MICHAEL, ST., AND GEORGE, ST.
This order of knighthood, founded for the Ionian
Isles and Malta, 27 April, 1818, was reorganised in
March, 1860, in order to admit persons of the

crown connected with the colonies. Among the first of the new knights were the earl of Derby, earl Russell, and earl Grey. See *Knights*.

MICHAELMAS, 29 Sept., the feast of St Michael, the reputed guardian of the Roman Catholic church, under the title of "St Michael and All Angels." Instituted, according to Butler, 487.

The custom of eating goose at Michaelmas has been erroneously attributed to Queen Elizabeth's eating of the bird at dinner on 29 Sept. 1588 at the house of Sir Neville Umfreville at the time she heard of the destruction of the Spanish Armada. The custom is of much older date and is observed on the continent. *Calendaria*.

MICHAEL'S MOUNT, Str. (Corwall), is considered by some to be the Iktis of Diodorus Siculus, and an ancient resort of the tin merchants. St Michael was said to have appeared on the mount, 495 or 710, and the place, thus reputed holy, became the seat of a body of monks, who received a charter from Edward the Confessor, 1044, and many privileges from pope Gregory VII, 1079.

MICHIGAN, a north-west state of N America, admitted by the French, 1670, admitted into the union, 26 Jan. 1837. Capital, Lansing. Population, 1880, 1,636,937, 1890, 2,093,889.

About 500 persons perish and 1000 male horses by destructive forest fires on 3 Sept. 1891.

Great fire at Grandhaven 41 buildings destroyed about 1 Sept. 1889.

Explosion at Wears Farm child's dynamite factory at White Pigeon 16 men killed 3 Sept. 1891.

MICROBES, see *Germs*.

MICROMETER, an astronomical instrument used to measure any small distances and the minute objects in the heavens, such as the apparent diameters of the planets, &c. was invented by Wm Gascoigne, who was killed at the battle of Marston-moor, 2 July, 1644. It was improved by Huyghens about 1652. Sir Joseph Whitworth made a machine to measure the millionth of an inch, about 1858, the measurement of the $\frac{1}{10,000,000}$ of an inch is now common.

MICROPHONE (Greek, *mikros*, little, *phone*, sound), a name given by W. heatstone, in 1827, to an instrument for rendering weak sounds audible by means of solid rods. The name was also given to an arrangement invented (in Dec. 1877) by professor D. E. Hughes (an American, an inventor of the printing telegraph), and shown to the Royal Society, 9 May, 1878.

An electric current is established between two moderately conducting bodies (such as pieces of charcoal metallized by being plunged into heated nitric acid) resting slightly upon each other, mounted on a piece of thin wood. If the contact is so made that one of the bodies may be easily displaced minute sounds produced on the wood disturb the electric conductivity at the place of contact and may be heard by the help of the telephone. The sonorous and electric waves are thus rendered synchronous and become convertible. The treat of a few sounds like that of a large quadruped. See *Telephone*.

MICROPHITE, a microscopic plant, especially parasitic, some physiologists consider bacteria and bacilli to be microphytes, 1890.

MICROSCOPES, said to have been invented by Jansen, in Holland, about 1590, by Galileo, about 1610, by Fontana, in Italy, and by Drebbel, in Holland, about 1621. Those with double glasses were made at the period when the law of refraction was discovered, about 1624. Solar microscopes were invented by Dr

Hooke. In England great improvements were made in the microscope by Benjamin Martin (who invented and sold pocket microscope about 1740), by Henry Baker, F.R.S., about 1763, and still greater during the present century by Wollaston, Ross, Jackson, Varley, Hugh Powell, and others. *Diamond* microscopes were made by Andrew Pritchard in 1824, and the properties of "test objects" to prove the qualities of microscopes, discovered by him and Goring in 1824-40. A *binocular microscope* (i.e., for two eyes), was constructed by professor Raddell in 1851, and Wenham's important improvements were made known in 1861. Treatises on the microscope by J. Quekett (1848), by Dr W. B. Carpenter (1856 *et seq.*), by Dr Lionel Beale (1858 *et seq.*), and Griffith and Henfrey's "Micrographic Dictionary" (1856, 1875, and 1883), are valuable. The Microscopical Society of London was established 20 Dec. 1839, and the Quekett Microscopical Club, 1865. In 1865 Mr H. Sorby exhibited his *spectum microscope*, by which the millionth of a grain of blood was detected.

MICRO-TASIMETER a new instrument invented by Mr T. A. Edison, in which he has applied the principle of the carbon microphone to the measurement of infinitesimal pressure, announced July, 1878. He proposes to apply the principle to delicate barometers, thermometer, hygrometers, &c.

MIDDLESBROUGH, N. Riding of Yorkshire, on the Tees, a coal port and a chief seat of the iron manufacture, the first house erected by George Chapman, April, 1830. New dock, and literary and scientific institution opened, Oct. 1875. Mr Henry W. F. Bolckow and John Vaughan, heads of great iron-works (Mr Bolckow, the first master and M. F., died 18 June, 1878). The property of the Cleveland district which had greatly declined since 1874, began to revive in the autumn of 1879. At the jubilee celebration, 6 Oct. 1881, a bust of Mr. Bolckow was unveiled and one of Mr. Vaughan was unveiled 2 June, 1884. See under *Steel*. Population, 1861, 18,092, 1881, 55,934, 1891, 75,516. MIDDLESEX, the metropolitan county of England, was the west of the Trinobantes in the Roman province. Flavia Cassiarina, and the Middle-Sex, or Middle Saxons, in the kingdom of East-Sex, or Essex. Lionel Cranfield was created earl of Middlesex, 16 Sept. 1622 succeeded by his son, James, 1645-51. Lionel, 1651-74, when the title became extinct. Charles Sackville was made earl in 1675, and his son became duke of Dorset in 1720.

MIDDLESEX HOSPITAL, London, founded, 1745; incorporated, 1836; cancer ward endowed, 1791.

MIDIAN, now **ARE MADIAN**, N.W. Arabia; apocritically held by the descendants of Midian, a son of Abraham. Having enticed the Israelites to idolatry, they were severely chastised, 1452 B.C. They invaded Cushan about 1249 B.C., and were thoroughly defeated by Gideon.

Capt. Richard F. Burton explored the ruined cities of Midian in 1877, and found the remains of ancient mines, many relics, and gold. An expedition, equipped by the khedive of Egypt, and placed under his command, started from Suez, in Dec. 1877, and returned 30 April, 1878. He brought home 25 tons of geological specimens, specimens of silver and copper ore, many coins and other antiquities, and photographs of the remains of ruined cities, &c.

MIDLAND INSTITUTE, BIRMINGHAM, incorporated 1854.

MIDLAND RAILWAY STATION, St. Pancras, N. London, possessing the largest known roof in the world (245 feet 6 inches wide, and 698 feet long), was opened for traffic 1 Oct. 1868. The engineer was Mr. H. W. Barlow. The architect of the magnificent Gothic hotel was Sir G. Gilbert Scott.

MIDWIFERY. Women were the only practitioners among the Hebrews and Egyptians. Hippocrates, in Greece, 460 B.C., is styled the father of midwifery, as well as of physic. It advanced under Celsus, who flourished A.D. 37, and of Galen, who lived 131. In England midwifery became a science about the period of the institution of the college of physicians, 10 Hen. VII. 1518. Dr. Harvey engaged in the practice of it, about 1603; Astruc affirms that madame de la Vallière, mistress of Louis XIV., in 1663, employed Julian Clement, a surgeon, with great secrecy.

MILAN, Mediolanum, capital of the ancient Liguria, now Lombardy, is reputed to have been built by the Gauls, about 408 B.C. The cathedral termed *duomo* was built about 1385. Population 1890, 414,551.

MILBANK PENITENTIARY, Westminster. The very unhealthy site was purchased of the Marquis of Salisbury in 1799 for 12,000*l*. The building, a modification of Jeremy Bentham's Panopticon (*which see*), first received convicts 27 June, 1816.

In consequence of many deaths during a great epidemic the convicts were placed in Woolwich hulks, &c. On 16 June, 1843, a committee reported the penitentiary a failure. The system was abolished in parliament, and the building styled Milbank prison. The buildings ordered to be pulled down and site sold, 1848.

It was finally closed 6 Nov. 1850.

MILETUS, a Greek city of Ionia, Asia Minor, founded about 1043 B.C. The Milesians defended themselves successfully, 623-612 B.C. During the war with Persia it was taken, 494, but restored, 449. MILITARY or MARTIAL LAW is built on no settled principle, but is entirely arbitrary, and, in truth, no law, but sometimes indulged, rather than allowed, as law. See *Matthew Hale*. It has been several times proclaimed in parts of these kingdoms, and in 1798 was almost general in Ireland, where it was also proclaimed in 1803.

MILITIA, the standing national force of these realms, is traced to king Alfred, who made all his subjects soldiers, 872-901. See *Army Defence*.

MILLENNARY PETITION, presented to king James on his accession, 1603, on behalf of nearly a thousand Puritan ministers against the "human rites and ceremonies" of the church of England.

MILLS Moses forbade mill-stones to be taken in pawn, because it would be like taking a man's life to pledge. *Jam. xxi. 6*. The hand-mill was in use among the Britons previously to the conquest by the Romans. The Romans introduced the water-mill. Cotton mills moved by water were erected by Sir Richard Arkwright, at Cromford, Derbyshire. He died in 1792. See *Mechanics*. Mill-work exhibited at the Agricultural Hall, London, N. 10-15 May, 1881.

MILWAUKEE A town in Wisconsin, North America, founded 1835. The New Hall hotel was burnt 4 A.M. 10 Jan. 1883, when about 100 persons perished. George Schiller, lessee of the bar-room, arrested for arson about 17 Jan. 1883. Population, 1890, 204,486.

MINDEN (Prussia), BATTLE OF, 1 Aug. 1759, between the English Hessians, and Hanoverians (under prince Ferdinand of Brunswick), and the French (under marshal De Contades), who were beaten and driven to the ramparts of Minden. Lord George Sackville (afterwards Lord George Germain) who commanded the British and Hanoverian horse, for some disobedience of orders was tried by a court-martial on his return to England, found guilty, and dismissed, 22 April, 1760. He was afterwards restored to favour, and became secretary of state, 1776.

MINERALOGY, the science of minerals, is a branch of geology, see *Geology*, *Minerals*, and *Crystallography*. It was not much studied by the ancients. George Agricola in the 16th century made the first attempt to treat it scientifically.

The study of mineralogy was advanced by Becker, Krieger and Wackward in the 17th century. A British mineralogical society established in 1800. Henry Truett of Minnikrup appeared in 1802. Mineralogical society of Great Britain held first meeting in London, 3 Feb. 1876 and others since. Another society termed the *Mineralogical Society* for the face of a crystal. James D. Dana's *System of Mineralogy* 5th edition 1863.

MINES Strabo and Tacitus enumerate gold and silver as among the products of Britain. The earliest instance of a claim to a mine royal being enforced occurs 47 Hen. III. 1262. It related to mines containing gold, together with copper, in Devonshire. In Edward I's reign, according to Mr. Ruding, the mines in Ireland, which produced silver, were supposed to be so rich that the king directed a writ for working them to Robert de Ufford, lord justice, 1276. The lead mines of Cardiganshire, from which silver has ever since been extracted, were discovered by Sir Hugh Middleton in

* This militia act was consequent upon the then prevailing opinion of the necessity of strengthening our national defences against the possibility of French invasion. The act empowered her majesty to raise a force not exceeding 80,000 men of which number 50,000 were to be raised in 1852 and 30,000 in 1853. The quotas for each county or riding to be fixed by an order in council.

MINERVA. see *Purshon* and *Athena*

MINGRELIA. the ancient Colchis, mentioned
in the legend of "Jason, the Argonauts, and the
Golden Fleece." A province of Asiatic Russia,
prince Nicolas having ceded his rights to the Czar
in 1867. In 1887 the prince was spoken of as a
candidate for the Bulgarian throne.

MINTÉ RIFLE. invented at Vincennes, about
1833, by M. Minié (born 1810). From a common
soldier he raised himself to the rank of chef
d'escadron. His rifle, considered to surpass all
made previous to it, was adopted by the French,
and, with modifications, by the British, 1852.

MINIMIZERS. A name given to certain
writers who advocate the limitation of the sove-
reign power of the state as much as possible to the
protection of life and property, which is styled
by professor Huxley "administrative nihilism."
They include W. von Humboldt, J. S. Mill (in his
"*Essay on Liberty*"), and Mr. Herbert Spencer
(in his "*Political Institutions*"), 1882.

MINIMS (from *minimé*, the least), an order of
monks, founded by S. Francesco di Paolo (1416—
1507), in Calabria, received their name, as pro-
fessing themselves inferior to the Minorites (from
minor, less); see *Franciscans*. St. Francis died
in France in 1507; where he had established houses
of his order.

MINISTER OF WAR, see *War Minister*.

MINISTERS, see *Administrations*.

MINISTERS in Scotland: church patronage
was abolished in 1874.

MINNESINGERS, lyric German poets, of
the 12th and 13th centuries, who sang of love and
war to entertain knights and barons of the time.
The *Meistersingers*, their successors, an incorporated
fraternity in the 14th century, composed satirical
ballads for the amusement of the citizens and lower
classes. Hans Sachs, a shoemaker (1494-1576), a
poet of the reformation, was for a time their dean.
His works were published at Nuremberg, 1560.
"*Owleglass*" and "Reynard the Fox," are attri-
buted to the *Meistersingers*.

MINNESOTA, a western state of N. America,
was organised as a territory, 3 March, 1849, and
admitted into the union in 1857. On 17 Aug. 1862,
the Sioux Indians commenced a series of outrages
at Acton in Meser county, decimating the country
and massacring above 500 persons, of both sexes,
and of all ages. General Sibley beat the Indians
in two battles and rescued many captives. Thirty-
eight Indians were executed as assassins. Capital
St. Paul.

The great Tribune buildings at Minneapolis were
burnt, about 20 persons perished. 20 Nov. 1892

Tornado, much destruction and loss of life in St.
Paul and the neighbourhood; the *Sea-King*,
steamer, on lake P-e-k-in upset, about 200 persons
drowned, and many others in small boats; total
loss about 250. 13 July, 1890

Destructive tornado with loss of life 15, 16 June, 1892
Population, 1880, 730,771; 1890, 1,301,826.

MINORCA and MAJORCA, the Balearic
Isles (*which see*). Port Mahon in Minorca was
captured by lieutenant-general Stanhope and sir
John Leake in 1708, and was ceded to the British
by the treaty of Utrecht in 1713. It was retaken
by the Spanish and French in July, 1756, and
admiral Byng fell a victim to public indignation
for not relieving it; see *Byng*. It was restored to
the British at the peace in 1763; taken 5 Feb.
1782, again captured by the British under general
Stuart, without the loss of a man, 15 Nov. 1798;
given up at the peace of Amiens, 25 March, 1802.

MINORITIES. In the new reform bill,
passed 15 Aug. 1867, provision was made for the
representation of minorities in constituencies with
three members by limiting each elector to two votes.
It was introduced as an amendment by lord Cairns
in the lords, 30 July, and accepted by the commons,
Aug. 1867. The principle was adopted in a new
constitution by the state of Illinois, U.S., July,
1870. See *Proportional Representation*.

MINSTER, or **MONASTERIUM,** a place oc-
cupied by monks; see *Westminster* and *York*.

MINSTRELS, originally pipers appointed by
lords of manors to divert their copyholders while at
work, owed their origin to the gleu men or harpers
of the Saxons, and continued till about 1560. John
of Gaunt erected a court of minstrels at Tutbury in
1380. So late as the reign of Henry VIII. they
intruded without ceremony into all companies, even
at the houses of the nobility; but in Elizabeth's
reign they were adjudged rogues and vagabonds
(1597).

MINT. Athelstan enacted regulations for the
government of the mint about 928. There were
several provincial mints under the control of that
of London. Henry I. is said to have instituted a
mint at Winchester, 1125. Stow says the mint was
kept by Italians, the English being ignorant of
the art of coining, 7 Edw. I. 1278. The operators
were formed into a corporation by the charter of
king Edward III., in which condition it consisted
of the warden, master, comptroller, assay-master,

workers, coiners, and subordinates. The first entry of gold brought to the mint for coinage occurs in 18 Edw. III. 1343. Tin was coined by Charles II. 1684; and gun-metal and pewter by his successor James after his abdication. Sir Isaac Newton was warden, 1690-1727, during which time the debased coin was called in, and new issued at the loss of the government. Between 1806 and 1810, grants amounting to 262,000*l.* were made by parliament for the erection of the present mint, which was completed in 1810; it was injured by fire, 31 Oct. 1815. The new constitution of the mint, founded on the report of the hon. Wellesley Pole, took effect in 1817. Professor Thomas Graham, the master of the mint, died 16 Sept. 1869. By the Coinage Act, passed 4 April, 1870, the office was combined with that of the chancellor of the exchequer, the duties being transferred to the deputy-master (Sir C. W. Fremantle), K.C.B. 1 Jan. 1890. After reorganization, the work was resumed, 8 Dec. 1882. See *Coin*.

MINUET, a French dance, said to have been first danced by Louis XIV., 1653.

MINUS, see *Plus*.

MIRACLE PLAYS, see under *Drama*.

MIRIDITES, or **MIRDITES**, see *Turkey*, 1877.

MIRRORS. In ancient times mirrors were made of metal; those of the Jewish women of brass. Mirrors of silver were introduced by Praxiteles 4th century B.C. Mirrors or looking-glasses were made at Venice, a.D. 1300; and in England, at Lambeth, near London, in 1673. The improvements in manufacturing plate-glass, and that of very large size, have cheapened looking-glasses very much. Various methods of coating glass by a solution of silver, thus avoiding the use of mercury, so injurious to the health of the workmen, have been made known; by M. Politron in 1851; by M. Cinq in 1861, and by Liebig and others.

MISCHNA, see *Talmud*.

MISERERE (*Psalm li.*) sung at Rome in the "Tenebrae" service in Holy or Passion Week, in a peculiarly effective manner, to old music. One arrangement is by Costanzo Festa, dated 1517.

MISSAL, or **MASS BOOK**, the Romanist ritual compiled by pope Gelasius I. 492-6, revised by Gregory I. 590-604. Various missals were in use till the Roman missal was adopted by the council of Trent, 1545-63. The missal was superseded in England by the book of common prayer, 1549.

MISSIONARY BISHOPS, see under *Bishops*.

MISSIONS,* see *Mark xvi. 15*. Among the Romanists, the religious orders of St. Dominic, St.

* *Missions*, "a series of sermons, generally by a missionary, or special preacher, often followed by confessions and communions" (a species of revivalism), were authorised in the metropolis by the bishops of London, Winchester, and Rochester, held 1869 and since.

Francis, St. Augustin, &c., have missions to the Levant and to America. Maro Polo is said to have introduced missionaries into China, 1275. The Jesuits have missions to China (*which see*) and to most other parts of the world. Among the Protestants, an early undertaking of this kind was a Danish mission, planned by Frederick IV. in 1706. The Society for the Propagation of the Gospel in foreign parts was established 1701, and the Moravian Brethren encouraged missions about 1732. The London Missionary Society held their first meeting, 4 Nov. 1794. Most Christian sects now support missions. *British Contributions to Foreign Missions*; 1871, 855,742*l.*; 1877, 1,100,793*l.* (in 1871-7, 6,977,586*l.*)

Great congress of protestant missions in London; a large number of societies represented; the earl of Aberdeen president, 9-17 June, 1888.

Commander Allan Gardner, R.N., who left England in the *Orcin Queen* in Sept. 1850, on the Patagonian mission, with Mr Williams, surgeon, Mr. Maidment, catechist, and four others, died on Ficion Island, at the mouth of the Beagle Channel, to the south of Tierra del Fuego, having been starved to death, all his companions having previously perished, 6 Sept. 1851.

M. Schoffer, a missionary to Cochun-China, was publicly executed at Hong-Tay, by order of the grand mandarin, for preaching Christianity, such preaching being prohibited by the law of that country, 4 May, 1851.

MISSISSIPPI, a great river, N. America, explored by De Soto about 1541. Captain Glazier discovered its source, 1884. Its length is now said to be 2,060 miles. The Mississippi trade was begun in England, in Nov. 1716. Law's Mississippi scheme in France, commenced about the same period, exploded in 1720; at which time the nominal capital is said to have amounted to 100,000,000*l.* The ruin of thousands soon followed. See *Law's Bubble*.

Population, 1880, 1,731,397; 1890, 1,289,600. The great leak bridge at St. Louis opened, 4 July, 1874. By the explosion of the boiler of the *Corona* at Port Hudson on the Mississippi, 43 persons perished, 3 Oct. 1889.

The North American state, **MISSISSIPPI**, was settled in 1763; admitted as a state of the union, 1817; seceded from it by ordinance, 8 Jan. 1862; submitted, 1865. Capital, Jackson.

About 85,000 persons made homeless through floods in the lower Mississippi valley early in March, 1888.

The Mississippi valley suffers much by frequent inundations; one was very disastrous in March, April, 1890, when thousands of square miles were submerged, many towns isolated, and communications cut off. Louisiana suffered much in April following, 150,000 dollars voted by congress to relieve the sufferers.

Gretnada nearly destroyed by fire, 25 April, 1890.

The great catfish ver bridge over the river, 3 miles long, at Memphis, joining Tennessee and Arkansas, completed, cost, 600,000*l.*, announced

17 April, 1890. Destructive floods; about 250 lives lost about 13 April 1892; about 1,500 sq. miles covered near St. Louis; 11 million dollars estimated loss; great loss of life; floods abating, 25 May, ..

MISSOLOGHI, a town in Greece, taken from the Turks, 1 Nov. 1821, and heroically and successfully defended against the Turks by Maro Botzaris, Oct. 1822-27 Jan. 1823. It was taken 22 April, 1826, after a long siege. Hero Lord Byron died, 19 April, 1824. A statue of Byron was unveiled here, 6 Nov. 1887. It was surrendered to the Greeks in 1829.

MISSOURI, a south-western state in N. America, was settled in 1763, and admitted into the union, 10 Aug. 1821. It decided on neutrality in

the conflict of 1861, but was invaded by both the confederate and federal forces in June of that year, and became one of the seats of war. Capital, Jefferson city; population, 1880, 2,168,380; 1890, 2,679,184; see *United States*, 1861 *et seq.*—Great railway strike March, 1886. The university library, Columbia, burnt, 9 Jan. 1892.—For the MISSOURI COMPROMISE, see *Slavery in America*. The Missouri river is 3,047 miles long.

MITCHELSTOWN, Cork, see *Ireland*, 9 Sept. 1887.

MITHRIDATE, a medical preparation in the form of an electuary, supposed to be an antidote to poison and the oldest compound known, is said to have been invented by Mithridates, king of Pontus, about 70 B.C.

MITHRIDATIC WAR, caused by the massacre of 80,000 Romans, by Mithridates VI., king of Pontus, 88 B.C., and remarkable for its duration, its many sanguinary battles, and the cruelties of its commanders. Mithridates having taken the consul Aquilius, made him ride on an ass through a great part of Asia, crying out as he rode, "I am Aquilius, consul of the Romans." He is said to have killed him by causing melted gold to be poured down his throat, in derision of his avarice, 85 B.C. Mithridates was defeated by Pompey, 66 B.C.; and committed suicide, 63 B.C.

MITRAILLEUSE, or **MITRAILLEUR**, a machine-gun in which 37 or more large-bored rifles are combined with breech-action, by means of which a shower of bullets may be rapidly projected by one man. It was invented in Belgium, and adopted by the French emperor soon after the Franco-Austrian war in 1866, and was much used in the Franco-Prussian war in 1870. Its peculiar "dry, shrieking, terrible sound" was described in the bombardment of Saubruck, 2 Aug. 1870. Modifications of the mitrailleuse have been made by Montigny and others. The Foster mitrailleuse was tried and approved at Shoburness, 11 Aug. 1870.—It is mentioned in *Grant's Military Antiquities* (1801) that in England, in 1625, a patent was granted to William Drommond for a machine composed of a number of muskets joined together, by the help of which two soldiers can oppose a hundred, and named, on account of its effect, "thunder carriage," or more usually, "fire carriage." An English mitrailleuse, a modification of the American gatling, containing 50 cartridges, was tried at Woolwich, 18 Jan. 1872; fifty of them were ordered to be made by Armstrong.

MITRE. The cleft cap or mitre was worn by the Jewish high-priest, 1491 B.C. It had on it a golden plate inscribed "HOLINESS TO THE LORD." *Ezekiel* xxxix. 28. The most ancient mitre that has the nearest resemblance to the present one is that upon the seal of the bishop of Laon, in the 10th century. *Foedbreke*. Anciently the cardinals wore mitres, but at the council of Lyons, in 1245, they were directed to wear hats.

MITYLENE, or **LESBOS**, *Ægean Sea*. Near here the Greeks defeated and nearly destroyed the Turkish fleet, 7 Oct. 1824.

MNEMONICS, artificial memory, was introduced by Simonides the younger, 477 B.C. *Arund. Marston*. "Mnemonics" was published by John Willis in 1618; and the "Memoria Technica" of Dr. Grey first appeared in 1730. A system of mnemonics was announced in Germany in 1806-7.

MOABITES, descendants of Lot, a people living to the south-east of Judaea. They were frequently at war with the Israelites, and were subdued with divine help by Ehud about 1336, by David about 1040, and by Jehoshaphat, 895 B.C., but often harassed the Jews in the decay of their monarchy. The discovery of a stone with inscription in Phœnician characters, said to relate to Meha, king of Moab, referred to in 2 *Kings*, xii., was announced in Jan. 1870, and impressions were exhibited soon after, causing much discussion among orientalists, and its authenticity was doubted.

MÖCKERN (Prussia). Here the French army under Eugène Beauharnais were defeated by the Prussians under York, 5 April, 1813; and here Blücher defeated the French, 16 Oct. 1813.

MODELS. The first were figures of living persons, and Dibutades, the Corinthian, is the reputed inventor of those in clay. His daughter, being about to be separated from her lover, traced his profile by his shadow on the wall; her father filled up the outline with clay, which he afterwards baked, and thus produced a figure of the object of her affection, giving rise to an art till then unknown, about 985 B.C.

A beautiful model of the new town of Edinburgh, before the building began, was formed in wood.

A model was made of a bridge over the Neva, of uncommon strength as well as elegance, and of the mountains of Switzerland, by general Pflüger (1766-83).

M. Chevalin's model of Paris also was remarkable for its precision.

Fine models of Gibraltar, Quebec, and other fortified places, are deposited in the Rotunda at Woolwich. See *WARR* &c.

MODENA (formerly Mutina), capital of the late duchy in Central Italy; was governed by the house of Este, from 1288 till 1796, when the last male of that house, the reigning duke Herrules III., was expelled by the French. By the treaty of Campo Formio, the Modenese possessions were incorporated with the Cisalpine republic, 1797, and with the kingdom of Italy, 1805. The archduke Francis of Este, son of the archduke Ferdinand of Austria, and of Mary, the heiress of the last duke, was restored in 1814. Modena, in accordance with the voting by universal suffrage, was annexed to Sardinia on 18 March, 1860. Population of the city, 1881, 31,053; of the province, 1881, 279,254, 1889, 303,541.

GRAND DUKES

1814 Francis IV. An invasion of his states by Murat was defeated, 11 April, 1815. He was expelled by his subjects in 1821, but was restored by the Austrians.

1846 Francis V (born 11 June, 1819) succeeded 21 Jan. His subjects rose against him soon after the Italian war broke out, in April, 1859. He fled to Vienna, establishing a regency, 12 June; which was abolished, 23 June. Francis was appointed dictator, 27 July; a constituent assembly was immediately elected, which offered the duchy to the king of Sardinia, 15 Sept., who incorporated it with his dominions, 18 March, 1860. Francis died, 20 Nov. 1875.

MODERADOS. A political party in Spain, long headed by Ramon Maria Narvaez, duke of Valencia (who died 23 April, 1868), who opposed the Progressives headed by Espartero and Prim. The party was reformed by the favourers of Don Carlos, after his total defeat in 1876.

MODOC INDIANS (a few hundreds), dwelling in lands south of Oregon, were removed to other lands by the United States government. Not obtaining subsistence, they returned to their old possessions, and their able leader captain Jack de-

feated the troops sent to expel them, 17 Jan 1873. During negotiations for a peaceful settlement, they deceived the United States commissioners and set an ambush (11 April) and was ~~slain~~ general Gambel and about 40 others. Fighting took place 15, 16 April, and the Indians retreated to almost impenetrable positions. The troops were fired on and suffered much loss 27 April. The Indians were gradually surrounded. Jack and about twenty warriors held out desperately. Some surrendered, and he himself was captured, 1 June, tried, July, and executed 1 Oct 1873.

MOESIA (now Bosnia, Serbia, and Bulgaria), was finally subdued by Augustus 29 B.C. It was successfully invaded by the Goths, A.D. 250, who eventually settled here, *see Goths*

MOHAMMEDAN, *see* *Vahometaism*

MOHAMMERAH a Persian town near the Euphrates, captured after two hours' cannonading, by Sir James Outram, during the Persian war, 26 March, 1857. News of the peace arrived 4 April.

MOHILEV, or MOHLER (Bus 11) Here the Russian army, under prince Bagration, was signally defeated by the French under marshal Davoust, prince of Eckmühl, 23 July, 1812

MOHOCKS, ruffians, who went about London at night wounding and disfiguring the men, and rudely exposing and insulting the women. One hundred pounds were offered by royal proclamation in 1712, for apprehending any one of them. *Voit thou?* The rascals of the 18th century are noble as the Mohocks.

MOHURRUM, a Mohammedan festival in honour of the prophet, is observed at its celebration in Bombay, Feb 1874 the Muhammadans fiercely attacked the Parsees and were repelled by the military.

MOKANNA (H. am ben Allah) The veiled prophet founder of a sect in Khoreasan in the 12th century. He pretended to be an incarnation of God, and thereby veiled his face but really to conceal the loss of an eye. He rebelled against the caliph al-Muwahhid in for a time successful, but was subdued in 780, when he and the remains of his followers took poison. He is the subject of a poem by Ihsos Moore in *J. of the Book* 187.

MOLDAVIA, *see Danubian Principalities* 17

MOLINISTS a Roman Catholic sect, followers of Louis Molina, a Jesuit, born 1535. He maintained the reconcilability of the doctrines of predestination and free will, 1588.

MOLLY MAGUIRE, the name of a secret society in Ireland in 1843, and of another society (originally, Bucksbot, about 1853) in mining districts, United States (*which see*), 1877. It ceased about March, 1879.

MOLOKANI, a sect in West Russia, said to date from the 16th century, who maintain primitive Christian doctrines and practices well described by Mr D Mackenzie Wallace in his "Russia," published 1877.

MOLUCCAS, an archipelago in the Indian Ocean (the chief island, Amboyna), discovered by

the Portuguese, about 1511, and held by them so retly until the arrival of the Spaniards, who claimed them, till 1523, when Charles V yielded them to John III for a large sum of money. The Dutch conquered them in 1667, and have held them ever since — except from 1810 to 1814, when they were subject to the English.

MOLWITZ (in Prussian Silesia) Here the Prussians, commanded by Frederick II, obtained a great victory over the Imperialists, 10 April (O S 30 March), 1741

MOLYBDENUM, a whitish, brittle, almost infusible metal. Discovered in 1778, discovered molybdenum, a mineral hitherto confounded with graphite. H. W. M., 1782, prepared the metal from molybdenum, and in 1825 Berzelius described most of its chemical characters. *Gmelin*

MOVASA chief town of the British East Africa territories indicating prosperity reported, July, 1800. *See Africa (British East,*

MONACHISM (from the Greek *monos*, alone). Catholic writers refer to the prophet Elijah, and the Nazarenes mentioned in *Isaiah*, (ch. 40) as early examples of the first Christian asceticism. It is said to have originated from the Jewish sect of the Essenes, whose life was very austere, practicing celibacy. About the time of Constantine (306-37) numbers of these ascetics withdrew into the desert, and were called *hermits*, *monks* and *anchorites*,* of whom Paul, Anthony, and Paphnuty were most celebrated. Paphnuty the founder of the Stylites (or pillar saints, died 451). He is said to have lived on a pillar thirty years. St. Benedict the great reformer of western monachism, published his rules and established his monastery at Monte Cassin about 529. The Carthusians, Cistercians &c., are various kinds of Benedictines. In 964, by decree of King Edgar, all married priests were made clerics ordered to be replaced by monks. Religious orders expelled from France by decree, 29 March, 1804. Revived of their vows by the Pope 1881. See *Abbey*, and *Benedictines*.

MONACO a principality, N Italy, held by the Grimaldi family, Grimaldi since 908. By treaty of 2 Feb 1801, the prince ceded the communes of Roqueuse and Mentone the chief part of his domains to France, for 4,000,000 francs. The prince, Charles III, born 8 Dec 1818 succeeded his father Francis 20 June 1856 and 10 Sept 1859 was succeeded by Albert, born 13 Nov 1846. A commercial convention between the prince and France, signed 9 Nov 1865, was much discussed as tending towards the abolition of the French navigation laws. MONEY is mentioned as a medium of commerce in *Genesis* xxiii, 1860 B.C., when Abraham purchased a field as a sepulchre for Sarah. The coinage of money is ascribed to the Lydians. *Moneta* was the name given to their silver by the Romans, it having been coined in the temple of *Juno-Moneta* 209 B.C. Money was made of different metals and even of leather and other articles, both in ancient and modern times. It was made of pasteboard by the Hollanders, so late as 1574. The first medals struck were in platinum. See *Coin, Gold, Copper, Mint, Banks, &c*. For *Money Orders*, see *Post Office*

MORMONS (calling themselves the Church of Jesus Christ of the LATTER-DAY SAINTS). This sect derives its origin from Joseph Smith, called the Prophet, who announced in 1823, at Palmyra, New York, that he had had a vision of the angel Moroni. In 1827 he said that he found the book of Mormon, written on gold plates in Egyptian characters. This book is said to have been written about 1812, by a clergyman named Solomon Spaulding (or by Martin Harris, who died Sept. 1875), as a religious romance in imitation of the scripture style. It was translated and published in America in 1830, in England in 1831. It fell into the hands of Rigdon and Smith, who determined to palm it off as a new revelation. The Mormons command the payment of tithes, permit polygamy, encourage labour, and believe in their leaders working miracles. Missionaries are propagating these doctrines in Europe with more success than would be expected.

MORTMAIN ACTS (*mort main*, dead hand)

When the survey of all the land in England was made by William I, 1085-6, the whole was found to amount to 62215 knights' fees, of which the church then possessed 28,015, to which additions were afterwards made, till the 7th of Edward I, 1279 when the statute of mortmain was passed, from a fear that the estates of the church might grow too bulky By this act it was made unlawful to give any estates to the church without the king's leave, and this act, by a supplemental provision, was made to reach all lay-freemen, or corporations, in the 15th of Richard II, 1391 Mortmain being such a state of possession as makes property inalienable, it is said to be in a dead hand Several statutes have been passed on this subject, legacies by mortmain were especially restricted by the 9th Geo II, c 36 (1736) Law consolidated and amended 1888, 1891

MOSAIC WORK (the Roman *opus tessellatum*), of Asiatic origin, and is probably referred to in *Isaiah*, ch 16, about 519 B.C. It had attained to great excellence in Greece in the time of Alexander and his successors, when Sosos of Pergamus, the most renowned Mosiac artist of an ignity, flourished He acquired great fame by his accurate representation of an unwearied floor after a feast The Romans also excelled in Mosiac work, as evidenced by the innumerable specimens preserved Byzantine Mosiacs date from the 4th century after Christ The art was revived in Italy by Ist. Gualdi, Cimabue, and Giotto who designed Mosiacs, and introduced a higher style in the 13th century In the 16th century Titian and Veronese also designed subjects for this art The practice of copying paintings in Mosiacs came into vogue in the 17th century, and there is now a workshop in the Vatican where chemical science is employed in the production of colours, and where 20,000 different tints are kept In 1861, Dr Salvatori of Venice had established his manufacture of "Enamel-mosiacs," and in July, 1864, he fixed a large enamel Mosiac picture in one of the spandrels under the dome of St Paul's cathedral, London He has since executed commissions for the queen and other persons He died Feb 1890, aged 74

MOSQUITO COAST (Central America). The Indians inhabiting this coast were long under the protection of the British who held Belize and a group of islands in the bay of Honduras. The jealousy of the United States long existed on this subject. In April, 1859, the two governments agreed not "to occupy or fortify, or colonize or assume, or exercise any dominion over any part of Central America." In 1855 the United States charged the British government with an infraction of the treaty, on which the latter agreed to cede the disputed territory to the republic of Honduras, with some reservation. The matter was finally settled in 1859.

Urban authorities authorized to provide museums and gymnasia, by act passed 3 July, 1891.

MUSIC. "Jubal, the father of all such as handle the harp and the organ" (3875 A.C. *Gen.* iii. 21). The flute, and harmony, or concord in music, are said to have been invented by Hyagnis, 1506 B.C. *Arnold, Marbles*. Vocal choruses of men are first mentioned 556 B.C. *Dufresnoy*. See *Organ*, and other musical instruments. Prior to 1600, the chief music in England was *ma-sea*, ballads, and madrigals, but dramatic music was much cultivated from that time. About the end of James I.'s reign, a music professorship was founded in the university of Oxford by Dr. Wm. Hychin; and the year 1710 was distinguished by the arrival in England of George Frederick Handel. Mozart came to England in 1763; Joseph Haydn in 1791; and Carl Maria von Weber in 1825.

Dictionaries of Music, Rousseau's, published 1767; in "Encyclopédie Méthodique," 1791; Fétis, "Biographie Universelle des Musiciens," 1835-44, and 1860-65. The publication of the excellent "Dictionary of Music and Musicians," edited by Mr. (aft. Sir) George Grove, began Jan. 1878, was completed in . . . 1890

Monthly Musical Record published, 1871, 829.
 Musical Notes, see *Nov Grant*. The first six are said to have been invented by Guy Arleino, a Benedictine monk of Arezzo, about 1025. *Blair*. The notes at present used were perfected in 1338. Counterpoint was brought to perfection by Palestrina about 1555. Galfrido di Lodi read lectures on musical composition in the 15th century, and they effected great improvement in the science. The Italian style of composition was introduced into these countries about 1600.

The *Musical Firm* was settled in France in 1859. The middle A. to be 875 simple or 435 double vibrations in a second; but through error of measurement the fork made gave (A) 430 double vibrations (C, 527). At a meeting on the subject, held at the Society of Arts, on 23 Nov. 1860, the concert pitch of C was recommended to be 528 vibrations in a second; but the fork made by Mr. J. H. Giesharb gives 530½ vibrations. Mr. Huallah adopted 532 vibrations.

A lower pitch was adopted at concerts in London in Jan. 1869. 528 vibrations for C adopted for performances . . .

* Pythagoras (about 555 B.C.) maintained that the motions of the twelve spheres must produce delightful sounds, inaudible to mortal ears, which he called "the music of the spheres." St. Cecilia, said to have obtained an angel from the celestial regions by her melody, is termed the patroness of music. She died in the second century.

MUSKETS, see *Firearms*

MUSKETRY SCHOOLS at Hythe and Fleetwood were established in 1851 under major-general C. C. Hay. He resigned in 1867. The school at Fleetwood was closed the same year.

MUSLIN, a fine cotton cloth, so called, it is said, from having a downy nap on its surface, resembling moss (French, *moosier*): according to others, because it was first brought from Moussel, in India. Muslins were first worn in England in 1770. *Anderson*. By means of the *Mule* (*which see*), British much super-eeded India muslins.

MUTA (Syria). Here Mahomet and his followers defeated the Christians in his first conflict with them, 629.

MUTE. A prisoner is said to *stand mute*, when being arraigned for treason or felony, he either makes no answer, or answers foreign to the purpose. Until 1741, persons refusing to plead were subjected to torture by pressure.

Walter Calverly, esq. of Calverly in Yorkshire, having murdered two of his children, and stabbed his wife in a fit of jealousy, being arraigned for his crime at York assizes, stood mute, and was thereupon pressed to death in the castle, a large iron weight being placed upon his breast, 5 Aug. 1605. *below*.

Major Strangway suffered death in a similar manner at Newgate for the murder of his brother-in-law, Mr. Fussell, 1657.

Judgment was awarded against mutes, as if they were convicted or had confessed, by 12 Geo. III. 1772.

A man refusing to plead was condemned and executed at the Old Bailey on a charge of murder, 1778, and another on a charge of burglary at Wells, 1792.

An act passed by which the court is directed to enter a plea of "not guilty" when the prisoner will not plead, 1867.

MUTINA (now Modena), N. Italy. Here Mark Antony, after defeating the consul Pansa, was himself beaten with great loss by Hirtius the other consul, and fled to Gaul, 27 April, 43 B.C.

MUTINIES, BARRIERS. The mutiny throughout the fleet at Portsmouth for an advance of wages,

April, 1797. It subsided on a promise from the Admiralty, which not being quickly fulfilled, occasioned a second mutiny on board the *London* man-of-war; admiral Colpoys, and his captain, were put into confinement for ordering the marines to fire, whereby some lives were lost. The mutiny subsided 10 May, 1797, when an act was passed to raise the wages, and the king pardoned the mutineers.

Mutiny of the *Bounty*, 28 April, 1789, see *Bounty*.

Mutiny at the *Nore*, which blocked up the trade of the Thames, broke out on 27 May, 1797, and subsided 13 June, 1797, when the principal mutineers were put in irons, and several executed (including the ringleader, who had assumed the name of rear-admiral Richard Parker), 30 June, at Sheerness.

Mutiny of the *Danvers* frigate; the crew carried the ship into Bust harbour, 27 March, 1800.

Mutiny on board admiral Mitchell's fleet at Bantry Bay, Dec. 1801, and January following (see *Bantry Bay*).

Mutiny at Malta, began 4 April, 1807, and ended on the 12th, when the mutineers (chiefly Greeks and Corsicans) threw themselves up by setting fire to a large magazine, consisting of between 400 and 500 barrels of gunpowder.

Mutiny on the *Moorby Land*, bound from London to Singapore; John Lyons and six foreign sailors murdered the captain and others, 30 Sept. 1863; a sailor named Tiffin separated from the rest, gave information, and seven were tried and five executed, 14-22 Feb. 1864.

Mutiny on the *Jefferson* *Isiden*, U.S. schooner; two mates murdered, put down by the captain, 20 April; vessel arrived at Gravesend May; 2 men condemned at Boston, U.S., 1 Oct. 1875.

Mutiny on the *Leander*, British ship, bound for America, captain and two mates murdered by foreign seamen, 31 Oct. 1875. Van Hovdyck, steward, managed to get the vessel to the Isle of Rhé; 11 men seized and conveyed to London, tried, 4 convicted, 4 May; executed, 23 May, 1876.

Mutiny on the *Cassell*, Glasgow barque, capt. G. Best. 4 Jan., on way home from Valparaiso, captain and men killed; mutineers overboard by others, some killed; vessel brought to Queenstown, 13 May. Christos Baumbos sentenced to death 31 July; executed at Cork, 25 Aug. 1876. Giuseppe Pastorica executed at Cork, 25 Aug. 1879.

Mutiny in 19th Hussars, Carrigroh camp, Dublin; through discontent with officers on account of extra duty, 8 Sept.; 75 arrested. Court martial; sentenced to penal servitude, 2 for 5 years, 3 for 6 years, 1 for 7 years, 1 for 8 years, 14 Nov. 1877.

Mutiny on board the *Frank N. Taylor*, U.S. ship, 700 miles from St. Helena; two natives from Manila wound the captain, cause panic, kill six men, imprison others, set fire to the ship; overpowered; leap overboard 2-3 Jan.; the captain and crew in boats reach St. Helena 10 Jan. 1886.

For Indian Mutinies, see *Madras*, 1866, and *India*, 1857.

MUTINY ACT (1 & 2 Will. and Mary, c. 5), for the discipline, regulation, and payment of the army, &c., was passed 12 April, 1689, and has since been re-enacted annually.

A parliamentary commission reported in favour of consolidating and simplifying military law, by combining the mutiny act and articles of war in a new act to be passed annually, &c. July, 1888, called the *Army (Annual) Act*. See under *Army*, 1879 and 1882.

MYCALE (Ionia, Asia Minor), **BATTLE OF**, fought between the Greeks (under Leotyichides, the king of Sparta, and Xantippus the Athenian) and the Persians, 22 Sept. 479 B.C.; the day on which Mardonius was defeated and slain at Platea by Pausanias. The Persians (about 100,000 men), who had just returned from the unsuccessful expedition of Xerxes in Greece, were completely defeated, thousands of them slaughtered, and their camp burnt. The Greeks sailed back to Samos with an immense booty.

MYCENÆ, a division of the kingdom of Argive, in the Peloponnese. It stood about fifty

stadia from Argos, and flourished till the invasion of the Heraclids. Early history mythical.

Perseus removes from Argos and founds Mycenæ,

B.C. 1431, 1313 or 1283

Reign of Eurystheus 1289, 1274 or 1258

[Towards the close of his reign is placed the story of the labours surmounted by Hercules.]

Agamemnon assassinates Atreus. Agamemnon succeeds to the throne, becomes king of Mycenæ, Corinth, and perhaps of Argos.

He is chosen generalissimo of the Grecian forces going to the Trojan war about 1193

Agamemnon in the absence of Agamemnon lives in adultery with the queen Clytemnestra. On the return of the king this assassinates him, and Agamemnon mounts the throne.

Orsides son of Agamemnon, kills his mother and her paramour.

Orsides dies of the bite of a serpent.

The Athenians are expelled.

Invasion of the Heraclids and the conquerors divide the domain.

MYLÆ, a bay of Sicily, where the Romans, under their consul Duilius, gained their first naval victory over the Carthaginians, and took fifty of their ships, 260 B.C. Here also Agrippa defeated the fleet of Scipio Pompeius, 36 B.C.

MYOGRAPHION, an apparatus for determining the velocities of the nervous current invented by H. Helmholtz in 1850, and since improved by Du Bois Reymond and others.

MYSORE (b India), was made a flourishing kingdom by Hyder Ali, who dethroned the reigning sovereign in 1761, and by his son, Tipoo Sahib, who considerably harassed the English. Tipoo was chastised by them in 1792, and on 4 May, 1799, his capital, Seringapatam, was taken by assault, and himself slain. The English established a prince of the old royal family as maharajah of part of Mysore in 1799, being without an heir he was permitted to adopt a child of four years of age, in Aug 1867, who succeeded him at his death, 27 Mar 1868, and assumed the government in May, 1881. Tipoo's eldest surviving son, Ghulam Mahomet, a British pensioner, died at Calcutta, 11 Aug 1872. A new maharajah assumed the government about 13 Oct 1879. Population, in 1881, 4,186,168, in 1891, 4,859,760.

MYSTERIES, derived from the Greek *mysterion*, a mystery or revealed secret. The sacred

mysteries is a term applied to the doctrines of Christianity, called the "mystery of godliness," 1 Tim ii 16, as opposed to the "mystery of iniquity," 2 Thess ii 7. The Holy Eucharist is also termed the sacred mysteries. The *Profane* mysteries were the secret ceremonies performed by a select few in honour of some deity. From the Egyptian mysteries of Isis and Osiris sprang those of Bacchus and Ceres among the Greeks. The Eleusinian mysteries were introduced at Athens by Demetrius, 1356 B.C. — **MYSTERY PLAYS**, see *Drama*.

MYSTIOS, a name given to those theologians who, in addition to the obvious meaning of the Holy Scriptures, assert that there are interpretations to be discovered by means of an emanation of the Divine Wisdom, by which the soul is enlightened and purified, for which purpose they advocate seclusion for contemplation and asceticism.

Mysticism taught at Alexandria by Clement, Panteus, Origen and others who manifested Christianity and Platonism in the 3rd century.

Mysticism entered into the works of the pseudo Dionysius (the Mystic Theologian) 5th century.

Introduced into the West in empire, 6th century.

Renowned Mystical mystics, 11th century, John Tauler of Strasburg, who acted heroically during the plague.

12th century, the Black Death (1347-1351). Henry Suso (1295-1366). They aimed at a more spiritual religion than Romanism, but their followers were charged with nimble superstition, communism and man-trading private interests.

Jacob Boehme (1575-1622) the German mystic published his *Aurora* (an allegorical divine revelation) 1622, died 16 Nov 1624.

For modern mystics, see *Index* to *Heavenly Science*, 1815, *Journal*.

For modern mystics, see *Index* to *Heavenly Science*, 1815, *Journal*.

The chief Hindu gods are Brahma the creator, Vishnu, the preserver and Shiva the destroyer, but the latter have been many changes in the Hindu Pantheon.

NAAS.

NAAS (E. Ireland). Here a desperate engagement took place between a body of royal forces and the insurgent Irish, 24 May, 1798, during the rebellion. The latter were defeated with the loss of 300 killed and many wounded.

NABONASSAR, ERA OF, received its name from the prince of Babylon, under whose reign astronomical studies were much advanced in Chaldaea. The years contain 365 days each, without intercalation. The first day of the era was Wednesday (said, in mistake, to be Thursday, in *L'Art de Vérifier les Dates*), 26 Feb. 747 B.C.—396, Julian period. To find the Julian year on which the year of Nabonassar begins, subtract the year, if before Christ, from 748; if after Christ, add to it 747.

NACHOD (Bohemia). At this place the Prussians, under their crown prince, defeated the Austrians, after a severe conflict, 27 June, 1866. The Prussian Uhlans vanquished the Austrian cavalry.

NACOLEA (Phrygia). Near here the usurper Procopius was defeated, and soon afterwards slain by the emperor Valens, 366.

NAPELS (Switzerland). Here an Austrian army was defeated by a small body of Swiss, 1368.

NAGA HILLS MASSACRE, see *India*, 1875.

NAG'S HEAD STORY. Matthew Parker was consecrated archbishop of Canterbury at Lambeth, 17 Dec. 1559, by bi-john Barlow, Coverdale, Scory, and Hodgekins. For forty-five years after, the Romish writers asserted that Parker and others had been ordained in an abnormal fashion by Scory at the Nag's Head Tavern, Cheapside. This fiction was refuted by Burnet, and is rejected by Roman Catholic authorities, such as Lingard.

NAHUM, FESTIVAL OF. Nahum, the seventh of the twelve minor prophets, about 713 B.C.; the festival is kept by the Eastern church on 1 December.

NAINI TAL, see *Laudalips*, 18 Sept. 1880.

NAISSUS (Mœsia). The Goths were defeated near here with great slaughter by the emperor Claudius II., 269.

NAJARA or **NAYARETE** (N. Spain). At Logroño, near these places, Edward the Black Prince defeated Henry de Trastámara, and re-established Peter the Cruel on the throne of Castile, 3 April, 1367.

NAMES. Adam and Eve named their sons. *Gen.* iv. 25, 26. A Roman citizen had generally three names; *praenomen*, denoting the individual; *nomen*, the gens or clan; *cognomen*, the branch of the clan: sometimes he had the *agnomen* (e.g., Publius Cornelius Scipio Africanus). The popes change their names on their exaltation to the pontificate, "a custom introduced by pope Sergius, whose name till then was *Swine-smout*," 687. *Platina*. Onuphrius (followed by most of the modern authorities), refers it to John XII., 956; stating that it was done in imitation of SS. Peter and Paul, who were first called Simon and Saul. In France the name given at baptism was some-

times changed. The two sons of Henry II. of France were christened Alexander and Heroules; at their confirmation these names were changed to Henry and Francis. Monks and nuns, at their entrance into monasteries, assume new names. See *Surnames*. Miss Yonge's "History of Christian Names," published 1863 (new edition 1884). M. A. Lower's "Patronymica Britannica," 1860.

NAMUR, in Belgium, was made a county in 932; taken by the French, 1 July, 1692; by William of England, 4 Aug. 1695; ceded to the house of Austria by the peace of Utrecht, and garrisoned by the Dutch as a barrier town of the United Provinces in 1715. The city of Namur was ceded to Austria, 1713; taken by the French in 1746, but was restored in 1749. In 1782, the emperor Joseph expelled the Dutch garrison. In 1792 it was again taken by the French, who were compelled to evacuate it in 1793; regained 1794; delivered up to the allies, 1814, assigned to Belgium, 1831. It was a site of a severe conflict in June, 1815, between the Prussians and the French under Grouchy, when retreating after the battle of Waterloo. Population, 1893, 29,794.

NANCY (N.E. France), an ancient city, capital of Lorraine, in the 13th century. After taking Nancy, 29 Nov. 1475, and losing it, 5 Oct. 1476, Charles the Bold of Burgundy was defeated beneath its walls, and slain by the duke of Lorraine and the Swiss, 5 Jan. 1477, see *Lorraine*. Nancy was embellished by Stanislas, ex-king of Poland, who resided and died here Feb. 1766. It was captured by Blücher, Jan. 1814, and on the retreat of MacMahon's army, and expecting the German army, surrendered to four Uhlans, 12 Aug. 1870. It was restored at the peace.

Grand fêtes: 14th of president Carnot and the grand duke Constantine of Russia, 5-7 June, 1892.

NANKIN, said to have been made the central capital of China, 420. It was the court of the Ming dynasty from 1369 till Yung-lo removed it to Peking in 1410. On 4 Aug. 1842, the British ships arrived at Nankin, and peace was made. The rebel Tae-pings took it on 19, 20 March, 1853. It was recaptured by the Imperialists, 19 July, 1864, and found to be in a very desolate condition. Estimated population, 1,000,000.

NANTES (W. France), formerly capital of the Nannetes. The edict in favour of the Protestants issued here by Henry IV., 13 April, 1598, was revoked by Louis XIV., 22 Oct. 1685 (bi-centenary celebration, 22 Oct. 1885). Awful cruelties were committed here by the republican Carrier, Oct.-Nov. 1793; see *Drowning*. Population in 1886, 127,482; 1891, 121,054.

NAPHTHA, a clear combustible rock oil, known to the Greeks, called "oil of Media," and thought to have been an ingredient in the Greek fire (which see).

NAPIER'S BONES, see *Logarithms*.

NAPLES, formerly the continental division and seat of government of the kingdom of the Two Sicilies, began with a Greek colony named Parthenope (about 1000 B.C.), which was afterwards

divided into Palæopolis (the *old*) and Neapolis (the *new city*), from the latter the present name is derived. The colony was conquered by the Romans in the Samnite war, 326 B.C. Naples, after resisting the power of the Lombards, Franks, and Germans, was subjugated by the Normans under Roger Guiscard, king of Sicily, A.D. 1131. Few countries have had so many political changes, and cruel and despotic rulers, or suffered so much by convulsions of nature, such as earthquakes, volcanic eruptions, &c. The eldest son of the king of Italy is styled prince of Naples. In 1856, the population of the kingdom of Naples was 6,886,030, of Sicily 2,231,020, total, 9,117,050. It now forms part of the revived kingdom of Italy. Population of the province in 1889, 1,060,032 of the city in 1890, 530,872.

NARBONNE (S E France), the Roman
 Narbo Martius founded 118 B.C., made capital of a
 Visigothic kingdom, 462, captured by the Saracens,
 720, re-taken by Pepin le Bref, 759. Gaston de
 Foix, the last Viscount (killed at Ravenna, 11 April,
 1512), resigned it to the king in exchange for the
 duchy of Nemours. Many councils held here, 589-
 1374.

 to be an innocuous anesthetic. June 1890.

NARVA (Esthonia, Russia). Here Peter the
 Great of Russia was totally defeated by Charles XII
 of Sweden, then in his nineteenth year, 30 Nov
 1700. The army of Peter is said to have amounted
 to 60,000, some Swedes affirm 100,000 men, while
 the Swedes were about 20,000. Charles attacked
 the enemy in his intrenchments, and slew 18,000,
 30,000 surrendered. He had several horses shot
 under him. He said, "These people seem dis-
 posed to give me victory." Narva was taken by
 Peter in 1704.

NASEBY (Northamptonshire), the site of a
 decisive victory over Charles I by the parliament
 army under Fairfax and Cromwell. The main
 body of the royal army was commanded by Lord
 Ashley, prince Rupert led the right wing, Sir Mar-
 shallham Langdale the left, and the king himself
 headed the body of reserve. The king fled, losing
 his cannon, baggage, and nearly 5000 prisoners,
 14 June, 1645.

NASHVILLE (Tennessee, N America) was
 occupied by the confederates in 1861, and taken
 by the federals, 23 Feb 1862. Near here the con-
 federates under Hood were defeated by the federals
 under Thomas, 14-16 Dec 1864. Population, 1890,
 76,168.

NASSAU, a German duchy, made a county by
 the emperor Frederic I about 1180, for Wolfram,
 a descendant of Conrad I of Germany, from whom
 are descended the royal house of Orange now
 reigning in Holland (see *Orange*, and *Holland*),
 and the present duke of Nassau. Wiesbaden was
 made the capital in 1339. On 25 April, 1900, the
 Nassau chamber strongly opposed the conclusion of
 a concordat with the pope, and claimed liberty of
 faith and conscience. The duke adopted the Aus-
 trian motion at the German diet, 14 June, and after
 the war the duchy was annexed to Prussia by decree,
 20 Sept., and possession taken, 8 Oct 1866. Popu-

NATIONAL ASSEMBLY, FRANCE.

Upon the proposition of the abbé Sieyès, the states-general of France constituted themselves the National Assembly, 17 June, 1789. On the 20th the hall of this new assembly was shut by order of the king; upon which the deputies of the *Tiers Etat* repaired to the *Jeu de Paume*, or Tennis-court, and swore not to dissolve until they had digested a constitution for France. On the 22nd they met at the church at St. Louis. This assembly abolished the state religion, annulled monastic vows, divided France in 8 departments, sold the national domains, established a national bank, issued assignats, and dissolved itself 21 Sept. 1792; see *National Convention*. In 1848 the legislature was again termed the National Assembly. It met 4 May, and a new constitution was proclaimed, 12 Nov. A new constitution was once more proclaimed by Louis Napoleon in Jan. 1852, after dissolving the National Assembly, 2 Dec. 1851. The present French National Assembly was elected 8 Feb., and met 12 Feb. 1871; new constitution adopted, 25 Feb. 1875; see *France*.

NATIONAL ASSEMBLY, GERMAN, see *Germany*, 1848

NATIONAL ASSOCIATIONS. One was formed in 1564, headed by the earl of Leicester, to protect queen Elizabeth from assassination, in consequence of the discovery of various plots. Another was proposed in the house of commons, in Feb. 1696, by sir Rowland Gwyn, for the defence of the person and government of William III. soon after the discovery of the assassination plot (*which see*). The members of both houses of parliament, and the majority of the male population, joined it immediately; all persons holding office under government were required to be members, see *Ad to Sick and Wounded, Artillery, Artists, Colonies, Employers, Farmers, Military Service, and Volunteers* for other national associations.

NATIONAL BENEVOLENT INSTITUTION, established 1812, incorporated 1859. Pensions are granted to decayed gentry, and to professional people, teachers, and others in reduced circumstances.

NATIONAL CONVENTION OF FRANCE, constituted in the hall of the Tuileries 17 Sept. and formally opened 21 Sept. 1792, when M. Grégoire, at the head of the National Assembly, announced that that assembly had ceased its functions. It was then decreed, "That the citizens named by the French people to form the National Convention, being met to the number of 371, after having verified their powers, declare that the National Convention is constituted." This convention continued until a new constitution was organized, and the Executive Directory was installed at the Little Luxembourg, 1 Nov. 1795; see *Directory*. The Chartists (*which see*) in England formed a National Convention in 1839.

NATIONAL DEBT. The first mention of parliamentary security for a debt of the nation occurs in the reign of Henry VI. The present national debt may be said to have commenced in the reign of William III., 1689. It amounted, in 1697, to about five millions sterling, and was then thought to be of alarming magnitude. The sole cause of the increase has been war. By an act passed 31 May, 1867, the conversion of 24,000,000*l.* of the debt into terminable annuities was provided for. The law is consolidated by the national debt act, passed 9 Aug. 1870; amended by acts passed 1875, 1882, 1884, 1886 and 1887. By the

national debt act, passed Aug. 1863, 70,241,908*l.* were immediately converted, and 173,300,000*l.* would be cancelled in 20 years. See *Sinking Fund*, and *Local Loans*.

NATIONAL GALLERY, LONDON, began with the purchase, by the British government, of the Angerstein collection of 38 pictures, for 57,000*l.* in 1824. The first exhibition of them took place in Pall-mall, on 10 May, 1824. Sir G. Beaumont (1826), Mr. Holwell Carr (1831), and many other gentlemen, as well as the British Institution, contributed many fine pictures; and the collection has been since greatly augmented by gifts and purchases. The present edifice in Trafalgar-square, designed by Mr. Wilkins, was completed and

opened 9 April, 1838. In July, 1857, a commission appointed to consider the propriety of removing the pictures reported in favour of their remaining in their present locality; and in 1860, 15,000*l.* were voted to be expended in adapting the central part of the building to exhibition purposes. On 11 May, 1861, the National Gallery was reopened after having been closed eight months, during which time great improvements were made in the internal arrangements. On 19 June, 1865, the house of commons voted 20,000*l.* to buy land to enlarge the building, and an act for this purpose was passed 15 July, 1866. Visitors in 1866, 775,901; in 1871, 911,638; in 1883, 849,604; sum voted for year 1867-8, 15,895*l.*, for 1876, 20,098*l.* Legacy from Francis Wm. Mr. Wm. Ellis (a silk merchant, born July, 1730, died 27 Nov. 1875) bequeathed about 800 pictures to the National Gallery on certain conditions. Re-opened; new galleries erected by E. Barry. Pictures re-arranged, Aug. 1876.

About 1030 oil paintings in the gallery. March, 1882 Mr. Henry Tate presents 57 modern pictures (value nearly 50,000*l.*) announced 5 March; declined by the government for want of space, he proposes the establishment of a National gallery especially for British Art, 17 June, 1880.

The government proposes placing his pictures in galleries at South Kensington 26 June, 1880.

Three of the earl of Radnor's pictures (purchased for the gallery for 55,000*l.* (Holbein's "Ambassador," and two portraits by Velasquez and Murillo) re-opened July, 1890. [The government gave 25,000*l.* for the Rothchild, sir Edward Guinness (since lord Iveagh) and Mr. Charles Colley, each 10,000*l.*]

Mr. William Agnew offers to present 10,000*l.* towards the erection of a special National gallery of British art, near Kensington palace, 21 July, 1890.

An anonymous donor (Mr. Henry Tate) through Mr. (Harold) Ward, offers to the government 8,000*l.* for the erection of a National gallery of British Art, 12 March, accepted by Mr. Goschen, 29 March, 1891. Mr. Tate, not approving of the site proposed by the government, withdraws his offer, 3 March, 1892.

NATIONAL GUARD OF FRANCE was instituted by the Committee of Safety at Paris on 13 July, 1789 (the day before the destruction of the Bastille), to maintain order and defend the public liberty. Its first colours were blue and red, to which white was added, when its formation was approved by the king. Its action was soon paralysed by the revolution, and it ceased altogether under the consulate and empire. It was revived by Napoleon in 1814, and maintained by Louis XVIII., but was broken up by Charles X., after a tumultuous review in 1827. It was revived in 1830, and helped to place Louis Philippe on the throne. In 1848 its reconstitution and its enlargement from 80,000 to 100,000 men led to the frightful conflict of June, 1848. Its constitution was entirely changed in Jan. 1852, when it was subjected entirely to the control of the government. Formerly it had many privileges, such as choosing its own officers, &c. In consequence of the defection of part of the National Guard and the incompetency of the rest

during the outbreak in Paris in 1871, its gradual abolition was decreed by the national assembly at Versailles (488-154), 24 Aug. 1871. The peaceful disarmament began in September. National Guards have been established in Spain, Naples, and other countries, during the present century.

NATIONALITY; a word much used since 1848. In Poland, Hungary, Italy, and Germany, the struggle for nationality has been long and severe. In 1866 agitation for this principle began in Bohemia, Slavonia, and other parts of the Austrian empire. The nationality of Ireland is the alleged basis of the Fenian agitation; see *Ireland*, 1870, and *Home Government*.

NATIONAL PORTRAIT GALLERY was determined on in Feb. 1857, in pursuance of votes from both houses of parliament. The sum of 20,000*l.* was appropriated for the purchase of portraits of persons eminent in British history. Donations are received under certain restrictions. The gallery, Gt. George-street, Westminster, was opened 15 Jan. 1859. Director, &c., George Scharf, c.b. The collection was removed to South Kensington Dec. 1869, and re-opened 28 March, 1870. The pictures removed to Bethnal Green museum for safety after the fire at the Indian museum, June, 1885. A valuable collection of National Portraits appeared at the Manchester Exhibition in 1857.

The marquis of Salisbury at the Royal Academy dinner, stated that the government had received an anonymous offer to erect a building for the National Portrait Gallery, if a site were provided, 4 May, 1880.

NATIVITY. There are three festivals in the Roman and Greek churches, under this name. The Nativity of Christ, also observed by the Protestants, on 25 Dec. (see *Christmas*); the Nativity of the Virgin Mary, not observed by the Protestants at all. Pope Sixtus I., about 690, established the latter, but it was not generally received in France and Germany till about 1000; nor by the eastern Christians till the 13th century. The festival of the nativity of St. John the Baptist, 24 June, Midsummer-day, is said to have been instituted in 488.

NATURAL HISTORY was studied by Solomon, 1014 B.C. (1 *Kings* iv. 33); Aristotle (384-322 B.C.); by Theophrastus (304-297 B.C.); and by Pliny (23-79 A.D.); see *Botany*, *Zoology*, &c.

NATURAL PHILOSOPHY, see *Philosophy*.

NATURAL SELECTION, see *Species*.

NATURALISATION is defined to be "the making a foreigner or alien a citizen or free man of any kingdom or city, and so becoming, as it were, both a subject and a native of a king or country that by nature he did not belong to." The first act of naturalisation passed in 1437, and various similar enactments were made in most of the reigns from that time, several of them special acts relating to individuals. An act for the naturalisation of the Jews passed May, 1753, but was repealed in 1754, on the petition of all the cities in England, see *Jews*, for the privilege since granted them the act for the naturalisation of prince Albert passed 3 Vict. 7 Feb 1840. A committee to inquire into the naturalisation laws, appointed May, 1868, earl of Clarendon chairman, met 25 Oct 1868, reported about Feb 1869, and new acts for this purpose were passed 12 May, 1870, and 25 July, 1872. In 1870 there were about 9500 Americans in England, and about 2,000,000 British subjects in the United States of America. By the new act the latter were enabled to renounce their allegiance, and by the convention signed 3 Feb 1871, the nationality of British subjects was made dependent on choice and not on birth.

NATURALISM a realistic style in literature, mainly introduced by Balzac, 1829, cf *sup*.
Edmond and Jules G. Courmont published 'Medical and Physiological Novels' 1846, cf
Emile Zola in his 'Romaine Maupassant' series 1871, cf *sup*, partly defined and developed rather than true naturalism. A dramatic film titled 'A monologue' titled 'Drink' was much performed in London in 1870.

NATURE, a weekly illustrated journal of science first appeared 4 Nov 1869, editor, Mr Joseph Norman Lockyer, F R S
The French publication *la Nature* appeared in 1871

NATURE PRINTING.—This process consists in impressing objects, such as plants, moose, feathers, &c., into plates of metal, causing these objects, as it were, to engrave themselves, and afterwards taking casts or copies fit for printing from Knapp's of Erfurt, between 1728 and 1757, produced his *Herbarium in lignis* by pressing the plants themselves (previously inked) on paper, the impressions being afterwards coloured by hand. In 1832, Peter Kny of Copenhagen made use of etched rollers and lead plates. In 1842 Mr Taylor printed lilies. In 1847 Mr Fawcett printed fern grasses and plants, and in the same year Dr Branson suggested the application of electricity to the impressions. In 1849, puff-blow, J. J. d'ol, of Vicenza, by the able assistance of Mr Andrew Worrall obtained impressions of spores and ferns. The first practical application of this process was by von Heuser's work on the *Mosses of Urvach*, in *Urvach-sylvium*, the second (*the first in this country*) in "The Ferns of Great Britain and Ireland," edited by Dr Lindley, the illustrations to which were prepared under the superintendence of Mr Henry Brabner in 1855-56, who also in 1856 G. printed "The British sea-weeds," edited by W. G. Johnston and Alex. Crum. The process was applied to butterflies by Joseph Merrim of Gloucester, in 1864.

NAVARINO (S. W. Greece), settled by the Arabs 6th century, taken by the Turks, 1500; by Venetians, 1686; by Turks, 1718; by Greeks, 1821, by Turks, 1825. Near here, on 20 Oct. 1827, the combined fleets of England, France, and Russia, under command of admiral Codrington, nearly destroyed the Turkish and Egyptian fleet. More than thirty ships, many of them four-deckers, were blown up or burnt, shelled by the Turks themselves, to prevent their falling into the hands of their enemies. This destruction of the Turkish naval power was characterised by the duke of Wellington as an "untoward event." The port is also called *Navrine*.

NAVARRÉ, now a province of Spain, formed a part of the Roman dominions, and was conquered from the Saracens by Charlemagne, 778. His descendants appointed governors, one of whom, Garcia Ramirez, took the title of king in 857. In 1076, king Sancho IV. was poisoned, and Sancho Ramirez of Aragon seized Navarre. In 1134, Navarre became again independent under Garcia Ramirez IV. In 1234, Thibault, count of Champagne, nephew of Sancho VII., became sovereign of Navarre; and in 1254, by the marriage of the heiress Jane with Philip IV. le Bel, Navarre was united to France.

SOVEREIGNS OF NAVARRÉ.

- 1274 Jane I. and (1284) Philip le Bel of France.
- 1305 Louis X. Ruffin of France
- 1316 Philip V. the Long, of France
- 1328 Charles I. the Fair, IV. of France
- 1328 Jane II. (daughter of Jane I.), and her husband Philip d'Evreux
- 1349 Charles II. the Bad.
- 1359 Charles III., the Noble.
- 1425 Blanche, his daughter, and her husband, John of Aragon.
- 1441 John II., alone, who became king of Aragon, in 1458. He endeavoured to obtain the crown of Castile also.
- 1479 Isabella de Foix, his daughter.
- Francis Planchon de Foix, her son.
- 1495 Catherine (his widow) and her husband John d'Albret. Ferdinand of Aragon conquered and annexed all Navarre south of the Pyrenees, 1512.

LOWER NAVARRÉ (in France).

- 1526 Henry d'Albret.
- 1535 Jane d'Albret, and her husband, Anthony de Bourbon, who died 1562
- 1572 Henry III. who became in 1589 king of France, to which Lower Navarre was formally united in 1609.

NAVIES, see *Fleets*.

NAVIGATION began with the Egyptians and Phœnicians. The first laws of navigation originated with the Rhodians. The first account we have of any considerable voyage is that of the Phœnicians sailing round Africa.

NAVIGATION LAWS. A code of maritime laws is attributed to Richard I. of England, said to have been decreed at the Isle of Oleron, 1194, and further enactments were made by Richard II. in 1381.—In Oct. 1657, the parliament passed an act entitled "Goods from foreign parts, by whom to be imported," the principles of which were affirmed by 12 Charles II. c. 18, "an act for the encouraging and increasing of shipping and navigation" (1660). The latter act restricts the importation and exportation of goods from or to Asia, Africa, or America, to English ships, of which the masters and three-fourths of the mariners are to be English. This was followed by many acts of similar tenor; which were consolidated by 3 & 4 Will. IV. c. 54 (1833). These acts were in the whole or in part repealed by the act "to amend the laws in force for the encouragement of British shipping and navigation" (passed 12 & 13 Vict. c. 29, 26 June, 1849, after much opposition), and which came into operation 1 Jan. 1850. The steam navigation act passed 14 & 15 Vict. c. 79, 1851, came into operation 1 Jan. 1852. The act regulating the navigation of the river Thames was passed in 1786.—In Feb. 1865 the emperor recommended the modification of the French navigation laws; in Feb. 1872, new restrictions were laid upon foreign ships, chiefly affecting British.

NAVIGATORS (or Naviges). These helpers in the construction of railways probably derived their name (about 1830) from formerly making the inland navigation in Lancashire, &c., and are doubtfully said to be descendants of the original Dutch canal labourers. Navy Mission Society (new) met at Lambeth palace, 7 May, 1880. A "steam navy" suitable for working in sand, gravel, or heavy clay, made by Messrs. Raston, Proctor, & Co., of Lincoln, 1878.

H.M.S. *Vanguard*, double-screw iron-clad (cost £50,000), sunk by collision with the *Iron Duke* during a fog off the Winklow coast; crew (about 400) saved; 50 m. past noon 1 Sept.

Court-martial on capt. Dawkins, assigned as cause:

1. That the squadron (under admiral Trelatou) of which the *Vanguard* was one, was going at too great a speed for a fog; 2. That captain Dawkins had left the deck before an ordered evolution was performed; 3. That the speed of the *Vanguard* had been injudiciously reduced; 4, 5, 6. The increased speed of the *Iron Duke*, her improper navigation, and want of signals; captain Dawkins reprimanded and dismissed; others reprimanded, 20 Sept.

The *Admiralty Minute* considered the speed of the squadron no cause of the accident; censured part of admiral Trelatou's evidence on responsibility of officers; and removed lieutenant Evans of the *Iron Duke* from his command.

NAVAL SALUTE. THE BRITISH FLAG began in Alfred's reign, and though sometimes disputed, may be said to have been continued ever since. The Dutch agreed to strike to the English colours in the British seas, in 1673. The honour of the flag salute at sea was also formally asserted to by France in 1704, although it had been long previously exacted by England, see *Flag and Salute at Sea*.

NAVAL UNIFORMS. The first notice of the establishment of a uniform in the British naval service, which we have met with, occurs in the *Quarterly Review* of 5 March, 1748, under the head of "Domestic News," in these terms:—"An order is said to be issued, requiring all his majesty's sea-officers, from the admiral down to the midshipman, to wear a uniformity of clothing, for which purpose pattern coats for dress suits and frocks for each rank of officers are lodged at the Navy-office, and at the several dockyards for their inspection." This is corroborated by the *Gazette* of 23 July, 1757, when the first alteration in the uniform took place, and in which a reference is made to the order of 1748, alluded to in the journal above mentioned, and which in fact is the year when a naval uniform was first established. James I. had indeed granted, by warrant of 6 April, 1609, to six of his principal masters of the navy, "liveries coats of fine red cloth." The warrant is stated to have been drawn *verbatim* from one signed by queen Elizabeth, but which had not been acted upon by reason of her death. This curious document is in the British Museum, but king James's limited red livery is supposed to have been soon discontinued.—*Quarterly Review*.

NAVY PAY OFFICER, organised in 1644, was abolished in 1856, when the army and navy pay departments were consolidated in the *Paymaster General's Office*.

NAVY LAW was first officially compiled by John Finlaison, the celebrated actuary, and published monthly in 1814; now quarterly.

NAVAL REVIEWS. The queen reviewed the fleet at Spithead, near Portsmouth, 11 Aug. 1855, again, March, 1856, before it sailed to the Baltic, at the commencement of the Russian war; and again, at Portsmouth, on the conclusion of peace, in the presence of the parliament, &c. The fleet consisted of an unbroken line of 5 miles, and consisted of upwards of 300 men-of-war, carrying 3500 guns, and manned by 40,000 seamen. There were about 200000 spectators, 23 April, 1856.
 A grand naval review (15 great wooden ships, 15 iron-plate, 25 gun-vessels and boats) was held at Spithead this year, the autumn, and the victory of Egypt pre-

sented, 17 July, 1867; another at Spithead before the abdication of Parma, 23 June, 1859; another at Spithead by the queen, (10 broadside ships, 8 turret ships, &c.), 3 Aug. 1878; another at Portsmouth, the queen and colonial visitors present (at the expense of the officers), 23 July, 1886.

Grand unannounced naval review (Jubilee) by the queen at Spithead, 23 July, 1887; 135 vessels of all kinds, including 65 iron-clads, 20,000 officers and men; one man died through the bursting of a shelling gun.

NAVAL VOLUNTEERS (or Reserve). By 16 & 17 Vict. c. 73 (1853), the admiralty were empowered to raise a body of sea-faring men to be called the "Naval Coast Volunteers," no to exceed 10,000, for the defence of the coast, and for actual service if required. In 1859, 1874 were passed to enable the admiralty to raise a number of men, not exceeding 30,000, as a reserve force of seamen, to be called the "Royal Naval Volunteers." In November following, the admiralty issued a statement of the "qualifications, advantages, and obligations" of this reserve. The enrolment commenced on 1 Jan. 1860. The engagement is for five years, and the volunteers are entitled to a pension when incapacitated after the expiration of the term. At the prospect of war with the United States in Dec. 1861, a great number of seamen at Hartlepool, Dundee, London, Aberdeen, &c. offered their services. First enrolled body of Royal Naval Volunteers inspected, about 18 Jan. 1867.

NAVY OF FRANCE. It is first mentioned in history, 728, when, like that of England at an early period, it consisted of galleys; in this year the French defeated the Frisian fleet. The French fleet was almost annihilated by Edward III. at the battle of Sluys, 24 June, 1340. It was considerably improved under Louis XIV. at the instance of his minister Colbert, about 1697. The French navy was in its splendour about 1761; became greatly reduced in the wars with England; see *Naval Battles*. It was greatly increased by the emperor Napoleon III., and in 1859 consisted of 51 ships of the line (14 sailing vessels and 37 steamers), and 308 other vessels, in all 449; including vessels building, converting, or ordered to be built. The new French iron-clad frigate *Gloire*, constructed by M. Dupuy de Lôme, launched in 1860, was generally considered as successful. The *Solférino* and *Magenta* were launched in June, 1861; other iron vessels since. The *Magenta* was destroyed by fire, 6 killed, 31 Aug. 1875. The *Destruction*, a great iron-clad, launched at Lorient, 19 Aug. 1879. France had 22 battleships, 11 armoured vessels for coast defence, besides gun boats, cruisers and torpedo boats; in all 256 vessels in 1888. The Supreme Navy Council was created by decree, 6 Dec. 1889. See under *Fleets*.

NAZARENE, a name given to Jesus Christ, and his disciples; but afterwards to a sect who rejected the doctrine of Christ's divinity in the first century. A sect named Nazarenes, resembling the Society of Friends in Britain, became prominent in Hungary in the autumn of 1867.

NEAPOLIS, see *Naples*.

NEBRASKA, a N.W. territory of North America (part of Louisiana), was organised 30 May, 1854. Capital, Lincoln; Omaha city, very important. Bradshaw destroyed by a tornado, 3 June, 1860. Population, 1880, 452,400; 1890, 1,058,910.

NEBULAR HYPOTHESIS, put forth by sir Wm. Herschel, 1811, supposes that the universe was formed out of shapeless masses of nebulae or clusters of small stars. It has not been generally received. In Oct. 1860, Mr. Lassell strictly scrutinized the dumb-bell nebula, and stated that the brightest parts did not appear to be stars. In 1865, Mr. Wm. Huggins reported that he had

analysed certain nebulae by their spectra, and believed them to be entirely gaseous.

For Mr. Norman Lockyer's theory see under *Meteors*, 17 Nov. 1867.

NECROMANCERS, see *Magie*.

NECTARINE, the *Amygdalus Persica*, originally came from Persia about 1562. Previously, presents of nectarines were frequently sent to the court of England from the Netherlands; and Catherine, queen of Henry VIII., distributed them among her friends.

NEEDLES. "The making of Spanish needles was first taught in England by Elias Crowe, a German, about the eighth year of queen Elizabeth, and in queen Mary's time there was a negro made one Spanish needles in Chesapeake, but would never teach his art to any."—*Stowe*. The manufacture was greatly improved at Whitechapel, London; Redditch, in Gloucestershire, and Hathersage, in Derbyshire. An exhibition of ancient needlework was formed at South Kensington Museum in 1873.

NEEDLE-GUN (*Zündnadelgewehr*), a musket invented by J. N. Dreyse of Sommerda, about 1827, and made a breech-loader in 1836, which was adopted by the Prussian general Manteuffel about 1846. It was found to be a most effective weapon in the war with Denmark in 1864, and in that with Austria in 1866. The ignition of the charge is produced by a fine steel rod or needle being pressed through the cartridge. The principle is claimed for James Whitley, of Dublin, 1823; Abraham Moser, 1831; and John Hanson, of Huddersfield, 1843.

NEMEAN GAMES, celebrated at Nemea, in Achaia, said to have been instituted by the Argives, in honour of Archemorus, who died by the bite of a serpent; and revived by Hercules, who slew the Nemean lion. The conqueror was rewarded with a crown of olives, afterwards of green parsley. They were celebrated every third year, or, according to others, on the first and third year of every Olympiad.—*Herodotus*. They were revived by the emperor Julian, A.D. 362, but ceased in 396.

NEPAUL (N. India) was conquered by the Ghoorkas, 1768, who made treaties with the British, 1791 and 1801; but frequently made incursions; and in consequence war with them commenced 1 Nov. 1814; terminated 27 April, 1815. A treaty of peace was signed between the parties, 2 Dec. 1815. War was renewed through an infraction of the treaty by the Nepaules, Jan. 1816; and after several contests, unfavourable to the Nepaules, the former treaty was ratified, 15 March, 1816. An extraordinary embassy from the king of Nepal to the queen of Great Britain arrived in England, landing at Southampton, 25 May, and remained till Aug. 1850; it consisted of the Nepaules prince, Jung Bahadoor, and his suite, to whom many honours were paid. He supported the English during the Indian mutiny in 1857. The prince of Wales was honourably received in Nepal, 12 Feb. 1876.

NEPHALIA, sacrifices of sobriety among the Greeks, when they offered mead instead of wine to the sun and moon, to the nymphs, to Aurora, and to Venus; and burnt any wood but that of the vine, fig-tree, and mulberry-tree, esteemed symbols of drunkenness, 613 A.C.

NEPHOSCOPE (*nephos*, Greek, a cloud). An apparatus for measuring the velocity of clouds, invented by Karl Braun, and reported to the Academy of Sciences, Paris, 27 July, 1868.

NEPTUNE, a primary planet, first observed on 23 Sept. 1846, by Dr. Galle at Berlin, in consequence of a letter from M. Le Verrier, who had conjectured from the anomalous movements of Uranus that a distant planet might exist nearly in the position where Neptune is situated. Calculations to the same effect had been previously made by Mr. J. Couch Adams, of Cambridge; but unfortunate delays occurred in their publication, and also of professor Challin's consequent discovery of the planet. The Royal Society of London awarded its gold medal to both astronomers as equals in the theoretical discovery. A satellite of Neptune was discovered by Mr. Lassell on 10 Oct. following. Neptune is said to have been seen by Lalonde, and thought to be a fixed star. The Greek god Poseidon became the Roman Neptune. Prof. J. C. Adams died 21 Jan. 1892.

NEPTUNIUM, a new metal discovered in tantalite, from Connecticut, by R. Hermann in 1877; not generally admitted by chemists.

NERVES. Our knowledge of the nature and functions of the nervous system has been greatly

enlarged by the researches and experiments of physiologists during the present century. Sir Charles Bell announced his discovery of the distinction between the nerves of motion and sensation, 1810. He published papers on the nervous system, 1821. See *Chronology*.

NERVII, a warlike tribe in Belgic Gaul, were defeated in a severe battle by Julius Cæsar 57, and subdued 53 B.C.

NESSIT, see *Nisbet*.

NESTORIANS, the followers of Nestorius, bishop of Constantinople (428-431), who is represented as a heretic. He was opposed by Eutyches, see *Eutychians*.

1. He rejected the error of those who said Christ was a mere man, as Ebron, Paul of Samosata Photinus. 2. He maintained that the Word was united to the humanity in Christ Jesus, and that this union was most intimate and strict. 3. He held that these two natures made one Christ, one Son, one Person; only made up of two natures. 4. And thus one Person may have either divine or human properties attributed to Him.

Nestorian Christians in the Levant administer the sacrament with leavened bread and in both kinds, permit their priests to marry, and use neither consecration nor auricular confession.—*Du Pin*.

A Nestorian priest and deacon were in London in July, 1862.

NETHERLANDS. William Frederick, prince of Orange, assumed the title of King of the Netherlands 16 March, 1815, and his successors, kings of Holland, retain the title. See *Flanders, Holland, and Belgium*.

NETLEY HOSPITAL, near Southampton, for invalid soldiers. The foundation stone was laid by the queen, 19 May, 1856.

NEUCHÂTEL, a canton in Switzerland, formerly a lordship, afterwards a principality. The first known lord was Ulrich de Fenis, about 1032, whose descendants ruled till 1373, after which by marriages it frequently changed governors. On the death of the duchesse de Nemours, the last of the Longueville, in 1707, there were many claimants; among them our William III. He and the allies however gave it to Frederick I. of Prussia with the title of prince. In 1806 the principality was ceded to France, and Napoleon bestowed it on his general Berthier, who held it till 1814, when it fell to the disposal of the allies. They restored the king of Prussia with the title of prince with certain rights and privileges; but constituted it a part of the Swiss confederation. Population, 1868: canton, 106,153; city, 16,261.

After an unsuccessful attempt in 1825, the inhabitants repudiated their allegiance to Prussia, and proclaimed Neuchâtel a free and independent member of the Swiss confederation. 1848

The king of Prussia protested against this: and a protocol was signed between England, France, and Austria, recognizing his claims. 1850

Some of his adherents, headed by the count de Pourtales, broke out into insurrection against the republican authorities, who, however, quickly subdued and imprisoned them, with the intention of bringing them to trial. Sept. 1856

War threatened by the king of Prussia, and great anxiety and determination manifested by the Swiss. On the intervention of the English and French governments, a treaty was signed by which the king of Prussia virtually renounced his claims, on receiving a pecuniary compensation, which he eventually gave up. He retains the title of prince of Neuchâtel, without any political rights. 11 June, 1857

The prisoners of Sept. 1856 were released without trial 21 Jan. "

NEUSTRIA or WEST FRANCE, a kingdom allotted to Clotaire by his father Clovis, at his death in 511. His descendant, Charlemagne, became sole king of France in 771. It was conquered by the Northmen and hence named Normandy (*which see*).

NEUTRALITY LAWS. A commission, in a report issued in May, 1868, recommended changes. An act to make better provision for the preservation of neutrality was passed 9 Aug. 1870. John P. McDiarmid apprehended, for breach of neutrality laws, at Bow-street, 28 Oct. 1870.

NEUTRAL POWERS. By the treaty of Paris, signed by the representatives of Great Britain, France, Austria, Russia, Prussia, Turkey, and Sardinia, on 16 April, 1856, it was determined that privateering should be abolished; that neutrals might carry an enemy's goods not contraband of war; that neutral goods not contraband were free even under an enemy's flag; and that blockades to be binding must be effective. The president of the United States acceded to these provisions in 1861. See *International Law*.

NEVADA, a western territory of the United States of N. America, organized 2 March, 1861; admitted a state, 31 Oct. 1864. Capital, Carson city. Virginia city was nearly destroyed by fire, 26 Oct. 1875; several lives were lost; property about 2,000,000 dollars; 10,000 persons rendered homeless. Population of Nevada, 1880, 62,266; 1890, 45,761.

NEVILLE'S CROSS or DURHAM, BATTLE OF, between the Scots under king David Bruce and the English it is said (probably incorrectly) under Philippa, consort of Edward III., and lord Percy, 12 or 17 Oct. 1346. More than 15,000 of the Scots were slain, and their king taken prisoner.

NEVIS (W. Indies), an island discovered by Columbus, planted by the English in 1628; taken by the French, 14 Feb. 1782; restored to the English in 1783. The capital is Charleston. See *Leeward Isles*.

NEWARK (Nottinghamshire). The church was erected by Henry IV. Here, in the midst of troubles, died king John, 19 Oct. 1216; here the royal army under prince Rupert repulsed the army of the parliament, besieging the town, 21 March, 1644; and here, 5 May, 1646, Charles I., after his defeat at Naseby, put himself into the hands of the Scotch army, who afterwards gave him up to his enemies. Newark was first incorporated by Edward VI., and afterwards by Charles II. Absorbed into the county, 1885. Population, 1881, 14,018; 1891, 14,457.

NEWARK, a town in New Jersey, U.S.A., settled in 1666, and chartered in 1836. Population in 1890, 181,830.

NEW BRUNSWICK was taken from Nova Scotia, and received its name as a separate colony in 1785. It was united with Canada for legislative purposes by an act passed 29 March, 1867. Population of New Brunswick in 1865, 272,780; in 1881, 321,213; 1891, 321,894. Capital, Fredericton. Lieut.-governor, Leonard A. Wilket, 1868; Samuel Leonard Tilley, 1874; Robert Duncanson Wilket, 1880; and Samuel L. Tilley, 1886.

NEWBURY (Berkshire) Near here were fought two desperate battles—(1) 20 Sept. 1643, between the army of Charles I and that of the parliament under Essex, it terminated somewhat favourably for the king. Among the slain was the amiable Lucius Cary, viscount Falkland, deeply regretted. (2) A second battle of dubious result was fought between the royalists and the parliamentarians under Waller, 27 Oct. 1644. Population, 1881, 14,018, 1891, 14,457.
 A memorial to lord Falkland and his companions at Newbury was inaugurated by the earl of Larnarvon, 9 Sept. 1878

NEW CALEDONIA (Pacific Ocean), discovered by Cook on 4 Sept. 1774, was seized by the French, 20 Sept. 1853, and colonised. The French government in Dec. 1864, redressed the outrages committed upon the British missionaries at a station established here in 1854.

In the latter part of June, 1878, some of the native tribes revolted, burnt some of the towns and villages and killed about 60 of the European (colonists men women children, and servants, including col. Gally Pascoe, the military commandant of the island. The insurrection was not subdued till the end of the year. Now used as a French penal settlement, said to be very disorderly, 1884. * In 1202 the use of coal for fuel was prohibited in London, by royal proclamation, chiefly because it injured the sale of wood for fuel, great quantities of which were then growing about the city but this interdiction did not long continue, and we may consider coal as having been dug and exported from this place for more than 500 years.

NEW ENGLAND (N. America). The first settlement made in 1607, was named New England by captain Smith, in 1614. A band of 102 Puritans, now termed the "Pilgrim Fathers" (with 28 women) arrived here in the *May Flower*, and founded the settlement on Plymouth Rock, 25 Dec. 1620, which was named New Plymouth. This was the nucleus of Massachusetts, from whence were gradually developed New Hampshire, Vermont, Connecticut, and Rhode Island. In 1643 these settlements formed the first American confederation, a defensive union, with a constitution based on the Mosaic law, governed by a religious aristocracy, which lasted till 1803. Maine was made an independent state in 1820.

NEW FOREST (Hampshire), was made ("afforested") by William the Conqueror, 1079-85. It is said that the whole country, for thirty miles in compass, was laid waste. William Rufus was killed in this forest by an arrow shot by Walter Tyrrel, that accidentally glanced against a tree, 2 Aug. 1100, the site of which is now pointed out by a triangular stone. The New Forest Deer Memorial act was passed 14 & 15 Vict. c. 76, 7 Aug. 1851. Agitation for the preservation of this forest, autumn, 1870. In accordance with an act passed in 1877, the forest is now managed by a court of Verderers as a public pleasure ground, and cattle fairs. See *Forests*.

NEWFOUNDLAND (N. America), discovered by John Cabot, who called it *Prima Fides*, 24 June, 1497. It was formally taken possession of by sir Humphry Gilbert, 1583. In the reign of Elizabeth, other nations had the advan-

tage of the English in the fishery. In 1577 there were 100 fishing vessels from Spain, 50 from Portugal, 150 from France, and only 15, but of larger size, from England.—*Hakluyt*. But the English fishery in some years afterwards (1625) had increased so much that the ports of Devonshire alone employed 150 ships, which sold their fish in Spain, Portugal, and Italy. The sovereignty of England was re-recognized in 1713, by the treaty of Utrecht, certain rights on the "French shores" being reserved for France. Newfoundland obtained the privilege of a colonial legislature in 1832; and the bishopric was established in 1839. Population, 1884, 197,335. Appalling fire at St. John's, a great portion of the town destroyed, the loss estimated at 1,000,000*l.* sterling, 9 June, 1846. On 14 Jan. 1857, a convention was concluded between the English and French governments, confirming certain French privileges of fishery in exchange for others. The English colonists were dissatisfied with this convention. Newfoundland refused union with the dominion of Canada, March, 1869; a railway from St. John's to St. George's bay, proposed by the colonial government Aug. 1878. Capital, St. John's; population, 1884, 31,142. Governor, col. sir Stephen J. Hull, 1870; sir John H. Glover, Jan. 1876. Mayne died Sept. 1883; sir John Hawley Glover, Dec. 1883; died 30 Sept. 1885; sir G. Wm. des Vaux, Feb. 1886; sir J. Terence N. O'Brien, Nov. 1888. See *Canada*, Nov. 1877.

NEWGATE, LONDON. The prison derives its name from the gate, to which was attached a small prison, gradually enlarged. One was erected in 1086 by the bishop of London. It was used as a prison for persons of rank as early as 1218, but was rebuilt about two centuries afterwards by the executors of Sir Richard Whittington, whose statue with a cat stood in the niche till the time of its demolition by the great fire of London, in 1666. It was then reconstructed, but becoming an accumulation of misery and inconvenience, was pulled down and rebuilt between 1778 and 1780. During the riots in 1780, the interior was destroyed by fire, but shortly afterwards restored. In 1857 the interior was pulled down to be re-erected on a plan adapted to the reformatory system. Newgate was disused as an ordinary prison, 31 Dec. 1881. Major Arthur Griffiths' "Chronicles of Newgate," published Jan. 1884. See *Old Bailey*. NEW GUINEA or PAPUA, a large island, Pacific Ocean, discovered by the Portuguese after their settlement of the Moluccas between 1511 and 1530. It was visited by Saavedra, a Spaniard, in 1528. It is said to have been named New Guinea by Ortiz de Retez, a Portuguese, 1549. Torres Straits, which divide New Guinea and Australia, were discovered by Torres, a Spaniard, in 1606. It was frequently visited by the Dutch in the 17th century. They established a colony and erected a fortress, named Dabuis, on the S.W. coast, in 1828, which was unsuccessful, and removed in 1835. A lofty range of mountains was named after Capt. Owen Stanley, who first saw them from his vessel on sea about 1849.

On 9 Oct. the New Guinea Colonizing Association proposed to Lord Carnarvon, the colonial secretary, to send to New Guinea an expedition of 200 men with 50 officers, in a ship of 1200 tons burden, he declined to sanction it, and referred to parliament, 30 Oct. 1875, part of the island annexed by the Queensland government, announced April, 1882, with the approval of all Australia, thus declared by the British government to be "null in point of law, and not to be admitted in point of policy," 9 July, 1883, signified by Lord Derby's dispatch, also recommending a confederation of Australian states, 11 July, 1883.

NEW ORLEANS, capital of Louisiana, N. America (see *see*), founded in 1717, under the regency of the duke of Orleans. In 1788, seven-eighths of the city were destroyed by fire. The British attacked New Orleans in Dec. 1814, and were repulsed with great loss by the Americans under general Jackson, 8 Jan. 1815. New Orleans was surrendered to the Federals in April, 1862. The strong feeling of the inhabitants in favour of the Confederates and against the Federals induced general B. Butler to rule them with military rigour, occasionally degenerating into brutal tyranny, especially towards females, May to October, 1862. He was replaced by general Banks, 16 Dec. 1862. Sanguinary riots; due to agitators, begun 30 July, 1866, only suppressed by martial law; about 40 persons, white and coloured, were killed, and about 160 wounded, similar riots occurred, 24 Oct. 1868, and often since. Population in 1880, 216,090; in 1890, 158,019.

New Orleans—John McEnery elected governor of Louisiana by the southern whites, 4 Nov. 1872; but W. F. Kellogg, elected by the coloured people and their white friends, was recognised by the Federal government. To defend themselves against tyranny, the southerners formed the "white league," and collected arms, which they refused to surrender on demand on 19 Sept. 1874. They deposed Kellogg at New Orleans after some resistance, and established McEnery as governor, but submitted to the president's proclamation. Kellogg was restored 18 Sept.

CHARTIST RACE.—About 10,000 chartists (*which see*), from the neighbouring mines, armed with guns, pikes &c. arrived at Newport, 4 Nov. 1839. They divided themselves into two bodies—one, under the command of Mr. John Frost, an ex-magistrate, proceeded down the principal street, whilst the other, headed by his son, took the direction of Stow-hill. They met in front of the Westgate hotel, where the magistrates were assembled with about 30 soldiers of the 45th regiment, and several special constables. The rioters broke the windows and fired on the inmates, by which the mayor, Mr. (afterwards Sir Thomas) Phillips, and several other persons, were wounded. The soldiers returned the fire, and dispersed the mob, which fled, leaving about 20 dead, and others wounded. A detachment of the 10th royal hussars arrived from Bristol, and the town became tranquil.

Frost was apprehended on the following day, together with his printer, and other influential persons among the chartists. He and others were tried and sentenced to death (afterwards commuted to transportation) Jan. 1840.

An amnesty was granted them, 3 May, and they returned to England Sept. 1856.

NEW RIVER, for the supply of London with water, was begun 1609, and finished in 1613, when the projector, Hugh Myddelton, a London goldsmith, was knighted by James I.—*Strype*. This artificial river, which rises in Hertfordshire, and which, with its windings, then forty-eight miles long, was brought to London, and opened 29 Sept. 1613. So little was the benefit of it understood, that for above thirty years the seventy-two shares (equally divided into *King's* and *Adventurers'*), netted only 51. apiece. Charles I. sold his shares to Myddelton's representatives for an annuity of 500l. Each of these shares was sold originally for 100l. A part of a share sold at the rate of 94,050l. the share, 1 Nov. 1786; part of a king's share at rate of 90,000l.; of an adventurer's share at rate of 93,000l., 15 May, 1787; king's share, rate 88,200l.; adventurer's, 91,000l., Oct. 1787; king's share, rate 91,010l.; adventurer's, 94,500l., Nov. 1880; king's share rate, 85,800l.; adventurer's, 85,200l., Nov. 1887.

An entire freehold adventurer's share of the company was sold by auction for 122,800l. to the Prudential Assurance Company 17 July, 1889.

The annual income of the company from land and water was stated to be 511,360l. in 1888.

An entire "King's Share" sold for 95,100l. 31 May, 1890.

(NEW) RUGBY, Tennessee, United States, N. America, a colony of British farmers and others, founded on English principles by Mr. Thomas Hughes, Q.C., formerly M.P., author of "Tom Brown's School-days," &c.; inaugurated 5 Oct. 1880. Reported failure of crops and prevalence of fever, Aug. 1881. Said to be not quite a failure by emigrating persons, 13 Oct. 1881; more favourable reports, Sept. 1883.

NEWRY (N. Ireland). In the rebellion of 1641, Newry was reduced to a ruinous condition; it was surprised by Sir Con. Magenis, but was retaken by Lord Conway. After the Restoration the town was rebuilt. It was burnt by the duke of Berwick when fleeing from Schomberg and the English army, and only the castle and a few houses escaped, 1689.

NEWS-LETTERS. News-writers in the reign of Charles II. collected from the coffee-houses information, which was printed weekly and sent into the country. The *London Gazette*, then the only authorised newspaper, contained little more than proclamations and advertisements.

NEW MODEL, see *Council of Officers*.

NEW SOUTH WALES, the principal colony of Australia on the eastern coast was explored and taken possession of and named by Captain Cook in 1770. At his recommendation a convict colony was first formed here. Captain Arthur Phillip, the first governor, arrived at Botany Bay with 800 convicts, 20 Jan. 1788; but he subsequently preferred Sydney, about seven miles distant from the head of Port Jackson, as a more eligible situation for the capital. A new constitution was granted in 1855 (18 & 19 Vict. c. 54). The Intercolonial Exhibition was opened at Sydney, by the governor-general Lord Belmore, 30 Aug. 1870. It consisted of two departments, agricultural and non-agricultural. A conference of delegates from the Australian colonies met at Sydney in Jan. 1873, to deliberate on a customs' union, postal and railway arrangements, &c. The ministry introduced a free trade budget near the end of the year. Industrial exhibition opened by the governor, 11 April, 1874. NEWSPAPER PROVINCIAL SOCIETY, established in 1836, became the Newspaper Society in 1839; see Press Association.

NEWSPAPERS. The Roman *Acta Diurna* were issued, it is said, 601 B.C. In modern times, a *Gazette*, which derived its name from its price, a small coin, was published in Venice (about 1536). The *Gazette de France*, now existing, first appeared in April, 1631, edited by Renaudot, a physician. It was patronized by the king, Louis XIII., who wrote some articles for it, and by Richelieu. The first real

newspaper published in England* was established by Sir Roger L'Estrange, in 1663; it was entitled the *Public Intelligence*, and continued nearly three years, when it ceased, on the appearance of the *Gazette*. In the reign of James I., 1622, appeared the *London Weekly Current*; and in the year 1643 (the period of the civil war) were printed a variety of publications, certainly in no respect entitled to the name of newspapers. See *Fourth Estate*. The following are the titles of some of them:—

England's Memorable Accidents.
The Kingdom's Intelligencer
The Diurnal of Certain Passages in Parliament.
The Mercurius Aulicus.
The Scotch Intelligencer.
The Parliament's Spout.
The Parliament's Scout's Discovery, or certain Informations.
The Mercurius Civicus, or London's Intelligencer.
The Country's Complaint, &c.
The Weekly Account.
Mercurius Britannicus.

A paper called the *London Gazette*,† published as Aug. 1642. The *London Gazette* of the existing series, published first at Oxford, the Court being there on account of the plague, 7 Nov. 1665, and afterwards at London, 5 Feb. 1666. A valuable index (1630-1883) compiled by Alex. Fulford for control of law reporting, published Nov. 1883.

Printing of newspapers and pamphlets prohibited, 31 Chas I. 1680. *Salomon's Crown*.

* Some copies of a publication are in existence called *The English Mercury*, professing to come out under the authority of Queen Elizabeth, in 1588, the period of the Spanish Armada. The rescuer of Mr. T. Wals, of the British Museum, proved these to be forgeries, executed about 1766. The full title of No. 30 is "*The English Mercury*, published by authority, for the prevention of false reports, imprinted by Christopher Fowler, her highness's printer, No. 30." It describes the Spanish Armada, giving "A Journal of what passed since the 1st of this month, between her majesty's fleet and that of Spain, transmitted by the Lord High Admiral, to the Lords of council."

ROYAL NEWSPAPER PRESS FUND, established 1864, chartered 1890.

NEW STYLE. Pope Gregory XIII., in order to rectify the errors of the current calendar, published a new one, in which ten days were omitted—5 Oct. 1582, becoming 15 Oct. The new style was adopted in France, Italy, Spain, Denmark, Holland, Flanders, Portugal, in 1582, in Germany in 1584, in Switzerland in 1583 and 1584, in Hungary in 1587; and in Great Britain in 1751. In 1752 eleven days were left out of the calendar—3 Sept. being reckoned as 14 Sept. The difference between the old and new style up to 1699 was 10 days; after 1700, 11 days; after 1800, 12 days. In Russia, Greece, and throughout the East, the old style is still retained. The czar, Alexander II., was born on the 17th April, 1818, old style, 29 April, new style; see *Calendar*.

NEW TESTAMENT, see *Bible*.

NEWTONIAN PHILOSOPHY, the doctrines respecting gravitation, &c., taught by Sir Isaac Newton in his "Principia," published in 1687; see *Gravitation*. He was born 25 Dec., 1642; became master of the mint, 1699; president of the Royal Society, 1703; and died 20 March, 1727. A statue of him in marble by Nollehiac was set up at Trinity College, Cambridge, 14 July, 1755, and one in bronze by Thorpe, at Grantham, 21 Sept. 1858, when Lord Brougham delivered a discourse on the life and works of Newton. The latter statue cost 1600*l.*, a sum obtained by public subscription.

NEWTOWNBARRY RIOT (S.E. Ireland). At a seizure of stock for tithes, a conflict ensued here between the yeomanry and the people, when thirty-five persons were killed or wounded, 18 June, 1831. The jury at the inquest were unable to agree on a verdict.

NEWTOWNBUTLER (N. Ireland). On 30 July, 1689, the Englishkenners under Gustavus Hamilton thoroughly defeated the adherents of James II. commanded by general MacCarthy, taking him prisoner with his artillery, arms, and baggage.

NEW YEAR'S DAY, &c. The beginning of the Jewish year was changed and the passover instituted, 1491 a.c. A feast is said to have been instituted by Numa, and dedicated to Janus (who presided over the new year), 1 Jan. 713 a.c.

On this day the Romans sacrificed to Janus a cake of new offered meal, with salt, incense, and wine; and all the households began something of their art of trade. The men of letters did the same, as to books, poems, &c.; and the commons, though chosen before, took the oath and entered upon their office this day. Nonius Marcellus refers the origin of NEW-YEAR'S DAY among the Romans to Titus Tatius, king of the Sabines, who having considered as a good omen a present of some branches cut in a wood consecrated to Minerva, the mother of serpents, which he received on the first day of the new year, authorized the custom afterwards, and gave these gifts the name of

NEW YORK, the "empire state" of the United States of N. America, is said to have been discovered by Verrazano, a Florentine in the French service, about 1524, and rediscovered by Hudson, an Englishman in the Dutch service, in 1609, and settled by the Dutch in 1614, the city being named Manhattan and New Amsterdam; but the English under colonel Nichols dispossessed them and the Swedes, 27 Aug. 1664, and changed its name, the king, Charles II., having given the territory to his brother, the duke of York. Population of the city in 1860, 805,651; in 1870, 942,292; in 1880, 1,206,299; in 1890, 1,515,301; of the state in 1880, 5,082,871; in 1890, 5,907,853; of Albany, the state capital, in 1880, 90,758; in 1890, 91,923; of Brooklyn, in 1880, 566,663; in 1890, 806,343; of Buffalo, in 1880, 155,131; in 1890, 255,664.

NEY'S EXECUTION. Ney, duke of Elchingen, prisoner of the Moslems, and one of the most valiant of the marshals of France, was shot as a

trooper, 7 Dec. 1875. On 7 Dec. 1853, his statue was erected on the spot where he fell.

After the abdication of Napoleon I, 5 April, 1814, Ney took the oath of allegiance to the king, Louis XVIII. On Napoleon's return to France from Elba, he marched against him, but his troops deserting, he regarded the cause of the Bourbons as lost, and opened the invader's way to Paris, March, 1815. Ney led the attack of the French at Waterloo, where he fought in the midst of the slain, his clothes pierced with bullet-holes, five horses having been shot under him, sight and defeat obliged him to flee. Though included in the decree of 20 July, 1815, which guaranteed the safety of all Frenchmen, he was sought out, and on 5 Aug. taken at the castle of a friend at Uxelles, and brought to trial before the Chamber of Peers, 1 Dec. The 12th article of the capitulation of Paris, fixing a general amnesty, was quoted in his favour in vain.

NEZIB, Syria. Here Ibrahim and the Egyptians defeated the Turks, 24 June, 1839.

NIAGARA (N America). At the head of this river, on the western shore, is Fort Erie, which was taken by the English, 24 July, 1759. It was abandoned in the war with the United States, 27 May, 1813, but was retaken, 19 Dec. following. A suspension bridge of a single span of 820 feet over the Niagara, connecting the railways of Canada and New York, was opened in March, 1855. It is elevated 16 feet on the Canadian side, and 28 feet on the American side.

About eighteen miles below Fort Erie are the remarkable falls. The river is here 700 yards wide, the half mile immediately above the cataract is a rapid, in which the water falls 52 feet. It is then thrown, with astonishing grandeur, down a stupendous perpendicular of 150 feet perpendicular in three distinct and collateral sheets, and in a rapid that extends to the distance of nine miles below, falls nearly as much more. The river then flows in a deep channel till it enters Lake Ontario, at Fort Niagara.

The falls visited by the prince of Wales Sept. 1860. Blondin crossed the falls on a tight rope 17 Aug. 1859. Professor Tyndall visited the falls, Aug. 1, 1872 and lectured on them at the Royal Institution, 4 April, 1873. Company formed to utilize its water power mechanically, 1877.

Capt. Matt Webb drowned while attempting to swim across the whirlpool rapids, 24 July, 1883. Niagara international park purchased by the U.S. government, opened 15 July, 1885.

Mr. Carlisle D. Graham, an Englishman, passed through the rapids safely in a barrel shaped like a buoy, seven feet long, 11 July, 1886, again, 11 June, 1887. Wm. J. Kendall in a cork went swims through the rapids, 22 Aug. 1886.

The huge upper table rock fell, due to weight of accumulated ice, 13 Jan. 1887.

Mr. Hollingshead's grand cyclorama of Niagara, London, opened 12 March 1888, closed 20 Nov. 1890.

Mr. Carlisle D. Graham after long preparation said to have shot Niagara (rapids) in a barrel 25 Aug. 1889. Mr. Dixon crosses Niagara river below the falls on a wire rope, 6 Sept. 1890.

An international commission (president, Sir Wm. Thomson, afterwards Lord Kelvin) was appointed to consider the best method for utilizing 125,000 horse power of the force of the Niagara falls, which is computed to be about 4,500,000 horse power. Prizes were given by the Cataract company to the authors of various projects 9 Feb. 1891.

In the Times of 8 June 1890, professor George Forbes, who was engaged in the undertaking, reported that the engineering works were nearly completed, and that the electrical arrangements by which the vast force was to be transmitted, were begun.

The force is to be used in factories, in lighting Niagara Falls city, and in working railways, probably in 1893.

NIBELUNGEN or NIBELUNGEN-LIED, a popular German epic of the 12th century, composed of various ancient mythical poems, termed *sagas*, which according to the poet Wm. Morris,

should be to our race what Homer was to the Greeks.

The first critical edition, by K. Lachmann, appeared 1846 and 1846. The best translation in modern German, by Strunk, 1867, a useful edition, with translation and glossary by L. Braunfels, 1846 in English, by W. N. Lettson and ed. 1874.

Richard Wagner's musical dramas, "The Ring of the Nibelungen," are based on this poem. The persons include the great Northern gods and goddesses, the giants, the dwarfs, and the daughters of the Rhine (see under *Muse*).

NICARUA, see Nisee

NICARAGUA, a state in Central America (which see). The present constitution was established 19 Aug. 1858. At the commencement of 1857 it was greatly disturbed by two political parties, that of the president, Chamorro, who held Granada, the capital, and that of the democrats, chief, Castellon, who held Leon. The latter invited Walker, the filibuster, to his assistance, who in a short time became sole director of the state. By the united efforts of the confederated states the filibusters were all expelled in May, 1857. On 1 May, 1858, Nicaragua and Costa Rica appealed to the great European powers for protection. Nicaragua railway, a transit route between the Pacific and Atlantic, proposed, and company formed Nov. 1866. President T. Martinez elected, 1859 and 1863, Fernando Guzman, elected 1 March, 1867, Valente Quadra elected 1 Feb. 1871, Pedro Joaquin Chamorro, 1 Feb. 1875. Joaquin Zavala, 1 March, 1879, Dr. Adam Cardenas, Jan. 1883, Señor

* William Walker was born at Tennessee, in the United States, where he became successively doctor, lawyer and journalist and afterwards gold-seeker in California, where he was invited to Nicaragua by Castellon, with the promise of 50,000 acres of land, on condition of bringing with him a band of adventurers to sustain the revolutionary cause. Walker accepted the terms, and on 28 June landed at Bluejo with 68 men. He increased his forces at Leon, and soon after attacked the town of Rivas, where he was rejoined with loss. He then joined Col. Hummer, who had occupied and governed Grey Town 6 Sept. On 13 Oct. Walker captured Granada by surprise when in a defensive state, shot Myroga, one of the ministers and established a *vide et verba*. In consequence of the Nicaraguans' conduct he made peace with the principal states, but shot him on 7 Nov. on finding him corresponding with fugitives at Costa Rica. Walker at first was only general-in-chief, but on Rivas whom he had made president deserting him he became sole dictator. On 14 May 1856 his envoy Vigil was recognised by the president of the United States, whence also he obtained reinforcements during his retention of power. Costa Rica declared war against him 28 Feb. 1856. The new states of central America soon followed the example and a sanguinary struggle ensued lasting till May, 1857. On 25 Nov. 1856, Walker totally burnt Granada, being unable to defend it, and removed the seat of government to Rivas. This place he succeeded in getting down on 1 May, 1857 on the intervention of Capt. Davis of the St. Mary, U.S. Himself his staff and 260 men, were conveyed in that vessel to New Orleans, where they were received with great enthusiasm. On 25 Nov. 1857, he again invaded Nicaragua, landing at Punta Arenas with 400 men, but on 8 Dec. was compelled to surrender to Capt. Becking, U.S., and was conveyed to New York. He escaped punishment by sailing to Havana (2 June 1858) but Capt. Becking was tried for exceeding orders and blamed - yet excused by President Buchanan. On 5 Aug. 1860, Walker landed near Tuxtilo Honduras, and took the fort on the 6th. On the 7th he proclaimed that he made war on the government, not on the people of Honduras. On being summoned to surrender his boots by Capt. Salmon, R.Y., of the *Force*, he refused and fled. He was pursued, caught, given up to the Honduras government, tried, and shot (25 Sept.). His followers were dismissed. Grey Town was surrendered to Nicaragua in 1860.

Carazo, 16 Dec. 1886. Don Benjamin Guerra, 1886? Senator Robert Neceat, 1889 Population in 1888, 282,445.

Louis Napoleon, afterwards emperor, proposed the making a ship canal by the lake Nicaragua from the Atlantic to the Pacific, between 1842-4, the government of Nicaragua proposed it in 1845. Colonel Chiride made a survey in 1851 a company was chartered for 25 years and conventions were signed, but the capitalists declined their support.

The scheme was revived in Feb. 1875 See Panama and Isthmus.

Insurrection in Granada suppressed with bloodshed (the leaders exiled), 23 Aug. 1891.

NICE or **NICAEA**, a town in Bithynia, Asia Minor, N W Antiquaries gave it the name Antigonea, which Lymanachus changed to Nicæa, the name of his wife. It became the residence of the kings of Bithynia about 208 B.C. At the battle of Nice, A.D. 194, the emperor Severus defeated his rival, Pescennius Niger, who was again defeated at Issus, and soon after taken prisoner and put to death. The first general council was held here 19 June to 25 Aug. 325, which adopted the **NICENE** CREED and condemned the Arians. It was attended by 318 bishops from diverse parts, who settled both the doctrine of the Trinity and the time for observing Easter. An addition was made to the creed, 381, was rejected, 431. See *Philopole*. When the Crusaders took Constantinople, and established a Latin empire there in 1204, the Greek emperors removed to Nice and reigned there till 1261, when they returned to Constantinople, see *Eastern Empire*. Nice was taken by the Ottoman Turks in 1330.

NICE (S E France) was the seat of a colony from Marseilles, now Marseilles, and formed part of the Roman empire. In the middle ages it was subject to Genoa, and suffered from the frequent wars, being taken and re-taken by the imperialists and French. It was taken by the Austrians under Melas, 1800, seized and annexed to France 1792, restored to Sardinia in 1814. Nice was again annexed to France in virtue of the treaty of 24 March, 1860, the people having voted nearly unanimously for this change by universal suffrage. The French troops entered 1 April, and definite possession was taken 14 June following. Garibaldi, a native, vehemently protested against this annexation.

Fire at the opera house, and panic, about 70 killed, 23 March, 1882.

International exhibition 6 Jan. 1884. About 30 acres of forest destroyed by fire, three persons killed, 27 Feb. 1891. Statue of Garibaldi unveiled 4 Oct. "

NICOLAS, PEACE OF, between Athens and Sparta for 50 years, 421 B.C., negotiated by that unfortunate Athenian general, who with his colleague, Demosthenes, was put to death after the disastrous termination of the expedition against Syracuse, 413 B.C.

NICKEL, a white, ductile, malleable, magnetic metal, employed in the manufacture of German

silver. Cronstedt in 1751 discovered nickel in the mineral copper-nickel. Nickel ore used to be mis-stated for bronze coinage in France, 1882.

The *wielat heat engine* of professor Stohar of Vienna in 1865 consisted of plates of nickel fixed on a wheel which rotated when the metal was heated in the presence of a magnet. Similar machines have been constructed by B. Berthier, 1883, Edman, 1887, and F. S. Smith, 1890.

NICOBAR ISLES, Indian Ocean, S of Bay of Bengal, given up by Denmark and occupied by Great Britain to suppress piracy, announced June, 1869.

NICOLAITANES, a sect mentioned in Rev. ii. 6, 15, said to have sprung from Nicolas, one of the first seven deacons (*Acts vi.*), and to have advocated a community of wives, and to have denied the divinity of Christ.

NICOMEDIA, the metropolis of Bithynia, Asia Minor, N W, founded by king Nicomedes I., 264 B.C., on the remains of *Antioch*, destroyed by an earthquake, A.D. 115, and restored by the emperor Adrian, 124. The Roman emperors frequently resided here during their eastern wars. Here Diocletian reigned the purple, 305, and Constantine died at his villa in its neighbourhood, 337. It surrendered to the Seljukian Turks, 1078, and to Urhan and the Ottoman Turks in 1338.

NICOPOLIS on the Danube, Bulgaria, founded by Trajan. Here was fought a battle between the allied Christian powers under Sigismund, king of Hungary, afterwards emperor, and the Turks under Bajazet, said to have been the first battle between the Turks and Christians, the latter were defeated, losing 20,000 slain, and as many wounded and prisoners, 28 Sept. 1396. Nicopolis was taken by the Russians after a severe conflict (2 pashas, about 6000 men, 2 monitors, and 40 guns were captured), 15, 16 July, 1877.

NIELLO-WORK believed to have been produced by rubbing a mixture of silver, lead, copper, sulphur, and borax into engravings on silver, &c., an art known to the ancients, was practised in the middle ages, and said to have given to Maso Finiguerra the idea of engraving upon copper, about 1460.

NIEMEN, or **MEMEL**, a river flowing into the Baltic, and separating Prussia from Russia. On a raft on this river the emperor Napoleon met Alexander of Russia 22 June 1807, and made peace with him and Prussia. He crossed the Niemen to invade Russia, 24 June, 1812, and re-crossed with the remains of his army, 28 Dec. Near it the Poles defeated the Russians 27 May, 1831.

NIGER A great river of N W Africa. British settlements at the mouth established since 1841. *Niger expedition*, see *Africa*, 1841. British protectorate with free trade affirmed by the West African Conference at Berlin, Dec. 1884, confirmed June, 1885.

The National African company incorporated in 1884; chartered as the Royal Niger company in 1886. Complaints against the company made by Germans in Africa, Nov., were rebuffed by the company, Dec. 1889.

The company reported prospering, 29 July, 1890. Samuel Adjai Crowther, a native African, first bishop of the Niger territory, rescued when a child from a slave-ship by the British, and taken to Sierra Leone river, baptised and educated, became a missionary on board at Canterbury cathedral, 1864, died 31 Dec., 1891.

NIGHTINGALE FUND. On 21 Oct. 1854, Miss Florence Nightingale left England with a

staff of thirty-seven nurses, and arrived at Soutari, 5 Nov. She rendered invaluable services to the army; and returned to London, 8 Sept. 1856. In honour of this, a meeting was held at Willis's Rooms on 29 Nov. 1855, to raise funds to establish an institution for the training of nurses and other hospital attendants. Madame Jenny Lind-Goldschmidt sang at Exeter Hall on 11 March 1856, and gave the proceeds (1872*l.*) to the fund. The subscriptions closed, 24 April, 1857, amounting to 44,039*l.* The queen gave Miss Nightingale a valuable jewel.

NIGRITIA, see *Soudan*.

NIHILISM, a popular name for the school of philosophy which believes nothing without physical evidence, renounces all forms of Divine revelation, and gives nothing in their place.

NIHILISTS, ultra-reformers in Russia, said to propose the destruction of all government, and to begin society afresh. They became known and spread in 1872; their alleged leader, Zhybaroff. The government began to suppress them, Sept. 1875. One of the leaders, Michael Bakounin, died at Lugano, 1 July, 1876. They evidently possess wealth. For recent events, see *Russia*, 1877-87. The term *Nihilist* was invented by the Russian novelist Tourgenief, who died 3 Sept. 1883.

"The Nihilists ask concessions, which are the common places of every free community."—*Times*, 26 April, 1881.

NIKA CONTESTS, see *Circas*.

NIKOLSBURG (Moravia). Here were signed, 26 July, 1866, the preliminaries of a peace between Austria and Prussia.

NIKSICH, a strong Turkish fortress in Montenegro, many times besieged; having been left by the Turks with insufficient garrison, it was captured by Montenegrins, 7 Sept. 1877, causing great rejoicings.

NIL DARPAN, see *India*, June, 1861.

NILE (Egypt). The longest river in Africa, formerly considered to have its rise in what were termed "the Mountains of the Moon." The travels of Bruce were undertaken to discover the source of the Nile. He set out from England in June, 1768; on the 14th of November, 1770, discovered the source of the Blue Nile in lake Tana, and returned home in 1773. The Nile overflows regularly every year, from about the 15th of June to the 17th of September, when, having given fertility to the land, it begins to decrease. The first Nilometer (a pillar), is said to have been set up by Oortasen III., a king of the XII. dynasty, 2,300 B.C. One was set up by Soymman the Caliph, 715 A.D. In 1829, the inundations of the Nile rose to 26 instead of 22, by which 30,000 people were drowned and immense property lost. Mr. Fetherick set out early in 1861 to explore the country at the source of the Nile. For recent discoveries, see *Africa* 1864. A bridge over the Nile (above 1300 feet) at Cairo, was completed by a French company, Aug. 1872. For the discoveries of Speke, Grant, and Baker, see *Victoria Nyassa*, &c.

Mr. H. M. Stanley, in his book, "Darkest Africa," published June, 1890, expressed his opinion that the newly discovered lake Albert Edward Nyman, at the head of the Semliki river which is fed by the snows of the mighty Ruwenzori range (possibly the Mountains of the Moon mentioned by Ptolemy the geographer in the 2nd century A.D.), is the real source of the Nile.

The barrages works of the Nile, consisting of two great dams or weirs for irrigation, and the conveyance of boats by means of locks, constructed under the direction of Mouget Bey, a Frenchman, 1843-61; were unsuccessful and eventually neglected.

In 1885 the great powers agreed to the expenditure of 2,000,000*l.* on irrigation works, and the renovation of the barrages was effected under the direction of sir Colin Scott Moncrieff, 1886-90.

Mouget Bey died at Paris, aged 82, Dec. 1890.

NILE, BATTLE OF THE (or Aboukir), 1 Aug. 1798, near Rosetta, between the French fleet under Brueys, and the British under sir Horatio Nelson. Nine of the French line-of-battle ships were taken, two were burnt, and two escaped. The French ship, *L'Orient*, with Brueys and 1000 men on board, blew up, and only 70 or 80 escaped. Nelson's exclamation upon commencing the battle was, "Victory or Westminster Abbey!"

NIMEGUEN (Holland). Here was signed the treaty of peace between France and the United Provinces, 1678. The French were successful against the British under the duke of York, before Nimeguen, 28 Oct. 1794; were defeated by them 3 Nov.; but gained the place 8 Nov. Population, 1890, 32,618.

NINETEENTH CENTURY, a magazine open to writers of totally different opinions; first appeared, March, 1877; editor, James Knowles.

NINEVEH, the capital of the Assyrian empire (see *Assyria*), founded by Ashur about 2245 B.C. The empire fell when Nebuchadnezzar captured Nineveh 606 B.C. The discoveries of Layard and others since 1839, in the neighbourhood of Mosul, at Koyunjik, the site of the ancient Nineveh, and other places, have in a manner disinterred and re-peopled a city which for centuries had ceased to figure on the page of history. Botta commenced his explorations at Khorsabad in 1843, and published his great work "Monuments de Ninive," 1849-50. In 1848 Mr. Layard published his "Nineveh and its Remains," and in 1853 his "Discoveries," in his second visit in 1849-50. Mr. Hormuzd Rassam, in 1854, discovered an ancient palace. Mr. George Smith described his excavations and their results in 1873-4, in "Assyrian Discoveries," 1875. He died at Aleppo, 19 Aug. 1876. See *Assyria*. Mr. Rassam, appointed his successor, among other valuable discoveries at Balawat, nine miles N.E. of Nimroud, and at Koyunjik, &c., found a bronze monument with inscriptions recording the names, title, genealogy, and exploits of king Assur-nazir-pal (B.C. 885-860), builder of the palaces and temples of Kalakh, the capital of the middle Assyrian empire. Mr. Rassam arrived in London with collections, Dec. 1882.

The forms, features, costume, religion, modes of warfare, and ceremonial customs of its inhabitants stand before us as distinct as those of a living people; and by help of the sculptures and their cuneiform inscriptions, the researches of the learned have increased the knowledge of Assyrian history. Among the sculptures that enrich the British Museum, may be mentioned, the winged bull and lion, and numerous hunting and battle pieces; and the bas-relief of the eagle-headed human figure, presumed to be a representation of the Assyrian god Nuroch (from *Nur*, an eagle or hawk), whom Sennacherib was in the act of worshipping when he was assassinated by his two sons, about 720 B.C. a *Kings* xix. 37.

NIOBIUM, a rare metal, discovered by Hatchett in columbite, a black earth, and named columbium, 1801. It was pronounced to be identical with tantalum (or tantalum) by Wollaston; but was rediscovered by H. Rose in 1846, and named niobium.

NIRVANA, see *Buddhism*.

NIRIBET or **NIRIBET** (Northumbria). Here a battle was fought between the English and Scotch armies, the latter greatly disproportioned in strength to the former. Several thousands of the Scots were slain upon the field and in the pursuit, 7 May, 1402.

NIREBO. See *Achem*.

NIRI PRIUS ("unless before"), words in a writ summoning a person to be tried at Westminster, unless the judges should come to hold their assizes in the place where he is. Judges sit in Middlesex by virtue of 18 Elis. c. 12 (1576).

NISMES (Nîmes), S. France, was the flourishing Roman colony, Nemausus. Its noble amphitheatre was injured by the English in 1417. The inhabitants embraced Protestantism, and suffered much persecution in consequence, and Nîmes has frequently been the scene of religious and political contests. The treaty termed the Pacification of Nîmes (14 July, 1629) gave religious toleration for a time to the Huguenots.

NITRE, see *Saltpetre*.

NITRIC ACID, a compound of nitrogen and oxygen, formerly called *agua fortis*, is said to have been first obtained in a separate state by Raymond Lully, an alchemist, about 1287; but we are indebted to Cavendish, Priestley, and Lavoisier for our present knowledge of its properties. H. Cavendish demonstrated the nature of this acid in 1785. Nitrous acid was discovered by Scheele about 1774. Nitrous gas was accidentally discovered by Dr. Hales. Nitrous oxide gas (laughing gas) was discovered by Dr. Priestley in 1776. The use of this gas as an anæsthetic, recommended by H. Davy in 1800, was begun in America (by Mr. Wells, a dentist), 1844, in Paris, 1866, in London, 31 March, 1868, ingenious apparatus having been invented for its application.

NITROGEN or **AZOTE** (from the Greek *a*, no, and *zoe* or *zē*, I live), an irrespirable elementary gas, and an important element in food, discovered by Rutherford about 1772. Before 1777, Scheele separated the oxygen of the air from the nitrogen, and almost simultaneously with Lavoisier discovered that the atmosphere is a mixture of these two gases. Nitrogen combined with hydrogen forms the volatile alkali ammonia, so freely given off by decomposing animal and vegetable bodies.

NITRO-GLYCERINE (also called **NITRO-GLYEROL**), an intensely explosive amber-like fluid, discovered by Sobrero in 1847, is produced by adding glycerine (in successive small quantities) to a mixture of one part of nitric acid, and two parts of sulphuric acid. Alfred Nobel, a Swede, first attempted its application as an explosive agent, in 1864. It has caused several most disastrous accidents, with great loss of life. In attempting to bury some nitro-glycerine in the town moor at Newcastle-on-Tyne, 17 Dec. 1867, an explosion took place, and seven persons lost their lives, including Mr. Mawson, the sheriff, and Mr. Bryson, town surveyor; see *Dynamics*. Mr. Alfred Nobel's nitro-glycerine manufactory, near Stockholm, blown up; 15 persons killed, many injured, 10 June, 1888. An act prohibiting its importation for a time, and regulating its transmission, was passed in 1866, and repealed by the Explosives Act of 1875. Secret manufactory discovered, see *Birmingham*, 1883.

NIZAM, see *Hydrabad*.

NOBILITY. The Goths, after they had seized a part of Europe, rewarded their hitherto with titles of honour, to distinguish them from the common people. The right of peerage seems to have been at first territorial. Patents to persons having no estate were first granted by Philip the Fair of France, 1095. George Neville, duke of Bedford (son of John, marquis of Montague), ennobled in 1470, was degraded from the peerage by parliament, on account of his utter want of property, 19 Edw. IV., 1478. Noblemen's privileges were restrained in June, 1773; see *Lords*, and the various orders of the nobility.

In 1845 a statistical writer said that there were 500,000 nobles in Russia, 130,000 in Austria; in Spain (in 1780), 470,000; in France (before 1790) 350,000 (of whom 4,100 were of the *ar-cane nobles*); in the United Kingdom, 1,631 with transmissible titles (dukes to baronets).

NOBILITY OF FRANCE preceded that of England. On 18 June, 1790, the National Assembly decreed that hereditary nobility could not exist in a free state; that the titles of dukes, counts, marquises, knights, barons, excellencies, abbots, and others, be abolished, that all citizens take their family names, livrées and armorial bearings also to be abolished. The records of the nobility, 600 volumes, were burnt at the foot of the statue of Louis XIV., 25 June, 1792. A new nobility was created by the emperor Napoleon I., 1808. The hereditary peerage was abolished 27 Dec. 1831; re-instituted by Napoleon III., 1852.

NOBLE, an English gold coin (value 6s. 8d.), first struck in the reign of Edward III., 1343 or 1344, said to have derived its name from the excellency of the metal of which it was composed.

NOCTURNE, a name given by John Field (who died 1837) to a new and very pleasing musical composition. He was followed very successfully by Chopin, who died, 1850. The term was adopted by Mr. Whistler, the artist, for his night pieces, in which he began with line, form, and colour, 1877-8.

"NOLUMUS LEGES ANGLIÆ MUTARI" see *Bastards*, and *Merton*.

NOMINALISTS (or **CONCEPTUALISTS**), a scholastic sect, opposed to the Realists, maintain that general ideas have no existence outside our minds, and only exist by the names we give them. The founder of the sect, Jean Roscelin, a canon of Compiègne, was condemned by a council at Soissons, 1092, but the controversy was revived in the 12th century. Among the Nominalists are reckoned Abelard, St. Thomas Aquinas (partially), Occam, Hobbes, Locke, Berkeley, and Dugald Stewart. The Realists assert that general ideas are real things with positive existence.

NON-CONFORMISTS. The Protestants in England are divided into conformists and non-conformists, or, churchmen and dissenters. The first place of meeting of the latter, in England, was established at Wandsworth, near London, 20 Nov. 1572. The name of non-conformists was taken by the Puritans when the Act of Uniformity came into operation on 24 Aug. 1662 (termed "Black Bartholomew's day"), when 2000 ministers of the established religion resigned, not choosing to conform to the statute passed "for the uniformity of public prayers and administration of the sacraments;" see *Puritans*, and *Dissenters*. The laws against them were relaxed by the Toleration act, 24 May, 1689. — The *Nonconformist* newspaper

(edited by Mr. Edward Miall, *alt. M.P.*) first appeared 14 April, 1841. He died 29 April, 1881.

The non-conformists presented to Mr. Miall 10,000 guineas for his exertions on behalf of religious equality.

Meeting of bishops and dissenting ministers at Lambeth palace, to consider the alleged progress of irreligious thought. 28 July, 1873
 Mansfield college, Oxford, for Nonconformists, opened. 24 July, 1876

NONES, in the Roman calendar, were the fifth day of each month, excepting March, May, July, and October, when the *nones* fell on the seventh day.

NON-JURORS considered James II to have been unjustly deposed, and refused to swear allegiance to William III. in 1689. Among them were Sancroft, archbishop of Canterbury; Ken, bishop of Bath and Wells, and the bishops of Ely, Gloucester, Norwich, and Peterborough, and many of the clergy, who were deprived 1 Feb. 1691. Non-jurors were subjected to double taxation, and obliged to register their estates, May, 1723. They formed a separate communion, which existed till the beginning of the present century.

NON NOBIS, DOMINE! ("Not unto us, O Lord;" *etc.*, *Psalms* *cxv.* 1), a musical canon, sung as a grace at public feasts, was composed by W. Birde in 1618.

NON-RESISTANCE OATH (containing a declaration that it is unlawful to take arms against the king upon any pretence whatever), enforced by the Corporation act, 1661, was repealed in 1719.

NOOTKA SOUND (Vancouver's Island), discovered by captain Cook in 1778, and settled by the British in 1786, when a few British merchants in the East Indies formed a settlement to supply the Chinese market with furs; but the Spaniards in 1789 captured two English vessels and took possession of the settlement. The British ministry demanded reparation, and the affair was amicably terminated by a convention, and a free commerce was confirmed to England in 1790.

"NO-POPERY RIOTS," see *Gordon*. The cry was revived against the Catholic emancipation bill, 1829.

NORDLINGEN (Bavaria). Here the Swedes under count Horn were defeated by the Austrians, 27 Aug. 1634; and the Austrians and allies by Turenne in 1645.

NORE MUTINY, see *Mutinies*.

NORFOLK ISLAND (Pacific Ocean), discovered in 1774, by captain Cook, who found it uninhabited, except by birds. The settlement was made by a detachment from Port Jackson under governor Phillip, in 1788, in Sydney bay, on the south side of the island. This was at one time the severest penal colony of Great Britain. The island was abandoned in 1800, but re-occupied as a penal settlement in 1825. The descendants of the mutineers of the *Bounty* were removed to it in June, 1856, from *Pitcairn's Island* (which see).

NORICUM, see *Austria*.

NORMAL SCHOOLS (from *norma*, a rule). One for the instruction of teachers, established at Paris by a law, 30 Oct. 1794, opened 20 Jan. 1795, under the direction of La Placé, La Harpe, Hault, and other eminent men, was soon closed. Another, established by Napoleon in 1808, was closed in 1822. The plan was revived in 1826, and has been developed in England and other countries. See *Science and Art*.

NORMANDY (N. France), part of Neustria, a kingdom founded by Clovis in 511 for his son Clotaire, which, after various changes, was united to France by Charles the Bald in 837. From the beginning of the 9th century it was continually devastated by the Scandinavians, termed Northmen or Normans, to purchase repose from whose irruptions Charles the Simple of France ceded the duchy to their leader Rollo, 905. Rollo, the first duke, held it as a fief of the crown of France, and several of his successors after him, until William the seventh duke, acquired England, in 1066. It

remained a province of England till the reign of king John, 1204, when it was conquered by Philip Augustus and reunited to France. It was re-conquered by Henry V., 1418, and held by England partially till 1450. The English still possess the islands on the coast, of which Jersey and Guernsey are the principal.

NOBLES

- 922. Rollo (or Raoul), baptized as Robert.
- 927. William I. Longsword.
- 943. Richard I. the Fearless.
- 968. Richard II. the Good.
- 1027. Richard III.
- 1028. Robert I. the Devil.
- 1035. William II. (I of England).
- 1087. Robert II., Courthouse (his son), after a contest deposed by his brother.
- 1106. Henry I. (king of England).
- 1135. Stephen (king of England).
- 1144. Matilda and Geoffrey Plantagenet.
- 1151. Henry II. (king of England in 1154).
- 1189. Richard IV. (I of England).
- 1200-1204. Arthur and John of England.

NORTH ADMINISTRATION, formed by lord North, Jan. 1770, who resigned March, 1782. (Lord North entered into a league with the Whigs; which led to the short-lived Coalition ministry, 1783. He succeeded to the earldom of Guildford in 1790, and died in 1792; see *Coalition*.)

Frederick, lord North, first lord of the treasury, and chancellor of the exchequer.

Earl Gower, lord president.
 Earl of Halifax, privy seal.
 Earl of Rochford, lord Weymouth (succeeded by lord Sandwich) and earl of Hillsborough, secretaries of state.
 Sir Edward Hawke, admiral.
 Margrave of G. mby, ordnance.
 Sir Gilbert Elliot, lord Hertford, duke of Ancaster, lord Carteret, &c.

NORTHALLEETON (Yorkshire). Near here was fought the "battle of the Standard," where the English totally defeated the Scotch armies, 22 Aug. 1138. The archbishop of York brought forth a consecrated standard on a carriage at the moment when they were hotly pressed by the invaders, headed by king David.

NORTH AMERICA, see *America, United States, Indians, Canada, &c.*

NORTH AMERICAN REVIEW began at Boston, U.S., in 1815, as a rival of the Edinburgh and Quarterly Reviews. It was published at first every second month; in 1818, quarterly; in 1879, monthly, at New York.

NORTHAMPTON was burnt by the Danes in 1010. Here Henry III. proposed to found a university in 1260, and held a parliament in 1269. On 10 July, 1460, a conflict took place between the duke of York and Henry VI. of England, in which the king was defeated, and made prisoner (the second time) after a sanguinary fight which took place in the meadows below the town. Northampton was ravaged by the plague in 1537. It was seized and fortified by the parliamentary forces in 1642. A fire nearly destroyed the town, 3 Sept.

1675. Riots here because Mr. O. Bradlaugh was not elected M.P., 6 Oct. 1874, were suppressed by the military. Population, 1881, 51,881; 1891, 61,016.

NORTH BRITON, a newspaper, first published 29 May, 1762, supported by John Wilkes, M.P. for Aylesbury, and a London alderman, and very bitter against the earl of Bute's administration, accusing him of unduly favouring the Scotch.

In No. 45 (titled "Wilkes's number"), the king was charged with uttering falsehood in his speech: published 23 April, 1763

"General warrant" issued by lord Halifax against the authors, printers, and publishers 26 April, Wilkes and others arrested and committed to the Tower, and his house searched 30 April, Brought by writ of habeas corpus before chief-justice Pratt, and discharged, his arrest being regarded as illegal 6 May,

3000. damages granted to a printer for false imprisonment 6 July,

No. 45 declared to be "a scandalous and seditious libel" by parliament, and ordered to be burnt by the hangman 15 Nov.

Riot at the burning in Chancery 5 Dec.

"General warrants" declared illegal by chief-justice Pratt; 1000. damages awarded to Wilkes for seizure of his papers 6 Dec.

1000. damages obtained by Wilkes in an action against lord Halifax 10 Nov. 1769

Wilkes elected lord mayor, 8 Oct.; elected fifth time M.P. for Middlesex Oct. 1774

Allowed to take his seat Jun. 1775

Elected chamberlain of London, 1779; died, 26 Nov. 1777

NORTHBROOK CLUB. Originated in 1879 to promote comfort and social intercourse for young Indians of good families under education in England. New premises in Whitehall Gardens were inaugurated by the prince of Wales, 21 May, 1883. Lord Northbrook was an active promoter of the undertaking.

NORTH CAROLINA, NORTH GERMAN, see *Carolina, German*.

NORTH-EAST AND -WEST PASSAGES.

The attempt to discover a north-west passage was made by a Portuguese named Corte Real, about 1500. In 1586, a company was formed in London called the "Fellowship for the discovery of the North-West Passage." From 1743 to 1818 parliament offered 20,000*l.* for this discovery. In 1818 the reward was modified by proposing that 5000*l.* should be paid when either 110°, 120°, or 130° W. long. should be passed; one of which payments was made to sir E. Parry. For their labours in the voyages enumerated in the *list below*, Parry, Franklin, Ross, Back, Richardson, McClure, Narce, and McClintock were knighted.

Sebastian Cabot's voyages to the arctic regions, 1498, 1577

Sir Hugh Willoughby's and Richard Chancellor's expedition to find a north-east passage to China, in the *Edward Bonaventura*, *Bona Esperanza*, and *Bona Confidentia*, sailed from the Thames, 30 May, 1553

Richard Chancellor, in the *Edward*, reached Archangel and Moscow; the rest perished off the coast of Lapland, about 1554

Lady Franklin received a medal from the Royal Geographical Society, 30 Jan. 1850

Commanders Collinson and McClure, in the *Enterprise* and *Investigator*, sailed outward in search of Sir John Franklin 30 Jan. 1850

* Sir John Franklin died 11 June, 1847 (see Franklin); Sir E. Parry died 8 July, 1855, aged 65; and Sir John Ross died 30 Aug. 1856, aged 63.

† In 1850 he discovered Boothia Felix: on 1 June, 1847, his nephew, com. James Clark Ross, discovered the north magnetic pole, in 70° 5' 17" N. lat., and 96° 46' 45" W. long.

‡ Capt. McClure sailed in the *Investigator* in company with com. Collinson in the *Enterprise* in search of Sir John Franklin, 30 Jan. 1850. On 6 Sept. he discovered high land, which he named Barrow's land; on the 9th, other land, which he named after prince Albert; on the 30th the ship was frozen in. Entertaining a strong conviction that the waters in which the *Investigator* then lay communicated with Barrow's straits, he set out on 21 Oct., with a few men in his sledge, to test his views.

On 26 Oct. he reached Point Russell (73° 31' N. lat., 112° 14' W. long.), where from an elevation of 600 feet he saw Parry or Melville Sound beneath them. The strait connecting the Atlantic and Pacific Oceans he named after the prince of Wales. The *Investigator* was the first ship which traversed the Polar sea from Behring's straits to Barrow's island. Intelligence of this discovery was brought to England by com. Inglefield, and the Admiralty chart was published 14 Oct. 1855.

§ Capt. McClure returned to England, Sept. 1855. In 1856, 3000*l.* were paid to capt. (afterwards sir Robert) McClure, and 3000*l.* were distributed among the officers and crew. On 30 Jan. 1855, the Admiralty notified that the Arctic medal would be given to all persons engaged in the expeditions from 1818 to 1855.

NORWICH, BISHOP OF, originally East Angles, the first bishop was Felix, a Burgundian, sent to convert the East Angles about 630. The see was divided into two distinct bishoprics—Elmham, in Norfolk, and Dunwich, in Suffolk, about 670. Both sees suffered extremely from the Danish invasions, inasmuch that after the death of St. Humbert they lay vacant for a hundred years. At last the see of Elmham was revived, and Dunwich was united to it, but at last the see was moved to Thetford, where it continued till Herbert Loomings removed it to Norwich 1094. This see has given to the church of Rome two saints, and to the nation five lord chancellors. It was valued in the king's books at 809 18 1/2 p. annuum. Precentor, com. 4500 l., see *Bishopric*.

NOTABLES, French assemblies of nobles, bishops, knights and laymen. An assembly of the nobles was convened by the duke of Guise 20 Aug 1560, and by other statesmen. Calonne, the minister of Louis XVI, summoned one which met on 22 Feb 1787, on account of the deranged state of the king's finances, and again in 1788, when he opened his plan but as any reform initiated too much against private interest to be adopted, Calonne was dismissed, and soon after retired to England. Louis having lost his confidential minister, De Lamoignon, by death, called De Brienne, an ecclesiastic, to his councils. The notables were re-assembled on 6 Nov 1788. In the end, the states-general were convoked 5 Dec, and from this assembly sprang the national assembly (which see). The notables

were dismissed by the king, 12 Dec 1788.—The Spanish notables assembled and met Napoleon (conformably with a decree issued by him commanding their attendance), at Bayonne, 25 May, 1808.

NOTABIES PUBLICI, said to have been appointed by the primitive fathers of the Christian church, to collect the acts or memoirs of the lives of the martyrs in the 1st century.—*Du Fresnoy*. This office was afterwards changed to a legal employment to attest deeds and writings, so as to establish their authenticity in any other country. A statute to regulate public notaries was passed in 1801, and statutes on the subject have been enacted since.

NOVARA (N. W. Italy). Near this town the Austrian marshal Radetzky totally defeated the King Charles Albert and the Sardinian army, 23 March 1849. The contest began at 10 A.M. and lasted till late in the evening. The Austrians lost 306 killed, and had about 1850 wounded, the Sardinians lost between 3000 and 4000 men, 27 cannons, and 3000 prisoners. The king soon after abdicated in favour of his son Victor Emmanuel.

ODOMETER (from the Greek *odos*, way, and *metron*, measure), see *Pedometer*.

ODONTOLOGY (from the Greek *odontes*, teeth), the science of the teeth, may be said to have really begun with the researches of professor Richard Owen, who in 1839 made the first definite announcement of the organic connection between the vascular and vital soft parts of the frame and the hard substance of a tooth. His comprehensive work, "Odontology" (illustrated with beautiful plates), was published 1840-45. The Odontological Society was established 1856.

ODRYSEÆ, a people of Thrace. Their king Teres retained his independence of the Persians, 508 B.C. Sitalees, his son, enlarged his dominions, and in 429, aided Amyntas against Perdiccas II. of Macedonia, with an army of 150,000 men. Sitalees, killed in battle with the Triballi, 424, was succeeded by Seuthes, who reigned prosperously; Cotys, another king (382-351), disputed the possession of the Thracian Chersonesus with Athens. After 9 or 10 years' warfare, Philip II. of Macedonia reduced the Odryseæ to tributaries, and founded Philippopolis and other colonies, 343. The Romans, after their conquest of Macedonia, favoured the Odryseæ, and in 42 their king Sadalees bequeathed his territories to the Romans. The Odryseæ, turbulent subjects and often chastised, were finally incorporated into the empire by Vespasian, about A.D. 70.

ODYL, the name given in 1845 by Baron von Reichenbach to a so-called new "imponderable, or influence," said to be developed by magnets, crystals, the human body, heat, electricity, chemical action, and the whole material universe. The odyle force is said to give rise to luminous phenomena, visible to certain sensitive persons only. The Baron's "Researches on Magnetism, &c., in relation to the Vital Force," translated by Dr. Gregory, were published in 1850. Emanuel Swedenborg (died 1772) described similar phenomena.

OHM'S LAW, for determining the quantity of the electro-motive force of the voltaic battery,

was published in 1827. It is in conformity with the discovery that the earth may be employed as a conductor, thus saving the return wire in electric telegraphy.

OIL was used for burning in lamps as early as the epoch of Abraham, about 1921 B.C. It was the custom of the Jews to anoint with oil persons appointed to high offices, as the priests and kings, *Psalm* cxxxiii. 2; *1 Sam.* x. 1; *xvi.* 13. The fact that oil, if passed through red-hot iron pipes, will be resolved into a combustible gas, was long known to chemists; and after the process of lighting by coal-gas was made apparent, Messrs Taylor and Martineau contrived apparatus for producing oil-gas on a large scale, 1815.—**OIL STRAINERS**; see *Petroleum*. **OIL PASCOS**; see under *Painting*.

To supply oil to calm the waves, pipes were laid down in the port of Aberdeen; experiments with Mr. Shield's apparatus, 26 Sept.; successful experiments reported, 4 Dec. 1882. OLD BAILEY SESSIONS COURT is held for the trial of criminals, and its jurisdiction comprehends the county of Middlesex as well as the city of London. It is held eight times in the year by the royal commission of *oyer and terminer*. The judges are, the lord mayor, three aldermen who have passed the chair, the recorder and the common-venger, who are attended by both the sheriffs, and one or more of the national judges. The court-house was built in 1773, and enlarged in 1808; see *Central Criminal Court*.

During some trials in the old court, the lord mayor, one alderman, two judges, the greater part of the jury, and numbers of spectators, caught the great distemper, and died, May, 1799.

This disease was fatal to several.

OLD BELIEVERS, a Russian sect, said to number about 12,000,000, originated in a revolt against the cruelties of the patriarch Nikon, whom they named Anti-Christ, 1654. They profess to adhere to the old reading of the Slavonian sacred books, which have been superseded by the present Russian church. The czar Alexander II. granted liberty of worship to the sect in 1879.

OLD CATHOLICS, the name assumed in Germany by the members of the Roman Catholic church opposed to the dogma of papal infallibility, headed by professor Dollinger of Munich (see *Concords*, 18 July, 1870). After three days' conference at Munich, Sept. 1871, they decided to set up independent worship, first meeting in a church given them by the town council of Munich. The abbé Michaud began a similar movement in Paris in Feb. 1872. Dr. Dollinger preached in favour of union with the church of England, March, 1872. Père Hyacinthe (Charles Loyson), president of the party at Rome, issued a programme, respecting the Vatican decrees, recognising ecclesiastical authorities, demanding reform, yet opposing schism, about 5 May, 1872. The bishops of Lincoln (Wordsworth) and Ely (Browne) and the dean of Westminster (Dr. Stanley), by invitation attended the conference at Cologne, and delivered addresses, 20-22 Sept. 1872. The Old Catholics elected their first bishop, Dr. Joseph Reinkens, 1 June, 1873, who was recognised by the emperor and other powers.

OLYMPIADS, the era of the Greeks, dating from 1 July, 776 B.C., the year in which Coubus was successful at the Olympic games. This era was reckoned by periods of four years, each period being called an Olympiad, and in marking a date the year and Olympiad were both mentioned. The

computation of Olympiads ceased with the 305th, A.D. 440.

OLYMPIC GAMES, so famous among the Greeks, said to have been instituted in honour of Jupiter by the Iæon Daetyli, 1453 B.C., or by Pelops, 1307 B.C., revived by Iphitus, 884 B.C., were held at the beginning of every fifth year, on the banks of the Alpheus, near Olympia, in the Peloponnesus, now the Morea, to exercise the youth in five kinds of combats; the conquerors being highly honoured. The prize contended for was a crown made of a kind of wild olive, appropriated to this use. The festival was abolished by Theodosius, A.D. 394. In 1858 M. Zappas, a wealthy Peloponnesian, gave funds to re-establish these games, under the auspices of the queen of Greece.—**OLYMPIC THEATRE**, London, opened 1806; see *Theatres*.

OLYMPIUM (near Peloponnesus) the great temple of Jupiter, erected by Libon, of Elis, about 450, at the charge of the Elisians, after their conquest of the country. For this temple Phidias made the colossal statue of the god, in gold and ivory, 437-433 B.C.

The German explorations by Messrs. Hirschfeld and Böttcher, planned by prof. Ernst Curtius, the historian, began in Oct. 1875. Towers and other relics were found. Above 904 objects in marble, many coins, inscriptions, &c., found, 1875-8. Explorations closed, Nov. 1880.

OLYNTHUS, a city, N. Greece. To resist the predominance of Sparta, it formed a league with other cities, which was subdued in war, 382-379 B.C. It resisted Philip of Macedon, 350 B.C., by whom it was destroyed, 347. Demosthenes delivered three orations on its behalf, 349.

OMENS, see *Aurora*. Alexander the Great and Mithridates the Great are said to have studied omens. At the birth of the latter, 131 B.C., there were seen for seventy days together, two splendid comets; and this omen, we are told, directed all the actions of Mithridates throughout his life.—*Justin*.

OMMIADES, a dynasty of Mahometan caliphs, beginning with Moawiyah, of whom fourteen reigned in Arabia, 661-750; and eighteen at Cordova, in Spain, 755-1031. Their favourite colour was green.

OMNIBUS (from *omnibus*, Latin "for all"). The idea of such conveyances is ascribed to Pascal, about 1662, when similar carriages were started, but soon discontinued. They were revived in Paris about 11 April, 1828; and introduced into London by a coach proprietor named Shillbeer. The first omnibus started from Paddington to the Bank of England on Saturday, 4 July, 1829. Regulations were made respecting omnibuses by 16 & 17 Vict. c. 33 (1853). See *Cabriolets* and *Hackney Coaches*. The London Omnibus Company was established in Jan. 1856. The saloon omnibuses ran in 1857-60. In Sept. 1865, it was stated that there were then running about 620 omnibuses belonging to the General Omnibus Company, and 450 belonging to private proprietors; in 1867, about 1050 omnibuses, with 13,000 drivers and conductors.—*Sir R. Maynes*. In 1873 about 1400 omnibuses; 1897, 2,415. Dividend, Aug. 1878, 12½ per cent. An omnibus bill, one which deals with many topics.

The London Road Car Company registered 1 Jan. 1892. The number of omnibuses greatly increased, daily additions with cheap fares, some 2d. and 4d. 1889-92. Sixties of the men employed by the General Omnibus and Road Car Companies, claiming a twelve hours' day, 7 June; closed by concessions, 13 June, 1897. The Workers' co-operative omnibus company formed; new omnibuses ordered, 30 Dec. 1897.

OMNIMETER, a new surveying apparatus (combining the theodolite and level, and comprising a telescope and microscope), invented by Eckhold, a German engineer, to supersede chain measuring; announced Sept. 1869.

ONE POUND NOTES issued by the Bank of England, 4 March, 1797, withdrawn for England, 1823; re-issued for a short time, 16 Dec. 1825.

Mr. Goschen's proposal in 1891 to issue one pound notes to increase the reserve of gold at the Bank of England, was much discussed; and at a meeting of the London chamber of commerce, the consideration of the question was deferred (31 to 14), 21 Jan. 1892.

OPEN SPACES ACT (METROPOLITAN), 40 & 41 Vict. c. 35 (1877), authorises the Metropolitan Board of Works and the corporation of London to acquire open spaces for the benefit of the public. Acts consolidated in 1887.

OPERAS. Adam de la Hât, a Trouvère, surnamed "le Bossu d'Arras," born in 1240, is, as far as has yet been ascertained, the composer of the first comic opera, *Li Gieus* (Le Jeu) de Robin et de Marion. The Italian opera began with the *Il Satturo* di Cavaliere, and the *Defu* di Rinuccio, with music by Peri, about 1590. Their *Eurydice* was represented at Florence, 1600, on the marriage of Marie de Medici with Henry IV. of France. *L'Orfeo*, *Farola in Musica*, composed by Monteverdi, was performed in 1607, and is supposed to have been the first opera that was ever published. About 1669, the abbot Perrin obtained a grant from Louis XIV. to set up an opera in Paris, where, in 1672, was acted *Tamara*.

Scarlatti produced 108 operas, 1680 et seq., followed by Stradella, Lulli, and other composers. Purcell produced *Dido and Aeneas*, 1697; and many others.

Handel's *Reinold* was performed at the Haymarket; he successfully broke through previous restrictions.

OPERAS IN ENGLAND. Sir William Davenant introduced a species of opera in London in 1684. The first regularly performed opera was at York Buildings, in 1692. The first at Drury Lane was in 1705. Handel's opera, *Admetus*, was performed in 1720, and others by him were frequently performed. A few years after Gay's *Beggar's Opera*, first performed in 1727 at the Lincoln's Inn theatre. It ran for thirty three successive nights, but so offended the persons in power, that the lord chamberlain refused a licence for the performance of a second put of it entitled "Polly". By Gay's friends' subscription, his profits on its publication amounted to 1200*l*, whereas the *Beggar's Opera* gained him only 400*l*. By the exertions of Carl Rosa (Rosa) and the company formed by him since 1875, performances of the opera have been greatly promoted in England. The company was joined by Mr Augustus Harris in April 1889, and obtained the command of Drury Lane in addition to Covent Garden and the Prince of Wales's.—Carl Rosa died, aged 46, 30 April, 1890, much lamented. See *Theatre*. The Opera Company liquidating Jan 1890 arrange matters with Mr A. Harris terminating Nov 1890. The Royal English Opera House, Cambridge Circus, Shaftesbury Avenue, erected by Mr D. O'Byrne, opened, 31 Jan, 1891. See under *Theatre*.

OPERA COMIQUE, a new theatre, 299, Strand, opened 29 Oct 1870, by Mlle Dejazet and a French company. The French opera comique began 1715, destroyed by fire, about 131 persons perished, 25, 26 May, 1887, see *Paris*.

OPERA-HOUSE, THE ITALIAN, or QUEEN'S, or (since 1837) **HER MAJESTY'S THEATRE**. The original building is generally supposed to have been constructed by Sir John Vanbrugh, though Mr Pennant attributes it to Sir Christopher Wren. It was built as "the queen's (afterwards changed to king's) theatre" opened 9 April, 1705, and burnt down 17 June, 1789. The foundation of the new theatre was laid 3 April, 1790, and the house was opened 22 Sept 1791, on an improved plan, a new exterior was erected in 1820, from designs by Mr Nash, &c, &c, by Mr Budd, 1821. This theatre was totally destroyed by fire on the night of 6-7 Dec 1867. The loss of the lease, Mr Mapleson, was abt 12,000*l*, and that of Mlle Titiens was valued at 2000*l*, rebuilt, but internal arrangements not completed. Moody

and Sankey's revival meetings were held here, 18 April, 31 May, 1875. The new house was opened for Italian opera by Mr Mapleson, 28 April, 1877, see *Theatre*. The house was pulled down in 1892.—**THE ENGLISH OPERA (or LYCEUM)** was opened 15 June, 1816. It was entirely destroyed by fire 16 Feb 1830. The new English Opera-house, or Lyceum, was erected from designs by Mr S. Beazley, and opened in July, 1834; see *Theatre* and *National Opera-house*.

OPHICLEIDE, the keyed bassoon, said to have been invented by Frichot, a Frenchman, in London, between 1791 and 1800.

OPHTHALMIA, general term for disease of the eye.

Ophthalmic hospitals were founded in London, 1804, and 1843. The Ophthalmological Society of Great Britain was founded in 1880 mainly by Mr W. Bowman, the first president. He died 30 March, 1892, having greatly advanced ophthalmic surgery.

OPHTHALMOSCOPE, an apparatus for inspecting the interior of the eye, invented by professor H. Helmholz, and described by him in 1851.

OPIUM, the juice of the white poppy, was known to the ancients, its cultivation being mentioned by Homer, and its medicinal use by Hippocrates. It is largely cultivated in British India, and was introduced into China by our merchants, which led eventually to the war of 1839, the importation being forbidden by the Chinese government. The revenue derived from opium by the Indian government in 1862 was about 7,800,000*l*, in 1874, 8,000,000*l*, in 1880, about 10,000,000*l*, but it has since declined. Laudanum, a preparation of opium was employed early in the 17th century. A number of alkaloids have been discovered in opium: narcotine by Derosne and morphia by Sertuener, in 1803. A society for suppressing the opium trade held meeting in London, 17 Jan 1881, and since.

The Chinese government derives a large revenue from the duty on imported opium which was fixed by the treaty of 1843. The plant is now largely grown in China.

Sir Joseph Parnes resolution condemning the cultivation of opium in India, the traffic in the drug and the revenue was adopted by the house of commons (160-130) 10 April 1891, this caused much excitement in India.

OPORTO (W Portugal), the ancient *Celle*, one of the most impragnable cities in Europe. After being held at various times by the Goths and Moors, Oporto was finally acquired by the Christians 1092. Oporto is the mart of Portuguese wine known as "Port." A chartered company for the regulation of the port-wine trade was established in 1756. The French, under marshal Soult, were surprised here by lord Wellington, and defeated in an action fought 12 May, 1809. The Miguelites besieged Oporto and were repulsed by the Pedroteis, with considerable loss, 19 Sept 1832. The Oporto wine company was abolished in 1834, but re-established by a royal decree, 7 April, 1838. An international exhibition was opened here by the king, 18 Sept. 1865. Population, 1878, 105,838, see *Portugal*.

The Baguet theatre burnt, panic, about 200 lives lost; 30 March 1888.

Business paralyzed by the strike of masters and men concerned with the wine trade, through the government favouring speculators for a monopolizing company, riots quelled by the military about 30 May, et seq 1889.

 Several banks stop payment about 15 March, 1892.

OPPORTUNISTS, a name given to French politicians (especially the ultra-liberals), who suspend agitation for their peculiar opinions till a suitable opportunity comes; among these Gambetta was prominent, 1876-82. See *France. Opportunism* in England is defined as the modification of political policy as the necessities of the time dictate, Oct. 1891. See *Trimmer*.

OPTICS, a science studied by the Greeks; and by the Arabians about the 12th century. See *Light*.
 Burning lenses known at Athens 494
 A treatise on optics doubtfully attributed to Euclid, about 300
 The magnifying power of convex glasses and concave mirrors, and the prismatic colours produced by angular glass, mentioned by Seneca, about a D. 50
 Treatise on optics by Ptolemy, 120
 Two of the leading principles known to the Platonists 300
 Greatly improved by Alhazen, who died 1038
 Hints for spectacles and telescopes, given by Roger Bacon 1280
 Spectacles said to have been invented by Salvinus Armatus, of Pisa before 1300
 Camera obscura said to have been invented by Baptista Porta 1560
 Telescopes invented by Leonard Digges about 1572
 Kepler publishes his "Dioptrice" 1611
 Telescope made by Jansen (said also to have invented the microscope), about 1600, and independently, by Galilei about 1630
 Microscope, according to Huyghens, invented by Drebbel about 1621
 Law of refraction discovered by Snellius 1624
 Inflection of light discovered, and the undulatory theory suggested by Grimaldi 1665
 Reflecting telescope, Jas. Gregory, 1663; Newton 1666
 Motion and velocity of light discovered by Roemer, and after him by Cassini 1667
 His velocity demonstrated to be 190 millions of miles in sixteen minutes 1669
 Double refraction explained by Bartholinus 1669
 Cassegrainian reflector 1673
 Newton's discoveries in colours, &c. 1674
 Telescopes with a single lens by Tschirnhausen, about 1690 1690
 Polarization of light and undulatory theory discovered by Huyghens about 1692
 Structure of the eye explained by Felst about 1700
 Aberration of light discovered by Bradley 1707
 Achromatic telescope constructed by Mr. Hall (but not made public) 1733
 Constructed by Dollond, most likely without any knowledge of Hall's telescope 1757
 Herschel's great reflecting telescope erected at Slough 1780
 Dr. T. Young's discoveries (undulatory theory, &c.) 1800-3
 Camera lucida (Dr. Wolfston) 1807
 Stokes' polarization of light by reflection about 1808
 Fresnel's researches on double refraction, &c. 1817
 Optical discoveries of Wheatstone 1838 et seq.
 Large telescope constructed by Lord Rosse 1845
 Arago's telescope of polarized light, &c. 1847-53
 Sir H. Brewster, optical researches (see *Kaleidoscope*, *Photography*) 1814-57
 The microscopes constructed and used by Kirchoff and Dorn 1861

OPTIC NERVES are said to have been discovered by N. Varoli, a surgeon and physician of Bologna, about 1538.—*News. Diet.*

OPTIMISM (from *optimus*, the best), the doctrine that everything which happens is for the best, in opposition to *Pessimism* (from *pessimus*, the worst). The germ of optimism is to be found in Plato, and in St. Augustin, and other fathers; and has been especially propounded by Malebranche and Leibnitz, and adopted by Pope, Bolingbroke, Rousseau, and others. Optimism as expressed in the term, "the best of all possible worlds," is ridiculed by Voltaire (1694-1778) in his "Candide." The term *meliorism* (from *melior*, better) has been lately introduced. See *Pessimism*.

"**OPTION**," a term given at the time to the permission given to the inhabitants of Alsace and Lorraine by the German government to choose, before 30 Sept. 1872, whether they would quit their country or become German subjects. Great numbers emigrated into the French territories. The "option" of archbishops respecting their claims on a benefice becoming void on the creation or translation of a bishop, was abolished in 1845.

ORACLES, a term applied to revelations made by God to man. They were given to the Jews at the Mercy-seat in the tabernacle; see *Exod.* xxv. 18-22. The Holy Scripture are the Christian "oracles," Rom. iii. 2; 1 Pet. iv. 11. King Abaziah sent to consult the oracle of Baalzebub at Ekron about 850 B.C. The Greeks consulted especially the oracles of Jupiter and Apollo (see *Dodona* and *Delphi*); and the Italians those of Faunus, Fortune, and Mars.

ORAN, Algeria (N. Africa), a Moorish city several times captured by the Spaniards; definitively occupied by the French in 1831, who have since added docks, &c.

ORANGE, a principality in S.E. France, formerly a lordship in the 9th or 10th century. It has been ruled by four houses successively: that of Giraud Adhemar (to 1174); of Baux (1182 to 1393); of Chalon (to 1530); and of Nassau (1530 to 1713); see *Nassau*. Philibert the Great, prince of Orange, the last of the house of Chalon, having been wronged by Francis I. of France, entered the service of the emperor Charles V., to whom he rendered great services by his military talents. He was killed at the siege of Florence, 3 Aug. 1530. He was succeeded by his nephew-in-law, René of Nassau; see *princes of Orange under Holland*. The eldest son of the king of Holland is styled the prince of Orange, although the principality was ceded to France in 1713. See *Araucio*.

ORANGE FREE STATE, a republic in South Africa, founded by Boers from Cape Colony in 1836. The British government proclaimed its authority over this territory, on 3 Feb. 1848, but declared it independent, 23 Feb. 1854. A constitution proclaimed, 10 April, 1854; revised, 1866, and 1879. The able president, sir John Henry Brand, first elected, 1863, died, 14 July, 1888. President Reitz elected, 11 Jan. 1889. Defensive treaty with the Transvaal, about 13 March, ratified 25 May, 1889. Concession granted to the Cape Government to construct a railway to Bloemfontein, the capital, May, 1889; railway opened at Bloemfontein, 17 Dec. 1890. Population, 1885, 133,378.

ORANGEMEN. The "Battle of the Diamond," 21 Sept 1795 (see *Diamond*), and the treachery experienced by the Protestants on that occasion, convinced them they would become an easy prey to the Roman Catholics, from their small numbers, unless they associated for their defence, and consequently the Orange Society was formed in 1795. The first Orange lodge was formed in Armagh, but the name of Orangemen already existed. An Orange lodge was formed in Dublin, the members published a declaration of their principles (the maintenance of church and state under the house of Brunswick) in Jan 1798. After 1813 Orangemen declined, but revived again in 1827, when the duke of Cumberland became grand-master, and it is stated that in 1836 there were 145,000 Orangemen in England, and 125,000 in Ireland. After a parliamentary inquiry Orange clubs were broken up in conformity with resolutions of the house of commons, but were revived in 1845—1849. In Oct 1857, the lord chancellor of Ireland ordered that justices of the peace should not belong to Orange clubs. The Orangemen in Canada were greatly excited during the visit of the prince of Wales in Sept 1860. Mr Wm Johnston, a grand master, convicted of violating the Party Processions Act, was elected M P for Belfast, Nov 1869. See *Belfast*.

ORANGE. The sweet, or China orange, was first brought into Europe from China by the Portuguese, in 1547, and it is asserted that the identical tree, whence all the European orange-trees of this sort were produced, is still preserved at Lisbon, in the gardens of one of its nobility. Orange-trees were first brought to England, and planted, with little success, in 1595; they are said to have been planted at Biddington park, near Crofton, Surrey. The duty on imported oranges was repealed in 1860.

ORATOR HENLEY. An eccentric English gentleman of some talents, in 1726 opened his "oratory," a kind of chapel in Newport-market, where he gave lectures on theological topics on Sundays, and on other subjects on Wednesdays, every week. Novelties procured him many hearers, but he was too imprudent to gain any permanent advantage. He removed his oratory to Clie-market, and sank into obscurity previously to his death, in 1756.

ORATORIANs (from the Latin *orare*, to pray), a regular order of priests established by St Philip Neri, about 1564, and so called from the oratory of St Jerome, at Rome, where they prayed. They had a foundation in France, commenced by Guillaume Gibeau and Pierre de Berulle (afterwards cardinal), 1612, approved by pope Paul V 1613. The rev Frederick Faber and others, as "Lithers of the Oratory," established themselves first in King William-street, Strand, in 1838, and afterwards at Brompton.

ORATORIO, a kind of musical sacred drama, the subject of it being generally taken from the Scriptures. The origin of our oratorios (so named from having been first performed in an oratory), is ascribed to St Philip Neri, about 1550. The first true oratorio, Emilio del Cavaliere's "Rappresentazione," was performed at Rome in 1600. He was followed by Giovanni Carissimi, Alessandro Scarlatti, &c. The first oratorio in London was performed in Lincoln's-inn theatre in Portugal-street, in 1712. Handel's oratorio of "Israel in Egypt" was produced in 1738, and the "Messiah" in 1741. Haydn's "Creation" in 1798, Beethoven's "Mount of Olives," 1803, Spohr's "Last Judgment" (pro-

perly "Things"), 1825, Mendelssohn's "St Paul" in 1836, and "Elijah" in 1846, Costa's "Eli," 1865, "Naaman," 1864, S Bennett's "Woman of Samaria," 1867, Benedict's "St Peter," 1870, Macfarren's "John the Baptist," 1873, "Reurrection," 1876, and "Joseph," 1877. Dr P Arneson's "Hezekiah," 1878, professor Macfarren's "King David," 1883.

ORCHIDS a natural order of plants of a very peculiar organization, recently much cultivated. In 1880, a great establishment for their cultivation was set up at St Albans by Mr Bander, "the orchid king," patronised by the Rothschilds who introduced him to the queen at Waddesdon Manor, 14 May, 1890.

ORCHOMENUS, a small Greek state in Boeotia, was destroyed by the Thebans, 367 B.C., restored by Philip II of Macedon, 354, and given up by him to Thebes, 346.

ORDEAL was known among the Greeks and Jews (Num v 2). It was introduced into England by the Saxons. A prisoner who pleaded not guilty might choose whether he would put himself for trial upon God and his country, by twelve men, as at this day, or upon God only. The trial by ordeal was abolished in 1218.

ORDER OF THE CORPORATE RE-UNION, virtually a new episcopal church, said to arise out of the Christian Unity Association (which see). It proposed to form four stations, (Lancaster, York, Caenlon, and St Andrews,) with rectors and provincials, announced 11 Sept 1877.

ORDERS, see *Knighthood*.

ORDERS IN COUNCIL were issued by the British government 7 Jan and 11 Nov 1807, prohibiting trade with the ports occupied by the French, being reprisals for Napoleon's *Berlin decree* (which see). They greatly checked the progress of manufactures in this country, and caused much distress till their removal in 1814.

ORDINANCES, see *Ordinances, Self-Denying Ordinances*.

ORDINATION of ministers in the Christian church began with Christ and his apostles, see *Mark* in 14, and *Acts* vi and xiv 23. In England in 1549 a new form of ordination of ministers was ordered to be prepared by a committee of six prelates and six divines.

ORDNANCE OFFICE. Before the invention of guns, this office was supplied by officers under the following names: the bowyer, the cross-bowyer, the pikeater, or purveyor of helmets, the armourer, and the keeper of the tents. Henry VIII placed it under the management of a master general, a lieutenant, surveyor, &c. The master-general was chosen from among the first generals in the service of the sovereign. The appointment was for mer, for life, but since the restoration, was held *durante bene placito*, and not unfrequently by a cabinet minister—Beaton. The letters patent for this office were revoked 25 May, 1855, and its duties vested in the minister of war, lord Panmure. The last master-general was lord Fitzroy-Somers, afterwards lord Buglan. The revival of the office recommended by the Ordinance Commission (see under *Army*, 1886).

ORDNANCE SURVEY. The trigonometrical survey of England was commenced by gen Roy, in 1784, continued by col Colby, and completed by col (aft. sir Henry) James in 1856. The publication of the maps (scale 7 inches to a mile),

commenced in 1819, under the direction of col. Mudge, and was completed in 1862; a large part of these maps have been coloured geologically. The survey of Ireland (6 inches to a mile) has been completed and published; that of Scotland, completed Nov. 1822. By the survey act, passed 12 May, 1870, the ordnance survey was transferred to the Board of Works, and by an act passed in 1880, to the Board of Agriculture, beginning 1 April, 1890. Directors, Lieut.-gen. John Cameron, succeeded sir Henry James in 1875, died 30 June, 1878; col. A. C. Cooke; col. R. H. Stothard, 1885. In 1892, several sets of maps were in course of publication or preparation.

ORDONNANCES, the laws enacted by the Capetian kings of France previous to 1789. They began with "in the name of the king," and ended with "such is our good pleasure." The first in French is dated 1287 (Philip IV.). The publication of these "ordonnances," ordered by Louis XIV., 1706, is still in progress. The "ordonnances" of Charles X., promulgated 26 July, 1830, led to the revolution.

OREGON TERRITORY (N. America), is said to have been visited by Drake in 1579. Lieut. Broughton took possession of part of it for Great Britain in 1792. In 1810 a settlement named Astoria, was founded by a New York Company. Oregon was occupied by the English in 1814, but was claimed by the United States government, to whom the greater part was ceded, after much negotiation, by the treaty of 12 June, 1846. Oregon was made a territory in 1848, and admitted as a state, Feb. 1859. Capital, Salem. Population, 1880, 174,768; 1890, 313,767.

By the fall of a train through a broken bridge: in Wasco county 20 men were killed 1 Feb. 1890
 Disastrous storm on the Willamette river, 6 Feb.; much distress at Salem and Portland

about 7 Feb.
 The overcrowded Pacific train wrecked on the long trestle bridge over Lake Labell, 4 lives lost and many injured 12 Nov.

ORGAN, a development of the pandean pipes; the "organ" in *Gen. iv.* 21 should be translated pipe. The invention is attributed to Ctesibius, a barber of Alexandria, about 250 B.C.; and to Archimedes, about 220 B.C. The organ was brought to Europe from the Greek empire, and was applied to religious devotions in churches, about A.D. 657.

—*Bellarmino*. Organs were used in the western churches by pope Vitalianus, in 658.—*Ammonius*. It is affirmed that the organ was known in France in the time of Louis I., 815, when one was constructed by an Italian priest. The organ at Haarlem is one of the largest in Europe; it has 60 stops and 8000 pipes. At Seville is one with 110 stops and 5300 pipes. The organ at Amsterdam has a set of pipes that imitate a chorus of human voices. Of the organs in ENGLAND that at St. George's Hall, Liverpool, by Mr. Willis, was the largest; next in order that at York minster, and that in the music-hall, Birmingham. In London, the largest was, perhaps that of Spitalfields church; and that in Christ Church was nearly as extensive. The erection of the famous Temple organ was completed for by Schmidt and Harris; after long disputes, the question was referred to vote, and Mr. Jefferies, afterwards chief justice, gave the casting vote in favour of Schmidt (called Father Smith), about 1684. A monster organ was erected in the Crystal Palace, Sydenham, in June, 1857. The organ, by Willis, at the Royal Albert Hall, is now said to be the largest in the world; 1873. A larger proposed for a cathedral in Long Island, North America,

1880. A noble organ (by Bryceson), with many appliances, opened in the hall, Primrose-hill-road, London, N. Jan. 1876.

Barrel organs are said to have been first made early in the 18th century. The finest was the *Apollonion* (which see).

ORGANIC SYNTHESIS, see *Chemistry*.

ORIEL COLLEGE (Oxford), founded in 1326, by Adam de Broms, archdeacon of Stow, and almoner to king Edward II. This college derives its name from a tenement called *F.Oriel*, on the site of which the building stands.

ORIENTAL INSTITUTE, Woking, Surrey, established by high caste Hindoos, Mahometans, and Sikhs, for religious and educational purposes, about 1884. A mosque was erected here, Aug. 1889.

ORIENTALISTS. The first International Congress of these scholars was held at Paris, 1 Sept. 1873; M. Léon de Roissy, the founder, president. The second Congress met at the Royal Institution, in London, 14-19 Sept. 1874, Dr S. Birch, president. The third Congress met at St. Petersburg, 1 Sept. 1876; the fourth at Florence, Sept. 1878. The fifth met at Berlin, 12-17 Sept. 1881, M. Dittman, president. The sixth at Leyden, 10 Sept. 1883. The seventh, Vienna, 27 Sept. 1886. Eighth, Stockholm (president king Oscar II.), 2-7 Sept. 1890. Independent, London, 1-10 Sept. 1891. Ninth in London, 5-12 Sept. 1892. See *Asiatic Societies*.

ORIENTAL STUDIES; Professor Max Müller, in the presence of the prince of Wales, at the Royal Institution, gave a discourse to inaugurate the establishment of a school for modern oriental studies by the Imperial Institute, in union with University College and King's College, London 11 Jan. 1890

ORIFLAMME, see *Auriflamme*.

ORIGENISTS pretended to draw their opinions from the writings of Origen, who lived 185-253. They maintained that Christ was the son of God in no other way than by adoption and grace; that souls were created before the bodies; that the sun, moon, stars, and the waters that are under the firmament, have souls; that the torments of the damned shall have an end, and that the fallen angels shall, after a time, be restored to their first condition. They were condemned by councils, and the reading of Origen's work was forbidden.—*Burke*. These doctrines were condemned by the council of Constantinople in 553.

"ORIGIN OF SPECIES, BY MEANS OF NATURAL SELECTION" by Charles Robert Darwin, F.R.S., first published, 24 Nov. 1859. He was born 12 Feb. 1809, died 19 April, 1882. See *Species*.

ORION STEAM-SHIP. On 18 June, 1850, this splendid vessel, bound from Liverpool to Glasgow, struck on a sunken rock, northward of Portpatrick, within a stone's throw of land, and instantly filled. Of two hundred passengers more than fifty were drowned.

ORISSA, an ancient kingdom of India, now a province of N. W. Bengal, conquered by Clive in 1755, and nearly all acquired by the company in 1765. It suffered much by famine in 1779, and 1792-3, and more especially from the end of 1865 to Nov. 1866, when it is said about 750,000 persons perished. The government and officials were censured for neglect and want of forethought. It is also said that during a hurricane in Oct. 1836, 22,500 persons were drowned.

ORKNEY AND SHETLAND ISLES (North of Scotland), were conquered by Magnus III. of Norway, 1099, and were ceded to James III. as the dowry of his wife Margaret, in 1469. The Orkneys were the ancient Orkades; united with Shetland, they now form one of the Scotch counties. The bishopric of Orkney, founded by St. Serenus early in the 5th century, some affirm by St. Columba, ended with the abolition of episcopacy in Scotland, about 1690; see *Bishops in Scotland*.

ORLEANS (a city in central France), formerly *Aurelianensis*; gave title to a kingdom, 491, and afterwards to a duchy, usually held by one of the royal family. Attila the Hun, besieging it, was defeated by Aetius and his allies, 451. It was besieged by the English under earl of Salisbury and Suffolk, 12 Oct. 1428, bravely defended by Gaucour (as its fall would have ruined the cause of Charles VI. king of France), and relieved by the heroism of Joan of Arc, afterwards surnamed the Maid of Orleans, 29 April, 1429, and the siege was raised 8 May; see *Joan of Arc*. (The 430th anniversary was celebrated 10 May, 1868; the emperor and empress being present.) During the siege of Orleans, Feb. 1563, the duke of Guise was assassinated.

After nine hours' severe fighting, Orleans captured by the Germans, under general Von der Tann. More than 4000 prisoners were taken. The loss on both sides was heavy. About 35,000 on each side were engaged. The city was made to pay a war contribution of 50,000. 11 Oct. 1870

Von der Tann and the Bavarians defeated by generals D'Aurelle de Paladines and Pallières, and Orleans re-taken. The Germans acknowledged the loss of about 700 men and 1000 prisoners, chiefly wounded. The French asserted the number of both to be higher and were much cheered with their victory. The French loss was heavy. The chief conflict took place between Cosmaire and Beaumont. 9, 10 Nov. "

Seven conflicts at Bazoches and Chevilly, near Orleans, between a part of the army of the Loire and prince Frederick Charles and the grand-duke of Mecklenburg. 24 Dec. "

A battle, during which the suburbs were stormed, and about 10,000 unwounded prisoners, 77 guns, and four gunboats taken. The French retired; Orleans re-taken by the Germans. 5 Dec. "

DUKES.

Louis contended for the regency with John the Fearless, duke of Burgundy, by whose instigation he was assassinated in 1407.

Charles taken prisoner at Agincourt, 1415; released, 1440, died, 1465.

ouis, became Louis XII. of France in 1498, when the duchy merged in the crown.

Bourbon Brionne.—Philip, youngest son of Louis XII., born, 1540; died, 1701.

ORMULUM, a metrical version of the Gospels and Acts, in early English, made by Orm, an ecclesiastic, in the 12th century, printed at Oxford in 1852, from a MS. in the Bodleian.

ORNITHOLOGY, see *Birds*.

ORNITHORHYNCHUS, the duck-billed platypus, or water-mole, a singular compound of the mammal and the bird, a native of Australia, was first described by Dr. Shaw, in 1819.

OBOQUELETA, Navarre, N. Spain. Here don Carlos, calling himself king Carlos VII., grandson of don Carlos, brother of Ferdinand VII., commanding about 4000 men, was suddenly attacked by general Moriones with about 2000, and defeated after a short conflict, 4 May, 1872. He fled, leaving 757 prisoners and 38 dead.

ORPHAN-HOUSES. The emperor Trajan first formed establishments for this purpose. Pliny relates in his Panegyric that he had caused 5000 free-born children to be sought out and educated, about A.D. 105. Orphan houses properly so called are mentioned for the first time in the laws of the emperor Justinian. At the court of Byzantium the office of inspector of orphans, *orphanothropes*, was so honourable that it was held by the brother of the emperor Michael IV. in the 11th century; see *Foundling Hospitals*.

ORRERY, a planetary machine to illustrate and explain the motions of the heavenly bodies, appears to have been coeval with the clepsydra. Ptolemy devised the circles and epicycles that distinguish his system about 130. The planetary clock of Finis was begun 1553. The planetarium of De Rheda was formed about 1650. The planetarium, now termed the Orrery, it is said, was constructed by Rowley, after a pattern devised by the clock-maker, George Graham, at the expense of Charles Boyle, earl of Orrery, about 1715. A large "planetarium" was constructed by the rev. Wm. Forster, for the Royal Institution, London, about 1803. An excellent planetarium constructed in London by signor N. Perini, was exhibited in Dec. 1873.

ORRINI'S PLOT against the emperor Napoleon III.; see *France*, Jan. 1858.

ORTHEZ or **ORTHEZ** (S. France), once capital of the principality of Bearn. Near it the British and Spanish armies, commanded by Wellington, defeated the French, under Soult, 27 Feb. 1814. The battle of Toulouse soon followed.

ORTHOPÆDIC HOSPITALS, for the cure of club-foot, spinal curvatures, &c.: National, Great Portland street, founded, 1836; Royal, Hanover-square, 1838; City, 1851.

OSBORNE HOUSE (Isle of Wight), was purchased by the queen in 1845, and rebuilt by Mr. Gubbitt.

OSMIUM, one of the heaviest known metals, discovered in platinum ore by Tennant in 1803.

OSNABURG (N. Germany), made the seat of a bishopric, by Charlemagne, near the end of the 8th century. After the treaty of Westphalia in 1648, the bishop was a Roman Catholic and Protestant alternately, the latter being chosen from the house of Brunswick. Frederick, duke of York, the last bishop, resigned in 1803, when the lands were annexed to Hanover. He died 5 Jan. 1827.

OSSEY (S. E. Ireland), BISHOPRIC OF, was first planted at Salgar, about 403; translated to Aghadoe, in Upper Ossery, in 1052; and to Killybegny about the end of the reign of Henry II. It was united to Ferns and Leighlin in 1835.

OSTEND (Belgium). An important sea-port in the 17th century, was destroyed by the sea 1334, rebuilt and afterwards walled by Philip the Good, the duke of Burgundy, 1445; sustained a siege by the Spaniards, from 5 July, 1601, to Sept. 1604, when it honourably capitulated. On the death of Charles II. of Spain, the French seized Ostend; but in 1706, after the battle of Ramillies, it was retaken by the allies. It was again taken by the French in 1792, but restored in 1795. In 1795, the French gave this town for the empress-queen Maria Theresa. In 1799, the French once more took Ostend, which they evacuated in 1799, but regained in 1800. The English destroyed the works of the French, but the wind shifting before they

could re-embark, they surrendered to the French, 19 May, 1798. The United East India company, established 1723, was dissolved 1731. Ristons attacks on British Bahamians landing fish qualified with bloodshed; intervention of the king; peace restored 23-30 Aug. 1887. Population, 1860, 24,712.

OSTIA, a Roman port, at the mouth of the Tiber, said to have been founded by Ancus Marcius about 627 a.c.

OSTRACISM (from the Greek *ostrakon*, a potsherd or shell), a mode of proscription at Athens, is said to have been first introduced by the tyrant Hippia; others ascribe it to Cleisthenes, about 510 a.c. The people wrote the names of those whom they most suspected upon small shells; these they put in an urn or box and presented to the senate. Upon a scrutiny, he whose name was oftener written was sentenced by the council to be banished from his altar and hearth. 6000 votes were required. Aristides, noted for his justice, and Miltiades, for his victories, were thus ostracised. The custom was abolished by ironically proscribing Hyperbolus, a mean person, about 338 a.c.

OSTRICH (the *struthio* of the ancients), a native of Africa (see Job xxxix. 14). Ostriches were hatched and reared at San Donato, near Florence, 1850-60; and at Trecco abbey, the seat of Augustus Smith, in the Scilly isles, 1866.

OSTROGOTHS, or **EASTERN GOTHS**, were distinguished from the *Vimigotus* (Western Goths) about 330. After ravaging eastern Europe, Thrace, &c., their great leader, Theodoric, established a kingdom in Italy, which lasted from 493 to 553; see *Italy*.

OSTROLENKA (Poland). Near here the French defeated the Prussians, 16 Feb. 1807. In another battle here between the Poles and Russians the slaughter was immense, but the Poles remained masters of the field, 26 May, 1831.

OTAGO, see *New Zealand*, 1848, 1861, 1866.

OTAHUTEI or **TAHITI**, an island in the S. Pacific Ocean, seen by Byron in 1765, and visited in 1767 by captain Wallis, who called it George the Third Island. Captain Cook came here in 1768 to observe the transit of Venus; sailed round the whole island in a boat, and stayed three months; he visited it twice afterwards. See Cook. Omai, a native of this island, was brought to England by Cook, and carried back in his last voyage. In 1799, king Pomare ceded the district of Matavai to some English missionaries. Queen Pomare was compelled to put herself under the protection of France, 9 Sept. 1843. She retracted, and Otahutei and the neighbouring islands were taken possession of by admiral Dupetit-Thouars in the name of the French king, Nov. 1843. The French imprisoned Mr. Pritchard, the English consul, 5 March, 1844, but the act was censured in France.

Queen Pomare IV., born, 23 Feb. 1819; succeeded her brother, Pomare III., in Jan. 1867; died 18 Sept. 1877, having reigned 20 years. By consent of her successor the island was formally annexed to France, 29 June, 1880. The queen arrived at Paris, 27 Feb. 1884.

OTHEROSCOPE (from *allos*, I propel), apparatus invented by Mr. W. Crookes, for studying molecular motion, the effects of radiation; described by him, April, 1877.

OTOLOGY, the science of the ear. A congress of Otologists met at Brussels, Sept. 1888.

OTTAWA (formerly **BYTOWN**), on the river Ottawa, was appointed to be the capital of Canada by the queen in August, 1858. The executive council met here 22 Nov. 1865, and the Canadian parliament was, for the first time, opened here by the governor-general, Lord Monck, on 8 June, 1866. Mr. Darcy McGee, M.P. for Montreal (once an Irish agitator, but afterwards exceedingly loyal), was assassinated on his return from parliament, 7 April, 1868. Fenians were suspected, and the town was put in a state of siege. Whelan, convicted of the murder, 15 Sept. 1868, was executed Feb. 1869. A dominion exhibition was opened here 24 Sept. 1879. The duke and duchess of Connaught warmly received 4 June, 1890. Population in 1861, 14,669; in 1871, 21,545; in 1881, 27,412; 1891, estimated 35,000.

OTTERBURN (Northumberland). In 1388 the Scotch besieged Newcastle and were driven off by Henry Percy (Hotspur), son of the earl of Northumberland. Percy pursued them to Otterburn, where a battle was fought on 10 Aug. in which the earl of Douglas was killed and Percy taken prisoner. On this battle the ballad of *Cherry Chase* is founded.

OTTOMAN EMPIRE, see *Turkey*, 1299.

OUDE or **ODDH** (North India), formerly a vice-royalty held by the vizier of the great mogul. About 1760, it was seized by the vizier Sujah-ud-Dowlah, ancestor of the late king.

OUDENAARDE (Belgium). Here the English and allies under the duke of Marlborough and prince Eugene thoroughly defeated the French belligerents, 11 July, 1708.

OULART (S.E. Ireland). Here 5000 Irish insurgents attacked the king's troops, in small numbers, 27 May, 1798. The North Cork militia, after great feats of bravery, were cut to pieces, five men only escaping.—*Mugraws*.

OUNCE (from *uncia*), the sixteenth part of the pound avoirdupois, and twelfth of the pound troy. Its precise weight was fixed by Henry III., who

decreed that six English ounces should be equal to four grains of wheat; that twelve of these ounces should be a pound; and that eight pounds should be a gallon of wine, 1233.

OURIQUE (Portugal), where Alfonso, count or duke of Portugal, is said to have encountered five Saracen kings and a great army of Moors, 25 July, 1139, and signally defeated them; and then to have been hailed the first king. Lisbon, the capital, was taken, and he soon after was crowned.

OUTLAW, one deprived of the benefit of the law, and out of the sovereign's protection; a punishment for such as being called in law do contemptuously refuse to appear. In the reign of Edward III. all the judges agreed that none but the sheriff only having lawful warrant therefor, should put to death any man outlawed.—*Concil.* Outlawry in civil proceedings was abolished by 42 & 43 Vict. c. 59, 15 Aug. 1879.

OUZEL GALLEY SOCIETY. In 1700, the case of the *Ouzel Galley*, a ship in the port of Dublin, excited great legal perplexity, and was referred to an arbitration of merchants, whose prompt decision was highly approved. This led to the present society, founded in 1705.

OVATION, an inferior triumph which the Romans allowed those generals of their army whose victories were not considerable. Publius Posthumus Tubertus was the first who was decreed an ovation, 503 B.C. A sheep (*ovis*) was offered by the general instead of a bull.

OVERLAND MAIL, see *Waghorn*. The overland mail travelled first through the Genis tunnel to Brindisi, saving 24 hours, 5 Jan. 1872. Communication between the East and West has been greatly facilitated by the opening of the Suez Canal, 1869, and the railways between the Atlantic and Pacific oceans; by means of the Canadian Pacific railway the China and Japan mails were conveyed from Yokohama to London in 25 days, arriving in London . . . 13 May, 1892

OVERSEERS of the poor for parishes were appointed in 1601; see *Poor Laws*.

OWENS COLLEGE, Manchester, founded by means of a bequest of 100,000*l.* by John Owens merchant, who died in 1846. A new constitution was obtained in 1870, and the duke of Devonshire, president, laid the first stone of the new building, 23 Sept. 1870; and opened it, 8 Oct. 1873. Mr. E. R. Langworthy bequeathed 10,000*l.* to develop the chair of experimental physics, 1874. The college proposed as a university, July 1876-8. See *Victoria University*.

OWHYHEE or **HAWAII**, an island in the N. Pacific Ocean, discovered Dec. 1778, by capt. Cook. On 14 Feb. 1779, he here fell a victim to a sudden resentment of the natives. A boat having been stolen by one of the islanders, the captain went on shore to seize the king, and keep him as a hostage till the boat was restored. The people would not submit to this insult, and their resistance brought on hostilities, and captain Cook and some of his companions were killed. Great progress has been recently made in civilisation here; and an order of nobility and a representative assembly were instituted in 1860. The population then was about 120,000; about 60,000 in 1878; a railway opened in 1878. See *Sandwich Isles* and *Leprosy*.

Eruption of the volcano Mauna Loa occurred, about 40 miles off lava, 8 Feb.; there have been frequent outbreaks of volcanoes on the island with occasional shocks of earthquakes; earthquakes shocks 3 May, 1887 at sea; 167 persons killed.

OWNERS OF LAND, *see* *Donations*.

OXALIC ACID, which exists in several plants, especially in sorrel, is now abundantly obtained, for use in the arts, from sawdust acted upon by caustic potash or soda, according to Dr Dale's process, patented in 1862.

OXFORD, an ancient city, restored by king Alfred, who resided here and established a mint, &c., about 879. Returns one M.P. by Act of 1885. *See* *Legislation*.

OXFORD, PROVISIONS OF, for several political reforms, enacted by the mad parliament June 1283 several times annulled and confirmed during the "barons' war"

OXFORD'S ACT, BISHOP OF, see *Diocese of Oxford*

OXFORD'S ASSAULT ON THE QUEEN
Edward Oxford, a youth who had been a servant in a public-house, discharged two pistols at queen Victoria and prince Albert, as they were proceeding up Constitution Hill in an open phaeton from Donnington palace, 20 June, 1845. He stood within a few yards of the carriage, but neither her majesty nor the prince was injured. Oxford was tried at the Old Bailey (10 July), and was adjudged to be insane, and sent first to Bethlehem hospital, next to Broadmoor, and set at liberty in 1863, on condition of going abroad

OXUS (the Persian and Turkish Diphoun, local name, Amou Darya), a river of Central Asia, supposed to have changed its course before 1000 A.D., and to have resumed its ancient bed in 1878

OXYGEN, a gas (named from the Greek *oxys*, sharp, *is being generally found in acids*), is the most abundant of all substances, constituting about one-third of the solid earth, and forming about nine-tenths of water and one-fifth of the atmosphere. It was first separated from red oxide of mercury by Priestley, 1 Aug 1774, and by Scheele, who was ignorant of Priestley's discovery, in 1775. It is a supporter of animal life (in respiration), and of combustion. An oxygen gas company was announced in Dec 1864, its object being the cheap

manufacture of oxygen for its application to the production of perfect combustion in lamps, stoves, furnaces, &c. Oxygen was liquefied by Daniel Pictet at Geneva, (pressure, 320 atmospheres, temp 140 below zero cent) 22 Dec. 1877. See *O one*.

Priestley or Dewar obtained 3 cubic centimetres (1/4 of a fluid oz) of liquid oxygen by means of liquid ethylene (the illuminating part of coal gas) temp 140 below zero Cent (by Wroblewski and Olszewski's method) at the Royal Institution, London, in the presence of the prince and princess of Wales 26 June, 1884. The exhibit for the first time some solid oxygen in the form of snow (temperature -200 Cent -400 Fahr) produced by placing liquid oxygen in a partial vacuum at the Royal Institution 27 May 1886

Professor Dewar exhibited between 300 to 400 cubic centimetres liquid oxygen at the Faraday Centenary, 26 June 1887. *The feeble magnetism of oxygen* demonstrated by Faraday, was shown by Professor Dewar to be greatly increased when reduced to the liquid state by a temperature of 280° below zero centigrade announced 20 Dec 1887. Some liquid oxygen placed in the magnet field sprang to the poles and adhered to them till evaporated, this was publicly exhibited by the professor at the Royal Institution 20 June, 1887. Several parts of liquid oxygen and liquid air were then produced in the presence of the audience

A statue of Priestley by F J Williamson, at Birmingham, was unveiled by professor T H Huxley, 2 Aug 1874, the centenary of the discovery of oxygen. This was also celebrated at Northumberland Pennsylvania where he was buried Feb 1864. The following telegram was sent 31 July. The brethren at the grave to the brethren at the home of Priestley send greetings on this centennial anniversary of the birth of chemistry

A method of obtaining oxygen from air, devised and patented by M Margus of Paris. The principle is that of dialysis, or diffusion under pressure, Sept 1885. See *Gazette* (Invention)

OYER and TERMINER, a commission directed to the judges of the courts, by virtue whereof they have power to hear and determine treasons, felonies, &c, 1285

O YES! A corruption of the French *Oyez, oyez* ye! The ancient term still used by a public orator and by the usher of courts of justice to attract silence and attention

OYSTER (the Latin *Ostrea edulis*) British oysters are celebrated by the Roman satirist Juvenal (Sat iv 140) about 100. The robbery of oyster-lads is prohibited by 7 & 8 Geo IV c 29 (1827). About 15,000 bushels of oysters were said to be produced from the Essex beds alone. In 1858 M Cooke commenced rearing oysters in great numbers on the coast of Brittany, and his plan has been found successful.

An act for promoting the cultivation of oysters in the United Kingdom passed Aug 1866
An act for the regulation of oyster fisheries 9 May 1867
Certain restrictions of the Oyster Fisheries act, 1866, removed by the Fishery act

The fisheries (oyster, crab and lobster) act forbids the sale of oysters by two between 15 June and 4 August, and the sale of others between 14 May and 4 August, passed 10 Aug 1877
Professor Huxley at the Royal Institution asserts the uselessness of resting and a close time for oysters and the present uncertainty of culture 12 May 1883

Artificial breeding greatly promoted by professor Brooks of Belmar (with discovered non hereditary) lieutenant Winton, U.S., and M. Bouten recently announced 12 June, 1884. Act for the cultivation of oysters in Ireland passed 10 Aug 1877
Oysters, about 130 the commonest of food, are now becoming scarcer and scarcer, although their reproduction is about a million fold. A committee recommended a "close time for dredging, viz, 1 May to 1 Sept, deep

was found to be worthless, as at present, from 25 June to 25 Aug., no order to be sold under of Spoken in dis-
 count. The Whistable beer in 1873 are said to have
 produced about 75,000 casks; value about
 24,000.

American and Portuguese oysters are now largely im-
 ported.

Oysters successfully cultivated at Arrechon, near
 Bordeaux, 1869.

OZOKERTI, a mineral hydro-carbon found in
 Moldavia and Wallachia. From it is distilled a
 substance suitable for making candles, introduced
 in the autumn of 1871.

OZONE (from the Greek *oza*, to yield an
 odour), was discovered by Schonbein, of Basel, in
 1840, when experimenting with the then newly-
 invented battery of Sir Wm Grove, and was recog-
 nised by him successively as a minute constituent
 of the oxygen gas resulting from the electrolysis of
 water effected by a current of high tension; of air
 or oxygen through which electric discharges have
 taken place; and of air in which moist phosphorus
 has been undergoing slow oxidation.

Marignac determined the action of ozone on various
 substances to be due to their oxidation . . . 1869

Quantities constructed . . . 1869
 M. Robinet announced his discovery of another
 modification of oxygen, which he termed *ozonine*,
 hitherto found only in the compound state (in
 peroxides of sodium, potassium, &c.) . . . 1869

The French Academy of Sciences appointed a com-
 mittee of eminent philosophers to inquire into
 the nature and relations of ozone . . . 4 Dec. 1869

Andrews and Tait demonstrated ozone to be a con-
 densed form of oxygen . . . 1869

This further established by Soret and Brodie, by

PACIFICATION.

PACIFICATION, EDICTS OF, the name usually given to the edicts of toleration granted by the French kings to the protestants; see *Ghent*.

First edict, by Charles IX., permitting the exercise of the reformed religion near all the cities and towns in the realm Jan 1562

The reformed worship permitted in the houses of lords justices, and certain other persons, March, 1563
These edicts revoked, and all Protestant ministers ordered to quit France in fifteen days 1568

Edict, allowing lords and others to have service in their houses, and granting public service in certain towns 1570

[In Aug. 1572, the same monarch authorised the massacre of St Bartholomew (see *Bartholomew*)]

Edict of Pacification by Henry III., April, revoked Dec. 1578, renewed for six years Oct 1577
[Several edicts were published against the protestants after the six years expired.]

Edict of Henry IV., renewing that of Oct. 1577 1591
Edict of Nantes (which see), by Henry IV., 23 April, 1598
Pacification of Nantes (which see) 14 July, 1629

PACIFIC ISLANDERS. See *Kidnapping Aids*.

PACIFIC OCEAN, the largest of the five oceans of the globe. It was first discovered in 1513 by Vasco Núñez de Balboa, and received its name from Magellan in 1521. Sir Francis Drake was the first Englishman who sailed upon it in 1577. See *Magellan*; *Steam*, 1851; *Wrecks*, 1856; *Kidnapping Aids*; *Panama*.

PACIFIC RAILWAY, North America, from Omaha city, Missouri, to Sacramento, California, 1700 miles, opened 12 May, 1869. By a collision near San Francisco, about 15 persons were killed, 14 Nov. 1869. For new Pacific railway see *Canada*, 1881, et seq. By means of this railway, the China and Japan mails were overhauled from Yokohama to London in 25 days; received 13 May, 1891.

PADLOCKS are said to have been invented by Beecher at Nuremberg, 1540, but are mentioned much earlier.

PADUA, the Roman Patavium, in Venetia, N. Italy, said to have been founded by Antenor, soon after the fall of Troy. It flourished under the Romans. Patavian Latin was considered very corrupt, and is traced in Livy, a native of Padua. After being an independent republic, and a member of the Lombard league, Padua was ruled by the Carrara family from 1318 with a short interruption till 1405, when it was seized by the Venetians. The university was founded about 1220. It was closed through disturbances, 1848-50.

PAGANS, the heathen, worshippers of idols, not agreeing in any set form or points of belief. See *Idols*. Constantine's nephew, Julian, attempted their restoration, 361; but Paganism was renounced by the Roman senate in 385, and finally overthrown in the reign of Theodosius the younger, about 391.

PAI MARIRE, a name given to the dogmas of the Han-han sect; see *New Zealand*, 1865.

PAINS AND PENALTIES, certain bills passed by the legislature to punish state offenders; see *Queen Caroline*.

PAINTING. This art was practised in Egypt and Greece in very early times; see under *Arts*.

PAINTING.

Polygnotus, said to be the first portrait and historie painter, lived about B.C. 450

Zeuxis of Hieracles and Parrhasius of Ephesus, about 400

Apelles about 330

Panais of Seion was the inventor of the encaustic, a method of burning the colours into wood or ivory about 360-330

Antiphilus, an Egyptian, is said to have been the inventor of the grotesque. Flawy A.C. 332

The art was introduced at Rome from Etruria, by Quintus Fabius, styled Pictor. Lary. 901

Excellent pictures brought from Corinth by Mummius after the death of Augustus, not a single painter of eminence appeared for several ages; Ludius, who was very celebrated, is supposed to have been the last about A.D. 14

Painting on canvas seems to have been known as *Stowe or old Book*, the *Saxon harkness*, knew something of the art, died 733

Giovanni Cimabue, of Florence, revived the art; he died 1300

John Van Eyck, of Bruges, and his brother, Hubert, are regarded as the founders of the Flemish school of painting in oil 1425

Uccello first studied perspective, died 1432

Henry VIII. patronised Holbein, and invited Titian to his court about 1523

In Aug. 1866, the sale of Lord Northwick's pictures occupied eighteen days. It produced 55,755 l.

Carlo Dolci fetched 2000, and a Murillo 2000.

The Bucknell collection, sold in April, 1863, produced 25,600

Mr. Wm. Noy Wilkins invented a process of using oil with mineral colours for frescoes in 1853; published his "Durability in Art." 1875

Gainsborough's picture of Georgiana, duchess of Devonshire, bought by Messrs. Agnew for 20,000, stolen from their house in Bond-street, London, 24-25 May, 1876

Baron Albert Grant's collection said to have sold for 105,000 28 April, 1877

Mr. Munro's Novar collection, sold for 64,975 l. close of sale 3 June, 1876

PAISLEY, a borough, W. Scotland, the Roman Vanduana, and grew out of the priory of Paisley, founded 1160-4 by Walter Steuart, made an abbey about 1220; burnt by the English 1307, rebuilt 15th century. Made a burgh of barony 1488 and a Parliamentary borough 1832. Since 1805 Paisley silk and cotton shawls have been celebrated. Visited by the Queen, 23 Aug. 1888. See *Population*.

PALÆOGRAPHY, ancient writing; see *Diplomatic, Writing*.

PALÆOLOG, a family which reigned as emperors of the east from 1260 to 1453. George Palæologus raised Alexius Comnenus to the throne in 1081, and thereby founded his own family. Andrew, the last Palæologus, son of Thomas, ruler of

the Morea, after the overthrow of his father, became a Mahometan at Constantinople about 1533. A person who called himself John Anthony Palaeologus Lascaris died at Turin, Sept. 1874. His claims were doubted.

PALEONTOLOGY (from the Greek *palaio*, ancient, and *onta*, beings), treats of the evidences of organic beings in the earth's strata. It combines biology and geology (*which see*). Cuvier, Mantell, Agassiz, Owen, Edward Forbes, and Blainville, all of the present century, may be reckoned as fathers of this science. The Palaeontographical society, which publishes elaborate monographs of British organic remains, was founded in 1847. The journal "Palaeontographica" (German) began 1851. Professor Owen's "Palaeontology," was published in 1860. "Nearly 40,000 species of animals and plants have been added to the *Systema Naturae* by palaeontological research." *Huxley*. See *Man*.

PALÆOPOLIS, see *Naples*.

PALAIS ROYAL, Paris, originally Palais Cardinal, built for cardinal Richelieu by Lemercier, 1620-36, received its present name when occupied by Louis XIII., to whom the cardinal gave it shortly before his death in 1642. Louis XIV., in 1692, gave it to his nephew Philippe, duke of Orleans, and it became the residence of his successors. It was confiscated by the republic in 1793, after the execution of Philippe Egalité. Louis Philippe resided in it, 1814-31. It suffered much injury at the revolution in 1848. Under the second empire it became the residence of prince Jerome and his son Napoleon. The buildings were much injured by fire by the communists, 24 May, 1871.

PALATINATE OF THE RHINE, one of the seven ancient electorates of Germany. It was long united to Bavaria, but was separated in 1294.—Frederic V., the elector palatine in 1610, married in 1613 Elizabeth, the daughter of James I. of England, and thus was an ancestor of queen Victoria; see *Hanover*. In 1619 he was elected king of Bohemia, but lost all by his defeat by the Austrians at Prague in 1620. The Palatinate was horribly ravaged by Tilly in 1622, and by the French in 1688. Several thousands of the ruined peasantry were sent to America by the British government and people. The elector palatine, Charles Theodore, inherited Bavaria in 1778; since when the two electorates have been united; see *Bavaria*.

PALATINE. William the conqueror made his nephew, Hugh De Abrincis, count palatine of Chester with the title of earl, about 1070. Edward III. created the palatine of Lancaster, 1539; see *Lancaster, duchy of*. The bishopric of Durham also made county palatine. There is also mention made of the county palatine of Hexham, in 33 Henry VIII. c. 10, which then belonged to the archbishop of York, but by the 14th of Elizabeth it was dissolved, and made part of the county of Northumberland. The palatine jurisdiction of Durham was separated from the diocese, and vested in the crown, 6 Will. IV. c. 19, 21 June, 1836.

PALE, the name given to the part of Ireland colonised by the English—viz., parts of the counties of Louth, Dublin, Meath, and Kildare. Anglo-Irish rulers were termed lords of the pale. Their arbitrary exactions led to a royal commission of inquiry in 1537. The defection of the lords of the pale in 1641 was followed by a general insurrection, and the royal cause was ruined in 1647. In 1652 Ireland was committed to the rule of four commissioners.

PALERMO (N. W. Sicily), the ancient *Panormus*. It has been held by the Carthaginians, 413 B.C.; taken by the Romans, 254 B.C.; by the Saracens, A.D. 832; and by the Normans, 1072. Here Roger II. was crowned king of Sicily, 1130. Palermo was the scene of the Sicilian Vespers (*which see*), 30 March, 1282. It suffered from earthquake in 1726 and 1740. The king Ferdinand resided at Palermo from 1806 to 1815, while Naples was ruled by Joseph Bonaparte and Joachim Murat. It revolted against the tyranny of Ferdinand II. 12 Jan. 1848. It was attacked by general Filangieri, 29 March, 1849, and surrendered on 14 May. It was taken by Garibaldi, 6 June, 1860. An insurrection against the abolition of the monastic establishments broke out in Palermo on 13 Sept. 1866, and was suppressed by the royal troops with much bloodshed; order was restored by 22 Sept. *Population*, 1890, 267,416.

The Italian National Exhibition at Palermo opened in the presence of the king and the royal family, by signor Chimirri, minister of agriculture 25 Nov. 1893
The exhibition included manufactures, fine arts, Greek relics, an Abyssinian department, &c.
New monument to Garibaldi uncovered; speech by sig. Crispi 27 May, 1892

PALESTINE, the name given by Moses (*Exodus* xv, 14) and other ancient writers, to a broad strip of land on the east coast of the Mediterranean Sea, which originally included Philistia, but was afterwards limited to the part termed the land of Canaan or Israel, Judea, and the Holy Land; see *Jews*. After being several times conquered by the Saracens, and retaken from the 7th to the 10th century, and after being the scene of the wars of the Crusades (*which see*), and other conflicts, Palestine was united to the Ottoman empire by Selim I. in 1516. See *Bible* (note), *Holy Places*, and *Syria*.

Palestine visited by the prince of Wales, March and April, 1862
"The Palestine exploration fund" was founded in London by many eminent persons as a society "for the investigation of the archaeology, topography, geology, and manners and customs of the Holy Land;" at the first meeting the archbishop of York (*Dr. W. Thomson*) was in the chair 22 June, 1865
By its means captain (after sir Charles) Wilson and a party left England for Palestine in Nov. 1865, they arrived at Damascus, Dec. 20, and in the following spring explored Jezreel, Nazareth, and many other parts of the Holy Land.

PALIMPSEST (from the Greek, *palin*, again;
 and *psest*, I efface), parchment written on after
 the previous writing had been partially effaced.
 Cardinal Mai, by removing the second writing in
 some MSS., recovered the original. This was the
 case with Cicero's "De Republica," published by
 Mai in 1821. It had been covered by a treatise of
 Lactantius.

PALL, PALLIUM, in the Roman Church an
 ensign of dignity conferred by the pope upon arch-
 bishops. By a decretal of pope Gregory XI. (about
 1370), no archbishop could call a council, bless the
 chrism, consecrate churches, ordain a clerk, or con-
 secrate a bishop, till he had received his pall from
 the see of Rome. The pall was first worn by an
 Irish archbishop in 1152, when Gelatus was recog-
 nized as primate of all Ireland.

PALLADIUM, the statue of Pallas, said to have
 fallen from heaven near the tent of Ulysses, as he
 was building Ithaca, which the oracle of Apollo de-
 clared should never be taken so long as the Pallad-
 ium was found within its walls. The Greeks are
 said to have obtained it by craft during the Trojan
 war, 1184 B.C.; but some writers assert, another
 statue was taken, and that the real Palladium was
 conveyed from Troy to Italy by Æneas, 1183 B.C.,
 and preserved by the Romans with the greatest
 secrecy in the temple of Vesta.—**PALLADIUM** is a
 rare metal, discovered in platinum ore by Dr. Woll-
 ston, in 1803.

PALLAS, the planet, was discovered by Olbers,
 at Bremen, 28 March, 1802.

PALLISER'S CHILLED SHOT, see
 Cannon.

PALL MALL, a street near St James's
 palace, London, is named from a French game at
 ball (*palle-mall*, being a wooden mallet), re-
 assembling the modern croquet, having been played
 there about 1600, and introduced into England
 about 1660. Among eminent inhabitants were
 Lord Grey and Dr. Thomas Sydenham. The
PALL MALL GAZETTE, a daily independent political
 and literary journal, first appeared 7 Feb. 1855, and
 was edited by Mr. Frederick Greenwood till 1 May,
 1880, when it became a liberal paper, edited by Mr.
 John Morley, who retired 25 Aug. 1885. Price 2d.
 reduced to 1d. 2 Jan. 1882.

Palmerston 4, 7, 8, 9 July, 1855, contained Mr. Stand-
 ish's statements respecting offences against young women and
 children. Greatly disapproved on intemperance. See
 Trials, Oct.-Nov. 1855.

PALMERSTON ADMINISTRATION.*
 The resignation of the Aberdeen administration was

* Henry John Temple was born on Oct. 1784; was
 educated at Harrow, Westminster, and Cambridge; suc-
 ceeded his father, Viscount Palmerston, 1805; became
 M.P., and a junior lord of the admiralty, 1809; was secre-
 tary of war, 1809-12, and a secretary for foreign affairs,
 1812-1819; April, 1821 to Sept. 1821, and July, 1824
 to Jan. 1825, and home secretary, Dec. 1825 to March,
 1826, when he became first lord of the treasury. He was
 created first baron of the cinque ports, 21 March, 1826;
 and master of the ceremonies of the Trinity house,
 28 June, 1826. He was Sir-Doctor, 1826-42. He died

unaccounted 2 Feb. 1835, but shortly after his death
 returned to office soon after under Lord Palmerston,
 Lord Derby and Lord John Russell having each in
 vain endeavored to form an administration. On
 28 Feb. Mr. Gladstone, Sir James Graham, and Mr.
 Sidney Herbert resigned on account of the Sub-
 scription inquiry. Lord John Russell resigned 13 July.
 Lord Cairns was appointed governor-general of

 1865. His statue at Rome, by M. Noble, was un-
 covered by Earl Russell, 21 July, 1866. Lady Palmer-
 ston died 21 Sept. 1865, aged 72.

PALM-SUNDAY. When Christ made his entry into Jerusalem, multitudes of the people who were come to the feast of the Passover, took branches of the palm-tree, and went forth to meet him, 33. It is usual, in some countries, to carry palms on this Sunday before Easter, hence called Palm-Sunday.

PALMYRA (Syria) was supposed to have been the Tadmor in the wilderness built by Solomon, but was manifestly Grecian. The brilliant part of the history of Palmyra was under Odenatus and his queen Zenobia. At the death of Odenatus, Zenobia assumed the title of queen of the East, in 267 Aurelian defeated her at Emesa, in 272, and made her captive, 273, and killed Longinus, the philosopher, her friend. Palmyra is now inhabited by a few Arab families. The ruins were visited in 1751, by Mr Wood, who published an account of them in 1753.

PAMIRS, a lofty mountain ridge in Turkestan, Central Asia.

Col. Gromchevskis Russian exploring expedition stopped by Afghan and British outposts in 1889. Capt. Yonoff, with military force, evades capt. Loughsham and Lieut. Davison, travellers from the little Pamir, on the frontier of Afghanistan &c. The Russians afterwards retire on the advice of a party of Goorkhas, Aug. 1891. The Russian government declares the action of Capt. Yonoff to be illegal, and apologises, Feb. 1892.

PAMPELUNA (N. E. Spain, taken by the French on their invasion of Spain), was invested by the British, between whom and the French obstinate conflicts took place, 27 and 29 July, 1813. It surrendered to the British, 31 Oct. in that year. Population, 1887, 26,663.

PAMPHLETS. Their first appearance amongst us is generally thought to have been in opposition to the church of Rome. Those who were first convinced of the reasonableness of the "new learning," as it was then called, propagated their opinions in small pieces, cheaply printed, and (what was then of great importance) usually concealed. Political pamphlets began in Edward VI's time, and were very numerous in the 17th and 18th centuries (by De Foe, Swift, Steele, and others).

Paul Louis Courier wrote simple discourses and other pamphlets against the priests and nobles after the restoration of the Bourbons, 1815. His "Pamphlet des Pamphlets," defending the pamphlets (1816) blushed, 1824, probably led to his murder, 30 April, 1825. Large collections are in the libraries of the British Museum and the Royal and London Institutions. Certain enactments respecting pamphlets removed by an act passed July, 1869.

PANAMA, the isthmus which joins the two Americas, see Darwin. Among this a ship canal was proposed by the Bulwer-Clayton treaty, 19 April, 1850. A treaty for the construction of a ship canal through the isthmus by the United States was signed by representatives of that government and that of Colombia 26 Jan. 1870. A railway was opened in 1855. In that year a new state, New Granada, was divided into eight federal states, one of which is named PANAMA. A revolution took place in Panama, on 9 March, 1865, the government was deposed, and don Jil Colina became president, succeeded by Vincent Ularte, 1 Oct. 1866. Panama is now subject to Colombia (which see). Aspinwall, a town at the extremity of the Panama railway, named after its originator, Mr Aspinwall, a New York merchant, who officially named Colon in 1870. PAPYRUS DIGNEVER (see *Opium*), invented about 1807. Denis Papin, a French philosopher, assisted Boyle in his experiments about 1678.

PAPISTS, see *Roman Catholics*.

PAPUA, see *New Guinea*.

PAPYRUS, the reed from which was made the paper of Egypt and India, used for writings until the discovery of parchment, about 190 B.C. The earliest known specimens of papyrus were found in the tombs attributed to the third dynasty, 3366 B.C. Many papyri were discovered at Hierakonpolis in 1754; and many were collected by the French in Egypt, 1798. A manuscript of the *Antiquities of Josephus* on papyrus, among the treasures seized by Bonaparte in Italy, and sent to the National Library at Paris, was restored in 1815. One of the largest known papyrus, found in 1835, behind Medinet Habu on the Nile, and now in the British Museum, were published with translations by the trustees in 1876.

PARABLE, see *Fable*.

PARACHUTE, see *Balloons*, 1785, 1802, 1837, 1874, 1887.

PARACLETE (Greek for comforter), a name given by Abélard to the convent which he founded in Champagne in 1122, of which Héloïse became the first abbess.

PARADISE LOST, the great English epic by John Milton, appeared first in ten books in 1667; in twelve books in 1674.

PARADOX (Greek, *para*, beyond; and *doxa*, opinion), something contrary to common opinion. Professor De Morgan's "Budget of Paradoxes" (of all kinds) was published in 1872. John Paget's "Paradoxes and Puzzles, Historical, Judicial, and Literary," published 1874.

PARAFFIN (from *parvus affinis*, from its having little affinity with anything), also called paraffin, a solid substance, somewhat like spermaceti, produced by distillation of coal, and first obtained by Reichenbach in 1830, and by Dr. Christison about the same time. It was procured from mineral oil by Mr. James Young about 1846 at Alfreton in Derbyshire. Soon after it was largely obtained from Boghead coal. It is also obtained from Irish peat. It makes excellent candles. Much litigation ensued through interference with Mr. Young's patent-right.

PARAGRAPH BIBLES, see under *Bibles*.

PARAGUAY, a republic in S. America, discovered by Juan Dias de Solis in 1515, and by Sebastian Cabot in 1526; conquered by Alvarez Nuñez in 1535, and civilised by the Jesuits, who in 1608 commenced their missions there and held it till their expulsion in 1768. Paraguay rose against the Spanish yoke in 1811. In 1814, Dr. José G. R. Francia was elected dictator, he ruled vigorously but tyrannically; he was succeeded on his death in 1840 by Vial. From 1814 to 1844 the country was rigidly closed against foreigners. The president, C. A. López, elected in 1844, was succeeded by his son, Francisco S. López, Sept. 1862 (see *Notes*). Paraguay was recognised as an independent state by the Argentine Confederation, 24 July, 1852, and by Great Britain in 1853. *See* *Annexation*. Population in 1857, 1,337,439; in 1872, 221,079; in 1888 (estimated) 270,000.

PARALLEL MOTION, see *Motion*.

PARASOLS were used by the ancient Egyptians. A new form (said to have been devised by the duchess of Rutland) came into general use about 1860.

PARC AUX CERFS, a deer-park at Versailles, near Paris, made by Louis XII., and kept as such till 1694, when Louis XIV. took the land for building. The name was given to a house erected on it by madame Pompadour, popularly said to form a seraglio for Louis XV in 1755. It was closed by madame Du Barry in 1771.

PARCEL POST (advised by Rowland Hill in 1842). Proposed in Parliament by Mr. H. Fawcett 27 March; act passed, 18 Aug. 1863; came into operation 1 Aug. 1863. Rates, from 1lb. 3d. to 7lb. 12.

Maximum weight raised to 11 lbs. from 7 May, 1886.
Parcel Post extended to India, British Burmah, Aden, Gibraltar, and Egypt 1 July, 1885, and other countries since
Coldbath fields prison was converted into offices for the Parcel Post, 1887.

PARCHMENT. Invented for writing books by Eumenes (some say by Attalus), of Pergamus, the founder of the celebrated library at Pergamus, formed on the model of the Alexandrian, about 190 B.C. Parchment-books from that time became those most used, and the most valuable as well as oldest in the world are written on the skins of goats. It should be mentioned that the Persians and others are said to have written all their records on skins long before Eumenes' time.

Parchment paper (for vegetable parchment) was invented and patented in 1857, by Mr W. E. Guise, C.E., who discovered, that when paper is exposed to a mixture of two parts of concentrated sulphuric acid and one part of water for no longer time than is required to draw it through the fluid, it is immediately converted into a strong tough skin-like material. It must be instantly washed with water. Its great strength points out many applications of this material, e.g., maps, school and account-books, and drawing-paper. In 1864 it appeared that a similar invention had been made in Paris by Figulier and Fommande in 1846.

PARDONS. General pardons were proclaimed at coronations: first by Edward III. in 1327. The king's power of pardoning is said to be derived *à la fois* *de la dignité*; and no other person has power to remit treason or felony. *stat. 27 Hen. VIII. 1535. Discretions*. A pardon cannot follow an impeachment of the house of commons: *stat. Will. III. 1700*.

PARIS, a city in *European Turkey*, retained its state independence under the protection of Venice till 1797, when that state was conquered by the French. It resisted various attempts to capture it; and in 1806 was garrisoned by Russians. It was given up to the French in 1807, taken by the English, 22 March, 1814, surrendered to the Turks, 1817, and abandoned by above 3000 of its inhabitants, who retired to the Ionian Isles, May, 1819.

PARIS (formerly *Lutetia Parisiorum*), the capital of France, situated on the river *Seine*, which cuts it into two unequal parts, the strongest being towards the north, and in which are three isles, *la cille (the city)*, *the St Louis*, and *the Louviers*. In the time of Julius Caesar, *Lutetia* comprised the city only. It was greatly improved by the emperor Julian, who made it his residence while he governed Gaul, 355 to 361. It became successively the capital of the kingdoms of Paris, Soissons, and Neustria, and eventually of all the kingdom. Many ecclesiastical councils were held at Paris, 360 1528. The representative of the house of Orleans is styled count of Paris. Population of Paris in 1856, 1,278,262, in 1872, estimated population, 1,851,792 in 1876, 1,988,806, in 1881, 2,269,023, in 1891, 2,423,946, see *France*.

PARISHES. Their boundaries in England are said to have been fixed by Honorius, archbishop of Canterbury, 636, or by Alfred about 890. They were enlarged, and the number of parishes was consequently reduced in the 15th century, when there were 10,000 Parial registers were commenced in 1538. Acts were passed in 1844 and 1856 by which new parishes may be formed out of too extensive ones; acts amended in 1869. The appointment of parish constables was made unnecessary by an act passed Aug. 1872. See Registers, and Benefices.

PARKESINE. A new substance, composed of gun-cotton, obtained from various vegetable bodies, and oil. It can be formed with the properties of ivory, tortoise-shell, wood, india-rubber, gutta-percha, &c. It is the invention of Mr. Alexander Parkes, of Birmingham, and was shown by him at the Exhibition in 1862. In Dec. 1865, at the Society of Arts, parkesine was proved to be an excellent electric insulator, and therefore likely to be suitable for telegraphic purposes.

PARK LANE MURDER, see Trials, 1872.

PARKS. The Romans attached parks to their villas. Fulvia Lupinus, Pompey, and Hortensius, among others, had large parks. In England, the first great park of which particular mention is made was that of Woodstock, formed by Henry I., 1105.

Queen Caroline, consort of George II, inquired, it is said, of the first Mr Pitt (afterwards earl of Chatham), how much it would cost to shut up the parks as private grounds. He replied, "Three crowns, your majesty." The design was never afterwards entertained. PARK'S TRAVELS. Mungo Park set sail on his first voyage to Africa, under the patronage of the African society, to trace the source of the river Niger, 22 May, 1795, and returned 22 Dec 1797, after having fruitlessly encountered great danger. He again sailed from Portsmouth on his second voyage, 30 Jan 1805, appointed to a new expedition by government. It is stated that his party fired on the natives when resisted, and that he was killed at Broussa on the Niger, Nov 1805. His "Travels in Africa" was published in 1799.

PARLIAMENT (from the French *parlement*, discourse) derives its origin from the baron general assemblies, called *l'assemblée*. The name was applied to the assemblies of the state under Louis VII of France, about the middle of the 12th century, but it is said not to have appeared in our law till its mention in the statute of Westminster I., 3 Edw I., 1272 and yet Coke declared in his *Institutes*, and spoke to the same effect, when speaking (1592), that this name was used even in the time of Edward the Confessor 1041. The first clear account we have of the representatives of the people forming a house of commons, was in the 43rd Hen III 1258, when it was settled by the statutes of Oxford, that twelve persons should be chosen to represent the commons in the three parliaments, which, by the sixth statute, were to be held yearly. *Burton's Annals*. The general representation by knights, citizens, and burgesses, took place 49 Hen III 1265. *Dugdale's Summons to Parliament, edit 1685*, see *Commons and Lords*. The power and jurisdiction of parliament are so transcendent and absolute, that it cannot be confined, either for causes or persons, within any bounds. It hath sovereign and uncontrollable authority in making and repealing laws. It can regulate or new-model the succession to the crown (as was done in the reigns of Henry VIII and William III). It can alter and establish the religion of the country, as was done in the reigns of Henry VIII, Edward VI, Mary, and Elizabeth. *Sir Edward Coke*. The ninth edition of May's

12th sitting, 24 Oct. speech by Mr. Biggar. Mr. M. Davitt began an address which was finished 32 Oct. 1890

17th to 18th sitting: Sir Henry James' address for the Times. 31 Oct. 1890

The report of the commissioners was laid before parliament, 23 Feb. 1890. The following is an abridgement of their conclusions:—I. That the respondent members of parliament collectively were not guilty of conspiring for the absolute independence of Ireland as a separate nation, but that some of them (Messrs. M. Harris, Dillon, W. O'Brien, W. Redmond, O'Connor, J. Coudon, and J. J. O'Kelly), together with Mr. Davitt, established the Land League mainly for that purpose. II. That the respondents did not conspire to promote agrarian agitation, the non-payment of rents, and the expulsion of the landlords (styled the English garrison). III. That they acquiesced Mr. Parnell and others of the charge of immorality in their denunciations of the Phoenix Park murders, and affirmed the fac-simile letter to be a forgery. IV. They found that the respondents did disseminate the *Irish World* and other newspapers, but failing to incite to violence or other crimes. V. That the charges of immorality to crime, except by intimidation and of payments for that purpose, were not proved. VI. They found that the respondents did not denounce the system of intimidation, though they knew its effects; and VII. That they defended persons charged with agrarian crime, and supported their families, but it was not proved that they subscribed for £500,000 for, or were intimately associated with, notorious criminals, or aided their escape by payments. VIII. That they found that the respondents made payments to compensate persons injured in the commission of crime. IX. That the respondents did invite and obtain the assistance and co-operation of the Physical Force Party in America, including the Clan-na-Gael, and did not repudiate the action of that party.

[Certain allegations against Mr. Parnell were declared not proved.]

The report adopted with thanks, by the commons, after 7 days' debate, 3-11 March; by the Lords (without a division), 21 March, 1890. Mr. Gladstone's amendment rejected by 339 to 268.

Parnell v. Walter and another, for libel. Queen's bench division, justices Denman and Willes; damages claimed, 100,000*l.*; 40*l.* paid into court, 11 Jan. Verdict for the plaintiff, by consent, 5,000*l.* damages 3 Feb. 1890

[The publication voted not a breach of privilege by the commons (260-212), 11 Feb. 1890.]

In consequence of the issue of the divorce suit, capt. O'Shea Mrs. O'Shea and Mr. C. S. Parnell, 25-27 Nov. 1890, Mr. Parnell was requested by Mr. W. E. Gladstone and other English liberals, to retire from the chairmanship of the Irish party. He declined, and issued a manifesto to the people of Ireland, giving an account of private conferences with Mr. Gladstone and Mr. John Morley, 29 Nov. The Irish B.C. bishops denounced Mr. Parnell's retirement, 3 Dec. After a week's angry discussion in the commons committee-room No. 12, the Irish party divided: Mr. Justin McCarthy, the vice-chairman, was elected chairman by 44 members; Mr. Parnell continuing chairman with 26 followers, 6 Dec. Manifestoes of the two parties issued 9, 20 Dec.

Collapse of negotiations (chiefly at Boulogne) of Mr. Parnell, with Messrs. Wm. O'Brien, Dillon, Justin McCarthy, Sexton and others; Mr. Parnell refuses to resign the leadership, 11 Feb.; counter-manifesto issued 17 Feb. 1891

Dispute between Mr. Parnell and Mr. McCarthy respecting the disposal of the Home Fund (in Farns) 16 Feb., March, 1891

Mr. Parnell in his campaign's vote, Roscommon, 22 Feb., Drogheda, and other places 1 March, 1891

The National Federation (with Mr. Parnell) established by the Anti-Parnellites 20 March, 1891

Parnellites, 70 Anti-Parnellites, elected M. P. July, 1892

PAROCHIAL CHARITIES COMMISSION, see London, 1878, and under *Charities*, 1883.

PARRICIDE. There was no law against it in Athens or Rome, such a crime not being supposed possible. About 172 B.C., L. Octavius having killed his father, the Romans scourged the parricide; sowed him up in a leather sack made air-tight, with a live dog, a cock, a viper, and an ape, and thus cast him into the sea. Miss Blandy was executed at Oxford for the murder of her father, April, 1752; see *Trials*, March, 1890.

PARSEES or **GUERRES**, the followers of Zerdusht, dwell in Persia till 638, when, at the battle of Kadesah, their army was decimated by the Arabs, and the monarchy annihilated at the battle of Nahâvend in 642. Many submitted to the conquerors, but others fled to India, and their descendants still reside at Bombay (where they are termed Parsees). Sir Jamsetjee Jejeebhoy, the 3rd baronet, was elected president of the community there, July, 1877. Mr. Dadabhai Naoroji, a Parsee merchant, was for several years professor of Gujarati at University college, London. He was nominated as M.P. for the Holborn district, but not elected, 1886; elected 6 July, 1892, for Central Finsbury. "History of the Parsees," by Donabhai Framji Karaka, published, 1884. See *Bombay*. A Parsee fire temple at Bombay was consecrated, Nov. 1891.

"**PARTANT POUR LA SYRIE**," popular French song; words by comte Alexandre de Laborde; music by Hortense Beaubrunnois, wife of Louis Bonaparte, king of Holland, about 1800. The music became very popular after her son became emperor, in 1852, as Napoleon III.

PARTHENON (from Greek *parthenos*, virgin), a temple at Athens dedicated to Minerva, erected about 442 B.C. In it Phidias placed his renowned statue of that goddess, 438 B.C. The roof was destroyed by the Venetians in 1687. "The Parthenon" published by Mr. James Fergusson in 1833. See *Elgin Marbles*.

PARTHENOPEAN REPUBLIC was established by the French at Naples (anciently called Parthénopée), 23 Jan. 1799, and overthrown in June same year.

PARTHIA (Asia). The Parthians were originally a tribe of Scythians, who, being exiled, as their name implies, from their own country, settled near Hyrcania. Arsaces laid the foundation of an empire which ultimately extended over a large part of Asia, 250 B.C.; the Parthians were never wholly subdued by the Romans. The last king, Artabanus V., was killed, A.D. 226; and his territories were annexed to the new kingdom of Persia founded by Artaxerxes, who had revolted against Parthia.

PARTICULARISTS. The name given to those Germans who desire the maintenance of the independence of the German states, and oppose their absorption into the empire. M. Gasser, one of them, failed in an attempt to form a ministry in Bavaria, Sept. 1872.

PARTITION ACT, relative to the division of property sold by direction of the court of chancery, passed 25 June, 1688.

PARTITION TREATIES. The first treaty between England and Holland for regulating the Spanish succession (declaring the elector of Bavaria next heir, and ceding provinces to France) was signed 19 Aug. 1698; and the second (between France, England, and Holland, declaring the arch-

duke Charles presumptive heir of the Spanish monarchy, Joseph Ferdinand having died in 1699), 13 March, 1700. Treaty for the partition of Poland; the first was a secret convention between Russia and Prussia, 17 Feb. 1772, the second between the same powers and Austria, 5 Aug. same year; the third was between Russia, Austria, and Prussia, 24 Oct. 1795.

PARTNERSHIP. The laws respecting it were amended in 1863 and 1890, see *Limited Liability*.

PARTY, see Processions.

PASIGRAPHY (from Greek, *passi*, for all): a system which professes to teach people to communicate with each other by means of numbers which convey the same ideas in all languages. A society for this purpose was established at Munich; and the president, Anton Bachmaier, published a dictionary and grammar for German, French, and English, 1868—71; 4334 mental conceptions may be thus communicated.

PASQUINADES. Small satirical poems obtained this name about 1533.

At the stall of a robber named Pasquin, at Rome, idle persons used to assemble to listen to his sallies, to relate anecdotes, and rail at the powers. After the robber's death, his name was given to a statue to which lampoons were affixed.

PASSAROWITZ TREATY, concluded 21 July, 1718, between Germany and Venice, and the Turks, by which the house of Austria ceded certain commercial rights, and obtained from Turkey the Temeswar, Belgrade, and part of Bosnia, Servia, and Wallachia. The Turks gained the Morea.

PASSAU (Germany), TREATY OF, whereby religious freedom was established, was ratified between the emperor Charles V. and the protestant princes of Germany, 31 July, 1552. In 1662 the cathedral and great part of Passau were consumed by fire.

PASSENGERS—by public vehicles, are protected by 1 & 2 Will. IV. c. 22 (1831), 1 & 2 Vict. c. 79 (1838), and 16 & 17 Vict. c. 33 (1853); another act was passed in 1889. Mr. Cleghorn, under whom the front seat on the rear side of one of the general omnibus company's carriages had given way, recovered 400*l.* damages against the company, in a verdict by consent, in the Queen's Bench, 10 Dec. 1856. The Ship's Passenger act, 18 & 19 Vict. c. 119, passed in 1855, was amended in 1863; see *Campbell's Act*, and under *Railways*.

PASSIONISTS, a congregation of clerks of the holy cross, founded by St. Paul of the Cross, who died 1775, and was canonized by the pope 1867. A home was set up in England in 1841, and others since. The monastery, Highgate, London, N., solemnly blessed by cardinal Manning, and opened, 16 July, 1876.

PASSION PLAY, see Drama.

PASSION-WEEK, the name given since the Reformation to the week preceding Easter, was formerly applied to the fortnight. Archbishop Laud says the two weeks were so called "for a thousand years together," and refers to an epistle, by Ignatius, in the 1st century, in which the practices is said to have been "observed by all." The week preceding Easter is now by some termed "Holy Week," the previous week "Passion Week."

PASSION-MUSIC: Gregory Nazianzen (A.D. 330-390) is said to have first set forth the history of this Passion in a dramatic form.

Guidetti, in 1886, published stanzas for this subject, which has been treated since by many composers. J. S. Bach's great "Passion Music," first performed on Good Friday, 1720, has been revived with great success in this country, beginning with that "according to St. Matthew," 6 April, 1854.

PASSOVER, the most solemn festival of the Jews, instituted 1491 B.C. (*Exodus* xii.), in commemoration of their coming out of Egypt; because the night before their departure, the destroying angel, who put to death the first-born of the Egyptians, passed over the houses of the Hebrews without entering them; the door posts being marked with the blood of the Paschal Lamb killed the evening before. The passover was celebrated in the new temple, 18 April, 515 B.C. *Usher*.

PASSPORT SYSTEM forbids subjects to quit one country or enter another without the consent of the sovereign thereof. In 1858 the system was somewhat changed in this country, and the stamp duty on passports was reduced from 5*s.* to 6*d.* Passports were abolished in Norway in 1859; in Sweden in 1860; and (with regard to British subjects) in France, 16 Dec. 1860; in Italy, 26 June, 1862; in Portugal, 23 Jan. 1863; and are falling into disuse in other countries. The passport system was established in the United States on 19 Aug. 1861. The passport system, revived in France on account of the war, 1 Aug. 1870, was abolished by M. Thiers, 10 April, 1872, in compliance with the wish of the British government.

PASTEUR INSTITUTE, Paris, see under Hydrophobia.

PASTEL, a roll of paste made of different colours ground with gum water, used as a crayon. Pastel painting has been recently much practised on the continent. The Society of British Pastellists, president Sir Coutts Lindsay, first exhibited at the Grosvenor Gallery, 18 Oct. 1890. Its members included Mr. Watts, Mr. Orchardson and other eminent artists.

PASTON LETTERS, the correspondence of a Norfolk family, 1422-83, giving a picture of social life in England, were edited by Sir John Penn, and published in five volumes, quarto, 1787-1823. Their authenticity was questioned Sept. 1865, but was satisfactorily vindicated by a committee of the Society of Antiquaries in May, 1866. Part of the MS. was soon after purchased by the trustees of the British Museum. The publication of a new edition, by James Gairdner, with additional letters, 1872-5. The MS. of the second series with other letters was found in 1875, by Mr. Frere, of Boydon Hall, near Diss, Norfolk. The MS. of the first series, long lost from the Royal Library, found in the library of col. Geo. Tomline at Orwell Park, who died 25 Aug. 1889; announced April, 1890.

31*st* M^{rs}. Paston letters, put up for sale by Messrs. Christie, London, brought in at a high reserve, 31 July, 1888.

PATAY (France), where Joan of Arc, the maid of Orleans, was present, when the earl of Richmond signally defeated the English, 18 June, 1429. Talbot was taken prisoner, and the valiant Fastolf was forced to flee. In consequence, Charles VII. of France entered Rheims in triumph, and was crowned 17 July, following year, Joan of Arc assisting in the ceremony in full armour, and holding the sword of state, see *Joan of Arc*.

PATENTS (from *patet*, I lie open), licences and authorities granted by the king. Patents are said to have been granted for titles of nobility in 1344, by

Edward III. They were first granted for the exclusive privilege of printing books, in 1391. The property and right of inventors in arts and manufactures were secured by letters patent by an act passed in 1623. The later laws regulating patents are very numerous; among them are 5 & 6 Will. IV. c. 83 (1835), and 15 & 16 Vict. c. 83 (1852). By the latter **COMMISSIONERS OF PATENTS** were appointed, viz., the lord chancellor, the master of the rolls, the attorney-general for England and Ireland, the lord advocate, and the solicitor-general for England, Scotland, and Ireland. In 1853, a journal was published under their authority, and indexes of patents, from March, 1617, to the present time. Specifications of patents may be consulted by the public at the Free Library and Reading-Room, in Southampton buildings, opened 5 March, 1854. A museum containing models, portraits, &c., was established in 1859 at South Kensington, mainly by the exertions of Mr. Bennet Woodcroft.

The "Illustrated Official Journal" combining six others published Jan. 1869.

An international congress for the protection of patents met at Vienna, Aug. 1873; at Paris, 6 March, 1883.

New patent bills introduced into parliament withdrawn, 1875, 1876, 1879; Mr. Anderson's bill read, 15 June, 1881.

Patent Design and Trade Marks Act, 45 & 46 Vict. c. 57, passed 27 Aug. 1882, began 1 Jan. 1884; amended 24 Dec. 1883. It greatly relieved patentees by lessening fees, &c.

In 1864, the alleged defalcations of Mr. Edmunds, a clerk in the patent office and an official of the house of lords, led to his retirement. He obtained a pension of 800*l.*, which was taken from him by a vote of the house of lords on 9 May, 1865. Much litigation ensued. In an action against Mr. Gladstone, the prime minister, and others, for a libel, Mr. Edmunds was non-suited, 21-22 June, 1874; and he failed in actions against several newspapers for printing a treasury calumnies. His appeal to the house of lords failed 16 June, 1873.

17,100 applications for patents in 1884; 16,100 in 1885; 17,100 in 1886; 18,000 in 1887; 19,700 in 1888; 21,000 in 1889; 22,888 in 1891.

Royal commission to enquire into the law relating to letters patent appointed 1862; Mr. Hindmarch's report issued 1864. In pursuance of recommendations for the formation of a roll of patent agents, the Institute of Patent Agents was registered 1882, chartered 1891. It has given much attention to legislation respecting patents.

PATENT MEDICINES: received for stamps, year 1883-4, 159,238*l.*

PATNA (N. India). Near here the English, under major Canase, defeated the emperor Shah Alum on 15 Jan. 1761. The town was acquired by the British by their defeat of the sanguinary Meer Cassim, 23 Oct. 1764.

PATRIARCHS (a name given to Abraham, Isaac, Jacob, and his sons). The ecclesiastical historian Socrates gives this title to the chiefs of Christian dioceses, about 440. It was first conferred on the five grand sees of Rome, Constantinople, Alexandria, Antioch, and Jerusalem. The Latin church had no patriarchs till the 6th century. The first founders or heads of religious orders are called patriarchs.

Mectarius, bishop of Constantinople, as *ex-officio* chief of the Eastern bishops, was nominated patriarch of Constantinople at the second general council of Constantinople, 9 July, 381. This led the way to the schism between the Eastern and Western churches.

PATRICIANS, the highest citizens or aristocracy of Rome; their authority began with the city itself; see *Rome*.

PATRICK'S CATHEDRAL, ST. (Dublin), was founded in 1190 by archbishop Comyn, on the

site of an old church. The cathedral was desecrated in 1546, and used as a law court; restored 1553. After renovation by the munificence of the late sir Benjamin Lee Guinness, it was re-opened 24 Feb. 1865. Several persons killed by the falling of a flying buttress, 14 Sept. 1882. See *Dublin*.

PATRICK, ST., KNIGHTS OF, an order instituted by king George III., 5 Feb., the statutes were signed 28 Feb. 1783. The number, originally fifteen, was increased in 1821, 1831, and 1833, and is now twenty-two. The prince of Wales was installed as knight, 18 April, 1868.—St. Patrick's Benevolent Society, London, instituted 1784. It sprang from the Irish Charitable Society, founded in 1704.

PATRIOTIC ASSOCIATION, formed to aid in upholding the honour and interest of the British Empire. A meeting was held at St. James's Hall, London, 27 March, 1880. "England," a weekly paper, was published same day. The duke of Abercorn, earl Stanhope, and others, were supporters.

PATRIOTIC BROTHERHOOD, see *Ireland*, 1883.

PATRIOTIC FUNDS, established to encourage the army and navy in times of war.

1. Founded by the subscribers to Lloyd's, "to animate the efforts of our defenders by sea and land" by providing a fund for the relief of themselves when wounded, and of their widows and orphans, and for granting pecuniary rewards and badges of distinction for valour and merit, 20 July, 1803; 24 Aug. 1809, 424,832*l.* had been received, and 332,612*l.* expended. From 1803 to 1826 the total sum received was 629,893*l.* 14*s.* 10*d.*

2. A commission (headed by prince Albert) was appointed to raise and distribute a fund bearing this name, for the relief of the families of those who might fall in the Russo-Turkish war, June; a great meeting held Nov. 1854.

Large sums were collected from this country and the colonies, amounting to 1,171,270*l.* in July, 1855; to 1,296,282*l.* on 16 Nov. 1855; finally to 1,460,861*l.* in Jan. 1856, 1,303,386*l.* expended.

300,000*l.* appropriated to founding an asylum for 300 orphan girls (the Royal Victoria Patriotic Asylum) on Wandsworth common, the first stone of which was laid by the queen, 11 July, 1857.

The royal family and many of the aristocracy contributed drawings, sold for high prices, in May, 1855.

3. A large fund contributed for the relief of the sufferers by the Indian mutiny, Aug. 1857, 434,799*l.* collected up to Nov. 1858. An act for its administration was passed, 12 Aug. 1867, amended 1886; see *India*, 1857. The total of the funds administered was 755,102*l.*, 31 Dec. 1888; 764,217*l.*, 31 Dec. 1889.

The alleged mis-administration of the Patriotic Fund was brought before the house of commons by baron de Worms 9 Aug. 1880, and in Jan. 1881.

Patriotic volunteer fund instituted by lord mayor Whitehead, see *Volunteers* 1889.

PATRONAGE OF LIVINGS by Laymen in England is very ancient; in Scotland was opposed by the books of discipline 1560 and 1578, abolished 1649, restored 1660. The system led to the disruption of the established church, and the foundation of the free church, 18 May, 1843. The abolition of lay patronage was earnestly advocated by the authorities of the established church in March, 1870, and the duke of Argyll volunteered to resign his patronage in May. Of 1109 livings 319 belonged to the crown, and about 600 to private persons. An act (37 & 38 Vict. c. 82) for abolishing patronage in Scotland, brought in by the duke of Richmond, 18 May, passed, 7 Aug. 1874.

PAULIANISTS or PAULINIANIS, followers of Paul bishop of Samosata, afterwards patriarch of Antioch, 260, who are said to have denied Christ's divinity and the trinity; he was excommunicated 269 by a council at Antioch.

PAULICIANS, a sect of Christian reformers, arose about 652. Although they were severely persecuted, they spread over Asia Minor, in the 9th century, and finally settled at Montferrat, in Italy, where they were attacked by the bishop of Milan in 1028. Severe decrees against them were made in 1163, and they gradually dispersed; very probably sowing the seeds of the great reformation of the 16th century.

PAUL JONES, a Scotchman, born 1742; died at Paris, 1792. He commanded an American privateer during the American war, and made daring depredations on British commerce. He pillaged the house of Lord Selkirk, near Kirkcudbright, and at Whitehaven burnt shipping in the harbour, April 1778. The Dutch permitted Paul Jones to enter their ports with two British ships of war which he had taken, and which the stadtholder peremptorily refused to deliver up, 1779.

PAUL'S CROSS, ST. (London), which stood at the north side of the cathedral, was a pulpit formed of wood, mounted upon steps of stone, and covered with lead, from which the most eminent divines were appointed to preach every Sunday in the forenoon. To this place the court, the mayor, the aldermen, and principal citizens used to resort. It was in use as early as 1259, and was appropriated not only to preaching, but to political and ecclesiastical discourses, &c. The cross was demolished in 1643, by order of the parliament.

PAUL'S SCHOOL, ST., was endowed in 1512 by John Colet, dean of St. Paul's, for 153 boys "of every nation, country, and class," in memory of the number of fishes taken by Peter. (*Johns xxi. 11*).

The first schoolhouse was burnt in 1666; the second, by Wren, was taken down in 1824, and another building erected by George Smith. William Lilly was the first master, and his grammar is still used by the school. *Times*. The claim of the Mercers' company to be owners instead of trustees of Colet's estate was set aside by the vice chancellor, 11 Feb. 1870. The school ordered to be removed to West Kensington; site bought, June, 1878. New building designed by Mr. Waterhouse opened by lord Selborne, 23 April, 1884. The number of scholars has been increased.

PAUPERS, see *Poor*.

PAVAN, PAVANE, or PAVIN, was a slow dance of the 16th and 17th centuries, sometimes accompanied by singing.

PAVEMENT. The Carthaginians are said to have been the first who paved their towns with stones. The Romans, in the time of Augustus, had pavement in many of their streets; the Appian way, a paved road, was constructed 312 B.C. In England there were few paved streets before Henry VII.'s reign. London was first paved about 1533. It was paved with flagstones between 1815 and 1825. Wood and asphaltic paving were tried in 1839, and have been disused since 1847; see *Wood Pavement*. Asphaltic has been much used since 1869. Wood reported to be the best for London, May, 1876.

Grano-metallic stone laid down in a plastic state in part of the Strand, London, and in other places, 1885.

PAVIA (N. Italy), the ancient *Ticinum* or *Avia*. Its university, founded by Charlemagne, is said to be the oldest in Europe. Pavia was built by the Gauls, who were driven out by the Romans, and these in their turn were expelled by the Goths: in 568 it was taken by the Lombards, and became the capital of their kingdom. In the 12th century it was erected into a republic, but soon after was subjected to Milan and followed its fortunes. On 24 Feb. 1525, a battle was fought near here between the French and the Imperialists, when the former were defeated, and their king, Francis I., after fighting with heroic valour, and killing seven men with his own hand, was at last obliged to surrender himself a prisoner. It was long asserted that Francis wrote to his mother, Louise of Savoy, regent of the kingdom during his absence, saying, *Tout est perdu, madame, hors l'honneur* (All is lost, madam, except honour). The words are now said to have been, *L'honneur et la vie qui est sauvée*.

PAWNBROKING. The Roman emperors lent money upon land. The origin of borrowing money by means of pledges deposited with lenders is referred to Perugia, in Italy, about 1462. The institutions were termed *monti di pietà* (which see). Soon afterwards, it is said that the bishop of Winchester established a system of lending on pledges, but without interest. The business of pawnbrokers was regulated in 1756, and licences issued in 1783. The rate of interest on pledges was fixed in 1800. In London there were, in 1851, 334 pawnbrokers; and in England, exclusively of London, 1127; the number is increasing more than in proportion to the population. In 1860 an act was passed enabling pawnbrokers to charge a half-penny for every ticket describing things pledged for a sum under 5s. The acts relating to pawnbrokers were amended in 1856, 1859, 1860. Pawnbrokers in Great Britain: 1851, 1873; in 1861, 2578; in 1871, 3540. The law was consolidated in the pawnbrokers' act passed 10 Aug. 1872.

PAX, a small tablet, generally silver, termed, *tabula pacis* or *occulutoria*, kissed by the Roman Catholic priests and laity; substituted for the primal kiss of peace in the early church. The Pax is said to have been introduced about the 12th century.

PAYMASTER GENERAL. In 1836 the army and navy pay departments were consolidated into the paymaster-general's office, sometimes held by a cabinet minister.

PEABODY FUND. Mr. George Peabody, an American merchant (born 18 Feb. 1795, died 4 Nov. 1869), who had made his fortune in London, gave on 12 March, 1862, 150,000l., on 21 Jan. 1866, 100,000l., on 5 Dec. 1868, 100,000l., and by the will directed his trustees to pay 150,000l.—in all

500,000l.—to ameliorate the condition of the London poor.

In an autograph letter, promising her portrait in miniature, was sent him by the queen, 28 March, 1866 (Inscription on the miniature sent—"V.R. presented by the Queen to G. Peabody, Esq., the benefactor of the poor of London.")

The first block of buildings for working classes, termed "Peabody dwellings," in Commercial street, Spitalfields, was opened 29 Feb. 1864; and others since, in Spitalfields, Islington, Shadwell, Westminster, Chelsea, Brompton, &c.; they have been found to be self-supporting. 1878, in 1879, net gain, 24,766l.; 1885, 23,691l.; 1887, 24,002l.; 1888, 29,611l.

Mr. Peabody's statue, at the east end of the Royal Exchange, was inaugurated by the prince of Wales 23 July, 1869.

PEACE. A temple was dedicated to peace by Vespasian, 75; see *Æne-ide*, *Tractatus*, *Justitiae*, &c.—"PEACE OF RELIGION" (between Catholics and protestants) was signed at Augsburg, 15 Sept. 1555.

A PEACE SOCIETY, founded 1816, for the promotion of universal peace; holds annual meetings; proposed amalgamation with the International Arbitration and Peace Association (founded by Mr. Lewis Appleton in 1860, Dec. 1864). The association divided in May, 1866, when the British arbitration association was founded by Mr. Appleton. A congress of the friends of peace, from all parts of the world, commenced its sittings at Paris, 22 Aug. 1849. It met in London at Exeter hall, 30 Oct. following; and at Frankfurt, in St. Paul's church, 22 Aug. 1850; at Birmingham, 28 Nov. 1850; and at Exeter hall, 23 July, 1851. A meeting was held at Manchester, 27 Jan. 1853; and at Edinburgh, 12 Oct. 1853.

Mr. Bright and Mr. Colclough were among the most conspicuous members of the society. A denunciation from the Peace Society, consisting of Messrs J. Sturge, A. Peace, and another Quaker friend, stated their views to the emperor of Russia at St. Petersburg, at an interview granted them in Feb. 1854. At the stormy international arbitration and peace congress at Geneva, Garibaldi was present,

9-12 Sept. 1867.

A peace congress met at Berne 24 Sept. 1868.

At the peace congress held at Lausanne, the violence of the Communists at Paris in May, was warmly reprobated.

25 Sept. 1871.

Congress held at Lugano, 27 Sept. 1872; at The Hague, 25 Sept. 1873; at Paris, 6 Sept. 1873; at Geneva, Oct. 1877; at Paris, 25 Sept. 1883; at Brussels, 10 Oct. 1882; at Berne 4-9 Aug. 1884.

Meeting at Crystal Palace near London, 22 July, 1885; another meeting 16 July, 1886; at Geneva, 9 Sept. 1887; at Paris, 23 June, 1889; in London, 14 July, 1890; Rome 11 Nov. 1891; Berne, Aug. 1892.

The principle of arbitration in place of war was adopted by the Pan-American Congress at Washington; a treaty was signed for several of the states 28 April, 1890.

Inter-Parliamentary Conference, on International Arbitration (members of different legislatures): first meeting at Paris, 24 July. Simon president June, 1889; London, Lord Haverhill president, 22 July, 1890; Rome 3-7 Nov. 1891; at Berne, Aug. 20, 30, 31, 1892.

The International Arbitration Society meets at Frankfurt, 17 Sept. 1890; at Westminster, 1 July, 1891; again 30 May, 1892.

PEACE PRESERVATION ACTS (IRELAND): one passed 4 April, 1870, was continued in 1876 to 31 June, 1880. A new act to last till 1 June, 1886, passed 21 March, 1881, continued till 31 Dec. 1887, 4 June, 1886. See *Arms Bill*.

PEACHES are said to have been introduced into this country from Persia about 1562.

PEARLS, mentioned *Job xxviii. 18*. M. Réaumur, in 1717, alleged that pearls are formed like other stones in animals. An ancient pearl was valued by Pliny at 80,000*l.* sterling. One which was brought in 1574, to Philip II., of the size of a pigeon's egg, was valued at 14,000 ducats. A pearl named the *Incomparable*, spoken of by De Moete, weighed thirty carats, equal to five pennyweights, and was about the size of a muscadine pear. The pearl mentioned by Tavernier, as being in possession of the emperor of Persia, was purchased of an Arab in 1633, and is valued at a sum equal to 110,400*l.* Value of pearls imported into Great Britain, 1850, 56,162*l.* Artificial mother of pearl is said to have been made at Berne by Mr. K. Gähndä.

PEASANTS' WAR, see *Jacquerie*.

PEAT, see *Bogs*. A peat coal and charcoal company, established in 1873, when coal was 4*s.* a ton.

"PECULIAR PEOPLE," a small sect founded in London by Wm. Briggs and Jas. Ban-yard in 1838; chief seat Essex. Two members, Thomas and Mary Anne Wagstaffe, were tried and acquitted of manslaughter, 29 Jan. 1868. They had neglected getting medical assistance for their sick child, and depended on the efficacy of their elders' prayers and anointing it with oil (*James v. 14*). Many cases of healing by these means are asserted. On 5 May, 1872, a father was convicted for neglecting to get medical advice for his child who died of small pox; and the sect agreed to modify their practice. Establishments for healing diseases by prayer exist in Germany.

At another trial, Thomas Hines was acquitted, in accordance with the opinion of the court. James Higgs held that the case did not amount to criminal neglect because the prisoner had not called in a doctor to his sick child, 10 Aug. 1874. Similar cases since 1875-6. John Robert Downes (for neglect respecting a sick child) sentenced to 3 months imprisonment 22 Sept. 1876.

PEDESTRIANISM. Enchidas, a citizen of Plataea, went from thence to Delphi to bring the sacred fire. This he obtained, and returned with it the same day before sunset, having travelled 125 English miles. No sooner had he saluted his fellow-citizens, and delivered the fire, than he fell dead at their feet. After the battle of Marathon, a soldier was sent from the field to announce the victory at Athens. Exhausted with fatigue, and bleeding from his wounds, he cried out, "Rejoice, we are conquerors!" and immediately expired.

Foster Powell, the English pedestrian, performed many astonishing journeys on foot. His expedition from London to York and back again, in 1788, is said to have been completed in 140 hours.

Captain Barclay, for a wager (on which many thousands of pounds depended), walked 1000 miles in 1000 successive hours, each mile in each hour, in forty-two days and nights (less 8 hours). His task was accomplished on 10 July, 1839.

Thomas Stansall, aged 60, of Salisbury, walked 100 miles in 100 hours (1 mile in 1 hour), finished, July, 1811.

Richard Manke, a native of Warwickshire, undertook (on invitation of captain Barclay) to walk 1000 miles in 1000 hours: the place chosen was the Barrack Tavern cricket ground, in Sheffield; he commenced on Monday, 17 June, 1850, and completed the 1000 miles, 29 July following, winning a considerable sum.

On 7 Oct. 1861, a 12 miles foot-race was held, when Lewis, the champion of England, ran 7 miles in 37 minutes 27 seconds; Doerfoot, a Seneca Indian, ran 12 miles in 65 minutes 5 seconds; and Mills ran 10 miles in 54 minutes 10 seconds; other races followed.

On 11 May, 1863, Doerfoot was beaten by White, who ran 10 miles in 54 minutes 14 seconds.

PEEL ACTS. Among the most important were the Bank Acts of 1819 and 1844; the acts amending the criminal law, 1827; dividing parishes into districts, 1833; and the act repealing the corn laws in 1846.

PEEL ADMINISTRATIONS.* The first

* Sir Robert Peel was born 5 Feb. 1788; entered parliament in 1809; became under-secretary of the colonies in 1811, chief secretary for Ireland in 1818; M.P. for Oxford in 1818 (when he resigned his office); secretary for home department in 1822; resigned office and re-appointed in 1827; resigned again in 1830; became

succeeded the Melbourne administration, which was broken up on the retirement of Lord Althorp, the chancellor of the exchequer, in Nov. 1834. Sir R. Peel, then in Italy, was summoned home, the duke of Wellington holding the seals of office in the interim. They both resigned in April, 1835. In May, 1841, Sir R. Peel carried a vote of want of confidence in the Melbourne cabinet, but did not take office; and in Sept. of that year, he became again premier. He lost the support of the conservative party by obtaining the repeal of the corn laws, and resigned 29 June, 1846.

PEERESSES of the United Kingdom (*in their own right*): 7 in 1885, Countess of Cromartie (duchess of Sutherland), baronesses Berkeley, Bessborough, Burdett-Goutts, Le Despencer, Willoughby De Resby, Bolsover. In 1892, 6: viscountess Ham-

plender in 1834 and 1842 (*see above*). He was thrown from his horse 29 June, and died 4 July, 1850. He greatly relaxed the severity of our criminal code in 1827, &c.; established the new police, and carried the catholic emancipation bill in 1829, and the repeal of the corn laws in 1846. Statues have been erected to him—at Bedford, in 1852; at Farnworth, Leeds, Bury, and Manchester, in 1853; and in London and Birmingham in 1855.

bladen and baronesses Berkeley, Bessborough, Burdett-Goutts and Macdonald of Bernalcliffe.

PEERS, *see* *Lords*.

PEGU, a province of the Burmese empire, discovered by the Portuguese in 1520. Pegu, the capital, was taken by major Cotton, with 300 men, in June, 1852, without loss; and afterwards abandoned. It was again occupied by the Burmese and strongly fortified, with a garrison of 4000 men. It was recaptured by general Godwin with 1200 men and two guns, in two hours, with the loss of six killed and thirty-two wounded. The province was annexed to our Indian possessions, by proclamation, 20 Dec. 1852, and has since prospered. In Feb. 1862, it was united with Arracan and Tenasserim as British Bumah.

PEIHO, *see* *China*, 1859, 1860.

PEISHWA, the prime minister of the Marhattas, seized the sovereign power and settled at Poonah, 1749. The title was abolished in 1818.

PEIWAR PASS (Kotul), in the Khoorum valley, Afghanistan. Here general Roberts, with the 72nd highlanders and the Ghoorkas, defeated the Afghans, 2 Dec. 1878. Major Anderson and capt. Kelso were killed, and about 80 men were killed and wounded. The enemy's loss was very great.

PEKIN, the capital of China, was built by Kachilun-Khan, grandson of Genghis-Khan, about 1267. Here was held the court of the Mongol or Yuan dynasty, 1280 to 1368. In 1369, Hung-wu, of the Ming dynasty, removed to Nankin, which was the capital till Yung-lo removed his court to Peking in 1410; and by him and his successors the city was enlarged, fortified, and beautified. It was visited by Lord Macartney, Sept. 1793; surrendered to the allied English and French armies, 12 Oct. 1860; and evacuated by them 5 Nov., after peace had been signed 24 Oct. It was described as being in a very desolate state, and the inhabitants scattered and indigent. English and French representatives were settled at Peking, March, 1861. Preliminary Peace with France concluded here, 5 April, 1885. The famous temple or Altar of Heaven burnt 18 Sept. 1889. Population, estimated 1874, 1,648,814.

PELAGIANS, followers of Pelagius, a Briton, appeared at Rome about 400. Their doctrines were condemned by councils at Jerusalem, Carthage, and other places, 415, 530. They maintained.—

1. That Adam was by nature mortal, and whether he had sinned or not would certainly have died.
2. That the consequences of Adam's sin were confined to his own person.
3. That new born infants are in the same condition with Adam before the fall.
4. That the law qualified men for the kingdom of heaven, and was founded upon equal promises with the Gospel.
5. That the general resurrection of the dead does not follow in virtue of Christ's resurrection.

PELASGI, the primitive inhabitants of Asia Minor, Greece, and Italy, appear to have belonged to the Indo-Germanic race. They were in Greece about 1900 B.C., and in Italy about 1600 B.C. They have been termed Tyrrheni, Sicani or Siculi, Apuli, &c. From the Pelasgi came the Dorians, Eolians, and Ionians; all three being Hellenes or Greeks. The Pelasgi appear not to have had the art of writing, but have left numerous architectural remains; they were probably a wealthy, powerful and intelligent people.

PELEW ISLANDS (N. Pacific Ocean), discovered by the Spaniards in the 17th century. The East India Company's packet *Antelope*, captain Wilson, was wrecked here in 1783. The ship, Abba Thalle, allowed captain Wilson to bring prince

Is Son, his son, to England, where he arrived in 1784, and died of the small-pox soon after. The East India Company erected a monument over his grave in Rotherhithe churchyard.

PENHAM ADMINISTRATION. Mr. H. Penham replaced the earl of Wilmington as premier, 25 Aug. 1743; see *Wilmington*. In Nov. 1744, the following ministry was formed (termed "the broad bottom administration," because it comprehended a grand coalition of the parties). It was dissolved by the death of Mr. Penham, 6 March, 1754.

Henry Penham, first lord of the treasury and chancellor of the exchequer.

Lord Hardwicke, lord chancellor.

Duke of Dorset, president of the council.

Earl Gower, lord privy seal.

Duke of Newcastle and the earl of Harrington, secretaries of state.

Duke of Montagu, master-general of the ordnance.

Duke of Bedford, first lord of the admiralty.

Duke of Grafton, lord chamberlain.

Duke of Richmond, master of the horse.

Duke of Argyll, keeper of the great seal of Scotland.

Marquis of Tinsdale, secretary of state for Scotland.

All of the cabinet.

The duke of Devonshire and duke of Bolton were not of the cabinet.

PELLS (from *pellis*, skin), receipts on parchment rolls deposited in the court of exchequer. By an act passed in 1834, the office of clerk of the pells was abolished, and a comptroller-general appointed. "Pell records," or "Issues of the Exchequer," or payments made out of his revenue by James I., were published by the government in 1836.

PELOPIUM, see *Niobium*.

PELOPONNESUS (the island of Pelops), a peninsula, S. Greece, termed *Morea* in the 13th century, said to have been settled by Pelops about 1283 B.C. **PELOPONNESIAN WAR** continued for twenty-seven years between the Athenians and the people of the Peloponneseus, with their respective allies, and is the most famous of the wars of Greece. It began by an attempt of the Boeotians to surprise Plataea, 431 B.C., on 7 May, and ended 404 by the taking of Athens by the Lacedaemonians.

PELUSIUM (now *Tinck*), formerly Sin, the key of Egypt. Here, in 525 B.C., Psammetichus III. was defeated by Cambyses, the Persian, who thereby obtained possession of the kingdom. Pelusium surrendered to Alexander, 333; was taken by the Persians, 309; by Antiochus, 173; by Augustus, 30 B.C.; and after a protracted resistance by Amrou, the Saracen, A.D. 638.

PEMBROKE (S. Wales). A county palatine till 1536. The royal dockyard at Milford was moved to Pembroke in 1814. **PEMBROKE COLLEGE** and **HALL**, see under *Oxford and Cambridge*. Population, 1881, 14,156; 1891, 14,978.

PENAL LAWS, see *Criminal Laws and Roman Catholics*. *Penal servitude* was substituted for transportation by acts passed in 1853 and 1857, and amended in 1864. A penal servitude commission appointed, 22 Jan. 1878.

First session of the International Penal Law Union opened at Brussels 7 Aug. 1889. The Penal Servitude acts, 1853 et seq. combined by act passed 5 Aug. 1891.

PENANCE, a sacrament in the Roman church, arose out of the practice of auricular confession (which see). The council of Trent, in its 14th session (1551), decreed that every one is accused who shall affirm that this sacrament was not instituted by Christ.

PENANG, or PRINCE OF WALES'S ISLAND, was given up to the East India Company in 1786, by captain F. Light, who received it as a marriage portion with the daughter of the king of Kedah. After several changes it became one of the Straits Settlements (which see).

PENDULUMS. The isochronous property of the pendulum is said to have been applied to clocks by Galileo about 1639, and by Richard Harris about 1641. Christian Huyghens claimed this discovery, 1658. See *Clocks*. George Graham invented the compensating pendulum, 1715. Experiments were made to determine the density of the earth by pendulums by Mr. (aft. sir) G. B. Airy (aft. astronomer royal), and others, in a mine in Cornwall, in 1826 and 1828; and at Horton Colliery 1854. In 1851, M. Foucault demonstrated the rotation of the earth by the motion of a pendulum.

PENGE MYSTERY, Surrey, see *Trials*, Sept. 1877.

PENINSULAR WAR, see under *Spain*, 1808-14.

Wellington computed that he lost 35,000 men in this war—killed, prisoners, deserters, &c. He took great care of his men (1836).

PENITENTIARIES. The London Female Penitentiary, Pentonville-road, was established in 1807; and the British Penitent Female Refuge at Cambridge Heath, Hackney, in 1829. The Church Penitentiary Association, founded 1851. See *Middlebank*.

PENITENTS, see *Magdalens*. The Penitents of the name of Jesus in Spain, were a congregation of persons who had led a licentious life, formed about 1550. The penitents of Orieto were formed into an order of nuns about 1662.

PENNSYLVANIA (N. America), the first state in the Union in regard to mineral wealth. The settlement by the Swedes here in 1633, was taken by the Dutch in 1655, and acquired by the British in 1664. Pennsylvania was granted by Charles II. to the duke of York, 1664; and it was sold to the Penn family, 1681. Pennsylvania was afterwards purchased from the Indians by the celebrated William Penn (son of admiral Penn), who went out from England with a number of colonists; from which period the settlement gradually increased. Mr. Penn granted a charter in May, 1701, but the emigrants from the Low Countries refused it, and separated themselves from the province of Pennsylvania. They afterwards had their own assembly, in which the governor of Pennsylvania presided. This state adopted an independent constitution in 1787, and established the present in 1790. Capital, Harrisburg; principal city, Philadelphia. It was strongly unionist during the civil war, 1861-5; see *United States of America, and Petrolen*. For strikes see *United States*, 1877, 1882. Population in 1860, 2,906,370; in 1880, 4,262,891; 1890, 5,453,014.

Great destruction of property and life by a tornado, especially at Pittsburgh and Reading, 9 Jan. 1889. Several days' violent storms and heavy rain in the Alleghenies, swelled the rivers and caused the overflow of the lakes, May, 1889. At 5 p.m. 31 May, the South Fork reservoir, a lake about 1 mile square burst the huge dam, and a mass of water rushed down the South Fork, four miles, by the deep crevasses Conemaugh valley to its junction with the Conemaugh river, driving all before it. For a distance of about 15 miles round Johnstown the flood swept out towns and villages, destroying all the bridges, railways, and factories. South Fork, Johnstown, Cambria city, McConnville, Sheridan, and other flourishing towns were completely blotted out. A great mass of floating wreckage, which was stopped by a stone railway

bridge at Johnstown, took fire, above five hundred persons, who were buried in the burning mass, perished. The most successful measures were taken by the government, by several states and by the railway companies for the relief of the sufferers, and for averting imminent famine and pestilence. Robbers of the dead and living were hushed by a vigilance committee. Troops were sent to maintain order, liberal subscriptions were begun in London, Paris, and other places, June. It is stated that the dam had previously given visible signs of its being in a very insecure condition, and had not been properly constructed. Several towns and villages submerged. June, many bridges swept away above 150 deaths reported.

Latest statistics state the result of the Johnstown disaster to be about 6,000 deaths. 26 July 1889
Johnstown again inundated through heavy rain, about 26 Feb 1891

By an explosion in the mine 10 miles from Mount Pleasant 150 out of 160 men perished 27 Jan 1891

Riotous strikes in the Pennsylvania coke district, such destruction of property reported 30 March desperate fight 2 men killed 2 April 1,000 soldiers maintaining order 2 April, both renewed with desperate fighting about 25 April
A train containing 75 men thrown off the line while rushing through a burning forest near Conley, port Potter county 5 men killed many injured about 12 May

After heavy rains when the river had become turbulent on 5 June a cloud burst over the Pittsburgh (the region causing great inundations at Titusville the tanks of oil and gasoline became upset and were ignited by lightning and the city was fired. A disastrous fire destroyed the bridge. Explosion followed, causing a panic and the people fled to the hills, women and children being trampled on during the rush. The fiery river reached Oil city 28 miles distant and a large part of it was reduced to ashes or submerged 1890
It was reported that 150 persons were either drowned or burnt at Titusville, and about 200 in all.

The loss of property at the two cities was estimated at 3,000,000 dollars. Large sums were immediately subscribed for the relief of the sufferers 6 June 1891

PENNY. The ancient silver penny was the first silver coin struck in England, and the only one current among the Anglo-Saxons. The penny until the reign of Edward I was struck with a cross, so deeply indented that it might be easily parted into two for halfpence, and into four for farthings, and hence these names. Copper penny and two-penny pieces were coined by Boulton and Watt at Soho, Birmingham, in 1797, and were accounted the finest of our copper currency. See *Coin*, &c.—**FRANK-POST.** see *Post-Office*—THE **PENNY MAGAZINE** began in 1832, the **PENNY CYCLOPEDIA** in 1833 (supplements in 1846 and 1848). The **PENNY RECEIPT** stamp was appointed in 1853 (postage stamps authorized to be used for receipts after 1 June, 1851), and in 1858 a penny stamp was directed to be placed on bankers' cheques.—**PENNY BANKS** (in 1861 about 200) were established about 1850. They have become numerous, and in 1876 were authorized to invest their funds.—**PENNY READINGS**, for the working classes, became general in 1859. Carpenter's "Penny Readings," published in 1865-7.

The value of the Roman penny (mentioned Matt. xx. 2), or denarius, was estimated at 1/12 of our money. **Penny dinners** for poor Board school children organized on proposed at Society of Arts, 6 Dec. 1884, see *Industrious Children*. A similar self-supporting system existed in the provinces.

PENRUDDOCK'S REBELLION on behalf of Charles II. was suppressed, and colonial John Penruddock himself executed, 16 May, 1655.

PENSIONS. The crown's power of granting them, often much abused, was materially checked by statute 1 Anne, c. 1 (1702).

PERJURY The early Romans threw the offender headlong from the Tarpeian precipice, and the Greeks set a mark of infamy upon him. After the empire became Christian, upon one who swore falsely upon the Gospels, was to have his tongue cut out. The canons of the primitive church enjoined eleven years' penance, and in some states the false swearer became liable to the punishment he charged upon the innocent. In England perjury was punished with the pillory, fine, and imprisonment, 1562. By the Abolition of Oaths bill, persons making a false declaration are deemed guilty of a misdemeanour. Act 5 & 6 Will. IV. c. 60 and 61, 9 Sept. 1835. Perhaps the greatest perjurer in modern times was Titus Oates, see *Oates*. A woman named Alice Grey was convicted of many perjuries in 1856. See *Female*, 1873.

PERTH (the old capital of Scotland), said to have been founded by Agricola, about A.D. 70. It was besieged by the Regent Robert, 1339. On 20 Feb. 1437, James I. was murdered at the Black Friars' monastery here, by Robert Graham and the earl of Athol, for which they suffered condign punishment. Gowrie's conspiracy occurred here, 6 Aug. 1600. Perth was taken from the French garrison by the reformers, 26 June, 1559. The "Articles of Perth" relating to religious ceremonies, were agreed to by the General Assembly of Scotland, 25 Aug. 1618. Perth was taken by Cromwell in 1651; and by the earl of Mar after the battle of Dunblane, in 1715. The statue of the prince consort was inaugurated in the presence of the queen, 30 Aug. 1864. PERUGIA, a city of central Italy; as Perusia, anciently one of the Etruscan confederation. It allied itself with the Samnites, but was ruined by two defeats by the Romans, 309 and 295 B.C. It was taken by Octavius Caesar from the adherents of Antony; many of whom were immolated on altars by their victor, 41. Leo X. took Perugia from the rival families Oddi and Baglioni, in A.D. 1520. An insurrection here against the pope was put down by the Swiss with great cruelty, 20 June, 1859. Perugia was taken by the Sardinian general Fanti, in Sept. 1860, when the cruel papal general Schmidt and 1600 men were made prisoners.

PERUKE or **WIG**. The ancients used false hair, but the present peruke was first worn in France and Italy about 1620; and introduced into England about 1660, and prevailed more or less till about 1810.

It is said that bishop Blomfield (of London), in 1830, obtained permission for the bishops to discontinue wearing their wigs in parliament, of which they gradually availed themselves. On account of the heat, sir J. F. Wilde, and other judges and several counsel, appeared in court without wigs, 22, 23 July, 1866.

PERUVIAN BARK, see *Jessitt's Bark*.

PESCHIERA, a strong Austrian fortress, on an island in the Mincio, near the Lago di Garda, N. Italy. It has been frequently taken by siege:—by the French, 1706; by the Austrians and Russians, 1799; by the French again, 1801; given up by them, 1814; taken by the Sardinians, May, 1848; retaken by Radetsky, March, 1849. The Sardinians were preparing to besiege it in July, 1859, when peace was made. It was given up to the Italians, 9 Oct. 1866; see *Quadrilateral*.

PESSIMISM (from *possimus*, the worst), the opposite doctrine to *optimism* (which see). Mr. James Sully's "Pessimism, a History and a Criticism" was published in 1877. Arthur Schopenhauer (1788-1860), an eminent pessimist, says, "All life is effort, all effort is painful, the pains of life must predominate."

PESTALOZZIAN SYSTEM of education was devised by John Henry Pestalozzi, born at Zurich in Switzerland, in 1746, died 17 Feb. 1827. In 1775 he turned his farm into a school for educating poor children in reading, writing, and working; but he did not succeed. In 1798 he established an orphan school where he began with the mutual instruction, or monitorial system, since adopted by Lancaster; but his school was soon after turned into a hospital for the Austrian army. In 1802, in conjunction with Fellenberg, he established his school at Hofwyl, which at first was successful, but eventually declined through mismanagement.

PESTH (Hungary), built about 839, on the east bank of the Danube, opposite Buda, was repeatedly taken and besieged in the wars of Hungary, particularly with the Turks. The great insurrection broke out here, and the minister, count Lamberg, was killed, 28 Sept. 1848. Buda-Pesth was taken by the imperialists, 5 Jan. 1849. The Hun-

garians afterwards defeated the Austrians, who were obliged to evacuate it 18 April, same year; see *Hungary*. Buda-Pesth formally constituted capital of Hungary, Nov. 1873.
Hungarian national exhibition opened 5 May, 1885.

PESTILENCE, see *Plague*.

PETALISM (from the Greek *petalon*, a leaf), a mode of deciding upon the guilt of citizens of Syracuse, similar to the Athenian ostracism, the name being written on a leaf (generally of an olive) instead of on a shell, about 460 B.C. If guilt were established the sentence was usually banishment.

PETARD, or **PETAR**, an invention ascribed to the Huguenots in 1579. Petards of metal, nearly in the shape of a hat, were employed to blow up gates or other barriers, and also in countermines to break through into the enemy's galleries. Cahors was taken by Henry IV. by means of petards, in 1580, when it is said they were first used. "Hoised with his own petar." *Shakespeare*, Hamlet iii. 4.

PETER THE GREAT'S WILL, see under *Will*.

PETER THE WILD BOY, a savage creature found in the Harzwald, electorate of Hanover, when George I. and his friends were hunting. He was found walking on his hands and feet, climbing trees like a squirrel, and feeding on grass and moss, Nov. 1725. At this time he was supposed to be thirteen years old. He died, while under the care of an English farmer, Feb. 1785, unchanged in his habits.

PETERBOROUGH, anciently Medeshamstede (Northamptonshire); obtained its present name from a king of Mercia founding an abbey and dedicating it to St. Peter about 655. The church, destroyed by the Danes, was rebuilt with great beauty. The tower becoming dangerous, restoration resolved on, Dec. 1882. Foundation laid of new building, 7 May, 1884. Choir re-opened 11 July, 1889; Cathedral re-opened, 14 Oct., 1890. The bishopric was erected by Henry VIII., out of the lands of dissolved monasteries in the diocese of Lincoln. The first bishop was John Chambere, the last abbot of Peterborough, 1541. The see was valued in the king's books at 419*l.* 19*s.* 11*d.* Present income 4500*l.* Population, 1881, 21,228; 1891, 25,172.

PETERLOO, see *Manchester Reform Meeting*, 16 Aug. 1819.

PETERSBURG, ST., the modern capital of Russia, founded by Peter the Great, 27 May, 1703. He built a small hut for himself, and some wooden hovels. In 1710, the count Golovkin built the first house of brick; and the next year, the emperor, with his own hands, laid the foundation of a house of the same material. The seat of empire was transferred from Moscow to this place in 1712. Here, in 1735, a fire consumed 2000 houses; and in 1780, another fire consumed 11,000 houses; this last fire was occasioned by lightning. Again, in

June, 1796, a large magazine of naval stores and 100 vessels were destroyed. The winter palace was burnt to the ground, 29 Dec. 1837. The railway to Moscow was finished in 1851; to Berlin, opened 5 May, 1862. On 10 June, 1862, property to the amount of nearly a million sterling was destroyed by fire. Population, 1886: province, 1,660,859; city, 1885, 861,303. See *Russia*, 1862 (1859); *Petersburg*, Virginia, see *United States*, 1864.

PETER'S CHURCH, ST. (Rome), originally erected by Constantine, 306. About 1450, pope Nicholas V. commenced a new church. The present magnificent pile was designed by Bramante, the first stone laid by pope Julius II. in 1506. In 1514, Leo X. employed Raphael and two others to superintend the building. Paul III. committed the work to Michael Angelo, who devised the dome, in the construction of which 30,000 lb. of iron were used. The church was consecrated 18 Nov. 1626. The front is 400 feet broad, rising to a height of 180 feet, and the majestic dome ascends from the centre of the church to a height of 324 feet, the length of the interior is 600 feet, forming one of the most spacious halls ever constructed. The length of the exterior is 669 feet, its greatest breadth within is 412 feet; and the entire height from the ground 432 feet. Renewal of the leaden envelope completed, July, 1884.

PETER'S PENCE, presented by Ina, king of the West Saxons, to the pope at Rome, for the endowment of an English college there, about 725, so called because agreed to be paid on Peter Mass, 1 Aug. The tax was levied on all families possessed of thirty pence yearly rent in land, out of which they paid one penny. It was confirmed by Odo, 777, and was afterwards claimed by the popes as a tribute from England, and regularly collected, till suppressed by Henry VIII. 1534. Camden. A public collection (on behalf of the pope) was forbidden in France in 1860.

PETERSWALDEN (Germany), CONVENTION OF, between Great Britain and Russia, by which a firm and decisive alliance between those powers was made against France, and the course of action against Napoleon Bonaparte was planned; signed 8 July, 1813. This alliance led to the overthrow of Bonaparte in the next year.

PETERWARDEIN (in Austria), was taken by the Turks, July, 1526. Here prince Eugene of Savoy gained a great victory over the Turks, 5 Aug. 1716.

PETITIONS. The right of petitioning the crown and parliament for redress of grievances is a fundamental principle of the constitution. Peti-

tions are extant of the date of Edward I. In the reign of Henry IV. petitions began to be addressed to the house of commons in considerable numbers. In 1837 there were presented to parliament 10,831 petitions, signed by 2,905,905 persons; in 1859, 24,386, signed by 2,290,579; in 1867, 12,744, signed by 1,145,216. See *Abolition*, and *Signets*.

A petition from Boulogne for a canal was brought in, but not received by the commons. April-May, 1896. Evidence before a committee of the commons disclosed statements whereby vast numbers of fictitious and forged signatures were obtained, rendering the petitions for and against the continuance of the London coal and wine duties utterly valueless, May, 1897.

PETOS' ACT, 13 & 14 Vict. c. 28 (1850), renders more simple and effectual the titles by which religious bodies hold property.

PETRA, the ancient Sela, in mount Seir, near mount Hor, in the land of Edom. In the 4th century B.C. it was held by the Nabatheans, who successfully resisted Antigonos. About A.D. 70 it was the residence of the Arab princes named Aretas. It was conquered by Cornelius Palma, and annexed to the empire under Trajan, 105, to which period its remarkable monuments are ascribed. It was an important station for commercial traffic with Rome. It has been described by Burckhardt and other travellers.

PETRARCH AND LATERA; celebrated for the renowned passion of the former for the latter, began in 1327; and the chief subject of his sonnets. He was born 1304, crowned with laurel, as a poet and writer, on Easter-day, 8 April, 1341, and died at Arqua, near Padua, 18 July, 1374. Laura died 6 April, 1348. A commemoration of his death at Avignon and other places, 18 July, 1874.

PETRO-BRUNIANS, followers of Pierre de Bruys, an early reformer, who was burnt at St. Gilles, Languedoc, as a heretic, in 1130.

PETROLEUM, rock oil or mineral oil similar to paraffin, has been found in many parts of the world, especially at Rangoon. In 1859 and since, a number of oil-springs were discovered in the bituminous coal regions of N. W. Pennsylvania, now termed "Petrolia," and others have been discovered in Ohio and other states, and also in Canada. Numerous artesian wells were sunk, manufactories erected, and an almost unlimited supply obtained; between 1859-77, 2,802,500,000 gallons; in 1863, 8,907,365 gallons. In consequence of the importation of this oil into this country, and many accidents having taken place through its inflammability at low temperature, acts for "the safe keeping of petroleum" were passed, 29 July, 1862; July, 1868, Aug. 1871, and 1879. Petroleum became an awful weapon in the hands of the insurgents in Paris, 23-27 May, 1871. About fifty killed by explosion at a petroleum manufactory near Rheims, 16 July, 1871. The Petroleum Association test petroleum, with the view of preventing the importation of that which is dangerous. Refined petroleum imported. 1872, 5,670,674 gallons; 1877, 33,474,955 gallons; 1881, 58,371,386 gallons. Unrefined and refined. 1882, 50,695,982 gallons; 1883, 70,526,996 gallons; 1884, 52,975,789 gallons; 1885, 73,873,641 gallons; 1886, 71,251,730 gallons; 1887, 77,390,435 gallons; 1888, 94,401,285 gallons; 1889, 102,881,256 gallons; 1890, 105,080,863 gallons.

Petroleum oil found in Lunenberger Heide, Hannover; a colony formed named Elbheim announced Aug. 1882

Petroleum fire at Bristol; fire started through the drains into the river. 30 Nov. "The great petroleum grounds near Baku, a Russian town on the Caspian, long monopoly owned, set free,

PHIGALIAN MARBLES, in the British Museum, were purchased for it by the prince regent in 1817. They consist of portions of the frame taken from the temple of Apollo Epikourus at Phigaleia in Arcadia, and are reputed to be works of the earlier school of Phidias, who died 432 B.C. The bas-reliefs represent the conflicts of the Greeks and Amazons, and of the Centaurs and Lapithæ.

PHILADELPHIA (Asia Minor), see *Seven Churches*. — **PHILADELPHIA**, Pennsylvania, was planned by William Penn 24 Oct. 1682. The first American congress assembled here in 1774, and promulgated the declaration of independence on 4 July, 1776. It was the capital of the Union till 1800, when Washington was selected in its place. The National Union Convention held its first meeting here 14 Aug. 1866, see *United States*. Population 1880, 847,170, 1890, 1,046,964.

Beginning of centennial year celebrated with great demonstration 31 Jan 1876
International exhibition opened by the president, the emperor and empress of Brazil present, very successful, about 130,000 persons present.

10 May, "Said to be the most extensive of all exhibitions hitherto, 1/16 of three-eighths of a mile, main building 1900 feet long, 6 other large buildings, and see smaller."
Prizes awarded to exhibitors; out of 11,000, 488 given to Great Britain 27 Sept.
About 80,000 persons admitted by payment daily, Sept., exhibition closed 20 Oct.

PHILANTHROPIC SOCIETY, for the reformation of criminal boys, was established in 1788, and incorporated in 1806. It supports a farm-school at Redhill, Reigate, Surrey, see *Reformatory Schools*.

PHILHARMONIC SOCIETY (London), was established in 1813; first concert, 8 March. New Philharmonic Society began 1852.

PHILIPHAUGH, near Selkirk, S. Scotland, where the marquis of Montrose and the royalists were defeated by David Leslie and the Scotch covenanter, 13 Sept. 1645.

PHILIPPI (Macedonia), so named by Philip II. of Macedonia. Here Octavius Caesar and Marc Antony, in two battles, defeated the republican forces of Cassius and Brutus, who both committed suicide, Oct. 43 B.C. Paul preached here, A.D. 48, and wrote an epistle to the converts, 64.

PHILIPPIOS, the term applied to the orations of Demosthenes against Philip II. of Macedonia, 355-341 B.C., and also to the orations of Cicero against Marc Antony (one of which, called *divine* by Juvenal, cost Cicero his life), 44-43 B.C.

PHILIPPINE ISLES (in the Malay Archipelago), discovered by Magellan, in March, 1521, who here lost his life in a skirmish. They were taken possession of in 1565 by a fleet from Mexico, which first stopped at the island of Zebu, and subdued it. In 1570 a settlement was effected at the mouth of the Manila river, and Manila became the capital of the Spanish possessions in the Philippines, see *Manila* and *East Indies*. The Philippine commercial company was unsuccessful, 1785. A successful Philippine exhibition was opened in Madrid, autumn 1887.

Rebels defeated in a fierce engagement at Lanas reported 20 Sept. 1891
Mr. John Foreman's "Philippine Islands," was published in 1891.

PHILIPPIUM, a metal of the yttrium series, found in Samsakoto earth (in Russia, North Carolina, &c.) by M. Marc Delafontaine, by means of the spectroscope; announced Oct. 1878. Also said to have been found by Mr. Lawrence Smith, and named Mosendrum, July, 1878.

PHILIPPOPOLIS, capital of (Eastern) Roumelia, which see. Population, 1868, 31,032.

PHILISTINES, a people of Palestine, conquered Israel, 1156 B.C. and ruled it forty years. They were defeated by Samual, 1120, and by Saul and Jonathan, 1087. They again invaded Israel about 1063, when David slew their champion, Goliath. After David became king he thoroughly subdued them, 1040. In common with Syria their country was subjugated by the Romans, under Pompey, about 63.—In Germany, about 1830, Herne and the liberal party applied the term "Philistines" to the opponents of progress, or conservative party.

In England the term has applied to the opponents of 'utilitarian' and humanitarian, chiefly among the upper middle classes by Mr. Matthew Arnold and others. 1867 & seq.

PHILOBIBLION SOCIETY, was instituted in 1853 by Mr. R. Monckton Milnes (aft. Lord Houghton), M. Sylvain Van de Weyer, the Belgian minister, and others. It publishes volumes of "Miscellaneous," &c.

PHILOLOGY, the science of language, much studied during the present century.

John Horne-Tooke's "Divisions of Farley" published
Philological society of London established 25 May, 1848
Lorenz Brunsbach's "Leitfaden der Germanistik" 1846-52

PHILOSOPHER'S STONE, see *Alchemy*.

PHILOSOPHICAL LAMP, constructed by Johann Wolfgang Döbereiner, who applied it to the property possessed by spongy platinum of causing the combination of oxygen and hydrogen, discovered by him in 1823.

PHILOSOPHY (love of wisdom), the knowledge of the reason of things (distinguished from history, the knowledge of facts, and from mathematics, the knowledge of the quantity of things)—the hypothesis or system upon which natural effects are explained. *Locke*. Pythagoras first adopted the name of philosopher (such men having been previously called sages) about 525 B.C. Philosophers were expelled from Rome, and their schools suppressed, by Domitian, A.D. 83. Philosophy is now divided into.—1. Moral or Ethical; 2. Intellectual; 3. Natural or Physical.

PHIPPS EXPEDITION The hon captain Phipps (afterwards lord Mulgrave) sailed from England in command of the *Swa-Howe* and *Careless* ships, to make discoveries as near as possible to the North Pole. In August 1773 he was for nine days environed with barriers of ice, in the Frozen Ocean, north of Spitzbergen, 80° 48' N lat. A brisk wind in two or three days completed their deliverance. They returned to England without having made any discoveries, 20 Sept 1773. Nelson was coxswain to the second in command.

PHLOGISTON, a term employed by Stahl to designate the matter or principle of fire, "the inflammable principle" of Bishop Watson, near the close of the 17th century. The chemical theory based upon it, considered to have been totally refuted by Lavoisier, 1790, has been recently revived in a modified form.

PHOCIS, a state in Northern Greece. The Phocians seized Delphi 357 B.C., and commenced the second Sacred War. They were opposed by Thebes and other states, and were utterly subdued by Philip II. of Macedonia in 346.

PHOENICIA, on the sea coast of Syria. The natives were the most eminent navigators and

traders of antiquity their cities or allied states being Tyre, Sidon, Berytus, Tripoli, Byblos, and Ptolemais, or Acre. From the 10th to the 17th centuries before Christ, they established colonies on the shores or isles of the Mediterranean—Gaza, Hippo, Utia, Gades, and Panormus, and they are said to have visited the British Isles. Phœnicia was conquered by Cyrus 537 B.C., by Alexander, 332, by the Romans, 67, and, after partaking of the fortunes of Palestine, was added to the Ottoman empire, A.D. 1516. See *Sidon* and *Tyre*.

PHOENIX CLUBS, of a treasonable character, were formed in Ireland in 1853. They met at night to drill. Several persons were arrested and tried in March, 1859, at Malco, but the jury could not agree on their verdict. Daniel Sullivan was condemned to penal servitude for ten years, April, 1859. Eventually some of the prisoners pleaded guilty, and were discharged on being bound over to keep the peace.

PHONEIDOSCOPE, an instrument for observing the colour figures of liquid films under the action of *sonorous vibrations*, being a *visible demonstration* of the vibratory and molecular motion of a telephone plate, invented by Mr Sedley Taylor, 1877, manufactured by S C Tuley, & Co, London. 1878

PHONOGRAPH, a machine proposed to be attached to pianofortes and other keyed instruments, by which any music that is played may be written down on blank paper, since it rules and prints the notes simultaneously. It was patented by Mr. Feunby, 13 June, 1837. The motive-power is electro-magnetism. Machines with a similar object were projected by Mr. Ciled in 1747, Mr. J. I. Unger in 1771, and by Mr. Carey in 1827.

A new phonograph by Thomas Alva Edison, called Gramophone, was introduced. The Gramophone identifications are made by means of a pin in a sheet of tin foil by speaking or singing, and from these notes may be taken. When these are placed upon the diaphragm of a telephone connected with revolving cylinders the sounds may be reproduced with a very like effect. Improved in New York Jan 12th 1879 See *Chronicle*

A greatly improved instrument by Mr. Edison is applied for patent communication, announced April 1, 1879 successful experiments reported in N. Y. *Chronicle* 12th May, 1879

PHONOGRAPHY (from the Greek *phōnē*, sound), suggested by Franklin, 1768. The Phonetice Society, whose object was to render our mode of writing and printing more consonant to sound, was established 1 March, 1813, at W C Threlvolan, president, and Mr Isaac Pitman, secretary, the latter being the inventor of the system which was made known in 1837. Among other works published by the promoters of the system, was the "Phonetic News," in 1840, see *Visible Speech*.

Pickwick Papers in shorthand, first of a series, published by Mr. Pitman 1 May, 1833
 Messrs. Pitman first publish in phonography, the New Testament from engraved plates 8 Oct. 1836
 Sells system in shorthand first published 5 Feb. 1837
 The book of Common Prayer; and a National "Phonographic Library" begun in April.
 Mr. Edison's talking doll, which utter about 30 words, by means of a concealed phonograph and clockwork, were exhibited at the Savoy Hotel, Westminster, 25 July; Edison's phonographic toy company announced 1 July, 1890

PHONOPORE, an arrangement of telegraph wires to facilitate transmission of sound, by checking the influence of adjoining wires, the invention of Mr. C. Langdon Davies, announced, May, 1886. See *Telephones*. The system was stated to have worked successfully on the Son's Eastern railway between London and Folkestone, Feb. 1887; the Midland railway, and others, 1889-92.

PHONOSCOPE, an apparatus for testing the quality of musical strings, invented by M. Koenig, and exhibited at the International Exhibition in 1882.

Mr. Edmunds' phonoscope, exhibited to the British Association, Aug. 1878, is an instrument for producing figures and light from the vibrations of sound. The name phonoscope is given to apparatus used by M. M. G. Duiney in phonography; the lip of a speaker and so combining the images thus produced that they may be understood by a deaf-mute, June, 1892. See *Photography*, 1871.

PHOSPHOR-BRONZE, an alloy of copper, tin, and phosphorus, invented by Messrs. Montifore-Levi and Kunzel, of Belgium, in 1867. It is very hard, ductile, and elastic, with a colour resembling gold.

PHOSPHORESCENCE. The property possessed by some bodies of retaining luminosity after exposure to light observed by the ancients; especially noticed by Vincenzo Cascariolo (1602), Boyle, Canton, Wilson, and others; and specially studied by Edmund Becquerel, and Balmann. See *Luminous Paint*.

PHOSPHORUS was discovered in 1667, by Brandt, of Hamburg, who procured it from urine. The discovery was prosecuted by John Kunckel, a Saxon chemist, about 1670, and by the hon. R. Boyle about the same time. *Notw. Dict.* Phosphoric acid is first mentioned in 1743, but is said to have been known earlier. Gahn pointed out its existence in bones in 1769, and Scheele devised a process for extracting it. Canton's phosphorus is so called from its discoverer, 1768. Phosphorated hydrogen was discovered by Gengembre in 1812. The consumption of phosphorus has immensely increased since the manufacture of lucifer matches. In 1815, Schrötter, of Vienna, discovered allotropic or amorphous phosphorus, which ignites more slowly and is less unwholesome in working than ordinary phosphorus.

PHOTOGRAPHY. The action of light on chloride of silver was known as early as the 16th century. The phenomenon was studied by Scheele (1777), Senecbar (1790), Ritter and Wollaston (1801). From the results of these investigations, experiments were made by Thos. Wedgwood and Humphry Davy, in the Royal Institution, London, which were published in its Journal, 1802. Wedgwood may be regarded as the first photographer. His paper was entitled "an account of a method of copying paintings upon glass, and of making profiles by the agency of light upon nitrate of silver."

Further discoveries were made by Niepce in 1814, and Sir J. Herschel in 1816.

Louis J. M. Daguerre commenced his experiments in 1824; and in 1826 joined Joseph Nicéphore Niepce, and worked with him till the death of the latter in 1833. The production of *Daguerotype* plates was announced in Jan. 1839; and the French chamber of deputies granted a pension to Daguerre and to Niepce's son Isidore.

In 1839 Mr. Henry Fox Talbot first published his mode of multiplying photographic impressions by producing a *negative* photograph (i. e., with the light and shades reversed) from which any number of positive copies may be obtained. His patent for producing the *Talbotype* or *Calotype* (on paper) is dated Feb. 1841.

In 1841, Collodion (which see) was applied to photography by Mr. F. Archer.

Here Franz Verreaux, of Kienersburg, Transylvania, photographs colours on glass and paper; specimens are exhibited at the Photographic Institute at Vienna, March, 1890.

The Photographic Society of London was established in 1853. It publishes a journal. On 22 Dec. 1859, 774 specimens of photography were exhibited at the rooms of the Society of Arts, Adelphi.

Carte de Visite portraits (which see) taken by M. Ferrier at Nice, 1857.

In 1861 Mr. Thompson, of Weymouth, photographed the bottom of the sea.

Photography was successfully applied to the transfer of works of art to wood blocks by Mr. John Leighton, in his illustrated edition of *Lyra Germanica*, 1861.

In 1861 professor O. M. Root suggested the application of photography to the microscope.

The tannin process introduced by major Russell about 1861.

The copyright of photographs is secured by an act passed in 1862.

Dr. Henry Wright photographed objects of surgical interest in Jan. 1862.

The *Woollytype* process, in which prints of silver and albumen are dissolved and a double salt of ammonia and collodion substituted, invented by Woolly, was announced in the autumn of 1864.

The light of ignited *ammonium* was employed for photographs by Mr. Brothers, of Manchester, in the spring of 1864.

Mr. H. Van der Weyde, an American artist, succeeded in making electric light very effective in photography, 1866-8.

Photographs of the first page of the *Times*, containing many French advertisements (14 inch long by 1 inch wide), sent to Paris from Bordeaux by balloons, Jan. 1871.

Criminals ordered to be photographed (by the act for prevention of crime), from 2 Nov. 1871.

Composite portraits (in which sometimes 9 components were used) formed in Mr. Francis Galton, by means of photography, 1877.

The *Autotype* process for transferring and printing reported successful, April, 1877.

Mr. E. J. Muybridge photographs, instantaneously, animals in rapid motion, 1881 & c. See *Synchromy*. Capt. Abney photographs a star in rapid motion by the electric spark, 17 March, 1882.

Crescent Photography began with professor Bond, the astronomer, of Cambridge, U.S., who exhibited a photograph of the moon in 1857. Since then, Mr. Warren de la Rue, of London, has produced excellent photographs of the moon, and other heavenly bodies, and on 28 July, 1860, photographed the solar eclipse.

By means of the gelatine dry plate, the results of the astronomical work of years is now obtained in hours. Delicate details are obtained not only of comets, nebulae and faint stars, but also of stars invisible by the most powerful telescope. Since 1866, Dr. W. Huggins and Mr. Andrew A. Cunnison in England, and Mr. Draper in America, have been eminently successful in celestial photography. About 400 stars have been detected in the space of two square inches.

Photography successfully applied to the heavens by M. Paul and F. Prager Henry, 1885-6. Charts of the whole heavens expected in two years.

Devotion by Junier North that a photographer has no right to sell or exhibit photographs of private sitters; "Pollard and with the Photographic Company, Rochester," so Dec. 1885.

Mr. W. E. Woodbury's "Encyclopædia of Photography," published 1890 et seq.

M. Marey's method of photographing the motions of living animals by his chronophotograph applied by M. G. Demeny to the movements of the lips in speech, the results being readable by the minutes; reported Aug. 1891

"Photographie des Couleurs par la Méthode interférentielle de M. Lippmann, par le Alphonse Berge, published June, "

M. Lippmann announced his method of photographing the spectrum in its natural colours by producing interference on the film, March, 1891-May, 1892

Mr. F. E. Ives at the Royal Institution, London, on 17 May, 1892, exhibited his patented method of photographing colours, by which he produced colour prints

PHOTOLOGGRAPH. an apparatus for registering the position of the sun's spots by means of clockwork and photography; erected at the suggestion of Sir John Herschel at New Observatory about 1837. It was used by Mr. Warren de la Rue to photograph the disc of the sun during the eclipse of 18 July, 1860.

PHOTOGRAPHY. the art of producing engravings by the action of light and electricity. The earliest specimens were produced by Nicéphore Niepce, and presented by him in 1827 to the great botanist, Robert Brown. Great advances have since been made in this art by MM. Niepce de St. Victor (who published a treatise on it in 1850), Vivry, W. R. Grove, H. Fox Talbot, &c. In 1852, Paul Prentiss patented a process which he called "Photogenic chemistry."

PHOTOGRAPHIC EXAMINER (a process by which the light actually strikes a picture on a plate that may be and has been painted from) was patented by Mr. Fox Talbot in 1838, and is described and exemplified in the *Photographic News*, 9 and 16 Sept. 1859, a specimen being given in the latter number.

PHOTOGRAPHY (a process by which photographs are transferred to zinc plates which may be printed from) was devised by Sir Henry James, chief of the Ordnance Survey, and was known in 1860. By it maps, charts, and engravings may be printed at a small cost.

PHOTO-SCULPTURE. M. Villème's employment of photography in the formation of a sculpture was announced in 1863.

Messrs. Goupil's process of *Photographie*, rivaling mezzotint, reported highly successful; first pictures reproduced, Feb. 1884.

PHOTOMETER (*light measurer*); one was constructed by Dr. W. Ritchie in 1825. Many improvements have been made recently in photometry. See under *Stars*.

Mr. A. Vernon Harcourt's new bolophotometer highly approved June, 1886.

Stellar Photometry. the measurement of the light of the stars, has been much studied by astronomers, especially by Sir John Herschel, prof. Angellier, prof. C. Pritchard and others. Mr. W. J. Dubini, in his "Guide to the measurement of light," published in 1883, describes his application of terrestrial photometry to stellar light.

PHOTOPHONE. In this apparatus, constructed by professor Graham Bell and Mr. Sumner Tainter of Washington, in 1880, a thin plane mirror is thrown into vibration by the voice; a beam of light is reflected from this mirror and received at a distance by a cell of the metal selenium; when, by arrangement, this is connected with a telephone, the sounds are reproduced.

PHOTOSPHERE, see *Sun*, note.

PHOTOTACHOMETER, an instrument for measuring the velocity of light, invented by Professor Simon Newcomb of Washington, 1879-80.

PHRYGIA (now Karamania), a province in Asia Minor, became part of the Persian empire in

517 B.C., and partook of its changes. After their defeat of Antiochus the Great, king of Syria, 190 B.C., the Romans added Phrygia to the kingdom of Pergamum, which was bequeathed to them by Attalus III., the last king, 133 B.C.

PHYLLORERA, see *Vine*.

PHYSIC appears to have been first practised by the Egyptian priests. Pythagoras endeavoured to explain the philosophy of disease and the action of medicine, about 520 B.C. Hippocrates, the father of medicine, flourished about 422 B.C., and Galen, born A.D. 131, was the oracle of medical science. About 980 Avicenna, an Arab, wrote a system of medicine. Dr. B. Quain's *Dictionary of Medicine*, published 1882. See *Medical*.

The dogmatic age of medicine lasted till the Reformation, when it was attacked by Paracelsus (1493-1541), and Vesalius (1514-64). Since 1800 medical science has been completely transformed by physiological and chemical research.

The discovery of the circulation of the blood, by Dr. Harvey, furnished an entirely new system of physiological and pathological speculation, 1628. See *Medical and Scientific*.

PHYSICIAN TO THE KING—John, the king's chaplain and physician (afterwards bishop of Bath and Wells), reigned 1509.

The earliest mandate or warrant for the attendance of a physician at court is dated 1454, and 37 Henry VI., a royal writ in the patronage which was afforded to practitioners in medicine, but no appointment existed which can justly be called physician to the royal person. By this warrant the king, with the consent of his privy council, deputed to three physicians and two surgeons the regulation of his diet, and the administration of such medicines and remedies as might be sufficient for his cure, without any allusion to the previous existence or nonexistence of the office which they were authorised for a time to fill, or to a remuneration for their services—*1 life of Lewis*.

Mrs. Garrett (afterwards Mrs. Arden-on) licensed at Apothecaries' hall, London, to practise medicine, 23 Sept. 1865.

At a meeting of the Royal Medical and Chirurgical Society, 3 May, 1869, it was resolved that the "Royal Society of Medicine" (including the various sections) be founded; the resolution was affirmed, 22 Feb. 1870, but in 1871 the project dropped.

School of Medicine for Women in London (council: Professors Burdon-Sanderson and Huxley, Mrs. Garrett-Anderson, M.D., Mrs. Blackwell, M.D., and others); opened, Oct. 1874.

Registration of medical women, permitted by Medical Act, 39 & 40 Vict. c. 41, 11 Aug. 1876.

The Queen lays the foundation of the Medical Examination hall on the Victoria Embankment, 24 March, 1886. See *Anatomy*.

PHYSIC GARDENS. The first cultivated in England was by John Gerard, surgeon of London, in 1567; that at Oxford was endowed by the earl of Danby, in 1652; that at Cambridge was commenced about the middle of the last century; and that at Chelsea, originated by Sir Hans Sloane, was given to the Apothecaries' company in 1721; the last was very much admired by Linnaeus.

PHYSICAL SOCIETY, established 14 Feb. 1874; Dr. J. H. Gladstone, first president.

PHYSICIANS, ROYAL COLLEGE OF, of London (of England since 1858), was projected by Dr. Linacre, physician to Henry VIII., who, through his interest with cardinal Wolsey, obtained letters patent, constituting a corporate body of regular physicians in London, with peculiar privileges, 23 Sept. 1518. Linacre was elected the first president of the college. Dr. W. Harvey was a great benefactor to this institution, 1653. He built a library and public hall, which he granted for ever to the college, with his books and instruments. The college was afterwards held in a building in Warwick-lane, erected by Sir C. Wren, where it continued till 1825, when the present elegant stone edifice in Trafalgar-square was erected from designs by Sir R. Smirke.—The College of Physicians, Dublin, was founded by charter of Charles II. 1667, and was re-incorporated in 1692. The Royal College of Physicians, Edinburgh, 29 Nov. 1681.

PHYSICS, see under *Philosophy*.

PHYSIOGNOMY, a science which affirms that the dispositions of mankind may be discovered from the features of the face. The origin of the term is referred to Aristotle, and Cicero was attached to the science. It became a fashionable study from the beginning of the 16th century; and in the 18th century, the essays of Le Cat and Parmentier led to the modern system.

J. E. Lavater, who endeavoured to raise physiognomy to the rank of a science, published his celebrated work "Physiognomie, oder Fragmenten," 1773-78, of which an English translation by Holcroft was published in 1793. The subject was considered by C. R. Darwin in his work "Expression of the emotions in Man and Animals," 1872, and by Mantegazza in his "Physiognomy and Expression," 1890.

PHYSIOLOGY is that part of physics which treats of the inner constitution of animals and plants, and the several functions and operations of all their organs and tissues. The works of Malpighi, Milne-Edwards, Huxley, and Carpenter are much celebrated, and Todd's "Cyclopedia of Physiology" (1836-53) is a library in itself. Physiological Society, in London, founded by Dr. Burdon-Sanderson and others, early in 1877, see *Anatomy, Biology, Morphology, Royal Institution*. International congresses of physiology: Basel, 1888; Milan, Aug. 1892.

PIACENZA, see *Piacenza*.

PIANETTE, a small upright piano introduced by Bord of Paris in 1837.

PIANOFORTE. The invention is attributed to Cristofori (or Cristoforo), an Italian, J. C. Schröter, a German, and Marini, a Frenchman, early in the 18th century. The strings are struck by small hammers, and not by quills, as in harpsichords. Schröter is said to have presented a model of his invention to the court of Saxony, in 1717; and G. Silbermann manufactured pianofortes with considerable success in 1772. Pianofortes were made in London by M. Zumpie, a German, 1766, and have been since greatly improved by Clementi, Broadwood, Collard, Kirkman, Erard, Pleyel, and others.

Upright pianos, first made in this country, were suggested by Isaac Hawkins in 1800, and Thomas Lord, in 1802. Wm. Southwell patented "column pianos," in 1807; superseded, from about 1840, by the cottage, piccolo, and other pianos. A keyed instrument at Modena was named "piano e forte," 1598.

A "straw pianoforte," formed of a series of flutes and other stones of various sizes, collected in France and arranged by M. Baudouin, was played on by him at the Royal Institution, on 16 March, 1866.

The new transposing piano, invented by Mr Henry Schallheim, was exhibited at the navy hotel, Westminster, in June, 1890.

The Janko pianoforte, with a new arrangement of keyboard, exhibited in the Portman rooms, London, W., 24 Nov. 1890, said to possess many advantages.

See Grove's "Dictionary of Music," article "Pianoforte."

PICARDY (N. France), was conquered by the English in 1346, and by the duke of Burgundy in 1417, to whom it was ceded by the treaty of Arras, 21 Sept. 1435, and annexed to France by Louis XI., 1463.

PICCADILLY, a fine street, W. London; the name of uncertain origin, was Piccadilla and Pigadello, about 1660, when a house of entertainment existed near the Haymarket, termed Piccadilly hall, after which buildings were gradually extended westwards.

PICCOLO, a small piano introduced by Robert Norman in 1849.

PICENTINES, a Sabine tribe, subdued by the Romans, and their capital, Asculum, taken, 208 B.C. They began the Social war in 90, and were conquered in 89 B.C.

* The nucleus of the instrument was a little box over which was stretched strings; such was the cithole, the cithara, and the psaltery. The clavichord had keys; the clavicord (about 1500) had dampers, successive improvements were the virginals (on which organ Elizabeth played), the spinet (about 1700), and the harpsichord (with two rows of keys), said to have been used in the 15th century, for which Bach and Handel composed in the 17th century. A collection of harpsichords (one dated 1551) is in the South Kensington museum. A double-pianoforte (with two keyboards reversed), giving remarkable effects (patented by M. M. Menotti), played at at Covent-garden theatre, 21 Oct. 1874.

PIEDMONT (*Piemontese*, Latin, foot of the mountains), a region in N. Italy, formerly the seat of government of the kingdom of Sardinia, which see, and Savoy. Population, 1890, 3,234,506.

PIE-POUDRE COURT, the Court of Dusty Foot, whose jurisdiction was established for cases arising at fairs and markets, to do justice to the buyer and seller immediately upon the spot. By stat. 17 Edw. IV., it had cognisance of all disputes in the precincts of the market to which it might belong, 1477.

PIER AND HARBOUR ACT, to facilitate the formation, management, and maintenance of piers and harbours in Great Britain and Ireland, was passed in 1862.

PIETISTS, a Lutheran sect, instituted in Leipzig, by Philip James Spener, a professor of theology, about 1689, with the view of reforming the popular religion. He established "colleges of pietists", with preachers resembling those of the society of friends and the methodists in Britain, about 1760. A body resembling the Pietists, named Chasidim, arose among the Jews in the Ukraine, and spread through Poland and European Turkey.

PIETRO BARSANTI CLUB, see *Italy*, 1878.

PIEZOMETER (Greek *piezo*, I compress), an apparatus for measuring the compressibility of liquids, invented by Orsted (died 1851); improved by Despretz & Saugay.

PIGEONS were employed as carriers by the ancients. Hirtius and Brutus corresponded by means of pigeons at the siege of Modena. The pigeons of Aleppo served as couriers at Alexandretta and Bagdad. Thirty-two pigeons liberated from London at 7 o'clock in the morning, 22 Nov. 1819; at noon one of them arrived at Antwerp; a quarter of an hour afterwards a second arrived; the remainder on the following day. *Philips*. At a pigeon race, 25 July, 1872, from Spalding to London, the speed allowed was 90 seconds a mile; see *Post Office*, 1870.

At a pigeon race from Dover to Plymouth, some pigeons attained the velocity of 7,233 yards, 1,218 yards and 2,008 yards per minute 22 July, 1886. About 300 pigeon-flying societies exist in France; the organization of carrier-pigeon stations ordered by the minister for war, Jan. 1888. About 250 similar societies exist in Germany, stated Jan. 1888.

National Pouter Society (originating from the Columbarian Society, founded in 1750), has annual shows. A bill for prohibiting shooting pigeons from a trap, attended with cruelty, passed by the commons with large majorities, in 1887 and 1888 (1835-40), was rejected by the lords in 1885 (30-17), and on 9 May, 1884 (78-48).

The London Columbarian society opened its 15th annual exhibition of pigeons, at the Westminster Aquarium, 2 Dec. 1891.

PIGMIES, see *Dwarfs*.

PILCHARD FISHERY. Peculiar to Landed Conn, Cornwall, reverts to W. Ireland, after suspension of two centuries (stated July, 1883).

PILGRIMAGE OF GRACE, a name assumed by religious insurgents in the north of England, who opposed the dissolution of the monasteries. The movement, which commenced in Lincolnshire in Sept. 1536, was suppressed in Oct.; but soon after revived in Yorkshire; and an expedition, bearing the foregoing name, having banners on which were depicted the five wounds of Christ, was

headed by Aske, and other gentlemen, and joined by priests and 40,000 men of York, Durham, Lancaster, and other counties. They took Hull and York, with smaller towns. The Duke of Norfolk marched against them, and by making terms dispersed them. Early in 1537 they again took arms but were promptly suppressed, and the leaders, several abbots, and many others, were executed.

PILGRIMAGES began with the pilgrimage of the empress Helena to Jerusalem, 326. They became very frequent at the close of the 10th century. Robert II. of France made several pilgrimages; among others one to Rome about the year 1010, perhaps in 1020, when he refused the imperial dignity and the kingdom of Italy. The pilgrimage to Canterbury is described by Chaucer in his *Canterbury Tales* about 1383. The pilgrimage of Mahometans to Mecca, the birth-place of the prophet, is commanded in the Koran. It still continues, and is frequently accompanied by great outbreaks of cholera, which see. Pilgrimages to shrines of the Virgin Mary in France revived in 1873, and since, in consequence of miracles alleged to have taken place at La Salette in 1846 and at Lourdes, 11 Feb. 1858; those of La Salette discredited by Pope Leo X., 1879. See *Sacred Heart*.

100 American pilgrims received by the pope 9 June, 1870. About 100 agricultural labourers (locked out for being unionists) traversed England as pilgrims, 1000 giving hospitality and money, beginning 20 June, *et seq.* English R.C. pilgrimages to shrine of St. Edmund, archbishop of Canterbury, at Pontigny Sept. English pilgrimages to Lourdes directed by the "Catholic Union of Great Britain," start proposed; given up Aug. 1880.

[See *Donkey*.]

PILGRIM FATHERS, the name given in North America to a party of 74 English puritans and 28 women, members of John Robinson's church, who sailed in the *May Flower* from Leyden to North America, and landed on Plymouth Rock, where they founded a colony, 25 Dec. 1620.

"**PILGRIM'S PROGRESS FROM THIS WORLD TO THAT WHICH IS TO COME**," written by John Bunyan, in Bedford goal, where he was imprisoned twelve years, 1660-72. The first part was published in 1678. A Hebrew version appeared in 1851; see *Bedford*.

PILLAR SAINTS, see *Monachism*.

PILLORY, a scaffold for persons to stand on, to render them publicly infamous. This punishment was awarded against persons convicted of forgery, perjury, libelling, &c. In some cases the head was put through a hole, the hands through two others, the nose slit, the face branded with one or more letters, and one or both ears were cut off. There is a statute of the pillory, 41 Hen. III. 1256. Many persons died in the pillory by being struck with stones by the mob, and pelted with rotten eggs and putrid offal. It was abolished as a punishment except for perjury, 1815, and totally abolished in 1837. The last who suffered at the Old Bailey was Peter Jas. Boney, for perjury, 22 June, 1830.

PILNITZ (near Dresden, Saxony). The convention of Pilnitz took place between the emperor Leopold and the king of Prussia, 20 July, 1791. On 27 Aug. the treaty of Pilnitz, or, as some style it, the Partition treaty, was finally agreed upon at Pavia by the courts in concert. It was to the effect "that the emperor should retake all that Louis XIV. had conquered in the Austrian Netherlands, and uniting these provinces to the Netherlands, give

PITT ADMINISTRATIONS * The first administration was formed on the dismissal of the Port and ministry 18 Dec 1783, and terminated by resignation in 1801. The second was formed 12 May, 1804, and terminated (after various changes) by Mr Pitt's death, 23 Jan. 1806. A public funeral was decreed to him, and 40,000*l.* to pay his debts.

ADMINISTRATION OF 1783

William Pitt first lord of the treasury and the chancellor of the exchequer
Earl Gower lord president
Duke of Rutland, privy seal
Marquis of Carmarthen and earl Temple (immediately succeeded by lord Sydney) secretaries
Lord Thurston lord chancellor
Viscount Howe admiral
Duke of Richmond privy seal
William Windham Grenville Henry Dundas &c
[Mr Pitt was joined by the Duke of Portland earl Spencer, and other leading whigs in 1794, he continued minister until 1801. Many changes occurred in the ministry in the long period of seventeen years.]

ADMINISTRATION OF 1804

William Pitt first lord of the treasury
Lord Holland lord chancellor
Duke of Portland succeeded by lord Sidmouth (late Mr Alington), privy seal
Earl of Westmoreland lord privy seal
Lord Hawkesbury lord foreign (succeeded by lord Mulgrave) and earl Camden (succeeded by viscount Castlereagh) &c foreign

Duke of Westmoreland Mr Dundas &c

PITTSBURG, the second city of Pennsylvania, founded on the site of Fort Duquesne, which was, in 1759, and named Fort Pitt after Pittsburg in honour of the then British prime minister William Pitt. See *United States*, 1787. The city from building burnt, 3 Oct 1853. Popul. 1750, 156,369, 1850, 238,617. It marks the 100th meridian by a monument, 1883. The use of coal gas fuel gradually adopted in Pittsburg by the iron and steel works from 1884. It is about 2000 miles from the Atlantic, 1884. It is about 2000 miles from the Atlantic, 1884. It is about 2000 miles from the Atlantic, 1884.

PITTSBURG LANDING (near Corinth, Tennessee). On Sunday, 6 April, 1862, a great battle was fought between the American federalists under Grant and Piontias, and the confederates under Albert Sydney Johnston and Beauregard. The latter began the attack and were victorious, but lost their able general Johnston. The federalists were reinforced the next day and renewed the attack, the confederates maintained their ground, but soon after retired in good order to Corinth. This engagement is also named the battle of Shiloh.

PITURINE, a new narcotic, said to have been discovered in 1882 in Australia. It resembles a mixture of opium and tobacco and is extracted from the dried leaves of the *Duboisia petersii*.

PLACENTIA (now Piacenza), N. Italy, founded by the Romans about 220 B.C. It suffered in all the convulsions attending the fall of the empire, and the wars of the middle ages. In 1254 it fell under the rule of the family of the Scotti. In 1302 Alberto Scotti was overthrown, and Placentia

* William Pitt second son of the great earl of Chatham, was born at Marsh, 1759. He was M.P. for 23 years, moved for a reform in parliament 7 May, 1784, became chancellor of the exchequer, July, 1782, died 23 Jan. 1806.

was united to Milan, then ruled by the Visconti. On their extinction in 1447, Placentia revolted, but was taken by Sforza duke of Milan, and treated very cruelly. In 1513 it was given to pope Leo X. In 1545, Paul III. gave it with Parma as a duchy to his son Peter Louis Farnese. The French and Spaniards were defeated by the Austrians and Sardinians near Placentia, 16 June, 1746, see *Parma*.

PLACILLA, Chili, which see. The site of the decisive victory of the congressists over president Balmaceda, 28 Aug. 1891.

PLAGUE. The plagues of Egypt (1491 B.C.) are described in *Exodus* ix, &c. The first recorded general plague in all parts of the world occurred 767 B.C. *Pestis*. At Rome a desolating plague prevailed, 453 B.C. The devastating plague at Athens, which spread into Egypt and Ethiopia, 430 B.C., is admirably described by *Thucydides*. Another which raged in the Greek islands, Egypt, and Syria, destroyed 2000 persons every day, 187 B.C. *Plany*. See *Cattle*.

At Rome a most awful plague 1000 persons perished daily, A.D. 59. Again it raged the Roman empire 167, 169, 189.

Any other in the Roman empire. For some time, 5000 persons died daily at Rome. Many towns entirely depopulated, 230, 263.

In Britain a plague swept away such multitudes that the living were scarcely sufficient to bury the dead, 430.

A long continued dreadful one began in Europe in 558, extended over Asia and Africa.

At Constantinople when 300,000 of its inhabitants 1 ravished and in Calabria, Sicily, and Greece 740, 749.

In London 662. At Chester in England an epizootical disease carried off 34,000 persons, 772. At Milan 1400 persons perished 954.

In Milan great mortality 1094, and Ireland, 1095. In London it extended to cattle, fowls, and other domestic animals 1111. See *Asia*.

In Ireland 1712. Christians this year Henry II. was executed, and the country 1712.

At the time when a prodigious number perished, 1704.

The Black Death in Italy 1340. A plague raged throughout Europe causing extensive mortality. Britain and Ireland suffered grievously.

In Milan alone 200,000 persons were buried daily in the Church of the dead 1348. (That at Florence described by Boccaccio.)

In London and Paris a dreadful mortality prevailed in 1350, 1357, 1366, and in Ireland in 1370.

A great pestilence in Ireland called the Fourth, destroyed a great number of the people 1383.

30,000 persons perished of a dreadful pestilence in London 1407.

At the time in Ireland, superinduced by a famine, great numbers died 1466, and Dublin was wasted by a plague 1470.

In 1481 a pestilence at Oxford 1477, and throughout England a plague which destroyed more people than the continual wars for the fifteen preceding years, 1478.

Pestis bubalis. The bubo anglicus or sweating sickness, very fatal in London 1485. *Delane*.

The plague in London a dreadful that Henry VII. and his court removed to Calais 1499, 1500. *Slow*.

The sweating sickness (mortal in three hours) in London, 1506, and in 1517. In most of the capital towns in England and half the inhabitants died, and Oxford was depopulated, 9 Henry VIII. *Slow*.

Liverpool was visited by a plague, when many thousands perished 1522.

The sweating sickness again in England, 1528, and in North Germany in 1529, and for the fifth time in England in 1557.

30,000 persons perished of the plague in London alone, 1603, 1604. It was also fatal in Ireland.

At Constantinople a pestilence at Constantinople in 1611.

In London a great mortality prevailed, and 35,417 persons perished, 1625.

In France a general mortality at Lyons, 50,000 persons died, 1822.

The plague brought from Hindostan to Naples (being introduced by a transport with soldiers on board), raged with such violence as to carry off 400,000 of the inhabitants in six months, 1720.

Thus *Gustav Plague* or *Levors*, began Dec. 1864, which carried off 61,506 persons; some say 100,000. Plague was kept up night and day to purify the air for three days; and it was thought the infection was not totally destroyed till the great conflagration of Sept. 1866.

[Graphically described by De Foe in his partially imaginative *History of the Plague*.]

60,000 persons perished of the plague at Marseilles and neighbourhood, brought in ship from the Levant, 1720.

One of the most awful plagues that ever raged, prevailed in Syria, 1750. 4844 Marthi.

In Persia, a fatal pestilence, which carried off 80,000 of the inhabitants of Bassora, 1773.

In Egypt, about 800,000 persons died of plague, 1792.

In Barbary, 3000 died daily; and at Fos 247,000 perished, 1799; in the east, 1800; 1840; 1873; many deaths in Bagdad, &c., April-May, 1876.

In Spain and at Gibraltar immense numbers were carried off by a pestilential disease in 1804 and 1805.

Again at Gibraltar, an epidemic fever much resembling the plague, caused great mortality, 1808.

The Asiatic cholera (see *Cholera*) made its first appearance in England, at Sunderland, 26 Oct. 1817; in Scotland, at Haddington, 23 Dec. same year; and in Ireland, at Belfast, 14 March, 1832.

The cholera again visited England, &c. 1848 and 1849 (see *Cholera*).

The cholera raged at Smyrna and Constantinople, and appeared in Paris, Marseilles, Naples & July-Dec. 1865.

A great cattle plague (which see) in England, resembling typhus, near London, begins June, 1865.

A new, and hitherto an insurable disease, named *Black death*, on account of purple blotches coming out on the skin, appeared in Dublin; many persons of all ranks died a few hours after the seizure. March 24, 1866.

Plague in Astracan, Jan.—April, 1879.

PLAN OF CAMPAIGN, see *Ireland Oct.*

1886. By this plan the tenant of a farm was to pay his rent to the National League instead of to the landlord, and was to be supported if evicted. It was condemned by the Pope, 20 April, 1888; given up by many tenants throughout the country, and disavowed by Mr. Parnell and others, 1890-1. The plan given up by many on the Woodford estate, Galway, Oct. 1891.

PLANE. A true plane, so important in machinery, has been most successfully obtained by air Joseph Whitworth. Fine specimens were exhibited at the Royal Institution in 1873.

PLANETARIUM, see *Orrery*.

PLANETS. Jupiter was known as a planet to the Chinese and the Chaldeans, and inserted in a chart of the heavens, made about 600 B.C., and in which 1450 stars are accurately described; this chart is said to be in the national library at Paris. The four satellites of Jupiter discovered by Galileo, 7 Jan. 1610, see *Mars, Saturn*. We now know nine primary planets, termed major; *Mercury, Venus, the Earth, Mars, Jupiter, Saturn, Uranus, Neptune*, and *Vulcan* (doubtful); and, secondary or minor, situated between the orbits of Mars and Jupiter. The numerical order differs in the lists of English, German, and French astronomers. In the French and German lists, *Aglia* to *Pandora* are numbered 47 to 55; *Meloid* in 56.

Uranus, formerly called *Georgium Sidus* and *Herschel*; discovered by W. Herschel (see *Georgium Sidus*).

Neptune, discovered by Galle (in consequence of the calculations of Le Verrier) (see *Neptune*) 23 Sept. 1846. It had been theoretically discovered by Professor J. Couch Adams of Cambridge 1845.

Vulcan (between Mercury and the Sun), said to be discovered by M. Leoucarbant, a physician (not seen since), 26 March, 1859; said to have been seen by Watson during the solar eclipse (doubted by Peters).

A red star seen by M. Thourvel during the solar eclipse, most probably *Vulcan* 6 May, 1853.

MINOR PLANETS (according to Mr. G. F. Chambers, the Royal Astronomical Society, and others).

1. Ceres, discovered by Piazzi (visible to the naked eye) 1 Jan. 1801.

2. Pallas, discovered at Bremen by Olbers (see *Pallas*) 28 March, 1802.

3. Juno, discovered by Harding 1 Sept. 1804.

PLASSEY, in Bengal, India, the site of a battle fought between the Briti-h under Clive, and the Hindoos under Surajah Dowlah, 23 June, 1757; 68,000 men were vanquished by 1000 British and about 2000 sepoye. The victory laid the foundation of our empire in India.

PLASTER OF PARIS. Gypsum, sulphate of lime, used for moulds, statuary, &c., first found at Montmartre, near Paris, whence its name. The method of taking likenesses by its use was first discovered by Andrea del Verrochio, about 1466.

PLATA, *LA*, see *Argentine Republic*.

PLATÆA (Bosotia, N. Greece), site of the battle between Mardonius, commander of the army of Xerxes of Persia, and Pausanias, commander of the Lacedæmonians and Athenians, 22 Sept. 479 a.c.; the same day as the battle of Mycale. Of 300,000 Persians scarce 3000 escaped with their lives. The Grecian army, about 110,000, lost but few men. The Greeks obtained immense plunder, and were henceforth delivered from the fear of Persian invasions. Platæa, as an ally of Athens, was destroyed by the Thebans, 372; and rebuilt by Philip II. after his victory at Chæronea, 338.

PLATE. In England, plate, with the exception of spoons, was prohibited in public-houses by statute 8 Will. III. (1690). The celebrated Plate act passed in May, 1756. This act was repealed in 1780. The act laying a stamp-duty upon plate passed in 1784; see *Goldsmith's Company*. By 17 & 18 Vict. c. 96 (1854), gold wares were allowed to be manufactured at a low or standard; but a later act excepted marriage rings.—The art of covering baser metals with a thin plate of silver, either for use or for ornament (**PLATING**), said to have been invented by a Birmingham spur-maker, who began with making the branches of a pair of spurs hollow, and filling the hollow with a slender rod of steel. He continued to make the hollow larger and the iron thicker, till at last he merely coated the iron spur with silver; see *Microtype*.

* Fulke Martel, earl of Anjou, having contrived the death of his nephew, the earl of Brittany, in order to succeed to the earldom, his confessor sent him, in token of the murder, to Jerusalem, attended by only two servants, one of whom was to lead him, by a ladder to the *Gate Sion*, the other to strip and whip him there, like a common malefactor. Broom, in French *genêt*, in Latin *genista*, being the only tough, plant shrub in Palestine, the noble criminal was smartly scourged with it, and from this instrument of his chastisement he was called *Marista-genista*, or *Plantagenet*; other accounts are given. *Silvester and Michay*.

Silver on silver plate to be reduced gradually until abolished, *Times* 4 Jan., 1881, abolished 17 April, 1890.

PLATE-WAYS, an ordinary roads for waggons carrying goods, proposed at Liverpool about 1880, to supersede railways for cheapness, not adopted, Jan. 1881.

PLATFORM, see *Public Meetings*

PLATINUM, the heaviest of all the metals, except iridium. The name originated with the Spaniards on account of its silvery colour, *Plata* signifying silver. It was found in the numerous sand of the river Pinto, in South America, and was unknown in Europe until 1741, when don Antonio Ufona announced its existence in the narrative of his voyage to Peru. *Gray*. In its ore have been found the metals palladium, rhodium, osmium, iridium, and ruthenium (*see* *see*). In 1859, M. H. Sie-Clerc Deville made known a new method of obtaining platinum from its ore, in great abundance and purity, and at the international exhibition of 1862 was shown a mass worth 2840*l*, weighing 2664 lb. of a metal hitherto considered infusible, obtained by his process, employing the oxy hydrogen flame. *See Philosophical Lamp*

Dodo a process for coating iron with platinum to prevent rust, shown at Johnson & Matthey's, 11 Jan. 1879.

PLATONIC PHILOSOPHY, the most popular of all systems (*see Philosophy*). Plato's dialogues have been termed "Philosophy backed by example." He was a disciple of Socrates, 409 B.C., and died 347. The leading feature of his mind was comprehensiveness.

PLATONIC YEAR, the period of time which the ancients take to finish their revolution, at the end of which the stars and constellations have the same place with respect to the zodiac as they had at first. The Bible says that this year is completed in 2222 years, and that the world is at the end of which there will be some heavenly and some natural renovation of the entire creation.

PLATONIC. A British expedition against the Spaniards, a force of New York, on Lake Champlain, was defeated by the general Sir George Prevost, but was abandoned after the naval force of England had suffered a defeat in an engagement with the Americans, 11 Sept. 1814, when the British evacuated the Lake Champlain was captured, *see United States*

PLAY-GROUNDS. In 1858 a society was established by the earl of Shaftesbury and other benevolent persons to provide play-grounds for the recreation of adults and the children of the humble classes. Ground was liberally offered by the government, and by the margues of Westminster and others, and in 1859 an act of parliament was passed to facilitate the grants of lands for this purpose, for which part of Southfield was to be resorted. The scheme was not successful.

The Metropolitan Public Garden, Boulevard, and Flat ground association formed by lord Balmora (ft. earl of Meath) and others in 1881 has done good service in the east of London.

PLEADINGS. In the early courts of justice in England, pleadings were made in the Saxon language, and in Norman French from the period of the conquest in 1066 until 1362. Pleadings were ordered to be in English by 35 Edward III.

1362, and Cromwell extended the rule to all legal proceedings 1650. In English law the proceedings are the mutual statements of the plaintiff's cause of action, and the defendant's ground of defence.

PLEBBIANS, Plebes, or Plebs, the commons of Rome, as distinguished from the Patricians; *see Rome*, 494-366 B.C.

PLEBISCITUM, a term given to a law passed by the *comitia tributa*, an assembly of the Roman people in their tribes, first established in 491 B.C. The term has been recently revived in France and Italy, and applied to *Universal Suffrage* (*which see*).

PLETHYSMOGRAPH, an apparatus for detecting the state of the mind by observing the relations of the circulation of the blood from the heart to the brain, invented by M. Mosol, of Turin, 1882.

PLEVNA, Bulgaria, 27 miles N.N.W. of Nicopolis, near the river Vid, the site of very fierce conflicts during the Russo-Turkish war, 1877.

Occupied by the Russians, 6 July but retaken by Osman Pasha, 18 July and held by him after severe combats with Schukler Schukler, 10, 20 July with Kradener 29-31 July, 1877.

The Russians lost about 2000 killed, 4000 wounded. The Russian attack was considered rash, like that at Balaklava and a disastrous check Osman Pasha defeated in a desperate sortie, about 30 Aug.

Gen. Skobloff gained a great advantage by capturing Lovatz (7 Sept.) 20 Sept. Siege began, 7 Sept., with an artillery duel lasting to 20 Sept.

Protracted negotiations followed 24, 25 Sept. Charles Pasha pitched an ambush on the Plevna, about 25 Sept.

Russian losses amounted to the 25 Sept. Russian prisoners taken; 25 Sept. Russian losses continued 25 Sept.

General Skobloff's efforts to break out of the Plevna were unsuccessful, and he was surrounded and defeated with great losses; 25 Sept. surrounded and defeated with great losses; 25 Sept. surrounded and defeated with great losses; 25 Sept.

PLOUGH. "Thou shalt not plough with ox and ass together." Deut. 22: 10. The Roman plough is accurately described by Virgil about 11 B.C. English plough systems, the old and the new, were patented by James Smith and Thomas Widdowson, in 1801; and many other improvements in ploughs have been patented since.

The application of steam power to ploughing was patented by John Upton in 1817, and by others; many were especially by Lord Willoughby, 17 March, the marquis of Tweeddale, and the earl of Cussington, *see Steam-Plough*.

International trial of ploughs, &c. at Haarlem; prizes won by English makers (Howard, Ransomes, &c.), 17-20 Sept. 1879.

PLOUGH MONDAY, in January, the first Monday after the kishpanav. It received the appellation from its having been fixed upon by our forefathers as the day upon which they returned to the duties of agriculture after enjoying the festivities of Christmas. *See*. On Plough Monday, too, the ploughmen of the north country used to draw a plough from door to door and beg plough money to drink. *See* *Barley*

On Plough Monday the lord mayor of London holds annually at Guildhall a grand court of worship, at which the election of the common council and other officers on St. Thomas day, 21 Dec. is celebrated.

PLUM. We have two native plums; our English kinds came from Italy and Sicily about 1000 years ago.

The *Disagevo* *Estus*, the late plum, was brought from Barbary, before 1596; the *Plumain* plum, *Disagevo virginiana*, from America, before 1629. Formerly damsons, apricots, and peaches went by this name, as sailors do to this day.

PLUMBAGO, see *Graphite*.

PLURALITIES. Clergymen have been restrained from holding more than one benefice by several statutes; the first being 21 Henry VIII. 1530. In 1838 an act was passed prohibiting the holding of more than two benefices except they were at a distance less than ten miles; and the law on this subject was still further amended in 1850, 1855, and 1865, provisions being made for the amalgamation of neighbouring benefices. See *Electors*.

PLURAL NUMBER, see *We*.

PLUS (+) AND MINUS (-). Professor De Morgan attributes these signs to either Christopher Rudolf, who published a book on algebra about 1522, or Michael Stifelius, about 1544.

PLYMOUTH, a fortified seaport in Devonshire, originally Sutton, was incorporated as Plymouth in 1439. It was in 1588 the rendezvous of the English fleet of 120 sail under Howard, Drake, &c., which pursued the Spanish armada. The fine hotel and assembly-rooms were burnt 6 Jan. 1867; loss about 50,000*l*. The National Association for Social Sciences met here, Sept. 1872. See *Armada*, 1888, 1890, *Breakwater*, and *Population*.

PLYMOUTH BRETHREN, a body of Christians calling themselves "the Brethren," first appeared at Plymouth about 1830. In 1847 they had 132 places of worship in England and Wales. They object to national churches as too latitudinarian, and to other dissenters as too sectarian. They receive into communion all who confess Christ, and own the Holy Ghost as his vicar. Their doctrines agree with those of most evangelical protestant churches, but they recognise no order of ministers. Mr. Darby, regarded as their founder, afterwards separated from them with some adherents.

PNEUMATIC DESPATCH COMPANY, to convey letters and parcels through tubes by means of atmospheric pressure and a vacuum. The company's act was passed 13 Aug. 1859, and tubes were laid down in Threadneedle-street on 12 Sept. 1860; and on 20 Aug. 1861, successful experiments were performed at Battersea. In 1862 tubes were laid down from the Euston railway station to the M. W. post-office in Camden-town, and on 21 Feb. 1863, the conveyance of the mail-bags began. In Oct. 1865, tubes had been laid down between Euston railway and Holborn; and on 7 Nov. several persons were killed by them. Engineer, Mr. Rammell. The

company stopped through insufficient support, 1876. A pneumatic tube by Battersea, employed to transmit telegraphic messages, began about Jan. 1871.

PNEUMATIC LOOM, in which compressed air is the motive power, invented by Mr. Harrison, was exhibited in London in Dec. 1864. A company was formed to bring it into general use.

POET-LAUREAT. Selden could not trace the precise origin of this office.

Warton, in his *History of English Poetry*, states that in the reign of Henry III. there was a *Versefactor Regis*, to whom an annual stipend was first paid of one hundred shillings.

Chaucer, on his return from abroad, assumed the title of poet-laureat; and in the twelfth year of Richard II., 1389, he obtained a grant of an annual allowance of wine. In the reign of Edward IV. John Kay was laureat; Andrew Bernard was laureat, temp. Henry VII.; and John Skelton, temp. Henry VIII.

James I. in 1615, granted to his laureat a yearly pension of 100 marks; and in 1630, this stipend was augmented by letters patent of Charles I. to 100*l* per annum, with an additional grant of one tierce of Canary Spanish wine to be taken out of the king's store of wine yearly. We believe that on Southern's appointment the tierce of Canary wine was commuted for 2*l*.

Laurence Eusden commenced a series of Birth-Day and New Year's Odes, which continued till the death of Pyc, in 1813.

On the death of Warton his abolition was recommended by Gibbon, whose elegant compliment on the occasion still more forcibly applied on Wordsworth's death, in 1850—"This is the best time for not filling up the office, when the prince is a man of virtue, and the poet just departed was a man of genius."

France was overthrown, many of her nobility slain, and her king was taken prisoner, and brought to London, see *Tours*, and *Young*

POISONING. A number of Roman ladies formed a conspiracy and poisoned their husbands. A female slave denounced 170 of them to Fabius Maximus, who ordered them to be publicly executed, 331 B.C. It was said that this was the first public knowledge they had of poisoning at Rome. Poisoning was made petty treason in England, and was punished by boiling to death (of which there are some remarkable instances), 23 Henry VIII. 1531, see *Boiling to death*. The frequency of cases of poisoning by means of arsenic, in England, caused the British legislature to pass a law rendering the sale of arsenic difficult (14 Vict. c. 13, 6 June, 1851). The sale of poison is now regulated by the Pharmacy Act of 1868. Additional restrictions enacted by act passed in 1885. The *Poisoned Grain Prohibition Act* was passed 28 July, 1863.

A deadly poison freely administered by Italians in the seventeenth century was called *acqua tofana* from the name of the woman Tofana who made and sold it in small flat vials. She earned on this traffic for half a century, and eluded the police but on being taken, confessed that she had been a party in poisoning 600 people. Numerous persons were implicated in her and many of them were publicly executed. All Italy was thrown into a ferment, and many fled and some persons of distinction on conviction, were strangled in prison. It appeared to have been chiefly used by married women who were tired of their husbands. Four or six drops were a fatal dose but the effect was not sudden and therefore not suspected. It was as clear as water but the chemists have not yet detected about its real composition. A proclamation of the pope described it as a salutary distilled into arsenic and others considered it as a solution of crystallized arsenic.

Between 1666 and 1676, the marcelliness de Brinvilliers poisoned her father and two brothers and many old friends. She was executed, 23 June, 1676.

W. Peltus was executed in 1846 and Miss M. Smith tried in 1857 for poisoning, see *Trials*. Catherine Wilson, a noted poisoner was executed on 20 Oct. 1862. Edward William Pritchard, M.D. was executed at Glasgow, 28 July, 1855, for the slow murder of his wife and her mother, by arsenic.

Nov. 1858, 17 persons died at Bradford through eating sweetmeats in which arsenic had been mixed by mistake. Mr. Hodgkin, a chemist, was tried for homicide and acquitted.

Welmann a bookbinder at Posen, poisoned 4 wives and a children, about 1839.

* On 22 Feb. 1846 an Austrian force under General Collin, which had entered Cracow in the approach of armed bands of peasants, was attacked and driven out of the town. A provisional government was then proclaimed by the insurgents, and two days afterwards they crossed the Vistula, expecting to be joined by the peasantry of Galicia, who were solicited by the nobles and clergy to strike a blow in the name of liberty. The Austrian government, in order to prevent this junction, enlisted in the peasantry a suspicion of the motives of the nobles, and offered a reward for every noble delivered up alive or dead. A general massacre of the nobility and clergy in the circle of Tarnow followed the insurgents from Cracow were defeated at Gdow, whence they retreated to Podgorze, a suburb of Cracow, here they were attacked by general Collin, and driven into Cracow on the 17th of February. The forces of the three powers then began to concentrate on Cracow, the people in the town opened negotiations with the Austrians about a surrender, and while these were going on a Russian army entered the town without resistance, and soon afterwards the revolution was at an end.

POLITICAL OFFICES PENSIONS ACT passed 9 Aug 1869

POLITICAL UNIONS were formed in England in 1831 to carry the Reform Bill, the most important was that of Birmingham

POLITICIANS A politician is described as a man well versed in policy, or the well regulating and governing of a state or kingdom, a wise and cunning man. A man of adroitness, one of deep contrivance. *South* The term was first used in France about 1569. A new faction appeared, known by the name of Politicians, headed by the Duc d'Alençon and the Montmorencys, and strengthened by the accession of the Huguenots in 1574. The Duke was arrested and the Montmorencys sent to the Bastille

Polytechnic at Chelsea; foundation stone laid by the prince and princess of Wales. 23 July, 1892. See *Buckingham Palace and Golden's Company*.

POMEGRANATE TREE (*Punica Granatum*) was brought to England from Spain before 1584.

POMERANIA, a Prussian province, N. Germany, was held by the Poles, 980, and by Denmark, 1210; made an independent duchy, 1479; and divided between Sweden and Brandenburg, 1648. The Swedish part, awarded to Denmark in 1814, was given up to Prussia for Lauenburg, 1815; see *Denmark*; *W. rocka*, 1878.

POMFRET or **PONTEFRAC** (S. York). At the castle (built 1080), Richard II. was confined and murdered, 10 Feb. 1400. Some writers assert that Richard escaped and died in Scotland. In this castle also, the earl Rivers, lord Grey, sir Thomas Vaughan, and sir Richard Haut or Hauze, were put to death by order of the duke of Gloucester, then protector of England (afterwards Richard III.) about 26 June, 1483. The castle, which had stood four sieges, was dismantled in 1649. The first parliamentary election by ballot took place here, 15 Aug. 1872, very quietly. It lost one of its two members in 1875. Population, 1881, 8,798; 1891, 9,702.

POMPEII (S. Italy), an ancient city of Campania, was partly demolished by an earthquake in A.D. 63. It was afterwards rebuilt, but was overwhelmed by an eruption of Vesuvius, accompanied by an earthquake, on the night of 24 Aug. 79. The principal citizens were then assembled at a theatre where public spectacles were exhibited. The ashes buried the whole city and covered the surrounding country. After a lapse of fifteen centuries, a countryman, as he was turning up the ground, found a bronze figure; and this discovery led to further search, which brought numerous other objects to light, and at length the city was uncovered. The part first cleared was supposed to be the main street, 1750. The kings of Naples greatly aided in exploring Pompeii, and the present Italian government resumed the work in 1863.

A commemorative meeting of antiquaries and philologists met at Pompeii, 25 Sept. 1879. Further discoveries made, autumn 1882 et seq. The remains of a handsome five-storied house were uncovered. July, 1890.

POMPEY'S PILLAR stands about three-quarters of a mile from Alexandria, between the city and the lake Mareotis. The shaft is fluted, and the capital ornamented with palm-leaves; the whole, which is highly polished, composed of three pieces, and of the Corinthian order. The column measures, according to some, 94 feet; to others 141, and even 160 feet; but of its origin, name, use, and age, nothing is certain.

It is generally believed that the column has no reference to Pompey, to whom a mark of honour was, nevertheless, set up somewhere about this part. One supposes the edifice was dedicated to Venusian, another to Serapis; and Mr. Clarke, from a half-erased inscrip-

tion on the base, considered that Atrium is the person honoured; while many assert, from the same inscription, that it is dedicated "to Dionetian Augustus, most adorable emperor, tutelary deity of Alexandria."

PONDICHERY (S.E. India), the capital of French India, and first settled by the French in 1674. It was taken from them by the Dutch in 1693, restored 1697; besieged by the English, 1748; taken by them, Jan. 1761; restored, 1763; again taken, Oct. 1778; restored in 1783; taken 23 Aug. 1793, and in 1803; restored, 1815. Visited by the Viceroy of India (Earl Dufferin), Dec. 1886. Prosperous state of the colony reported Jan. 1889. Population in 1890, 283,053.

PONDOLAND, the coast between Cape Colony and Natal, S. Africa, the British protectorate was proclaimed and notified, 6 Jan. 1885.

Severe fighting among the natives reported, Feb.-March-April; the chief Umhlangano surrenders to the Cape authorities. April, 1891.

PONT-À-NOYELLIES. At this place, near Amiens, took place a fierce indecisive conflict, lasting from 11 A.M. to 6 P.M., between the Germans under Martenuffel and the French army of the north under Faidherbe, 23 Dec. 1870. Both sides claimed a victory; the French general asserted that he remained master of the field.

PONTEFRAC, see *Pomfret*.

PONTIFFS (Latin *Pontifices*), the highest Roman sacerdotal order, established by Numa. The college first consisted of 4 patricians, with a chief (Pontifex Maximus); to these 4 plebeians were added, by the Ogulnian law, 300 B.C. Sulla increased the number to 15 (3 *augures*, 7 *minoris*, 5), and Julius Cæsar to 16. T. Coruncanus, a plebeian, obtained this office, 254 B.C.

PONTUS, in Asia Minor, seems to have been a portion of Cappadocia, and received its name from its vicinity to the *Pontus Euxinus*. Artabanus was made king of Pontus by Darius Hyastapes in the 4th century B.C. His successors were mere satraps of the kings of Persia.

POOR CHILDREN'S AID SOCIETY,
for providing food, clothing, &c., established 1867.

**POOR KNIGHTS OF WINDSOR, or ALMS
KNIGHTS**, known after his institution of the order
of the Garter, Edward III. founded this society, for
the provision of 24 (afterwards 26) poor persons
eminent for military service. Edward IV. dis-
charged the college from the support of the thas-
knights, but Elizabeth re-established the charity
for 13 knights, 1557. King William IV. changed
the name to the "Military Knights of Windsor,"
in consequence of their all having held commissions
in the army, Sept. 1833—the "Naval Knights of
Windsor" are maintained on a distinct foundation,
under the bequest of Samuel Rivers, 1724. The
corporation was established in 1798. An act making
lieutenants and widows eligible was passed in
1867. Alterations made by act passed in 1895.
An act to dissolve the corporation was passed in
1892.

POOR The poor of England, till the time of
Henry VIII., subsisted as the poor of Lie and until
1838, entirely upon private benevolence. By statute
23 Edw. III. 1349, it was enacted that none should
give alms to a beggar able to work. By the com-
mon law, the poor were to be sustained by "par-
sons, rectors of the church, and parishioners, so that
none should die for default of sustenance," and by
15 Rich. II. impositions were obliged to distribute
a yearly sum to the poor, but no compulsory law
was enacted till the 27th Hen. VIII. 1535. The
origin of the present Poor Law is referred to the
43rd of Elizabeth, 1601, by which overseers were
appointed for parishes.

* "The principle of the poor law of 1834 (in its
force)—(1) No man shall be allowed to perish through
want of what is necessary for maintaining life and health,
(2) every destitute person is bound to demand and obtain
from the guardians what is necessary for maintaining the
health and life of his children, in respect of this duty is
criminal, (3) it is obligatory on the guardians of the poor
to afford sufficient relief to all persons unable to
maintain themselves, refusal an indictable offence.

POPE (from the Greek *Pappas* and *Papa*, a father or grandfather), considered by Romanists to be the visible chief of the church, the vicar of Jesus Christ, and the successor of St. Peter. He styles himself "servant of the servants of God." The title pope was formerly given to all bishops. It was first adopted by Hyginus, 139; and pope Boniface III. induced Phocas, emperor of the east, to confer it to the prelates of Rome, 606. By the

confinement of Phocas also, the pope's supremacy over the Christian church was established; see *Italy, Reformation, and Rome, Modern*.

PORCELAIN, see *Pistery*.

PORPHYROGENITUS, "born in the purple," a term applied to emperors of the east, born while their fathers were reigning.

PORT BRETON, an isle near New Caledonia, South Pacific.

In 1877 the marquis Du Breil de Rays purchased of the king Maragan a quantity of land on which to found a colony. Growing prospectuses were issued in France, a company was formed, and the scheme being favoured by the legislators, a large number of shares were purchased and much money received. Other speculating companies were formed, and colonial government officers nominated. In spite of warning and prohibition several vessels sailed in 1879 with emigrants to meet with misery, disease, and, to a large extent, with death. A few who had been landed in New Caledonia got back to France and published an account of their sufferings. The marquis and some of his associates were brought to trial 27 Nov. 1883; he was sentenced to four years' imprisonment and a fine of 3000 francs; his associates to shorter imprisonment, a Jan. 1884; on appeal, sentence continued, 14 March, 1884.

PORTE, or **SUBLIME PORTE**, official name of the court of the sultan of Turkey. *Moustassim*, the last of the Abbasside caliphs (1243-58), fixed in the threshold of the principal entrance to his palace at Bagdad a piece of the black stone adored at Mecca, and thus this entrance became the "porte" by eminence, and the title of his court. The sultans, successors of the caliphs, assumed the title. — *Boswell*.

PORTEOUS MOB. Capt. Porteous, at Edinburgh, on 15 April, 1736, commanded the guard at the execution of Wilson, a smuggler, who had saved the life of a fellow criminal, by springing upon the soldiers around them, and by main force keeping them back, while his companion fled. This excited great commotion, and the spectators pelted the guard with stones. Fearing a rescue, Porteous ordered his men to fire upon the mob, and seventeen persons were killed or wounded. He was found guilty of murder, 22 June, 1736; but the queen granted him a reprieve (the king being then in H-nover). The people, at night, broke open the prison, took out Porteous, and hanged him on a dyer's sign-post, in the Grass-market, 7 Sept. 1736. None of the rioters were ever detected.

PORTER. Dr. Ashe says that this beverage obtained its appellation on account of its having been drunk by porters in the city of London, about 1730.* The number of licensed brewers in 1850, in England, was 2257; in Scotland, 154; and in Ireland, 96—total, 2507. On 17 Oct. 1814, at Meux's brewhouse two large vats of porter burst, destroying neighbouring houses. Several lives were lost; and the loss was between 8000 and 9000 barrels.

* The malt liquors previously in use were ale, beer, and twopenny, and it was customary to call for a pint or tankard of half-ale-half, i.e., half of ale, and half of beer. In the course of time it also became the practice to ask for a pint of three-thirds, meaning a third of ale, beer, and twopenny. To avoid trouble, Harwood, a brewer, made a liquor which partook of the united flavours of ale, beer, and twopenny, calling it entire, or entire butt beer, meaning that it was drawn entirely from one cask or butt. Being relished by porters and other working people, it obtained its name of porter, and was first retailled at the "Blue Land," Curtain-road. — *Lepell*.

PORTERAGE ACT, regulating the charge for portage of small parcels, passed 1799.

PORT HAMILTON, see *Corea*.

PORT JACKSON (New South Wales), thirteen miles north of Botany Bay, was so named by capt. Cook in 1770; see *Sydney*. Hero the duke of Edinburgh was shot by O'Farrell, a Fenian, 12 March, 1868, but soon recovered. The assassin was hanged, 21 April.

PORTLAND ADMINISTRATION. The first was the "Coalition ministry," of which William Henry Cavendish, duke of Portland,* as first lord of the treasury, was the head. It obtained the name of the "Coalition" ministry, and included lord North with Mr. Fox, formerly inveterate opponents. Formed 5 April, 1783; dissolved by Mr. Pitt's coming into power, Dec. same year.

First Administration.
Duke of Portland, first lord of the treasury
Vicount Stormont, president of the council
Earl of Caillie, privy seal
Fredrick, lord North, and Charles James Fox, home and foreign secretaries
Lord John Cavendish, chairman of the exchequer
Vicount Koppel, admiral
Vicount Townsend, admiral
Lord Loughborough, chief justice of great seal
Charles Townshend, Edmund Burke, Richard Fitzpatrick, Richard B. Sheridan, &c.

Second Administration, 25 March, 1807.
Earl Camden, lord president
Lord Eldon, lord chancellor
Earl of Westmorland, lord privy seal
Hon. Spencer Perceval, lord Hawkesbury (afterwards earl of Liverpool), Mr. Canning, and vicount Castlereagh (afterwards marquis of Londonderry), home, foreign, and colonial secretaries
Earl Bathurst and Mr. Dundas, boards of trade and control
Lord Mulgrave, admiral
Earl of Chatham, admiral

PORTLAND CEMENT, first mentioned in a patent granted to Joseph Aspdin, a bricklayer of Leeds, 1824. His son made the true cement at Northfleet. Its value as a building material was established by Mr. John Grant's tests, 1850-71. Portland cement concrete was used by Mr. E. A. Beman in 1867.

PORTLAND ISLE (off Dorset), the English Gibraltar. Fortified before 1142. Portland castle was built by Henry VIII. about 1536. Off this peninsula a naval engagement commenced between

the English and Dutch, 18 Feb 1653, which continued for three days. The English destroyed eleven Dutch men-of-war and thirty merchantmen. Van Tromp was admiral of the Dutch, and Blake of the English.—Here is found the noted freestone used for building our finest edifices. The Portland lights were erected 1716 and in 1789. The pier, with nearly half a mile square of land, was washed into the sea in Feb 1792. Prince Albert laid the first stone of the Portland breakwater, 25 July, 1849, and the last stone was laid by the prince of Wales, 10 Aug 1872. Mr James Rendel, the first chief engineer, was succeeded on his death in 1856 by Mr (aft sir) John Coode. The breakwater and other harbour works cost 1,033,600*l* exclusive of convict labour. The Portland prison was established in 1848. A mutiny among the convicts here in Sept 1858, was promptly suppressed.

PORTLAND (or **BARBERIN**) **VASE**. This beautiful specimen of Greek art (composed of a glass-like substance, with figures and devices raised on it in white enamel, but 10 inches diameter in the broadest part, 7, with a handle on each side) was discovered about the middle of the 16th century, in a marble sarcophagus in a sepulchre at a place called Monte del Grano, about 2½ miles from Rome. The sepulchre was supposed to have been that of the Roman Emperor, Alexander Severus (222–235), and his mother Mamaea, and the vase is supposed to have been the emerald urn of one of these 101 personages. It was placed in the palace of the Barberini family, at Rome, where it remained till 1770, when it was purchased by sir William Hamilton, from whose possession it passed to that of the dukes of Portland 1787, at the sale of her effects, it is said to have been bought by the then duke of Portland, who, in 1810, deposited it (on loan) in the British Museum. On 27 Feb 1845, this vase was smashed to pieces with a stone by a man named William Lloyd, it has been skillfully repaired, and is now shown to the public in a special room. Joshua Wedgwood made a mould of it and took a number of casts.

PORTO BELLO (S America) discovered by Columbus, 2 Nov 1502, was taken by Morgan the Buccaneer in 1668, by the British under admiral Vernon, from the Spaniards, 21 Nov 1739, and the fortifications destroyed. Before the abolition of the trade by the galleons, in 1748, it was the great mart for the rich commerce of Peru and Chili.

POSITIVE PHILOSOPHY set forth by Auguste Comte, an eminent mathematician, born about 1795, died at Paris, 1852. M. P. J. Lattre, the great French philologist, ardently embraced the system, and published "De la Philosophie Positive," in 1845.

Comte's "Cours de Philosophie Positive" published 1830-42, "Système de la Philosophie Positive ou Traité de Sociologie" institué par l'École de la Philosophie (Paris) pour principe de la science de la vie (1830-42).

It professes to have itself wholly on positive facts of observed phenomena in order to all metaphysical conceptions which it considers negative having nothing real or true in them and disagrees with the science of mind. It sets aside the laws of metaphysics as too much influenced by ideas in life and abandons all search after causes and essences of things and restricts itself to the observation of the laws of the material world and the discovery of the laws of the mind as far as they can be known in the third state of the human mind.

Positivism does not recognize the supernatural or the future state.

The Society of Positivists in London meet in Newton hall in Fleur de Lis court near Connaught, on Sunday evenings, when discourses on philosophy, morality, science, politics &c are delivered. Their professed object is to promote the perfection of man by means of education in its widest sense, aiming at the attainment of universal happiness in the interests of all professions, which is the object of the society. Founded by Auguste Comte, President (1841) M. J. Lattre, 29 Nov 1883.

"The Church of Humanity" is a modified form of positivism described by Mr Richard Congreve (1841) M. J. Lattre, 17 Jan 1884.

POSSIBILISTS A section of the liberal party in Spain, aiming at reforms. San Cristobal, a chief, Oct 1883.

The name is also given to the workmen's party in Paris who aim at effecting social reforms by legal methods. They are said to have prevented a revolutionary outbreak of the violent Bismarckists, or Autonomists, at the presidential election 1 Dec 1887.

POSTAL UNION GENERAL, was established by the Treaty of Bern, signed 9 Oct 1874, and took effect from 1 July, 1875. From time to time conferences have been held at Bern, Jan 1876; Paris, 1878 and 1880; Lausanne, 1885. At the congress at Vienna, 30 May-4 July, 1891, the British Australasian colonies were added to the union.

POSTING. Post-chaises were invented by the French, and, according to Granger, were introduced into this country by Mr William Tell, son of the writer on husbandry. Posting was fixed by statute of Edward VI at one penny per mile, 1548. By a statute, re-establishing the post-office, none but the postmaster or his deputies could furnish post-horses for travellers, 1660. The post-horse duty was imposed in 1779. Post-horse duty varied, in 1852, in England, 12s. 5011, and in Scotland, 16s. 9312.

POSTS, said to have originated in the regular councils established by Cyrus, who erected post-houses throughout the kingdom of Persia, about 550 B.C. Augustus was the first who introduced this institution among the Romans, 31 B.C. This was imitated by Charlemagne about A.D. 800—*Ashe*. Louis XI first established post-houses in France, owing to his eagerness for news, and they were the first institution of this nature in Europe, 1470—*Hinsley*. An international commission respecting postal arrangements met at Paris, 11 May, and broke up 9 June, 1863.

POST-OFFICE OF ENGLAND In England, in the reign of Edward IV 1481, orders on post-houses went stages of the distance of twenty miles from each other, in order to procure the king the earliest intelligence of the events that passed in the course of the war that had arisen with the Scots—*Gale*. Richard III improved the system of couriers in 1483. In 1543 similar arrangements existed in England—*Sadler's Letters*. Post communications between London and most towns of England, Scotland, and Ireland, existed in 1635—*de la Roche*.

The first chief postmaster of England was Thomas Tresham appointed by Queen Elizabeth I. 1561. Tresham appointed Matthew de L'Equerre 1561, postmaster general, and thus appointed William Russell and Thomas Withersham 1632. Appointment of Charles I. whereas to this time the king had been no certain intercourse between the kingdoms of England and Scotland the king now commands his postmaster of England to foreign parts to settle a running post (two to run night and day between Edinburgh and London to go thither and come back again in six days) 1633.

The king commanded his postmaster of England for foreign parts to settle a running communication by running posts between the metropolises and Edinburgh &c. (the Scotch Highlands) and Plymouth &c. &c. (the cities of the kingdom) and to settle a running post (two to run night and day between Edinburgh and London to go thither and come back again in six days) 1633.

An enlarged office created by the parliament in 1663 and one more considerable in 1667 with a view to benefit commerce by the public delivery of letters in the last means to discover and prevent any dangerous wicked designs against the commonwealth in the inspection of the civil responsibility 1657.

The Post office as at present constituted was founded 22 Charles II. 1663 by Daniel O'Neale 1663. Penny Post established in London and its suburbs by a Mr Robert Murray, upholsterer 1681.

He resigned his interest in the undertaking to Mr Dockwra a merchant 1683 but on a trial at the King's Bench he was adjudged to belong to the duke of York and a fourth of the general post was thereupon afterwards annexed to the revenue of the crown 1690.

This institution commenced July 1817 and made a total of 100 post July 1817. 1817. Cross posts established by Ralph Allen 1720. Between 1720 and 1740 the post was only transmitted three times a week between Edinburgh and London and the night of his own occasion sent a single letter which was for an Edinburgh banker, named Run-Q. 1720.

POTASSIUM, a remarkable metal, discovered by Humphry Davy, who first succeeded in separating it from its oxide, potash, by means of a powerful voltaic battery, in the laboratory of the Royal Institution, London, about 19 Oct 1807, and also the metals sodium from soda, Calcium from lime, &c. The alkalies and earths had been previously regarded as simple substances. Potassium ignites on contact with moisture

POTATOES, natives of Chili and Peru, generally considered to have been brought to England from Santa Fe, in America, by Sir John Hawkins, 1565. Others ascribe their introduction to Sir Francis Drake, in 1580, their general introduction, 1592. Their first culture in Ireland is referred to Sir Walter Raleigh, who had large estates in that country, about Youghal, in the county of Cork. It is said that potatoes were not known in Flanders until 1620. A fine kind of potato was first brought from America by Mr Howard, who cultivated it at Cuddington, near Bedford, 1765, and its culture became general soon after. The failure of the potato crop in Ireland, several years, especially in 1846, caused famine, to which succeeded pestilence of which multitudes died, among the many priests and physicians. Parliament voted ten millions sterling; and several countries of Europe, and the United States of America, forwarded provisions and other succours, see Ireland. In 1868 it was reported that in England and Wales 500,000 acres, and in Ireland 1,000,000 acres, were under cultivation for potatoes. Potato disease prevailed greatly in England, autumn of 1872. In consequence the value of potatoes imported in 1872 was 1,654,240*l.*, in 1871, only 225,732*l.*; in 1877, 7,964,840 *cwt.*, value, 2,348,749*l.*; in 1883, 5,149,509 *cwt.*, value 1,585,260*l.*; in 1887, 2,763,357 *cwt.*, in 1888, 2,381,807 *cwt.*, in 1889, 1,864,426 *cwt.* in 1890, 1,940,100 *cwt.* Temporary alarm respecting the American Colorado beetle or bug, autumn, 1876. POTSDAM (near Berlin), the Versailles of Prussia. It was made an annual in 1721. Here is situated the palace of Sans Souci (built, 1660-73), embellished by Frederick II., and occupied by Napoleon I. in Oct. 1806, and the new palace, erected by Frederick the Great, 1763-9, was the residence of the emperor Frederick III. when prince Frederick William of Prussia and his wife the princess royal of England, married 25 Jan. 1858. Population, 1890, 54,161.

POTTERY AND PORCELAIN. The manufacture of earthenware (the ceramic art) existed among the Jews as an honourable occupation (see 1 Chron. 15:23), and the power of the potter over the clay as a symbol of the power of God is described by Jeremiah, 605 B.C. (ch. xix.). Earthenware was made by the ancient Egyptians, Assyrians, Greeks, Latins, and Romans.

The Mycenaean Raffellia or Lulubum ware of the 13th century was probably introduced into Italy from the Moors from Mycenaean Raffellia and other artists made designs for the ware. Pottery manufactured at Basimian, in France, in the 12th century.

Enamelware pottery made at St. Cloud, about 1628. Luca della Robbia (born about 1400) applied tin enamel to terra cotta. Faience ware was made in France by Bernard Palissy (died, 1588) and his family.

Porcelain formed of earth in which was made in China in the 2nd century after Christ. Chinese porcelain is mentioned in the 11th century, when it was introduced into England and eagerly sought after.

POULTRY An exhibition of poultry was held in London, Jan 1853, when nearly 1000 cocks were exhibited, and similar exhibitions have been held at the Crystal Palace since

POULTRY COMPETER (London) was one of the most noted of the old city prisons. The competer of Wood-street belonged to the parish of London, and was made a prison-house in 1775. This latter and Broad street competer were rebuilt in 1667. The Giltspur street prison, built to supply the place of the old city competer, was pulled down in 1855. The Poultry chapel was erected on the site of the Poultry competer, in 1819.—*Laugh*

POUND, from the Latin *Pondus*. The value of the Roman *pondo* is not precisely known, though some suppose it was equivalent to an Attic *mina*, or 3½ lbs 7d. The pound sterling was in Saxons times, about 67½, a pound Troy of silver, and a shilling was its twentieth part, consequently the latter was three times as large as it is at present.—*Leacham*. Our avoirdupois pound weight, taken from the French, and contains sixteen ounces: it is in proportion to our Troy weight as seventeen to fourteen: see under *Standard*

POYNINGS' LAW, named after an Edward Poynings, lord deputy of Ireland at the time of its passing, at Drogheda, 13 Sept 1494. By this law all legislation in the Irish parliament was confined to matters first approved of by the king and the English council. The act was repealed, together with the English Statute of the 6th of George I and other obnoxious Irish statutes, 4 April, 1782

PRÆMONSTRATENSIAN ORDER, or **WHITE CANONS**, founded in 1120 by Norbert, a monk, at Præmonstrat, near Laon. Its first house in England was founded by Peter de Goussier, at Newsham, in Lincolnshire, 1143.—*Fenner*, according to others in 1146. The order spread widely through England soon after. The house at Newsham was dedicated to St Mary and St Martial.—*Trevor*

PRÆMUNIRE, LAW OF. This law (which obtained its name from the first two words "*Præmonitionem*," or "*Præmonitionem facias*," "Cause to be forewarned," which is applied to any offence in the way of contempt of the sovereign or his government) derived its origin from the aggressive power of the pope in England. The offence introduced a foreign power into the land, and created an *imperium in imperio*. The first statute of Præmunire

was enacted 35 Edward I 1306.—*Coke*. The pope bestowed most of the bishoprics, abbacies, &c., before they were void, upon favourites, on pretence of providing the church with better qualified successors before the vacancies occurred. To put a stop to these encroachments, Edward III enacted a statute in 1353. The statute commonly referred to as the statute of Præmunire is the 16th of Richard II 1392. Several similar enactments followed. The assertion that parliament is independent of the sovereign was declared a *præmunire*, 1661

PRÆTORIAN GUARDS, instituted by the emperor Augustus (13 B.C.), their numbers enlarged by Tiberius, Vitellius, and their successors. At first supporters of the imperial tyrants, they eventually become their masters, actually putting up the diadem for sale (as in March, 193 A.D., when it was bought by Didius Julianus). They committed many atrocities, and were finally disbanded by Constantine in 312

PRÆTORS, Roman magistrates, afterwards termed consuls (*ut huc*) were elected at the establishment of the republic, 509 B.C. In 366 the *prætor urbanus* was appointed for the city, and the *prætor peregrinus* for foreigners, 246 B.C. Two prætors were appointed for the provinces, 227, and two more 197. Sylla, the dictator, added two, and Julius Cæsar increased the number to 10, which afterwards became 16. After this, their number fluctuated, being sometimes 18, 16, or 12, till, in the decline of the empire, their dignity decreased, and their numbers were reduced to three

PRAGA, a suburb of Warsaw, where a bloody battle was fought, 4 Nov 1794. 30,000 Poles were killed by the Russian general Suwarow. Near here, on 25 Feb 1831 the Poles, commanded by Skrzynecki, defeated the Russians, under general Giesmar, who lost 4000 killed and wounded, 6000 prisoners, and 12 pieces of cannon

PRAGMATIC SANCTION, an ordinance relating to church and state affairs. The ordinance of the kings of France 1110 thus called, in one of the nights of the Guelphian church was assented against the usurpation of the pope in the choice of bishops, by Charles VII in 1438. The Pragmatic Sanction for settling the empire of Germany in the house of Austria, 1439. The emperor Charles VI published the Pragmatic Sanction, whereby in default of male issue his daughters should succeed in preference to the daughters of his brother Joseph I, 10 April, 1713, and he settled his dominions on his daughter Maria Theresia, in conformity thereto, 1712. She succeeded in Oct 1740, but it gave rise to a war, in which most of the powers of Europe were engaged, and which lasted till 1748

PRASLIN MURDER. The duchesse de Choiseul-Praslin was murdered by her husband, the duc de Praslin, at his own house, in Paris, 17 Aug. 1847. She was the only daughter of the celebrated marshal Sebastiani, the mother of nine children, and in her forty-first year. Circumstances were so managed by him as to give it the appearance of being the act of another. During the arrangements for the trial, the duke took poison.

PRAYER-BOOK, see *Common Prayer*. The Prayer-book and Homily Society, London, was founded in 1812.

Prayer-book Revision Society, established 1854, for promoting a revision of the book of common prayer, and such liturgical reforms in the church of England as will strengthen its Protestant and scriptural character.

PRAYERS. "Then began men to call upon the name of the Lord" (*Gen. iv. 26*), 3875 B.C. The mode of praying with the face to the east was instituted by pope Boniface II. A.D. 532. Prayers for the dead, first introduced into the Christian church about 170, are advocated by some ministers of the English church. Prayers addressed to the Virgin Mary and to the saints are said to have been introduced by pope Gregory, 593. See *Liturgies*.

PREBENDARY a clergyman attached to a cathedral or collegiate church, who receives an income termed *prebends* for officiating at stated times. The office slightly differs from that of a canon.

PRECEDENCE was established in very early ages, and was amongst the laws of Justinian. In England the order of precedence was regulated solely by two statutes, 31 Hen. VIII. 1539, and 1 Geo. I. 1714.

PRECEPTORS, COLLEGE OF, Bloomsbury, London, established in 1826, and incorporated by royal charter 26 March, 1829, for promoting

sound learning, especially among the middle classes, by the instruction of teachers, and by the examination of pupils at stated times.

New building in Bloomsbury Square opened by the prince of Wales, 30 March, 1827.

PREDESTINATION (*Ephes. i.*). The doctrine concerning this is defined in the seventeenth article of the Church of England (*Ephes. i. and Romans ix.*). It was maintained by St. Augustin, and opposed by Pelagius, in the early part of the 5th century. In later times it has been maintained by the Augustinians, Janseuists, the church of Scotland, and many dissenters (termed Calvinistic), and opposed by the Dominicans, Jesuits, and dissenters (termed Arminian), especially by the Wesleyan methodists.

PREHISTORIC ARCHEOLOGY began in Sweden, and first systematised by Mr. Nilsson. Daniel Wilson's "Archæology and Pre-historic Annals of Scotland," published 1851. An international congress for treating prehistoric subjects met at Neuchâtel in 1866, and at Paris in 1867. At the third meeting at Norwich, Aug. 1868, it assumed the name of "International Congress for Prehistoric Archaeology," and published its transactions in 1869. A meeting was held at Stockholm 7-14 Aug. 1874. See *Barrow's, Men, and Ancient Monuments*.

Sir John Lubbock divides prehistoric archæology into four great epochs: 1. The Drift or Palæolithic or old stone age; 2. The Neolithic or polished stone age; 3. The Bronze age; 4. The Iron age, when bronze was superseded. (1860.)

PRE-RAPHAELITE SCHOOL, a name given about 1850, to J. E. Millais, Wm. Holman Hunt, D. G. Rossetti, and other artists, who opposed the routine conventionality of academic teaching, and resolved to study nature as it appeared to them, and not as it appeared in the antique. For a short time they published "The Germ, or Art and Poetry," beginning in 1850. Their works have been much criticised, but their influence has been beneficial. Their principles are much advocated by the great art-critic, John Ruskin.

PREROGATIVE COURT, in which formerly all wills were proved, and all administrations taken, which belonged to the archbishop of Canterbury by his prerogative, a judge being appointed by him to decide disputes. Appeals from this court, previously to the pope, were commanded to be made to the king in chancery, 1533; to the privy council in 1830-2. This court was abolished, and the *Probate Court* established in 1857. Sir John Dodson, the last judge, died in 1858.

PREROGATIVE, ROYAL. In England the sovereign is the supreme magistrate, and it is a maxim that he can do no wrong. He is the head of the established church, of the army and navy, and the fountain of office, honour, and privilege, but is subject to the laws, unless exempted by name. The royal prerogatives were greatly exceeded by several despotic sovereigns, such as Elizabeth, James I., and Charles I. Elizabeth used the phrase "We, of our Royal prerogative, which we will not have argued or brought in question" (1591). James I. told his parliament "that as it was blasphemous to question what the Almighty could do of His power, so it was sedition to inquire what a

king could do by virtue of his prerogative." These extreme doctrines were nullified by the revolution of 1688, and the exercise of the prerogative is now virtually subject to parliament, see *Lords*.

PRESBURG, the ancient capital of Hungary, where the diets were held and the kings crowned (on 26 Dec. 1805, a treaty was signed between France and Austria, by which the ancient states of Venice were ceded to Italy, the principality of Milan, part of the bishopric of Passau, the city of Augsburg, the Tyrol, all the possessions of Austria in Suabia, in Burgundy, and Ortenau, were transferred to the elector of Bavaria, and the duke of Wurtemberg, who, as well as the duke of Baden, were then created kings by Napoleon. The independence of the Helvetic republic was also stipulated. A new iron and stone railway and passenger bridge over the Danube was inaugurated by the emperor, 30 Dec. 1890. Population, 1890, 52,444.

PRESBYTERIANS are so called from their maintaining that the government of the church appointed in the New Testament was by presbyters, or association of ministers and ruling elders, equal in power, office, and in order. "The elders (Greek, *presbyteros*) I exhort, who am also an elder (*synpresbyteros*)" 1 Peter 5. Presbyterism was accepted by parliament in place of episcopacy in England in 1648, but set aside at the restoration in 1660. It became the established form of church government in Scotland in 1666. Its tenets were embodied in the formulae of faith said to have been composed by John Knox, in 1580, which was approved by the parliament, and finished, 1597, and finally settled by an act of the Scottish senate, 1696, afterwards secured by the treaty of union with England in 1707. The first Presbyterian meeting-house in England was established at Wandsworth, Surrey, 20 Nov. 1572.

PRESS ASSOCIATION (a company "limited") was established by the newspaper proprietors of London and the provinces, at a meeting at

Manchester, 29 June, 1868, to make arrangements to enable them to avail themselves of the increased facilities for the speedy transmission of news afforded by the post office, in consequence of the purchase of the rights of all the telegraph companies, authorized by the Telegraph Act of 1868. The organization of the association was completed at a meeting in London, 3 March, 1869. The Provincial Newspaper Society, out of which it sprang, was founded in 1836, and became the Newspaper Society in 1880. Since 1868 the number of good daily provincial newspapers, containing the latest news of the world, has very greatly increased.

PRESS, LIBERTY OF THE. The *Supremacy* "it is to be printed" was much used on the title-pages of books printed in the sixteenth and seventeenth centuries. The liberty of the press was severely restrained, and the number of master-printers in London and Westminster limited by the Star Chamber, 13 Charles I., July 1, 1637. John Milton published his noble work, "Areopagitica, or, a speech for the Liberty of Unlicensed Printing," 1644. See *Fourth Estate*.

Disorders in printing were repressed by the parliament in 1543 and 1569, and by Charles II. 1666. The morning of the 11th (by a hurricane) destroyed in 1633, and 1693, also in 1695.
The best. The liberty of the press is like the sun we breathe—if we have it not we die. Was first given at the Crown and Anchor tavern at St. White, 1799.
It was reserved, and the printer's name required to be placed on both the first and last leaf of a book. July 1799.
The severity of the restrictions on the French press revived by M. Peignery minister of the interior but soon restored. Dec. 1860.
The liberty of the press in the United States greatly curtailed during the civil war. 1861-1865.
Certain restrictions on printers in the United Kingdom removed by an act passed. July 1869.

PRESTON (Lancashire). Near here Cromwell totally defeated the royalists under sir Marmaduke Langdale, 17 Aug. 1648. Preston was taken in 1715 by the Scotch insurgents, under Fenton, who proclaimed king James VII. They were defeated in a battle on 12, 13 Nov. by generals Wiles and Carpenter, who with the royal army invested Preston on all sides. The Scots laid down their arms, and their nobles and leaders were secured, some were shot as deserters, and others sent to London imprisoned and bound together, to intimidate their party.—The stoppage of the cotton manufacture in 1861 and 1862, through the civil war in America, occasioned great suffering in Preston. See *Population*.

The Preston quilt Merchant festival said to have been instituted in 1800, was recorded as being given 1798 and to have been kept once in 20 years regularly since 1862, was duly celebrated in Sept. 1866 and Sept. 1882.

PREVENTIVE MEDICINE. The dis-
coveries of Pasteur, Koch, and others, relative to
the propagation of disease by minute germs (see
Germ Theory), led to the gradual formation of a
British Institute of Preventive Medicine by a com-
mittee of eminent physiologists and medical men.

Sir Joseph Lister was proposed as the first president,
and Cambridge as the site of the Institute, Dec 1890.

PRICES, see Corn, Bread, and Provisions.
Mr T Tooke, in 1838, published a "History of
Prices from 1793 to 1836." He was latterly aided
by Mr. W Newman's "History of Agriculture
and Prices" (1250-1702). By Mr J E T Rogers,
six volumes published 1866-87, he died 13 Oct 1890.

PRIDE'S PURGE. On the 6th Dec 1648,
colonel Pride, with two regiments, surrounded the
house of parliament, and during the passage
forty-one members of the Presbyterian party, sent
them to a low room, then called *hell*. Above 160
other members were excluded, and none admitted
but the most famous of the Independents. The
privileged members were named the *Rump parlia-
ment*, which was dissolved by Cromwell, 20 April,
1653.

PRIENCE, one of the twelve cities of the Ionian
league in Asia Minor. The temple of Minerva
Polias, founded here by Alexander the Great, and
the work of Pythius, was excavated by Mr R P
Fullan, for the Dilettanti Society, in 1868-9.

PRIEST (derived from *presbyteros*, elder), in
the English church the minister who presides over
the public worship. In Gen xiv 18, Melchisedek
king of Salem is termed "priest of the most high
God." (1013 B.C. see *Hebrews vii*). The Greek
hierous, like the Jewish priest, had a sacerdotal
character, which idea of the priesthood is still
maintained by the Romists and those who favour
their views. Among the Jews, the priests assumed
their office at the age of thirty years. The dignity
of high or chief priest was fixed in Aaron's family,
1491 B.C. After the captivity of Babylon, the civil
government and the crown were superadded to the
high priesthood, it was the peculiar privilege of
the high priest, that he could be prosecuted in no
court but that of the great Sanhedrim. The
heathens had their arch-priest or high priest,
resembling the Christian archbishop. For "Priest
in Absolution," see *Holy Communion*.

PRIMER. A book so named from the Romish
book of devotions and formerly set forth or pub-
lished by authority, as the first book children
should publicly learn or read in schools, containing
prayers and portions of the scriptures. Primers were
printed 1535, 1539. Henry VIII issued a prayer-
book called a "primer" in 1545. The three were
published by Dr Burton in 1834.

PRIMITIVE CULTURE, see *Civilization*.

PRIMOGENITURE, RIGHT OF. A usage
brought down from the earliest times. The first-
born in the patriarchal ages had a superiority over
his brethren, and in the absence of his father was
priest to the family. In some parts of England,
by the ancient customs of gavel-kind and borough-
English, primogeniture was superadded. It came
in with the feudal law, 3 Will I 1068. The
rights of primogeniture abolished in France, 1790.

PRIMROSE LEAGUE, formed in 1884 in
memory of the late Lord Beaconsfield (with whom
the primrose is said to have been a favourite flower)
and in support of conservative principles, he died
19 April, 1881, and the anniversary of this day is
termed "Primrose Day," when the flower is gene-
rally worn by his admirers. The marquis of
Salisbury became grand master.

The league, which began with under a thousand
members, was declared to consist of 80,000
knights, dames, and associates, with 1,000
"habitués," on 30 May, 1889.

The League issues great number of political leaflets and wings. "Habitations" have been established in Scotland and Ireland.
Number of members reported, 1,000,000. April, 1891.

PRINCE RUPERT'S LAND, see *Rupert's Land*, and *Hudson's Bay*.

PRINCESS ALICE, an iron saloon steamer, belonging to the London Steamboat company, while carrying, it is supposed, above 900 persons, principally women and children, on their return from Sheerness, was immediately sunk by collision with the *Hywell Castle*, a large iron screw steamer, about 7.40 p.m. on Tuesday, 3 Sept. 1878, in the Thames, in Gullion's reach, about a mile below Woolwich Arsenal. About 200 persons were saved, but of the 16 who died afterwards. About 630 bodies were recovered and buried; many at Woolwich.

The *Princess Alice* was 251 tons gross, 270 ft. 4 in. long; 20 ft. 2 in. broad, 8 ft. 4 in. deep. Engines, 140 horse power. Owners, Mr. Glasgow. Capt. Wm. Gifford (lost), with (it is said) 6 sailors, 2 engineers, 3 cabinmen, 6 stowaways and 5 boys.

The *Hywell Castle*, 1376 tons gross; 254 ft. 3 in. long; 32 ft. 1 in. broad, 20 ft. 6 in. deep. Engines, 140 horse power. Owners, Hall Brothers, London. Captain J. Thomas Harrison.

Mission House Relief Fund opened, 5 Sept. The queen sent 1051; subscription came from 1031 family; 38,261 25 6d. received; final meeting, 30 Dec. 1878.

Harold of Ulster Inquiry—Result. Officers of *Hywell Castle* and *Princess Alice* not considered responsible for the accident, but some were considered for carelessness, 28 Oct. The *Princess Alice* considered to be equal to her load; inquiry concluded, 31 Oct. Decision: "that the cause of the casualty was the breach of Rule 29 of the Thames Conservancy Regulations, by the *Princess Alice* not turning her helm when she came and on to the *Hywell Castle*, a vessel rounding in the opposite direction." Report dated 6 Nov. 1878.

Coroner's Inquest—Verdict: "The *Hywell Castle* did not take necessary precautions in time of coming, &c.; *Princess Alice* contributed to the collision by not stopping her engines and going astern, &c." 14 Nov. 1878.

An action for damage against owners of *Hywell Castle* in Admiralty division began 27 Nov.; decision that both vessels were to blame, 17 Dec. 1878; decision on appeal that the *Princess Alice* was solely to blame, 15 July, 1879.

PRINTED GOODS, see *Calico*.

PRINTERS' PENSION SOCIETY, (now termed "Printers' Corporation"), founded 1827; chartered, 1865; almshouses instituted, 1841; orphan schools have been set up.

PRINTING. Block printing is said to have been invented by the Chinese about 593 A.D., movable types made in the 10th century. The

honour of first printing with single types in Europe has been appropriated to Muntz, Strassburg, Harlem, Venice, Rome, Florence, Basle, and Augsburg; but the names of the three first only are entitled to attention; see *Press*.

Adrian Junius awards the honour of the invention to Laurens Jordaen Koster, of Harlem, "who printed with blocks, a book of images and letters, *Speculum Humanae Salvationis*, and compounded an ink more viscous and tenacious than common ink, which blotted, about 1438."

[The leaves of this book, being printed on one side only, were afterwards pasted together.]

[In 1859, Mr. Samuel Leigh Sothby issued an elaborate work compiled by his father and himself, entitled "Principia Typographica," containing fac-similes, &c., of the block-books of the 15th century, and Mr. J. Russell Smith published a fac-simile of the *Biblia Pauperum*, a very early block-book.]

John Fust established a printing-office at Mentz, and printed the *Tractatus Petri Hispani*. 1462

John Gutenberg invented cut metal types, and used them in printing the earliest edition of the Latin bible (termed the *Mazarin*, from the discovery of a copy in the cardinal's library) at Mentz. 1450 55

[At the sale of the Perkins library, 6 June, 1873, a copy of this bible on vellum sold for 2500l., one on paper sold for 2500l.; a copy belonging to Sir John Thynne, of Myton park, sold for 3000l., 13 Dec. 1884; a copy belonging to the Earl of Crawford sold for 2,500l., 15 June, 1887; Lord Hopetoun's copy sold for 2,000l., 25 Feb. 1889.]

 The Stanhope press invented about 1800; in general use 1806
 Albion press introduced 1826
 The roller, which was a suggestion of Nicholson, introduced 1837
 Cowper's and Applegath's rollers 1837
 Columbian press of Clymer patented 1837
 Printing for the blind (by raised characters) begins 1837
Anastatic Printing, in which written or printed matter is transferred upon zinc plates, was invented by Baldwin of Berlin about 1835, and made known in London: lectured on by Faraday in 1835; and improved by Strickland and Delanotte in 1848
 [A similar process was invented by Mr. Cooks of Falmouth in 1836.]
 Printing-types electro-faced with copper about 1850
 Engraved copper-plate electro-faced with iron and nickel 1858
 Type-composing machines.—By James Young's several numbers of the "*Family Herald*" were set up, beginning 17 Dec. 1845; Hatterley's appeared at the Exhibition of 1851; Hart's was shown at the meeting of the British Association at Cambridge 6 Oct. 1862
 W. H. Mitchell's composing machine was tried at Messrs. Spottiswoode's, 1861, these machines were said to be in use in America in Jan. 1863
 Kastmbein's composing and distributing machines (in use at the *Times* office) shown at the International exhibition 1872
 The "Clowes" type-composing machine (Hooker's patent), in which electro-magnets are employed, was shown at the Caxton celebration exhibition, South Kensington. July, 1877
 10,000 types per hour may be set up in page form.
 Alexander Mackie's type-composing machine in use at his office in Warrington, and at Messrs. Clay's, London, in 1877. It was said to be able to set up 4 columns of the *Times* in an hour.
Justotype.—An American composing and distributing machine, in which type matrices are employed instead of type. The manipulator brings letters, points, and spaces together in one line of the galley; this is passed into a casting-box, and a solid line of type is produced in seven metal; this is repeated till the galley is full. The *New York Herald* has used about 40 machines. In July, 1885, it was freely shown in London, for the purpose of forming a company.
 Miss Emily Faithfull established the Victoria printing-office in Great Ormond-street, London, in which female compositors are employed: the "*Englishwoman's Journal*" printed there Aug. 1865; appointed printer and publisher in ordinary to her Majesty June, 1866
 Mr. William Blades, learned printer, printed facsimiles of several of Caxton's works, 1858, & seq.

 The catalogue contains valuable information.
 PRINTING-MACHINES.—William Nicholson, editor of the *Philosophical Journal*, first projected (1790-4) but Mr. König first contrived and constructed a working printing machine, which began with producing the *Times* of Nov. 1844, a memorable day in the annals of typography.
 * Ramish Service-books, used at Salisbury, by the devout called Pies (Pica, Latin), as is supposed from the different colour of the text and rubric. Our printing-type *Pica* is called *Clevo* by foreign printers.—H. Acleby.

In 1818, Mr E. Cowper patented improvements to König's machine printed 2800 an hour on one side. Cowper's improvements increased this number to 4200. This was raised to 15,000, by Mr Applegath's machine, which printed the *Times*. Hoe's American machine, introduced into London 1858, prints 20,000 an hour. Marinoni's machine at Paris said to print 36,000 an hour, Dec 1868.

Walter press, invented for the *Times* by J G Macdonald and Mr Calverley, between 1862-9, prints about 17,000 an hour perfected, 1872.

American Campbell press said to print 30,000 sheets per facet in an hour, Feb 1876.

Ingram web rotary machine, invented by Mr W J Ingram, M P, for printing illustrated papers first used to print *Illustrated London News*, 4 Oct 1877.

PRINTING IN COLOURS was first commenced by the employment of several blocks, to imitate the initial letters in Mss. (for instance, the Wente Palace of Faust, 1425, which has a letter in three colours). Imitations of chiaroscuro soon followed ('Reposee in Egypt,' engraving on wood after Louis Charrin, in 1810 in Germany, others by Ugo da Carpi in Italy, 1518).

J & K Jackson (1790-54) attempt to, without success, to imitate water colour drawings, and to print paper-hangings.

About 1823, John Skuppe an amateur, printed some chiaroscuro.

In 1829, Mr William Savage produced his remarkable work, 'Hints on Colour Printing, illustrated by imitations of chiaroscuro, and of coloured drawings, giving details of the processes employed.'

In 1836 Mr George Butler procured beautiful specimens of Picture Printing and took out a patent, which expired in 1851. In some of the illustrations to the 'Pictorial Almanac' (1836), he employed twenty different blocks.

It has been applied to Lithography (hence Chromolithography).

In 1849 Mr G C Toulton produced imitations of water colour drawings by means of 100 different plates and improvements of Savage's process. In 1851 he commenced colour printing by machinery and has since avoided himself of aqua tincta plates and also of electrotyped plates in copper surface to obtain purity of color as well as durability.

The huge coloured prints of the *Illustrated London News* were first issued in Dec 1846.

Mr E. Mervin explained his process of printing many colours on one impression (chromolithography), Society of Arts 13 Dec 1876.

Printing surface of vulcanised India rubber was first employed for this purpose by Mr John Leighton F R S, about 1862, and patented in the name of Alfred Leighton, 1864. The application is much used for hand stamps for books, &c.

PRINTING EXHIBITION (of specimens, apparatus, materials, stationery, and sundries), at Agricultural Hall, London, include 5-7 July, 1880, 14 July &c, 1881, and 30 July &c, 1883.

International exhibition of printing at Stationers' Hall, London, opened by the Lord Mayor, 14 Oct 1890.

PRIORIES, at first dependent on the great abbey, are mentioned in 722 in England, see *Abbeys, and Monasteries*. *Aben priories* were seized by the king (Edward I) in 1285, and in succeeding reigns on the breaking out of war with France, but were usually restored on the conclusion of peace. These priories were dissolved, and their estates vested in the crown, 3 Henry V 1414.—*Rymer's Fœdera*.

PRISCILLIANISTS, disciples of Priscillian, a Spanish bishop who propagated doctrines alleged to contain Gnosticism and Manichæism, 372. When condemned he appealed from the pope to the emperor, but was beheaded at Treves, 385.

† In 1851 was published Blumenbach's *Physiology* by Elliotson, the first book printed by machinery. The machine employed was König's, one which printed both sides in one operation at the rate of 900 sheets an hour (1864).

PRISONERS OF WAR, among the ancient nations, when spared, were usually enslaved. About the 13th century, civilized nations began to exchange their prisoners.

The Spanish, French, and American prisoners of war in England were 12,000 in number, 30 Sept. 1779. The number exchanged by cartel with France, from the commencement of the then war, was 44,000.

The English prisoners in France estimated at 6000, and the French in England 27,000. Sept 1798. The English in France amounted to 10,300 and the French, &c., in England to 47,600 in 1811. Great numbers made by the Germans in the war 1870-1.

PRIVATE BILLS, see *Acts of Parliament*.

PRIVATEER, a ship belonging to private individuals, sailing with a licence (termed a *Letter of Marque*), granted by a government in time of war, to seize and plunder the ships of the enemy. The practice, said to have been adopted by Edward I against the Portuguese in 1295, was general during the war between Spain and the Netherlands in the 17th century, and during the last French war privateering was abolished by the great sovereigns of Europe by treaty, 30 March, 1856. The United States government refused to agree unless the right of blockade was also given up. The British government declined this, asserting "that the system of commercial blockade was essential to its naval supremacy." On 17 April, 1861, Jefferson Davis, president of the southern confederacy, announced his intention of issuing letters of marque and on the 19th president Lincoln proclaimed that all southern privateers should be treated as pirates. This decree was not carried out see *United States*. All the great powers forbade privateering during the American civil war (which see). By the treaty of Washington privateering was prohibited.

PRIVILEGED PLACES, see *Asylums*.

PRIVY COUNCIL. A council said to have been instituted by Alfred, 895. The number of the council was about twelve when it discharged the functions of state now confined to the members of the cabinet, but it had become of unwieldy amount before 1679, in which year it was remodelled upon Sir William Temple's plan, and reduced to thirty members. Anthony Ashley, earl of Shaftesbury, being president. The number is now unlimited. To attempt the life of a privy councillor in the execution of his office was made capital, occasioned by Cromwell's stabbing Mr Harley while the latter was examining him on a charge of high treason, 9 Aug., 1711.

The Proceedings and Ordinances of the Privy Council of England from 10 Richard II to 33 Hen VIII, edited by Sir H. Nicolas, 9 vols, were published by the record commissioners, 1834-7.

The "Acts of the Privy Council," edited by Mr J R Bennett, beginning with 1542, Vols I—IV, issued in 1860-2.

Official Committee of the Privy Council.—In lieu of the Court of Delegates, for appeals from the local chan-

cellors of Great Britain and of Ireland in cases of lunacy—from the Ecclesiastical and Admiralty Courts of England, and the Vice-Chancery courts abroad—from the Warden of the Exchequer the Courts of the Isle of Man and other islands and the Colonial courts, &c.—fixed by statute 3 & 4 Will IV c 41, 1833—amended by other acts in 1841, 1851, 1852.

JUDGES.—The lord president, lord chancellor master of the rolls, vice-chancellor lord justices in appeal, lord chief justice of the king's bench and 1 common pleas, lord chief baron judges of the courts of bankruptcy, probate and admiralty and 1 clerk appointed by the queen. In consequence of the increase of business, and consequent delay the queen was empowered to appoint four new judicial members of the committee, by 34 & 35 Vict c 61 (21 Aug. 1871). The attorney-general, Sir R Collier was made a judge of the Common Pleas 2 Nov., and a member of the judicial committee 27 Nov. 1871.

These proceedings were considered contrary to the spirit of the act by several judges and the legal profession generally. A vote of censure on the trial by jury was negatived in the House of Lords (89 7) 15 Feb. in the Commons (268 247) 19 Feb. 1871.

Other changes were made by an act passed in 1876.

PRIVY SEAL, THE LORD, the fifth great officer of state, has the custody of the privy seal, which he must not put to any grant, without good warrant under the king's signet. This seal is used by the king to all charters, grants, and pardons, signed by him before they come to the great seal. Richard Fox, bishop of Winchester, held this office in the reign of Henry VIII previously to 1523, when Cuthbert Tunstall, bishop of London, was appointed. The privy seal has been on some occasions in commission.—*Deacon*. Sec under *Liverpool*, *Canning*, *Wellington*, and succeeding Administrations. Present lord, George Henry Cadogan earl Cadogan appointed 26 July, 1886.

PRIZE-FIGHTING, see *Boxing*.

PRIZE MONEY, arising from captures made from the enemy, was decreed by government to be divided into eight equal parts, and distributed by order of ranks, 17 April, 1793. The distribution of army prize-money is regulated by an act passed in 1832. Naval prize money was now regulated by royal proclamation, the last, 19 Nov., 1866.

PROBABILITY, THEORY OF (termed by Butler, "the guide of life" by Laplace, "good sense reduced to calculation"), was originated by Pascal, and taken up by Fermat, in their correspondence in 1654.

Its objects is the determination of the number of ways in which an event may happen or fail in order that we may judge whether the chances of its happening or failing are greater.—*Fermat*.

It has been treated upon by the most eminent mathematicians viz. the Bernoullis, De Moivre, D'Alembert, Euler, Lagrange, Laplace, and Quetelet.

Issac Todhunter's famous "History of Probability," published 1865.

PROBATE COURT, established in Aug 1857 by 20 & 21 Vict c 77, which abolished all powers exercised by the ecclesiastical courts in the granting of probates of wills, &c., see *Pierogative Court*. The first judge appointed, 5 Jan 1858, was Sir Cresswell Cresswell, who took his seat on 12 Jan. On his death, Sir James P Wilde (aft. Lord Penzance) was appointed judge, 28 Aug 1863, see *Supreme Court*. The president of the probate, divorce, and admiralty division, Sir James Hannen (1872), succeeded by Sir Charles P Butt, Jan 1891 (died 25 May, 1893), Sir Francis Henry James, 30 May, 1892. By the Judicature Act of 1873, the probate, divorce, and admiralty courts were constituted the 5th division of the Supreme Court. A probate and matrimonial division of the high court of justice of

Ireland was established by Judicature act, 1877; present judge, Robert Richard Warren (1889). *Probate* is the exhibiting and proving a will before the proper authority. The probate registry is now at Somerset House (1889).

Probate duties transferred to relieve local taxation by Local Government Act, 1888—amount received 1887-8, £1,596,600.

PROCEDURE RULES, see under *Parliament* 1882 and 1888, 1890.

PROCESSIONS ACT, 13 Vict. c. 2, passed 12 March, 1830, prohibited party processions, with banners, &c. It was repealed in 1872. Processions of workmen and others, for demonstrations in Hyde Park, prohibited in the great thoroughfares of London, by the police, 31 May, 1890.

PROCLAMATIONS, ROYAL, "have only a binding force when grounded upon and to enforce the laws of the realm."—*Coke*. Henry VIII., in 1539, declared that they were as valid as acts of parliament. This was annulled, 1547.

The lord lieutenant of Ireland has power by proclamation to place districts under the provisions of the Criminal Law Procedure Act, 1881 and 1887, which districts are then said to be *proclaimed*.

PROCONSUL, a Roman consul, whose tenure of office was extended beyond his legal term. Q. Publilius was the first proconsul appointed during the war with Carthage, 327 B.C. The name was afterwards given to governors of provinces.

PROCTOR (from *procurator*), an office in ecclesiastical courts, corresponding to that of an attorney or solicitor in courts of common law. It was abolished by the Judicature act, 1873. The persons chosen to represent the clergy in convocation are termed proctors. The university proctors enforce discipline.

PROFILES. The first profile taken, as recorded, was that of Antigonus, who, having but one eye, his likeness was so taken, 330 B.C.—*Ashm.* "Until the end of the 3d century, I have not seen a Roman emperor with a full face; they were always painted or appeared in profile, which gives us the view of a head in a very majestic manner."—*Addison*.

PROGRESISTAS, a political party in Spain, headed by Espartero, duke of Victory, and later by general Prim. Since 1865 they adopted a policy of inaction in public affairs, by uniting with the unionists and republicans in Sept. 1868, the government were overthrown, see *Spain*.

A party in Servia and also in Portugal are termed *Progresistas*, and in England a radical party is termed *Progresstives*, 1838 et seq.

"PROGRESS AND POVERTY," see *Land Nationalization*.

PROGRESSIONIST THEORY supposes that the existing species of animals and plants were not originally created, but were gradually developed from one simple form; see *Species*.

PROMISSORY NOTES were regulated and allowed to be made assignable in 1705. First taxed by a stamp in 1782; the tax was increased in 1804, and again in 1808, and subsequently; see *Bills of Exchange*.

"PRO NIHILO," a pamphlet, said to be by count Henry Arnim, attacking count Bismarck; published Nov. 1875. He was prosecuted for it in 1876; see *Prussia*.

PROPORTIONAL REPRESENTATION. The scheme propounded by Mr. Thomas Haic in 1857, in a pamphlet on "Representation," and perfected in his "Treatise on the Election of Representatives," published in 1859, which was well received by Mr. J. Stuart Mill. A society to introduce this principle was formed in Feb. 1884. It included sir John Lubbock (president), Mr. Leonard H. Courtney, and many other M.P.s.

It proposed that "in all cases where an elector is entitled to one vote only, to enable the elector to nominate more than one candidate to whom, under certain circumstances, that vote might be transferred in the manner indicated by the elector." Negated by the commons, 134-37, 3 March, 1885.

PROROGATION OF PARLIAMENT. By an act passed 12 Aug. 1867, her majesty was enabled to issue a proclamation for the prorogation of parliament during the recess.

PROSECUTOR. By the Prosecution of Offences Act, 42 & 43 Vict. c. 22 (3 July, 1879), the appointment of a director of public prosecutions with assistants was enacted, somewhat resembling officers in Scotland and Ireland. It came into operation 1 Jan. 1880. John Bossert Maule, appointed director of public prosecutions, Dec. 1879; succeeded by sir Augustus Stephenson, 1884.

A committee reported the plan to be a failure, and recommended changes, June; act amended, 1884.

PROTEIN, from the Greek (*protein*, principal); a chemical term introduced by Mulder about 1844, for the basis of albumen, fibrin, and casein.

PROTESTANT REFORMATION SOCIETY, established 1820; it employs missionaries and readers.

PROTESTANTS. The emperor Charles V. called a diet at Spire in 1529, to request aid from the German princes against the Turks, and to devise means for allaying the religious disputes which then raged owing to Luther's opposition to the Roman catholic clergy. Against a decree of this diet, to support the doctrines of the church of Rome, six Lutheran princes, with the deputies of thirteen imperial towns, formally and solemnly *protested*, 19 April, 1529. Hence the term protestants was given to the followers of Luther; it afterwards included Calvinists, and other sects separated from the see of Rome. The six protesting princes were: John, elector of Saxony; George, margrave of Brandenburg; Ernest and Francis, the dukes of Lunenburg; the landgrave of Hesse; and the prince of Anhalt; these were joined by the citizens of Strassburg, Nuremberg, Ulm, Constance, Heilbron, and seven other cities; see *Lutheranism*, *Calvinism*, *Huguenots*, *Germany*, *Church of England*, &c.

PURCHASE OF LAND, see under *Land*

PURCHASE SYSTEM in the army. The payment of a present or gratuity for a commission was prohibited by William III., 1693, but in 1702 purchase was legally reorganised. In 1711 the sale of commissions was forbidden without the royal permission. In 1719-20 regulations were issued, and a fixed scale of prices was adopted in consequence of a commission in 1765. Large over-regulation payments continued to be paid. Commissions of inquiry were held frequently since 1858, and in 1873 the system was abolished, with compensation, by royal warrant, 20 July, 1871, the bill for the purpose having been rejected by the house of lords. For amounts paid, see under *Army*

PURGATIVES of the mild species (aperients), particularly castor, manna, and senna, are ascribed to Aesculapius, a Greek physician, 1245

PURGATORY the middle place between heaven and hell, where it is believed by the Roman Catholics, the soul passes through the fire of purification before it enters the kingdom of God. The doctrine was known about 250, was introduced into the Roman church in the 5th century, and made a religious dogma by Gregory I., 590-604. It was first set forth by a council at Florence, 1439, enforced by the council of Trent, Dec 1563, see *Indulgences*

PURIFICATION, after childbirth, was ordained by the Jewish law, 1490 B.C. (*Lev. xii.*), see *Cherubim*. The first of the purification was instituted, 542, in honour of the Virgin Mary's going to the temple (*Luke ii.*) Pope Sergius I. ordered the procession with wax tapers, whence Candlemas-day

PURITANS, the name first given, it is said, about 1564, to persons who aimed at greater purity

of doctrine, holiness of living, and stricter discipline than others. They withdrew from the established church, professing to follow the word of God alone, and maintaining that the church retained many human inventions and popish superstitions; see *Coburn's, Nonconformists, and Presbyterians*.

PURLEY, see *Dispersions*.

PURPLE, a mixed tinge of scarlet and blue, discovered at Tyre. It is said that Hercules Tyrius having observed his dog's lips to be stained, after eating a shell-fish named *murex* or *purpura*, was thereby led to invent the dye. Purple was anciently used by the princes and great men for their garments. It was restricted to the emperor by Justinian I. 532, and *porphyrogenitus* attached to the names of some emperors signifies "born to the purple."

PURVEYANCE, an ancient prerogative of the sovereigns of England of purchasing provisions, &c., without the consent of the owners, led to much oppression. It was regulated by Magna Charta, 1215, and other statutes, and was only surrendered by Charles II. in 1660, for a compensation.

PUSEYISM, a name attached to the views of certain clergymen and lay members of the church of England, who proposed to restore the practice of the church of England to what they believed to be required by the language of her Liturgy and Rubrics, but which were considered by their opponents to be of a Romish tendency. The term was derived from the name of the professor of Hebrew at Oxford, Dr. Edward Pusey. The heads of houses of the university of Oxford passed resolutions censuring Dr. Pusey's attempts to renew practices which are now obsolete, 15 March, 1841; and his celebrated sermon was condemned by the same body, 30 May, 1843; he died 16 Sept. 1882; see *Tractarians*, and *Ritualism*.

PUTNEY, anciently Putteli and Putonheath, N.E. Surrey, on the Thames, opposite Fulham. A new granite bridge, founded by the prince of Wales (to replace the wooden one completed in 1730), 12 July, 1884. Opened by the prince, 29 May, 1886.

PYDNA (Macedon), where Perseus, the last king of Macedon, was defeated and made prisoner by the Romans, commanded by *Emilius Paulus*, 22 June, 168 B.C.

PYRAMIDS OF EGYPT, about 75 in number, of various sizes, constructed for the preservation of mummies of the kings and their families.

The Stepped Pyramid of Sakkara is conjecturally assigned to *Ousnephes* of the first dynasty, see *Egypt*. Three great pyramids are situated near Gizeh on the W. bank of the Nile. The first or greatest, is said to have been erected as the tomb of Cheops, fourth dynasty, the Cheops of Herodotus, dated by Bunsen, 2733-2666 B.C. Its height is said to have been originally 481 feet, and its base 777 square feet. The second pyramid is ascribed to Chephren, or Chephren, 2666-2633 B.C. The third pyramid is said to have been built by Menkaura or Mycerinus, 2633 B.C.

The pyramids have been visited and described by Belzoni, 1817; Vyse, 1836; C. Plazzi Smith, and others, see *Egypt Exploration Fund*.

Some of the eleven pyramids at Sakkara have been explored by M. Mariette, 1880 & seq.

At the base of the Pyramids, Napoleon Bonaparte defeated the Mamelukes, and thereby conquered Lower Egypt, 13 and 21 July, 1798.

PYRENEES. After the battle of Vittoria (fought 21 June, 1813), Napoleon sent Soult to superintend *Jordan*, with instructions to drive the allies across the Ebro; Soult retreated into France with a loss of more than 20,000 men, having been defeated by

Wellington in a series of engagements from 25 July to 3 Aug. One at the Pyrenees on 28 July. A railway through the Pyrenees (from Bilbao to Miranda) was opened 21 Aug. 1862.—THE PACES OF THE PYRENEES was concluded between France and Spain, by cardinal Mazarin, for the French king, and don Louis de Haro, on the part of Spain, in the island of Pheasant, on the Bidassoa. By this treaty Spain yielded Rousillon, Artois, and her right to Alsace; and France ceded her conquests in Catalonia, Italy, &c., and engaged not to assist Portugal; 7 Nov. 1659.

PYROLYTER, a mechanical and chemical apparatus for extinguishing fires, especially in ships, invented by Dr. Paton; tried at Greenwich, and reported successful, 1 June, 1875.

PYROMETER (fire-measurer), an apparatus employed to ascertain the temperature of furnaces, &c., where thermometers cannot be employed; Muschenbroek's pyrometer (a metallic bar) was described by him in 1731. Improvements were made by Elliott and others. Wedgwood employed clay cylinders, 1782-6. In 1830 professor Daniell received the Rumford medal for an excellent pyrometer made in 1821. Mr. Ericsson's pyrometer appeared in the Great Exhibition of 1851. (*Eng. Cyc.*) Mr. (aft. air) C. W. Siemens employed electric resistance in his pyrometers, exhibited in 1871.

PYROPHONE (Greek, *pur*, fire; *phone*, voice), a musical instrument, invented by M. Frédéric Kastner, of Paris. It consists of glass tubes of various lengths; the tones being produced by what are termed "singing flames." It is based upon the "chemical harmonicon." Keys are attached for playing, as in the piano. The invention was reported to the French Academy of Sciences, 17 March, 1873; exhibited at Vienna, same year; and at the Society of Arts, 17 Feb. 1875. M. Kastner died aged 31, 6 April, 1882.

PYROXYLIN, the chemical name of Gun Cotton (which see).

PYRRHONISM, see *Sceptics*.

PYTHAGOREAN PHILOSOPHY.

Pythagoras, of Samos, head of the Italian sect, flourished in the 6th century B.C. He is said to have taught the doctrine of metempsychosis, or transmigration of the soul from one body to another, forbidden his disciples to eat flesh and beans, invented the multiplication table, improved geometry, and taught the present system of astronomy.

PYTHIAN GAMES, in honour of Apollo, near the temple of Delphi; asserted to have been instituted by himself, in commemoration of his victory over the serpent, Python. Also said to have been established by Agamemnon, or Diomedes, or Amphictyon, or lastly, by the council of the Amphictyons, 1203 B.C. They lasted till 394.

PYX, the casket in which Catholic priests keep the consecrated wafer. In the ancient chapel of the pyx, at Westminster abbey, are deposited the standard pieces of gold and silver, under the joint custody of the lords of the treasury and the comptroller-general. The "trial of the pyx" signifies the verification by a jury of goldsmiths of the coins deposited in the pyx or chest by the master of the mint; this took place on 17 July, 1861, at the exchequer office, Old Palace-yard, in the presence of twelve privy councillors, twelve goldsmiths, and others, and on 15 Feb. 1870. This trial is said to have been ordered in the reign of Henry II., 1154-89; King James was present at one in 1611. The first annual trial of the pyx, appointed by the Coinage act of 1870, took place 18 July, 1871.

Q.

QUACKERY.

QUACKERY, or medical imposture, is very ancient. Quack medicines were taxed in 1783 *et seq.* An inquest was held on the body of a young lady, Miss Cashin, whose physician, St. John Long, was afterwards tried for manslaughter, 21 Aug. 1830; he was found guilty, and sentenced to pay a fine of 25*ol.*, 30 Oct. following. He was tried for manslaughter in the case of Mrs. Catherine Lloyd, and acquitted, 19 Feb. 1831. Dr. Vriets, "the black doctor," a professed cancer-curer, at Paris, was condemned to fifteen months' imprisonment as an impostor in Jan. 1860.

QUADRAGESIMA SUNDAY, first Sunday in Lent and 40th day before Good Friday; see *Lent*, and *Quingagesima*.

QUADRANT, a mathematical instrument in the form of a quarter of a circle. The solar quadrant was introduced about 290 *a.c.* The Arabian astronomers used the calpita, in 995, had a quadrant of 21 feet 8 inches radius, and a sextant 59 feet 9 inches radius. Davis's quadrant for measuring angles was produced about 1600; Hadley's quadrant about 1731; see *Navigatio*.

QUADRILATERAL or **QUADRANGLE**, terms applied to four strong fortresses in N. Italy, long held by the Austrians, but surrendered to the Italians, Oct. 1866;—Peschiera, on an island in the Mincio; Mantua on the Mincio; Vicenza and Legnago, both on the Adige; see *Italy*, *Peschiera*, &c. The Turkish *Quadrilateral* was Slumna, Varna, Rustchuk, and Silistria, lost to the sultan by the treaty of Berlin, which established the autonomy of Bulgaria.

QUADRILLE, a dance (originally *quadrille de contre danse*, introduced into French ballets about 1745), in its present form became popular in France about 1801. It was introduced into this country about 1808 (*Miss Berry*), and promoted by the duke of Devonshire and others, in 1813. *Rail*.

QUADRIVIUM, see *Arts*.

QUADRUPE ALLIANCE. That between Great Britain, France, and the emperor (signed at London, 22 July, 1718), on the accession of the states of Holland, 8 Feb. 1719, obtained its name. It guaranteed the succession of the reigning families of Great Britain and France, settled the partition of the Spanish monarchy, and led to war.

QUADRUPE TREATY, concluded in London 22 April, 1834, by the representatives of Great Britain, France, Spain, and Portugal, guaranteed the possession of her throne to Isabella II., the young queen of Spain.

QUESTORS (seekers). Two *questores paritici*, public prosecutors, in cases of murder and other capital crimes, seated in Rome under the kings; two *questores classici*, who had the management of the public treasure; appointed about 484 *a.c.* The number of questors was raised from time to time, as circumstances demanded. Plu-

QUAKERS.

beians were first elected in 409 *a.c.* There were eight questors in 205. Sylla raised the number to twenty; Julius Cæsar to forty.

QUAKERS or **SOCIETY OF FRIENDS**, originally called Seekers, from their seeking the truth, and afterwards Friends (3 *John*, 14). Justice Bennet, of Derby, gave the society the name of Quakers in 1650, because George Fox (the founder) admonished him and those present to quake at the word of the Lord. This sect was commenced in England about 1645, by George Fox (then aged 22), who was joined by George Keith, William Penn, and Robert Barclay, of Ury, and others. Fox rejected all religious ordinances, explained away the commands relative to baptism, &c.; discarded the ordinary names of days and months, and used *this* and *thou* for *you*, as more consonant with truth. He published a book of instructions for teachers and professors, and died 13 Jan. 1691. Sir H. Nicolas explains the Quaker calendar in his *Chronology of History*. The first meeting-house in London was in White Hart-court, Gracechurch-street.

Their principles are contained in "Extracts of minutes" (from the beginning) published 1782; revised 1802, 1862, and 1885.

The Quakers early suffered grievous persecutions. At Boston, U.S., where the first Friends who arrived were females, they (even females) were cruelly accosted, and had their ears cut off, some put to death. In 1659 they stated in parliament that 2000 Friends had endured sufferings and imprisonment in Newgate; and 164 Friends offered themselves at this time, by name, to government, to be imprisoned in lieu of an equal number in danger (from confinement) of death, 1659. Fifty-five (out of 120 sentenced) were transported to America, by an order of council, 1664.

The masters of vessels refusing to carry them for some months, an embargo was laid on West India ships, when a mercenary wretch was at length found for the service. The Friends would not walk on board, nor would the sailors host them into the vessel, and soldiers from the Tower were employed. In 1665, the vessel sailed; but it was immediately captured by the Dutch, who liberated twenty-eight of the prisoners in Holland, the rest having died of the plague. Few reached America.

First meeting of Quakers in Ireland in Dublin in 1688; and their first meeting-house there was opened in Kenton-street.

The solemn affirmation of Quakers enacted to be taken in all cases in the courts below wherein oaths are required from other subjects (see *Affirmation*).

William Penn, with a company of Friends, colonised Philadelphia.

John Archdale, a Quaker, elected M.P. for Chipping Wycombe; refused to take the oath, and his election was declared void.

Quakers emancipated their negro slaves.

A schism in the society was begun in America about 1827, by Elias Hicks publishing his opinions denying the divinity of Christ and his atonement and the authority of the Holy Scriptures. His numerous followers are styled Hicksite Friends.

Joseph Pease, a Quaker, was admitted to parliament on his affirmation.

The Quakers had in England 413 meeting-houses in 1800, and 372 in 1879.

At an annual assembly it was agreed to recommend that mixed marriages should be permitted, and that many of the peculiarities of the sect in speech and costume should be no longer insisted on.

2 NOV. 1898

said to be 14,441 Quakers in Great Britain, May, 1877; about 14,700, May, 1880; 15,381 May 1885

QUALIFICATION FOR OFFICE ABOLITION ACT, passed May, 1866, rendered it unnecessary to make and subscribe certain declarations.

QUARANTINE: the custom observed at Venice as early as 1127, whereby all merchants and others coming from the Levant were obliged to remain in the house of St. Lazarus, or the Lazaretto, forty days before they were admitted into the city. Various southern cities have now lazarettes; that of Venice is built in the water. In the times of plague, England and all other nations oblige those that come from the infected places to perform quarantine with their ships, &c., a longer or shorter time, as may be judged most safe. Quarantine acts were passed in 1753 and in 1825. By order of council, 10 Nov. 1866, foreign cattle were made subject to quarantine.

QUARTER SESSIONS were established, 25 Edw. III. 1350-1. The days of sitting were appointed, 2 Hen. V. 1413. In 1830 it was enacted that quarter sessions of the peace should be held in the first week after 11 Oct., 28 Dec., 31 March, and 24 June. Further regulated, 1842, 1848, and 1858.

QUARTERLY REVIEW, the organ of the Tory party. The publication was proposed to Mr. George Canning, and his support solicited by Mr. John Murray, the publisher, in a letter dated 25 Sept. 1807, in opposition to the opinions of the *Edinburgh Review*. Mr. Murray was ably assisted by Walter Scott, Robert Southey, John Gibson Lockhart (editor 1825-53), J. W. Croker, and other eminent persons. The review first appeared in Feb. 1809, under the editorship of William Gifford, the celebrated translator of "Juvenal." He died 31 Dec. 1826.

QUASI MODO, a name given to *Lois Sunday* (the first Sunday after Easter) from the commencement of a hymn sung on that day.

QUATERNIONS, an important mathematical method or calculus, invented by Sir Wm. Rowan Hamilton, about 1843.

It is based upon the separation of multiplication from addition, and its fundamental idea is mental transference or motion by what he termed vectors. He attributed to addition motion from a point: to multiplication about a point. Four numbers are generally involved, hence the name quaternion. Hamilton's "Lectures on Quaternions," was published 1853; his "Elements," 1866. Other works by professors Kelland and Tait, published since.

QUATRE-BRAS (Belgium). Here on 16 June, 1815, two days before the battle of Waterloo, a battle was fought between the British and allied army under the duke of Brunswick, the prince of Orange, and sir Thomas Picton, and the French under marshal Ney. The British fought with remarkable intrepidity, notwithstanding their inferiority in number, and their fatigue through marching all the preceding night. The 42nd regiment (Royal Highlanders) suffered severely in pursuit of a French division by ambushers posted in ambush behind growing corn. The duke of Brunswick was killed.

QUEENSTOWN (Upper Canada). This town, on the river Niagara, was taken in the war with America by the troops of the United States. 12 Oct. 1812; but was retaken by the British forces, who defeated the Americans with considerable loss in killed, wounded, and prisoners, on the same day. Queenstown suffered severely in this war.—The Cove of Cork was named **QUEENSTOWN**, 3 Aug. 1849 by the queen on her visit.

QUEEN'S UNIVERSITY (see *Queen's Col-lege*), was directed to be dissolved by 42 & 43 Vict. c. 65 (1879), and was dissolved by proclamation, 31 Jan. 1882; see *University of Ireland*.

QUEEN VICTORIA STEAM SHIP. Wrecked 15 Feb. 1853; see *Wrecks*.

QUENTIN, ST. (N. France). The duke of Savoy, with the army of Philip II. of Spain, assisted by the English, defeated the French under the constable De Montmorency, at St. Quentin, 10 Aug. 1557. In fulfilment of a vow made before the engagement, the king built the monastery, palace, &c., the *Ecclurial*, considered by the Spaniards the eighth wonder of the world; see *Escurial*. During the Franco-German war the army of the north, under Faidherbe, was defeated here by the Germans after seven hours' fighting, on 19 Jan. 1871; total loss about 15,000: the German loss about 3100.

QUERETARO (Mexico), was besieged and taken (through the treachery of Lopez) by the liberal general Escobedo, 15th May, 1867. The emperor Maximilian and his generals Miramon and Mejia, were taken prisoners, and, after trial were shot 19 June following.

QUERN or HANDMILL, is probably the implement spoken of in Isaiah xlvii. 2, about 712 B.C. So-called Roman querns have been found in York-shire.

QUESNOY (N. France), was taken by the Austrians, 11 Sept. 1793, but was recovered by the French, 16 Aug. 1794. It surrendered to prince Frederick of the Netherlands, 29 June, 1815, after the battle of Waterloo.—It was here that cannon were first used, and called *bombards*. *Hénaull*.

QUETTAH, see *Beloochistan*.

QUIBERON BAY (W. France). A British force landed here, Sept. 1746, but was repulsed. In the bay admiral Hawke gained a complete victory over the French admiral Conflans, and thus defeated the projected invasion of Great Britain, 20 Nov. 1759. Quiberon was taken by some French regiments in the pay of England, 3 July, 1795; but on 21 July, through treachery, the French republicans, under Hoche, retook it by surprise, and many emigrants were executed. About 900 of the troops, and nearly 1500 royalist inhabitants who had joined the republicans in the pay of Great Britain, effected their embarkation on board the ships.

QUICKSILVER, in its liquid state, *mercury*. Its use in refining silver was discovered, 1560. There are mines of it in various parts, the chief of which are at Almaden, in Spain, and at Idria, in Illyria; the latter, discovered by accident in 1497, for several years yielded 1500 tons. A mine was discovered at Ceylon in 1797; and at New Almaden and other places in California. Quicksilver was congelated in winter at St. Petersburg, in 1759. It was congelated in England by a chemical process, without snow or ice, by Mr. Walker, in 1787. Corrosive sublimate, a deadly poison, is a combination of mercury and chlorine; see *Calomel*.

QUICUNCQUE VULT, see *Athanasion Creed*.

QUIETISM, the doctrine of Miguel Molinos, a Spaniard (1627-96), whose work, the "Spiritual Guide," published in 1675, was the foundation of a sect in France. He held that religion consisted in an internal silent meditation on the merits of Christ and the mercies of God. Madame de la Mothe-Guyon, a quietist, was imprisoned in the Bastille for her visions and prophecies, but released through the interest of Fénelon, archbishop of Cambrai, between whom and Bossuet, bishop of Meaux, arose a controversy, 1697. Quietism was finally condemned by pope Innocent XII. in 1699.

QUILLS are said to have been first used for pens in 553; some say not before 635.

QUINCE, the *Pyrus Cydonia*, brought to this country from Austria, before 1573. The Japan quince, or *Pyrus Japonica*, brought hither from Japan, 1796.

QUINDECIMVIRI, fifteen men, chosen to keep the Sybilline books. The number, originally two (*duumviri*), about 520 B.C., was increased to ten in 365 B.C., and afterwards (probably by Sulla) to fifteen, about 82 B.C. Julius Cæsar added one; but the precedent was not followed.

QUININE or **QUINTA**, an alkaloid (much used in medicine), discovered in 1820 by Pelletier and Caventou. It is a probable constituent of all genuine cinchona barks, especially of the yellow bark; see *Jenista Bark*. Artificial quinine was prepared (synthetically) by Mr. W. J. Scott, in Oct. 1865.—**QUINOIDINE,** see *Fluorescence*. John Eliot Howard, promoter of the cultivation of cinchona in India, and author of "Quinologia" (1862) died 22 Nov. 1883.

QUINQUAGESIMA SUNDAY. The observation is said to have been appointed by Gregory the Great (pope, 590-604). The first Sunday in Lent having been termed *Quadragesima*, and the three weeks preceding having been appropriated to the gradual introduction of the Lent fast, the three Sundays of these weeks were called by names significant of their position in the calendar: and reckoning by decades (*tenth*), the Sunday preceding Quadragesima received its present name, *Quinquagesima*, the second *Sextagesima*, and the third *Septuagesima*.

QUINTILIANS, heretics in the 2nd century, the disciples of Montanus, who took their name from Quintilia, a lady whom he had deceived by his pretended sanctity, and whom they regarded as a prophetess. They made the eucharist of bread and cheese, and allowed women to be priests and bishops. *Pardon*.

QUIRINUS, a Sabine god, whose name was given to Romulus after his death. L. Papius Cursor, general in the Roman army, first erected a

sun-dial in the temple of Quirinus, from which time the days began to be divided into hours, 293 B C. *Apollonius*. The sun-dial was sometimes called the Quirinus, from the original place in which it was set up. *Ashe*. The Sabines who became Roman citizens were termed Quirites.

QUITO (capital of the republic of Ecuador), founded in 1534, was the scene of the measurement of a degree of the meridian, by the French and Spanish mathematicians, 1736-42. Forty thousand persons perished by an earthquake which almost overwhelmed the city of Quito, 4 Feb. 1797. Since then violent shocks, but not so disastrous, occurred, till one, on 22 March, 1859, when about 5000 persons were killed, see *Earthquakes and Ecuador*.

QUIXOTE, see *Don Quixote*.

QUITS, a game said to have originated with the Greeks, and to have been first played at the Olympic games, by the Idaeus Dictyn, fifty years after the deluge of Deucalion, 1453 B C. Perseus, the grandson of Acrisius, by Danae, having inadvertently slain his grandfather, when throwing a quoit, exchanged the kingdom of Argos, to which

he was heir, for that of Tirynthus, and founded the kingdom of Mycenae, about 1313 B C.

QUOTATIONS *Athenaeus's "Deipnosophistae" or Banquet of the Learned* (compiled about 228), and Burton's "Anatomy of Melancholy" (1621), contain masses of extracts. Henry Ainsworth's "Communion of Saints" (died 1622), is a mosaic of Scripture quotations.

QUO WARRANTO ACT, passed 1230. By it a writ may be directed to any person to inquire by what authority he holds any office or franchise. Charles II. directed a writ against the corporation of London in 1683, and the court of king's bench declared their charter forfeited. The decision was reversed in 1690. The proceedings have been regulated by various acts, 1710, 1792, 1837, 1843.

RABELAIS CLUB, to promote the study of Rabelais and the illustration of his works: lord Houghton, sir W. Frederick Pollock and his sons, Walter Besant, and others; first meeting, Dec. 1879.

Rabelais Gallery, Pall Mall East, opened to the press, 23 Oct.; at the instance of the National Vigilance Association, four pictures were seized as indecent by the police, 3 Nov.; Mr. J. F. Sutton and Mr. H. Scarborough the exhibitors, were prosecuted at Bow Street, 5 Nov.; committed for trial; 21 pictures ordered to be destroyed, 12 Nov.; Messrs. Sutton & Scarborough convicted, 18 Dec. 1890: fined 25s. each; the pictures ordered to be returned to France 18 April, 1891.

RABIES, see *Hydrophobia*.

RACES, one of the ancient games of Greece. Horse-races were known in England in very early times. Fitz-Stephen, in the days of Henry II., mentions the delight taken by the citizens of London in the diversion. In James I.'s reign Croydon in the south, and Garterly in the north, were celebrated courses. Near York there were races, and the prize was a little golden bell, 1607. *Camden*. In the end of Charles I.'s reign, races were performed at Hyde Park. Charles II. patronised them, and instead of bells, gave a silver bowl, or cup, value 100 guineas. William III. added to the plate (as did queen Anne), and founded an academy for riding.

The first racing calendar is said to have been published by John Harvey 1727

Act for suppressing races by points and weak horses, 12 Dec. 11 1739

The most eminent races in England are those at Newmarket (which was established by Charles II. 1667; and at Epsom, begun about 1721; by Mr Parkhurst (annual since 1730, *Allen's Survey*) [The earl of Derby began the Oaks, 1779, the Derby, 1780 (first won by Diomed)] see *Derby Day*

"Tattersall's," the "high change of horse flesh," was established by Richard Tattersall, near Hyde Park Corner (hence termed "the Corner") in 1766, for the sale of horses. The lease of the ground having expired, the new premises at Brompton were erected and opened for business, on 10 April, 1865

The Jockey Club, which now chiefly regulates races, and the betting connected with them, was founded in 1750. Its gradually accumulating rules were modified in 1828 and revised in 1857

Alterations recommended by a committee appointed in April; adopted by the club 26 July following 1870

Rules revised, Nov. 1876; reforms made 1880

RACE-HORSES.

Flying Childers, bred in 1715 by the duke of Devonshire, was allowed by 51 jockeys to have been the fastest horse that ever ran at Newmarket, on that was ever bred in the world; he ran four miles in six minutes and forty-eight seconds, or at the rate of 32½ miles an hour, carrying nine stone two pounds. He died in 1741, aged 26 years.

Edipus was the fastest horse that ran in England since the time of *Childers*; he was never beaten, and died in February, 1789, aged 25 years. His heart weighed 14 lb., which accounted for his wonderful spirit and courage. *Charlotte White's Hist. of the Turf*

On the accession of queen Victoria, the royal stud was sold for 16,476l. on 25 Oct. 1837

The *Countess de Grange's* stud (in consequence of the war) was sold for 23,730l. *Gladiator* (a foal of the stud) was sold for 100,005 guineas. *Bar Athol* (a foal of the stud) was sold for 100,005 guineas. *Bar Athol* (a foal of the stud) was sold for 100,005 guineas. 26 July, 1872

RACK, an engine of torture, for extracting a confession from criminals, mentioned by Demosthenes, *de Corona*, B.C. 330, and in later times an instrument of the Inquisition. Lord Coke states from tradition that the duke of Exeter, in the reign of Henry VI., erected a rack of torture (thence called the duke of Exeter's daughter, now seen in the Tower, 1447). In the case of Felton, who murdered the duke of Buckingham, the judges of England protested against the proposal of the privy council to put the assassin to the rack, as contrary to the laws, 1628; the use of the rack was abolished 1640. See *Ravallius* and *Torture*.

RADCLIFFE LIBRARY, OXFORD, founded under the will of Dr. John Radcliffe, an eminent physician. He died 10 Nov. 1714, leaving 40,000l. to the university of Oxford for the founding a library, the first stone of which was laid 17 May, 1737, and the edifice was opened 13 April, 1749.—The *RADCLIFFE OBSERVATORY*, Oxford, founded by the exertions of Dr. Hornsby, Savilian professor of astronomy, about 1771, was completed in 1794. The publication of the observations was commenced in 1824, by Mr. Manuel J. Johnson, the director, appointed in 1839.

RADIATION, see *Heat*.

RADICALS or "RADICAL REFORMERS,"

persons who professed to aim at procuring a thorough reformation in the government and policy of England, became prominent in 1816, when Hampden clubs were formed, of which Sir Francis Burdett, Lord Cochrane, Major Cartwright, and William Cobbett were prominent members. Samuel Bamford's "Life of a Radical," published in 1842, gives much information; he died 13 April, 1872. Many radicals were severely punished, 1817-20. Wm. Harrie's "History of the Radical Party," published early in 1885.—The "Radicals" in the United States were the party headed by Thaddeus Stevens, bitterly opposed to the policy of President Johnson, as too favourable to the subdued Southern States.

The *Radical Programme*, advocated by the Rt. Hon. Joseph Chamberlain, widely circulated, first appeared July, 1885, in the *Tenningly Review*; it included reform of the land laws, free education, increased local government, reform in taxation and finance, improvement of condition of agricultural labourers and of the poor, and religious equality and disestablishment of national churches. Which tended to disorganise the liberal party.

Mr. O. C. Grenville (*Journ.*), 28 Aug. 1837, describes "Tory Radicals." Some politicians were so termed in 1885.

The National Radical Union at its fourth anniversary at Birmingham, Mr. Chamberlain in the chair, changed its name to National Liberal Union. 24 April, 1889.

RADICLE, see *Compound*.

RADIOMETER. &c. (termed a *light-mill*), a little instrument constructed by Mr. Wm. Crookes, F.R.S., 1873-6. Two little disk arms, mounted on a pivot and placed in an exhausted glass-bulb, revolve when placed in bright light. The motion was attributed to heat-absorption, 1877; see *Light*.

Radiophone. By this apparatus Professor Bell, at Philadelphia, showed how a ray of strong light, acting on a selenium cell, conveyed sound 500 feet, Sept. 1884.

RADSTADT, Austria. Here Moreau and the French defeated the Austrians, 5 July, 1796.

RAFFAELLE WARE, see *Pottery*.

RAGGED SCHOOLS, free schools for outcast destitute ragged children, set up in large towns. The instruction is based on the scriptures, and most of the teachers are unpaid. John Pounds, a cobbler, of Portsmouth, who died in 1839, opened a school of this kind; and one was set up by Andrew Walker, in "Devil's Acre," Westminster, in 1839. *Knights*. They did not receive their name till 1844, when the "Ragged school union" was formed, principally by Mr. S. Starey and Mr. Wm. Locke (afterwards hon. secretary). The earl of Shaftesbury was chairman. In 1856 there were 150 Ragged school institutions. Sunday ragged schools reported in London in 1867, 226; in 1878, 177; day schools, in 1867, 204; in 1878, 58; week evening schools, in 1867, 207, in 1878, 147. Ragged school buildings were exempted from rates, 1869. The day schools are being gradually superseded by those established by the London school board; but the Sunday and night schools, mother's meetings, &c., are still maintained in very great efficiency (1886). The union has many affiliated institutions (1892). Dr. Guthrie, a founder of ragged schools in Edinburgh, &c., died 24 Feb. 1873. The earl of Shaftesbury presided at the 40th anniversary of the Ragged School Union, 12 May, 1884. See *Shoe-Black*.

RAGMAN ROLL (said to derive its name from Ragmunde, a papal legate in Scotland) con-

tains the records of the homage and fealty to Edward I., sworn to by the nobility and clergy of Scotland at Berwick in 1296. The original was given up to Robert Bruce, king of Scotland, in 1328, when his son David was contracted in marriage to the princess Joanna of England.

RAGUSA, a city on the Adriatic, on the south confines of Dalmatia, was taken by the Venetians, 1171, but became an independent republic, 1358. It suffered much by an earthquake, 1667; was taken by the French in 1806, and given up to Austria in 1814.

RAILWAY COMMISSIONERS; see *Railways*, 1873 and 1880.

RAILWAYS. Short roads, in and about Newcastle, laid down by Mr. Beaumont, so early as 1602, are thus mentioned in 1676.—"The manner of the carriage is by laying rails of timber from the colliery to the river, exactly straight and parallel; and bulky carts are made with four rollers fitting those rails, whereby the carriage is so easy that one horse will draw down four or five chaldron of coals, and is an immense benefit to the coal merchants." *Roger North*. They were made of iron at Whitehaven, in 1738. See *Gauges, Tramroads*. For electric railways see *Electricity*.

RALEIGH'S CONSPIRACY, termed the *Mass Plot* (which see)

RAMADAN, the Mahometan month of fasting, in 1889 began 2 May. It is followed by the festival of Bairam (which see)

RAMBOUILLET, a royal château, about 25 miles from Paris. Here Francis I died 31 March, 1547, and here Charles X abdicated, 2 Aug 1830. After being owned by the count of Thoulouse and the duc de Penthièvre, it was bought by Louis XVI 1778.

RAMILLIES (Belgium), the site of a brilliant victory gained by the English under the duke of Marlborough and the allies over the French commanded by the elector of Bavaria and the marshal de Villeroi, on Whitsunday, 23 May (O S 12), 1706. The French were soon seized with a panic, and a general rout ensued about 4000 of the allied army were slain in the engagement. This accelerated the fall of Louvain, Brussels, &c.

RAMSGATE, Kent, a fishing village in the 17th century, became important through commerce after 1689. The erection of the pier began in 1750. The harbour was formed by George Smeaton, 1780-95, and the lighthouse erected soon after. Population, 1881, 22,683. 1891, 24,676.

RANELAGH (near Chelsea), a public garden for concerts and dancing occupying the grounds of Ranelagh House (built by James earl of Ranelagh, about 1691), was opened with a breakfast, 5 April, 1742. The music for the orchestra was frequently composed by Dr Arne. The gardens were closed, and the buildings taken down, in 1804.

RANGES ACT 1891 See under *Commons*

RANGOON, maritime capital of the Burmese empire, built by Alompra, 1552, was taken by Sir A Campbell on 11 May, 1824. In Dec 1826, it was ceded to the Burmese on condition of the payment of a sum of money, the reception of a British resident at Ava and freedom of commerce. Oppression of the British merchants led to the second Burmese war, 1852. Rangoon was taken by storm by general Godwin, 14 April, and annexed to the British dominions in December. An English bishopric founded, 1877. Destructive fire for two days about 18 April 1884. Foundation stone of Cathedral laid by lord Dufferin, viceroy, 24 Feb 1886. Prince Albert Victor of Wales hospitably received, 20 Dec 1889. See *Burma*.

RANSOMER'S ARTIFICIAL STONE, the invention of Mr Fred Ransom, 1848, is made by dissolving common flint (silica) in heated caustic alkali adding fine sand. The mixture is pressed into moulds and heated to redness.

RANTERS, a sect which arose in 1645, similar to the Seekers now termed Quakers. The name is now applied to the Primitive Methodists, separated from the main body in 1810, see *Wesleyans*.

RAPE was punished with death by the Jews, Romans, and Goths, by mutilation and loss of eyes in William I's reign. This was mitigated by the statute of Westminster I, 3 Edw I 1274. Made felony by stat Westminster 2 12 Edw III 1338, and without benefit of clergy. 18 Eliz 1575. Rape made punishable by transportation in 1841, by penal servitude for life, or a less period, 1861.

RAPHIA, a port of Palestine. Here Antiochus III of Syria was defeated by Ptolemy Philopater, king of Egypt 217 B C.

RAPHOE, a bishopric in N Ireland. St Columb-kille, a man of great virtue and learning, and of royal blood, founded a monastery in this place, and it was afterwards enlarged by other holy men. But it is the received opinion that St Eunan erected the church into a cathedral and was the first bishop of the see in the 8th century. Raphoe was united to the bishopric of Derry by act, 3 & 4 Will IV 1833, see *Bishops*.

RAPPAHANNOCK, see *Chancellorsville*, and *Tricks*, 1865

RASPBERRY, not named among the fruits early introduced into this country from the continent. The Virginian raspberry (*Rubus occidentalis*) before 1696, and the flowering raspberry (*Rubus odoratus*), about 1700, came from North America.

RASTADT, Baden. Here the preliminaries of a peace were signed, 6 March, 1714, by marshal Villars on the part of the French king, and by prince Eugene on the part of the emperor, the German frontier was restored to the terms of the peace of Ryswick.—The Congress of RASTADT, to treat of a general peace with the German powers, was commenced 9 Dec 1797, and negotiations were carried on throughout 1798. The atrocious massacre of the French plenipotentiaries at Rastadt by the Austrian regiment of Szeitzler took place 28 April, 1799.

RATCLIFFE HIGHWAY (now St George's street), East London. A man a shopkeeper here with his wife child, and boy, were brutally murdered in a few minutes, 7 Dec 1811. RATISBON (in Bavaria) was made a free imperial city about 1200. Several diets have been held here. A peace was concluded here between France and the emperor of Germany, by which was terminated the war for the Maxian succession, signed 13 Oct 1630. In later times, it was at Ratisbon, in a diet held there, that the German princes elected from the German empire, and placed themselves under the protection of the emperor Napoleon I of France, 1 Aug 1806. Ratisbon was made an archbishopric in 1806, secularized in 1810, was added to Bavaria in 1815, became again an archbishopric in 1817. Population 1890, 37,567.

RATTENING (from *ratten*, provincial for rat), the removing and hiding workmen's tools as a punishment for nonpayment to trades unions, or opposition to them. Much "rattening" was disclosed at the commission of inquiry at Sheffield in June 1867, and at Manchester Sept following, see *Sheffield*.

RAVENNA (on the Adriatic), a city of the Papal states, founded by Greek colonists, fell under the Roman power about 234 B.C. It was favoured and embellished by the emperors, and Honorius made it the capital of the Empire of the West about A.D. 404. In 568 it became the capital of an exarchate. It was subdued by the Lombards in 752, and their king, Astolphus, in 754 surrendered it to Pepin, king of France, who gave it to the pope Stephen, and thus laid the foundation of the temporal power of the holy see. On the 11th of April, 1512, a battle was fought between the French, under Gaston de Foix (duke of Nemours and nephew of Louis XII), and the Spanish and Papal armies. De Foix perished in the moment of his victory and his death closed the good fortune of the French in Italy. Ravenna became part of the kingdom of Italy in 1860.

REAPING-MACHINES. One was invented in this country early in the present century, but failed from its immaturity. At the meeting of the British Association at Dundee Sept 1867, the Rev Patrick Bell stated that he invented a reaping-machine in 1826, which was used in 1827, the principle being that on which the best American machines are now constructed. On 15 Jan 1868, he was presented with a valuable testimonial, and 1000*l* in money. McCormick's American machine was invented about 1831, and perfected in 1846, he received a gold medal from the jurors of the Exhibition of 1851, and also at the Royal Agricultural Society's competition at Bristol, 6 Aug 1878. The sheaves are bound by these reaping machines. About 200 patented, few good. Humber's machine, also American, exhibited in 1851, was highly commended.

John Radley, the inventor of the reaping machine largely used in Australia died 28 Nov 1857.

REGISTERS The registering of deeds and conveyances disposing of real estates was appointed to be effected in Yorkshire and in Middlesex, Anne, 1703, *et seq*. Greater security was thus given to purchasers and mortgagees, and the value of estates increased in those counties. Wills have been for a series of years kept and registered, in London, at Doctors' Commons, see *Wills*. The registering of shipping in the Thames was commenced, 1786 and throughout England, 1787, and several acts and amendments of acts have since followed for keeping and improving registers. The duties and payments of the Lord Clerk Register of Scotland and his deputy were regulated by 42 & 43 Vict c 44 1879

REGISTERS, PAPOOHILI, were established by Cromwell, lord Essex, by which the dates of births, marriages, and burials, became ascertainable, Sept 1538. This measure was opposed by the people, who feared some new taxation. A stamp-tax was laid on registers in 1784. Laws for better better regulation were enacted in 1813 *et seq*. The great Registration act (introduced by lord John Russell), 6 & 7 Will IV c 86, passed 17 Aug 1836, see *Bills of Mortality*, &c.

A new registration act for births and deaths passed 7 Aug 1874, came into operation 1 Jan 1875

Births and Deaths Registration act for Ireland passed 2 Aug 1880
 Major George Graham, the first registrar general (1838) was succeeded by Sir Bridges Powell Heneker appointed Jan

REGISTRATION OF VOTERS was enacted by the Reform act, passed 7 June, 1832, and by acts passed in 1868 and 1885, see *Revising Barristers*

New Parliamentary and Municipal Registration act passed 20 July, 1878

REGIM DONUM (Royal gift), an allowance from the sovereign for the maintenance of the Presbyterian ministers in Ireland, commenced by Charles II in 1672 and revived by William III in 1690, was commuted by the Irish Presbyterian Church act passed June, 1871. The allowance to certain protestant dissenting ministers in Ireland was given up by them in 1857, in deference to the wishes of English dissenters.

REICHENBACH (Prussia). Here Duros was killed during the conflicts between the French and the allies 22 May, 1813, see *Battle of Reichenbach*. Here was signed a subsidy treaty between Russia, Prussia, and England, whereby the last engaged to provide means for carrying on the war against Napoleon I on certain conditions, 14 15 June, 1813. Austria joined the alliance soon after.

REICHSRATH, the representative council of the empire of Austria, constituted by decree 5 March, met on 31 May, 1860. In May, 1861, the upper house consisted of 17 spiritual, 55 hereditary, and 39 peers. The lower house consisted of 136 elected deputies. No representatives came from Hungary, Transylvania, Venetia, the Banat, Slavonia, Croatia, and Istria. The Reichsrath was abolished by a rescript, 21 Sept 1865, with the view of restoring autonomy to Hungary and other provinces. It again met 20 May, 1867. The Reichstag of Germany, the imperial parliament or diet, first met at Berlin, 21 Mar 1871.

REIGATE (Surrey), sent two members to parliament in the reign of Edward I, lost one by the Reform Act of 1832, and was wholly disfranchised for corruption by that of 1867. Population, 1881, 18,662, 1891, 22,546.

REIGN OF TERROR Maximilien Robespierre headed the populace in the Champ de Mars, in Paris, demanding the dethronement of the king, 17 July, 1791. He was triumphant in 1793, and numbers of innocent men and citizens were sacrificed during his sanguinary administration. Billard Varennes denounced the tyranny of Robespierre in the tribune, 27 July, 1794. The next day he suffered death, with many of his companions, see *France*. This has been termed the *Red Terror*. The reaction after the restoration of the Bourbons, 1815, disgraced by many atrocious acts of wanton cruelty, has been termed the *White Terror*. The Jesuits were then conspicuous in the destruction of their adversaries.

REIGNS OF SOVEREIGNS The average duration, according to Newton, is 19 years each, according to Hales 22½ years, that of the sovereigns of England being 23½ years, and that of the popes, 7½ years. Pius IX was the first pope who reigned above 25 years, 1846-76.

RELICS, the trade in these became general in the 7th century, fragments of bones, &c., being brought from Jerusalem. The sale of relics was prohibited by pope Innocent III 1198, without effect.

RELIEF CHURCH, a secession from the church of Scotland, founded by Thomas Gillespie, who was deposed from his ministry for opposing the doctrine of passive obedience to the law of the church of Scotland respecting the settlement of ministers, 23 May, 1752. The church was constituted as the "presbytery of relief," 22 Oct 1761. The Relief and Secession churches were united as the United Presbyterian Church, 13 May, 1847.

RELIEF OF DISTRESS (IRELAND) ACT, 43 & 44 Vict c 14 passed 2 Aug 1880 *see Ireland, Dec 1890*

RELIGION (from *religio*, I bind again, in the sense of a vow or oath) comprehends a belief in the being and perfections of God, and obedience to his commandments. The Jewish religion is set forth in the Old, and the Christian religion in the New, Testament. Departure from these scriptures has been the origin of all corrupt forms of religion, as foretold in them. Buddhism differs from this. *See Mahometanism*, and other religions and sects under their names. The population of the globe with reference to religious worship, is given by Balbi (who assumed the total population to be 1,050,000,000), and Dietsch (who assumed it to be 1,288,000,000), as follows:

	P R (1836)	Dietsch (1836)
Jews	4,500,000	5,000,000
Christians	22,000,000	23,000,000
Roman Catholics	16,000,000	17,000,000
Mahometans	15,000,000	16,000,000
Idolaters &c not professing the Jewish Christian or Mahometan worship	66,000,000	800,000,000
Estimate in 1856	1,375,000,000	
Roman Catholics		19,450,000
Protestants		100,000,000

REMONSTRANCE, THE GRAND, drawn up by the house of commons, and presented to king Charles I., 1 Dec 1641. It consisted of 206 articles, dwelt bitterly on all the king's illegal and oppressive acts, and was printed by order of the house.

REMONSTRANTS, *see Arguments*

RENAISSANCE, a term applied to the revival of the classic style of art in the 15th and 16th centuries, under the patronage of the Medici and

RENSBURG (Holstein), was taken by the imperialists in 1627, by the Swedes in 1643, and by the Prussians and confederate troops in 1848. The first diet of Schleswig and Holstein met here 3 April, 1848. It was re-occupied by the Danes in 1852 and taken by the Prussians after a serious conflict, 21 July, 1864.

RENNES (capital of Brittany, N W France) Here was established by Henry II., in 1553, the parliament so celebrated for its independence, especially in its struggle with the court, 1788-89. On 20 May, 1788, it declared infamous every one who should take part in the *cour plénière* then proposed, but afterwards suppressed.

RENTS said to have been first made payable in money, instead of in kind, about 1135. Numerous statutes have been enacted in various reigns to define the relations and regulate the dealings between landlord and tenant. 8 & 9 Vict c 106 (1845) regulates leases. By the act 8 Anne, 1709, no goods are removable from tenements under an execution until the rent shall have been paid to the landlord by the sheriff, 1709. The rental of England, including land, houses, and mines, was 6,000,000 about the year 1600, and twelve years' purchase the value of land. About 1690, the rental amounted to 14,000,000, and the land was worth eighteen years' purchase. *Dissemination of the Estates*. The rental of the United Kingdom has been estimated in the present century at 127,000,000, Great anti-rent agitation in Ireland, 1879, *et seq*, *see Land and Ireland, &c*

REPEAL OF THE UNION, IRELAND An Irish association was formed with this object under the auspices of Mr O'Connell, in 1829. *See Home Rule and Ireland*

A proclamation of the lord lieutenant prohibited the meetings of a society, organized for the purpose of procuring a repeal of the union under the name of the Irish Society for Legal and Legislative Relief or the Anti Union Society. 18 Oct 1820.

The commons by a majority of 484 rejected Mr O'Connell's motion for repeal. 7 April 1824.

A new association in 1841 1842 and 1843 became more violent. Assemblies of the lower classes of the people were held in the last named year in various parts of the land some of them amounting to 150,000 persons and called 'monster meetings'.

A great meeting at Trim, 16 March other meetings were held at Mullingar, Cork, and Longford, in 1841 and 1842 respectively. At Drogheda, Kilkenny, Mullingar, and Dundalk on 5 & 6, 1842, and 29 June at Donnybrook and Ballynascree, and 20 July at Tara 25 Aug at Loughrea, Clifton, and Lamoine, 10, 17 and 24 Sept., and at Mullaghmaske. 7 Oct 1843.

A meeting to be held at Clontarf, on 8 Oct was prevented by government and Mr O'Connell and his chief associates were brought to trial for political conspiracy 15 Jan 1844 and convicted 16 Feb but the sentence was reversed by the house of lords 4 Sept., *see Trials*.

The association for the repeal of the union continued for some time under the direction of Mr John O'Connell but was little regarded. The total "repeal rent" is said to have amounted to 134,379.

A fruitless attempt was made in Dublin to revive repeal agitation. 4 Dec, 1860.

REPLENISHES, *see Replenish (Provisional)*

REPORTING The publication of the debate in parliament is forbidden as a breach of privilege but was virtually conceded, after a severe struggle,

in 1771 * Reporters' galleries were erected in the house of parliament after the fire of 1834. To the unfettered liberty of reporting we doubtless owe much of our freedom and good government, see under *Law*. By the verdict for the defendant in the case of *Wason & The Times* (for libel) reports of parliamentary debates were decided to be privileged, Nov 1868. For the attempted exclusion of reporters, see *Parliament*, 1875. A commons committee on reporting recommended continuance of Hansard's debates with improvement, May, 1879.

The publication of Hansard's parliamentary debates began 1862 and closed in 1888. The publication of the debates was taken up by Messrs. Macmillan & Co Feb 1889 and continued by the Hansard Publishing Union limited 1889, the Union ordered to be wound up 23 May 1890.

Mr Thomas Curson Hansard formerly editor of the 'debates' aged 78 dies 12 Nov 1891. Government contract with him as a Telegram company for printing and publishing, 100 nite of parliamentary debates, £60, 21 Dec 1891, published 26 Feb 1892.

REPRESENTATION OF THE PEOPLE ACT FOR ENGLAND, passed 15 Aug 1867, for Ireland and Scotland, 13 July, 1868, a new act passed, 6 Dec 1884. See *Reform*.

The *Representative* a daily Tory paper, was started by Mr John Murray the bookseller 1101, position in the Times in 1886. Although he was assisted by Mr Benjamin Disraeli and other eminent persons, the project was unsuccessful, the first number appeared 2 Jan, the last 29 July 1887.

"**REPTILE BUREAUCRACY**," term applied in Germany to certain journalists writing for government pay, 1871, &c &c.

REPUBLICANS, see *Democrats*. The name adopted by the Northern party in the United States, N A, opposed to the democrats in the South. Sir Charles Dilke, M P professed himself a republican at public meetings and was much applauded, Nov 1871, but at some places he appeared to be notorious proceedings. His motion for returns respecting the expenditure of the civil list by the queen was negatived in the house of commons (2-276), 19 March, 1872. A national republican conference of delegates was held at Sheffield, 1 Dec 1872, when a national flag was adopted.

REQUIEM, a solemn mass, sung for the dead, so called from the introit "Requiem Aeternam," &c. Palestrina's Requiem was printed at Rome, 1591, Vittoria's at Madrid, 1605, Mozart's last work was a requiem, 1791.

RESEDOS, the screen or decorated portion of the wall behind the altar in a church.

A highly sculptured screen designed by Sir G G Scott, was erected in Læter cathedral, by subscription 1873.

Very inaccurate reports of parliamentary debates were inserted in the *Grand mass Mercury* and other periodicals in the middle of the last century. Miller, printer of the *London Evening Mail*, was arrested in the city of London, by order of the house of commons, for publishing the debates but was discharged by the lord mayor, who for doing this was sent to the Tower where he remained until the end of the session. No opposition was made to the publication of the debates in the next session 1777.

Prebendary Philpotts, the chancellor, and others who objected brought their objections before the bishop's visitation court on 7 Jan, it was decided that the bishop had jurisdiction in the matter, and he ordered the articles to be removed, 13 April 1874. Dean Boyd appealed to the court of arches, and Sir R Phillimore reversed the previous decision 6 Aug 1874.

Prebendary Philpotts appealed to the judicial committee of the privy council who decided that the articles should remain 24 Feb 1875. The manuscript service set up in St Paul's cathedral, London was protested against as idolatrous by some of the London clergy April, 1888. An action against the dean having been stopped by the bishop, the queen's bench division ordered the bishop to withdraw his veto upon the prosecution 1 June, 1888. After further litigation in the house of lords sustained the bishop's veto 20 July 1892.

RESERVE FORCES. In the summer of 1859, acts were passed to provide for the establishment of a military reserve force of men who have been in her majesty's service (not to exceed 20,000), and a volunteer reserve force of seamen not to exceed 30,000. These acts were consolidated and amended in 1867 and 1882. The reserve forces called out by proclamation, on account of possible war with Russia, 2 April, 1878. About 35,000 good soldiers appeared, and were commended. They were disbanded 31 Aug 1878. Again called out on account of war in Egypt, 25 July, 1882, and prospect of war with Russia, 27 March, 1883. Average of army reserve 1888, 55,068; 1890, 56,082.

RESOLUTE, ship, see *Franklin Search*, 1854.

RESONATOR, a small apparatus, placed in the mouth to strengthen and increase the volume of the voice in singing, invented by signor Alberto Bach, who exhibited its effects at the Royal Academy of Music, 29 June, 1880.

RESPIRATORS, see *Charcoal* and *Fireman*.

RESTITUTION BILL, of Mr Jesse Collins, proposes the surrender of lands illegally taken from commons, to be given to small cultivators, to become peasant proprietors, Jan 1885.

RESTORATION, THE, of King Charles II. to the crown of England, after an interregnum of eleven years and four months, between 30 Jan 1649, when Charles I was beheaded, and 29 May, 1660, when Charles II entered London amidst the acclamations of the people. The annual form of prayer, with thanksgiving, then appointed was ordered to be disused by 22 Oct (2, 25 March, 1849 see *France*, 1814, 1815).

RETREAT OF THE TEN THOUSAND GREEKS, who had joined the army of the younger Cyrus in his revolt against his brother, Artaxerxes Mnemon. The Greeks were victors, but Cyrus was defeated and slain at the battle of Cunaxa, 401 B C. Artaxerxes having enticed the Greek leaders into his power and killed them, Xenophon was called to the command of his countrymen. Under continual alarms from sudden attacks, he led them across rapid rivers, through vast deserts, over the tops of mountains, till he reached the sea. The Greeks returned home after a march of 1155 parasangs or leagues (3465 miles), which was performed in 215 days, after the absence of fifteen months. This retreat has been immortalized by the account given by its conductor, in his "Anabasis Cyni" (Expedition of Cyrus).

REUSS-GREIZ AND REUSS-SCHLEIZ, two principalities in central Germany, with a united population of 166,502 in 1885, in 1890, 184,565. The reigning family sprang from Ekbert, count of Osterode, in the 10th century. The princely dignity was conferred by the emperor Sigismund in 1426.

1859 Henry LXII prince of Reuss Greiz 8 Nov born 28 March 1846.

REVELATION, see *Apocalypse*.

REVENUE AND EXPENDITURE OF KING LAND. The revenue collected for the civil list, and for all the other charges of government, as well ordinary as extraordinary, was 1,200,000^l per annum, in 1660, the first after the restoration of Charles II. In 1690 it was raised to 6,000,000^l, every branch of the revenue being anticipated, thus was the origin of the funds and the national debt, 2 William and Mary *Salmon*. The revenue laws were amended in 1801. Previously to 1834 there had been an average surplus of 2,500,000^l since 1840. In consequence of the Russian war the deficiency in 1854 was 3,209,039^l, in 1855, 21,141,183^l, in 1856, 10,104,412^l. In 1857 there was a surplus of 36,097^l, in 1858, of 12,705,71^l, in 1859, a deficiency of 2,019,541^l.

* Revenue in relation to army, navy, and India.

The weekly *Illustration* of the public revenue and expenditure was begun by Mr Robert Lowe the Chancellor of the Exchequer 16 Feb 1870. By an act passed 2 July 1868 revenue officers are permitted to vote for the election of members of parliament. Above 200 statutes relating to inland revenue fell into disuse 13 Jan 1871. The revenue from livings, tithes, and national debt act 1874 1875 1876 1877 1878 1879 1880 1881 1882 1883 1884.

REVEREND, an honorary appellation given to the clergy, since the middle of the 17th century. In *Tamworth* parish register the minister is first styled reverend. In 1657 occasionally after wards but regularly so after 1727. It first appears in the registry of All Hallows Barking 1732. The prefix on a family tombstone was refused to Mr Keet a Wesleyan preacher by the bishop of Lincoln but given by the Archbishop of Canterbury 1874. On trial Mr Walter G F Philmore the Chancellor of Lincoln decided against Mr Keet who gave notice of appeal, 3 June 1875. Mr R. Philmore gave a similar decision in the court of arches 31 July 1875. On appeal to the privy council the decision was reversed. It was decided that there is no law or usage restricting the right of ministers of the Church of England, it is merely laudatory. 21 Jan 1876.

REVIEWS. The *Journal des Savants*, published 5 Jan 1666, by Denis de Salo, under the name of H. Hedouville, was the parent of critical names. It was soon imitated throughout Europe, journals, itself translated into various languages. It was published George III spoke of this publication still published Johnson, in the private interview with cation to Lyrae honoured by his majesty, in the which he was queen's house, in Feb 1767. *Boswell*. among the results of the *Revolution* of 1789 in Great Britain were the toleration act, the establishment of the presbyterianism of Scotland, the power of granting supplies limited to the house of commons, the purification of the administration of justice, and unlicensed printing.

REVOLVERS, see *Pistols*

REVUE DES DEUX MONDES, the French literary and historical periodical published on the 1st and 15th of each month, first appeared in 1831. It includes among its contributors the most eminent writers in France

REYNARD THE FOX, "REINEKE FUCHS," a satirical epic in low German, in which beasts are actors and speakers, was first printed as *Reinke Vos*, at Lubbeck in 1498, and professes to be written by Hinrick van Alkmar. It has been frequently translated. Goethe's version in High (or literary) German in hexameters appeared in 1794. Jacob Grimm has shown that the subject-matter of this "Fabel" or "beast-fable" is very ancient, many incidents being found in Pilgray and other oriental writers. The early French had a "Roman de Renart," and "Renart le Nouvel." A poem, entitled "der Rinehart," in Flemish, was known in the 11th century, Catton's translation in English prose was printed 1481, a poetic English translation of Goethe's version, by T J Arnold, appeared in 1855

REZONVILLE, BATTLE OF, 18 Aug. 1870, see *Metz*

RHÆTIA (or RETIA), an ancient Alpine country, comprising the modern Grisons, Tyrol, and part of Lombardy, inhabited by a wild rapacious people, after a long struggle was conquered by Diomedes and Rhemus, B C 15

RHE, ISLE OF, see *Ré and Rochelle*

RHEA, see *China Grass*

RHEGIUM (now Reggio), S Italy, a Greek colony, flourishing in the 5th century, B C. It was held by the Campanian legion, 281-271, afterwards severely punished for its rebellion. Reggio was taken by Garibaldi, Aug 1860

RHEIMS (N France). The principal church here, built before 400, rebuilt in the 12th century, is now very beautiful. The corpse of St Remi, the archbishop, is preserved behind the high altar, in a magnificent shrine. The kings of France were crowned at Rheims, probably because Clovis, the founder of the French monarchy, when converted from paganism, was baptized in the cathedral in 496. Several ecclesiastical councils have been held here. The city was taken and retaken several times in the last months of the French war, 1814. University founded by cardinal Lorraine, 1547, suppressed about 1790. Strike of the workmen of Mr Jonathan Holden, mill owner, a great benefactor to the town, May, 1890. Population, 1891, 104,186.

RHEOMETER, see under *Electricity*.

RHETORIC. Rhetorical points and accents were invented by Aristophanes of Byzantium, 200 B C. Rhetoric was first taught in Latin at Rome by Pholus Gallus, about 87 B C. He taught Cicero, who said "We are first to consider what is to be

said, secondly, how, thirdly, in what words, and lastly, how it is to be ornamented." A regius professor of rhetoric was appointed in Edinburgh, 20 April, 1762, when Dr Blair became first professor.

RHINE (Latin, *Rhenus*, German, *Rhein*, French, *Rhin*), a river, about 760 miles long, rising in Switzerland, receiving the Moselle, Main, Meuse, Neckar, and other rivers, terminating in many arms in Holland, and falling into the German ocean. On its banks are Constance, Basel, Strasbourg, Spire, Mannheim, Cologne, Düsseldorf, Utrecht, and Leyden. The possession of the banks of the Rhine has been the cause of many wars, and it has been crossed by the French about twenty times in a century. In the beginning of the revolutionary war, Custine invaded Germany by crossing it in 1792, and at the close of the war in 1815, France retained the left bank, but lost it at the close of the Franco-Prussian war, 1870-1 (see). A navigation treaty with other powers was signed by France 17 Oct 1868. A central committee for the navigation exists, formed by members of Alsace, Lorraine, Baden, Bavaria, Hesse, Holland, and Prussia. Very great damage (about 4,000,000) and loss of life caused by the rising of the river through excessive rain end of November and December, 1882, relieved by government grants.

Becker a German song. They shall not have it free German Rhine and lifted to Muscovy right in French. We have had it your German Rhine appeared in 1817. The French conqueror a throb of The Watch on the Rhine died 1837. All were peculiar during the war 1871.

RHODE ISLAND (N America), settled by Roger Williams about 1636, was taken in the war of independence by the British, 8 Dec 1776, but was evacuated by them, 25 Oct 1779. Capital, Providence. Population in 1880, 276,531; 1890, 345,500; see *United States*.

RHODES, an island on the coast of Asia Minor, is said to have been peopled from Cretæ, as early as 916 B.C. The Rhodians were great navigators, and institutors of a maritime code afterwards adopted by the Romans. The city was built about 408 and flourished 300-200 B.C., see *Colossus Rhodes*, long an ally of the Romans, was taken by the emperor Vespasian, A.D. 71. It was held by the Knights Hospitallers from 1309 to 1522 when it was conquered by the Turks, who still retain it. The knights returned to Malta (see) Rhodes suffered severely by an earthquake on 22 April 1863.

RHODIUM, a rare metal, discovered in platinum ore, by Dr Wollaston in 1804. It has been used for the points of metallic pens.

RHODOPE MOUNTAINS (Turkish, *Dzopot Daghi*), a plateau in Roumelia.

In these about 150,000 Mahomedans took refuge during the Russo-Turkish war on the approach of the Russians in Dec 1877 and Jan 1878 and resisted the invaders. The Russians were accused of killing and outraging thousands of men, women, and children. A European commission of inquiry, met in July closed, 26 Aug., confirmed the statements, but issued no united report, some members seceded. 1878

The insurgents asserted that they were not resisting the sultan himself, but male administration. They are governed by an English chief (Col St Clair, who receives the taxes &c and is styled commander in chief of the national army of the Rhodope. Sept

RICHMOND (Sussex) anciently called Shene, which in the Saxon tongue signifies *excellent*. Here stood a palace in which Edward I and II resided, and Edward III died, 1377. Here also died Anne, queen of Richard II, 1394. The palace was repaired by Henry V, who founded three religious houses near it. In 1497 it was destroyed by fire, but Henry VII rebuilt it, and commanded that the village should be called Richmond (Yorkshire) before he obtained the crown and here he died in 1509. Queen Elizabeth was a prisoner in this palace for a short time during the reign of her sister. When she became queen it was one of her favourite places of residence and here she died 24 March 1603. It was afterwards the residence of Henry prince of Wales. The beautiful park and gardens were enclosed by Charles I. The observatory was built by Sir W. Chambers in 1769. In Richmond, Johnson "*sang the Seasons and their change*," and died 27 Aug 1748.

The hotel and Garter tavern burnt, W. Lever the manager destroyed. 19 Jan 1870. Mrs Julia Martha Thomas was murdered at Richmond here she was put in bags and cast into the Thames, by a thermite Webster aged 30 about 2 March. John Church a publican in street 1 on suspicion discharged 17 April, Webster committed for trial 16 May, convicted, 8 July, condemned executed at Wandsworth. 29 July 1879. RIFLE CORPS, see *Totensteers*, and *Fire-arms*. *Rifle Brigade* formed, 1800. International rifle meeting, Washington, began, 26 Sept. 1876. Another at Creedmoor, near New York, began 14 Sept.; the British victors, 1882. For *Rifle Ranges*, see *Commons*.

RIGHTS, BILL OF. To the PETITION OF RICHIE, preferred 17 March, 1627-8, Charles I. answered, "I will that right be done according to the laws and customs of the realm." Both houses addressed the king for a fuller answer to their petition of rights, whereupon he gave them an answer less evasive, "*Sed dicit fastidisse ut est desiderat*," 7 June, 1628. The petition thus became a statute 13 Car. I. c. 1. An important declaration was made by the lords and commons of England to the prince and princess of Orange on 13 Feb 1689, in an act "declaring the rights and liberties of the subject, and settling the succession of the crown." The Bill of Rights, virtually the same as the Declaration, was passed by parliament. It totally abolished the dispensing power of the crown, Oct. 1689. See *Claim of Right*.

RIMNIK (near Martinești, Wallachia). Here the Austrians and Russians under prince Coburg and gen. Suwarow, gained a great victory over the Turks, 22 Sept. 1789.

RINDERPEST, German for cattle plague (which see).

RING DES NIBELUNGEN, see *Nibelungen* *Nibel*.

RINGS anciently had a seal or signet engraved on them, to seal writings, and they are so used to this day. In *Genesis* xl. 42, it is said that Pharaoh gave Joseph his ring. Rings are now put upon women's fourth finger at marriage: but the Jews used them at the espousal or contract before marriage. Wedding-rings are to be of standard gold by statute, 1855.

RINK (from the Gaelic *ring*, or Saxon *hrinc*, a course), a term used in the Scotch game, "curling." The Belgrave skating rink, London, S.W., was opened to the public 2 Aug 1875. Others were at Brighton and other places. Skates with rollers (said to have been introduced in a scene of Meyerbeer's "Prophète," at Paris, 16 April, 1849), are used. Mr Plimpton, an American, patented roller-skates in 1845; his right was affirmed on a trial for infringement. 28 Jan 1876 See *Glossary*.

RITUALISTS, a name given in 1866 to a party in the church of England, formerly named Puseyites, for endeavours, to give a more imposing character to public worship, by the use of coloured vestments, lighted candles, incense, &c., professing to go back to the practices of the church in the time of Edward VI. An exhibition of these things was held during the church congress at York in Oct 1866, but was not officially connected with it. The practices of the ritualists (said by Mr Dismal to be symbolical of doctrines they were bound to renounce), were censured in several episcopal charges in Dec 1866, in two reports of the ritualist commission, 19 Aug 1867, and April, 1868, and by the judicial committee of the privy council on appeal, 23 Dec 1868. See *Church of England* and *Praxis*, 1867-9. At a general convocation of the Anglican episcopal church at Philadelphia, 27, 28 Oct 1868 after a warm discussion on ritualism, the discussion was adjourned. It was renewed at the convocation for Oct 1874, and the ritualists were decisively beaten by the evangelical party. A stringent canon on ceremonies being passed 27 Oct. The Public Worship Regulation Act was passed 7 Aug 1874 for the repression of ritualism in England. See *Little's Worship*.

RIVERS COMMISSIONS, first appointed 1865, Messrs R Rawlinson, J I Harrison, and Professor W W, second, 1888, Sir Wm Denison, Mr J Chalmers Morton, and Professor Linnik and published six Reports. 1874

RIVOLI (near Verona, N Italy). Napoleon here the Austrians defeated the French, 17 Nov 1796, and was defeated by Bonaparte 14, 15 Jun 1797. Massena was made duke of Rivoli for his share in the actions.

ROAD CLUB, established in the autumn of 1874 in London, by gentlemen interested in the revival of coaching.

ROAD MURDER. On the night of 29-30 June, 1860, Francis Davile Kent, four years old, was murdered, and his body laid in a garden water-closet at home. His sister Constance Kent (aged sixteen), and the nurse Elizabeth Gough (the first suspected), were discharged for want of evidence. The coroner was severely blamed for charging the jury improperly, but the court of queen's bench, in Jan 1861, refused to issue a writ for a new inquiry. Constance Kent, on 25 April, 1865, before Sir Thomas Henry at Bow street and at her trial at Old Bailey, on 21 July following, confessed herself to be guilty of the murder. Her punishment was commuted to penal servitude for life. Let out on ticket-of-leave, 18 July, 1885. Road near Krome Somerset.

ROADS, see *Roman Roads*. The first general

repan of the highways of this country was directed about 1285. Acts were passed for the purpose in 1524 and 1555, followed by others in Elizabeth's and succeeding reigns. Roads through the Highlands of Scotland were begun by General Wade in 1726. London & Adams's roads were introduced about 1818. Wooden pavements were tried with partial success in the streets of London at Whitehill in 1839, and in other streets in 1840, asphalt pavement soon after. An Act for the better management of the highways was passed in 1862 after much opposition, and then, 16 Aug 1878, also regulated the use of locomotives on roads. Steam road-rollers were tried in 1867 used in London 18 March, 1868. See *Macadamizing*, *Tolls*, and *Wooden Pavements*.

ROAD STEAMERS. Mr R W Thomson, of Edinburgh, in 1868, by adding india rubber to the tires of the wheels of locomotives is considered to have solved the question of steam traction on common roads. Road steamers have been successfully employed in Edinburgh and Leith for drawing heavy waggons up inclined planes, and are adaptable to any draught work. They were tried at Woolwich, 1 Oct 1870, and reported successful by eminent authorities, and their application to ploughing, by Lord Drumore was exhibited 1 Feb 1871.

ROANOAKE, an island off Carolina, U.S., discovered by Sir Walter Raleigh 1584, and settled by him, 1585, without success. Other settlers also failed.

ROASTING ALIVE. An early instance is that of Boetioria, king of Egypt, by order of Sabion of Ethiopia, 737 A.D. *Langlet*. Sir John Oldcastle, Lord Cobham was burnt to death in 1418, and Michael Servetus for heresy, at Geneva, 27 Oct 1553, see *Burning Alive* and *Deaths*.

ROBBERS were punished with death by Edmund I a law which directed that the eldest of robbers should be hanged. Remarkable robbers in England were Robin Hood, 1189 (see *Robin Hood*), and Claud Du Val, executed at Tyburn, 1718. An historian quaintly, "to the great grief of the women," Jan 1670. In Ireland, the famous MacCabe was hanged at Newgate 19 Aug 1691. Galloping Hogan, the ruffian, hanged at this period. Freney, the celebrated highwayman, surrendered himself 10 May 1749. He accomplished Barrington was transported, 22 Sept 1790. See *Trails*.

ROBIN HOOD, captain of a band of robbers, in Sherwood forest Nottinghamshire, traditionally reported to have been the cul of Huntingdon, disgraced and banished the count by Richard I at his accession (1189). Robin Hood and Little John and their band are said to have continued their depredations till 1247, when Robin had Sir Lord Pennington's dam, 'The Foresters, Robin Hood and Maid Marian first presented at New York on account of the American copyright law, end of March, 1892.

"ROBINSON CRUSOE" by Daniel De Foe, the first part appeared in 1719. See *John Fernandez*. Three old lines, Mrs Ann, Jane Ancher, and Sarah Finner Do Foe finally descended from De Foe, pensioned by the queen, May, 18--.

ROBURITE a new German explosive invented by Dr Carl Roth, reported 1888.

ROCHDALE, Lancashire. A charter was obtained for a market by Edmund de Lucy, 1241,

and the grammar school was founded 1564. Rochdale canal was opened 1804. The new town was commenced in 1805. Rochdale first sent a member to parliament in 1832. The woollen manufacture was carried on in the 16th century. The first cotton mill was erected in 1795. Population, 1881, 68,866. 1891, 71,458.

ROCHEFORT (W France), a seaport on the Charente. The port was made by Louis XIV in 1666. In Aix-roads, near Rochefort, capt. lord Cochrane attacked the French fleet and destroyed four ships, 11-12 April, 1809. Near Rochefort, the emperor Napoleon surrendered himself to capt. Maitland of the *Bellerophon*, 15 July, 1815.

ROCHELLE (W France), a seaport on the Atlantic, belonging to the English for some time, but finally surrendered to the French leader, Du Guesclin in 1372. As a stronghold of the Calvinist party, it was vainly besieged by the duke of Anjou in 1573, and was taken after a siege of thirteen months by cardinal Richelieu in 1628. The duke of Buckingham was sent with a fleet and army to relieve it, but the citizens declined to admit him. He attacked the side of Rhe near Rochelle, and failed, 22 July 1627. He was repulsed 8 Nov. following. A conspiracy here in 1822 caused loss of life to sergeants Horne and others.

The new harbour opened by president Carnot 19 Aug. 1800.

ROCHESTER in Kent, the Roman *Durobrivæ*. The bishopric, founded by Augustine 603, is the next in age to Canterbury. The first cathedral was erected by Ethelbert, king of Kent, at June was bishop in 604. Alterations were made in the diocese in 1841. Rochester is situated in the king's books at 3s. 8d. 3d. per annum. Present income 3,000*l*. The cathedral is repaired after repairs of the choir, 11 June, 1874. The old castle and grounds were purchased for the public by the Corporation, 1883. The ten churches begun by the bishop p. 1583. Population, 1891, 21,307, 1891, 26,301.

RODNEY'S VICTORIES Admiral Rodney fought, near Cape St. Vincent, the Spanish admiral, Don Langara, whom he defeated and made prisoner, capturing six of his ships, one of which blew up, 16, 17 Jan. 1780. On 12 April 1782 he encountered the French fleet in the West Indies, commanded by the count de Grasse, took five ships of the line, and sent the French admiral prisoner to England. Rodney was raised to the peerage June, 1782.

ROGATION WEEK. Rogation Sunday, the Sunday before Ascension-day, received its title from the Monday, Tuesday and Wednesday following it, called Rogation days, derived from the Latin *rogare*, to beseech. Patristical prayers and supplications for the three days are said to have been appointed in the third century as a preparation for the devout observance of our Saviour's ascension on the next day succeeding to them denominated Holy Thursday or Ascension day. The whole week, in which the days happen is styled Rogation week, and in some parts it is still known by the other names of *Flow week*, *Grass week*, and *Proclamation week*. The perambulations of parishes have usually been made in this week.

ROHAN, an illustrious family, descended from the ancient sovereigns of Brittany. Henri de Rohan, son-in-law of the great Sully, after the death of Henry IV (14 May, 1610), became head of the Protestant party, and sustained three wars against Louis XIII. He eventually entered the service of the duke of Savoy-Wittmar, and died of wounds received in battle in 1638. Of this family was the cardinal de Rohan, see *Diamond Necklace*.

ROHILCUND, a tract of country, N E India, was conquered by the Rohillas, an Afghan tribe, who settled here about 1747. After aiding the sovereign of Oude to overcome the Mahattas, they were treated with much treachery by him, and nearly exterminated. Rohilcund was ceded to the British in 1801. After the great mutiny, Rohilcund was tranquillized in July, 1858.

ROMAN LAW, see *Codes*, *ROMAN LITERATURE* see *Latin*

ROMAN ROADS IN ENGLAND Our historians maintain, but are mistaken that there were but few of these roads. *Campan* "The Romans, says Isidore, made roads almost all over the world to have their marches in a straight line, and to employ the people, and crimes were frequently committed to work at such roads, as we learn from *Steban*, in his *life of Caligula*. They were commenced and completed at various periods, between the 2nd and 4th centuries, and the Roman soldiery were employed in making them, that insatiable might not give them an opportunity to raise disturbances. *Bede*

1st WATLING STREET so named from the Britons who is supposed to have called it the Briton calling him in their language *Watling* (from Kent to Caithorn Bay).

2nd, ICHNOD OF ICHNOD STREET from its beginning among the Iceni (from St Dunstons to Tynemouth).

3rd Fosse or Lough Way probably from its having been defined by a fosse on both sides (from Cornwall to Lincoln).

4th Eborac Street, from *Emborac* a German word in *Campan* *Mercator* whom the German soldiers were shipped under that name (from St Dunstons to Southampton).

ROMAN WALLS One was erected by Agricola (79 to 85) to defend Britain from the incursions of the Picts and Scots, the first wall extended from the Tyne to the Solway (80 miles), the second from the frith of Forth, near Edinburgh, to the frith of Clyde near Dumbarton (36 miles). The former was renewed and strengthened by the emperor Adrian (121), and by Septimus Severus (208). It commenced at Burnmouth near Carlisle, and ended at Wallend near Newcastle. It had battlements and towers to contain soldiers. The

more northern wall was renewed by Lollius Urbicus, in the reign of Antoninus Pius, about 140. Many remains of those walls still exist, particularly of the southern one, Dr J C Bruce's "*Roman Wall*," published 1853-1868.

ROMANCE, originally a composition in the Romance or Provencal idiom. The term in the middle ages was extended to narrative poetry in general. Heliodorus, a bishop of Tricca, in Thessaly, about 398, was the author of *Ethiopia* (relating to the loves of Theagenes and Charicleia), the first work in this species of writing. The first part of the "*Roman de la Rose*" was written by Guillaume de Lorris (1226-70), the second a separate poem, by Jean de Meung (1285-1314), the Dictation of Boccaccio was published, 1358, Don Quixote, by Cervantes, 1605, Gil Blas, by Le Sage, 1715. Dunslop's "*History of Nations*," published 1814. See *English Authors*, "*Reynard the Fox*."

ROME The foundation of the city, by Romulus, was laid on the 20th April, according to Varro in the 5th year of the Julian period (753) 100 years before the birth of Christ, and in the fourth year of the sixth Olympiad. Other dates given (Cato, 751, Polybius, 750, Iustus Victor, 747, Cicero, 728 &c.) The Romans conquered nearly the whole of the then known world. In the time of Julius Cæsar the empire was bounded by the Euphrates, India, and Armenia on the east, by Ethiopia on the south, by the Nile on the north, and by the Atlantic on the west. Numerous ecclesiastical councils have been held at Rome, from 197 to 1869-70. Population 1872, about 250,000, 1877 250,000 1881, 300,467, 1890, 423,217. Church through the exertions of Mr John Henry Parker of Oxford, the Roman exploration fund was established for the preservation of ancient architectural remains. Has "Archæology of Rome" (with many photographs) published, 1874 &c. Professor J H Middleton's works on "Ancient Rome," published 1849, 1858, and 1892. The Italian government voted 12000 a year for a similar purpose. The early history of Rome is legendary, and the dates purely conjectural. It has been greatly elucidated by the researches of B G Niebuhr, whose Roman history was published 1811, and 1827-30.

* In its original state Rome was but a small castle on the summit of mount Palatine, and the founder to give his followers the appearance of a nation or a barbarian horde, was obliged to erect a standard as a common asylum for criminals, debtors or murderers, who fled from their native country to avoid the punishment which attended them. From such an assemblage a numerous body was soon collected and before the death of the founder, the Romans had covered with their habitations the Palatine, Cæstus, Aventine, and Esquiline hills, with Mount Cælius and Quirinalis.

ROMILLY'S ACT, SIR SAMUEL, 52 Geo.
III c 101 (1812) relates to charities

RONCESVALLES (in the Pyrenees), where, it is said, Charlemagne's paladin Roland, or Orlando, was surprised, defeated and slain by the Gascons, 778. On 25 July, 1813, marshal Soult was defeated here by the British entering France.

RONDO A short piece of music having one prominent subject to which returns are made, many composed by Beethoven, Chopin, and others.

ROOF. The largest in the world was said to be that over a riding-school at Moscow, erected in 1791, being 235 feet in span. The roof of the London station of the Midland railway, in Euston-road, London, N.W., is 240 feet wide, 690 feet long, 125 feet high. The extent of ground covered is about 165,000 square feet.

ROPE-MAKING MACHINE. One was patented by Richard March in 1784, and by Edm. Cartwright, in 1792. Many improvements have been made since.

ROCKE'S DRIFT, boundary of British territory of Natal, in South Africa and Zululand. Behind extemporised trenches a handful of British soldiers here successfully resisted a large Zulu army, and probably saved the colony, 22 Jan. 1879. See *Zululand*.

ROSEMOND'S BOWER. Rosemond was daughter of lord Clifford, and mistress of Henry II. about 1154. A conspiracy against her was formed by the queen, prince Henry, and the king's other sons. Henry kept her in a labyrinth at Woodstock, where his queen, Eleanor, it is said, discovered her apartments by the clue of a silk thread, and poisoned her. She was buried at Godstow church, from whence Hugh, bishop of Lincoln, had her ashes removed, 1191.

ROSARY, see *Beads*.

In a brief of pope Pius IX., 30 Sept. 1872, it was asserted that 40 repetitions in a rosary of 40 beads of "Sweet Heart of Mary, be my salvation!" will obtain a large number of days of indulgence for souls in purgatory (23,300 days calculated).

ROSAS (N. E. Spain), BAY OF, where a brilliant naval action was fought by the boats of the *Tigre, Cumberland, Volantiera, Apollo, Turpsa, Philomet, Scout, and Tascen*, led by lieut. John Taitour (of the *Tigre*), which ended in the capture or destruction of eleven armed vessels in the bay, 1 Nov. 1809; for which purpose lord Collingwood had organised the expedition commanded by capt. Hallowell. Rosas was gallantly defended by lord Cochrane, 27 Nov.; but surrendered, 4 Dec. 1809.

ROSBACH (Rosebeque), Flanders. Here Charles VI of France beat the Flemings, who had revolted against their count, 27 Nov. 1382.—At ROSBACH, in Prussia, a great battle was fought between the Prussians, commanded by Frederick the Great, and the combined army of French and Austrians, in which the latter were defeated with severe loss, 5 Nov. 1757.

"ROSCUR, INFANT," Wm. Henry West Betty, born 13 Sept. 1791. After acting at Belfast, 16 Aug. 1803, and at other places, with much applause, he appeared at Covent-garden, 1 Dec. 1803, as Salim, in "Barbarossa," and is said to have gained in his first season, 17,200*l*.

After several years' retirement, he re-appeared, but soon after hit the stage, not being successful. He retired on the fortune he had amassed, and died Aug. 1874.

A portrait may be seen at the Garrick club.

ROSE, see under *Flowers*. The rose, a symbol of silence, gave rise to the phrase *sub rosa*, "under the rose;" said, by Italian writers, to have risen from the circumstance of the pope's presenting consecrated roses, which were placed over the confessionals at Rome, to denote secrecy, 1526. The pope sent a golden rose to the queen of Spain, which was given to her with much solemnity, 8 Feb. 1868. A "National rose society" opened its first annual show, St. James's hall, 4 July, 1877.

The *Legion of the Rose*, under the patronage of the Comtesse de Paris, formed to promote the restoration of the monarchy in France, autumn 1888.

ROSE'S ACT, 33 Geo. III. c. 53 (1793) brought to rest societies under the control of government.

ROSES, WARS OF THE, between the Lancastrians (who chose the red rose as their emblem)

and the Yorkists (who chose the white rose), 1455-1485. It is stated that in the Wars of the Roses there perished 12 princes of the blood, 200 nobles, and 100,000 peasantry and common people. The union of the roses was effected in the marriage of Henry VII. with the princess Elizabeth, daughter of Edward IV. 1486.

Richard II., who succeeded his grandfather Edward III. in 1377, was deposed and succeeded in 1399 by his cousin Henry IV., son of John of Gaunt, duke of Lancaster, the fourth son of Edward III., in pursuance to the right of Roger Mortimer (grandson of Lionel, duke of Clarence, Edward's third son), who was declared presumptive heir to the throne in 1385.

Roger's grandson, Richard duke of York, first openly claimed the crown in 1449.

Attempts at compromise failed, and the war began in 1455.

The Lancastrians were defeated at St. Alban's: the protector Somerset was slain, a truce was made, and Richard was declared successor to Henry VI. 23 May.

The war was renewed, and the Yorkists defeated the Lancastrians at Bloreheath 23 Sept. 1459.

The Yorkists eventually dispersed, and the duke was attainted.

He defeated his opponents at Northampton, took Henry prisoner, and was declared heir to the crown; but fell into an ambuscade near Wakefield, and was put to death 31 Dec. 1460.

His son (Edward) continued the struggle; was installed as king 4 March.

Defeated the Lancastrians at Towton 29 March. Was deposed by Warwick, who restored Henry VI. Sept. 1470.

Edward defeated the Lancastrians at Barnet, 14 April, and finally at Tewkesbury 4 May, 1471.

The struggle ended with the defeat and death of Richard III. at Bosworth 22 Aug. 1485.

ROSETTA (in Egypt), taken by the French in 1798, and by the British and Turks, 19 April, 1801. The Turks repulsed the British here, 22 April, 1807. Near Rosetta was fought the battle of the Nile, 1 Aug. 1798; see *Nile*. Mehmet Ali rendered great service to his country by constructing a canal between Rosetta and Alexandria.

The *Rosetta stone*, discovered by the French in 1799, was brought from Rosetta in a French vessel, from whence it was taken by Mr. Wm. B. Hamilton, who deposited it in the British Museum in 1802. Mr. Letronne published the text and a translation of the Greek inscription. It is a piece of black basalt, about 3 feet long and 2 feet wide, with an inscription in three languages, viz. hieroglyphics, modified hieroglyphics (demotic or enchorial), and Greek, setting forth the praises of Ptolemy Epiphanes (about 196 B.C.). It was studied in 1817 by J. T. Young and especially by J. F. Champollion, whose works were published 1824-1845. Champollion's method was adopted by Rosellini, and extended by Lepsius, Jacquet, Bruch Brugsch, and others. Champollion discovered that the hieroglyphs represented sounds by an initial letter, and after studying the "Ritual of the dead," published a grammar and Dictionary.

ROSCRUCIANS, a sect of mystical philosophers who appeared in Germany in the 14th century. It is asserted that their founder was a noble German monk, named Christian Rosenkreutz, born 1378, who travelled in Arabia, Egypt, Africa, and Spain; returned to Germany and founded the fraternity of the Rose 1406, and died aged 102. The *Fama Fraternitatis* and the *Confessio Rosae Crucis*, 1615, the latter attributed to Johann Valentin Andreae and others, are important works. They swore fidelity, promised secrecy, and wrote hieroglyphically, and affirmed that the ancient philosophers of Egypt, the Chaldeans, Magi of Persia, and Gymnosophists of the Indies, taught the same doctrine.

Mr. Arthur B. Waite's elaborate work "The Real History of the Rosicrucians" published in 1887.

ROYAL ACADEMY. A society of artists
 met in St. Peter's-court, St. Martin's-lane, about
 1730, which Hogarth established as the society of
 Incorporated Artists, who held their first exhibition
 at the Society of Arts, Adolphus, 21 April, 1760
 From this sprang the Royal Academy, in con-
 sequence of a dispute between the directors and the
 fellows. On 10 Dec. 1768, the institution of the
 present Royal Academy was completed under the
 patronage of George III., and Sir Joshua Reynolds,
 knighted on the occasion, was appointed its first
 president. *Leap.* The first exhibition of the
 academicians (at Pall-Mall) was on 26 April, 1769,
 when 136 works appeared. In 1771 the king
 granted them apartments in old Somerset-house,
 and afterwards, in 1780, in new Somerset-house,
 where they remained till 1838, when they removed
 to the National Gallery. Among the professors have
 been Johnson, Gibbon, Goldsmith, Macaulay, and
 Hallam Turner, the painter, gave funds to the
 academy for the award of a medal triennially for
 landscape-painting, which was awarded to Mr. H.
 O. Lupton in 1857. A commission of inquiry into
 the affairs of the academy, appointed in 1858, re-
 commended various changes in July, 1863, which
 were carried into effect. The hundredth anniversary
 of the foundation of the academy was celebrated

10 Dec. 1868. The Royal Academy held its first exhibition in the new building, 3 May, 1869. The annual exhibition of pictures by the old masters, with some British, began 3 Jan. 1870. The money received has been devoted to the establishment of a professorship of chemistry and a laboratory, &c. In 1874 the exhibition included many of Landseer's pictures.

Sir Frances Chantrey, sculptor, died 25 Nov. 1841. At the death of his wife Jan. 1875, in conformity with his will, about 3000*l.* a year allotted to the Academy for the purchase of works of art for the nation, and other purposes.

The court of appeal upholds Mr Justice North's decision that the works of sculpture purchased must be finished in marble or bronze, and not models, 4 June, 1880.

The gallery containing the sculptures of John Gibson, bequeathed by him, was opened free, 27 Nov. 1886. The number of the works of art exhibited in 1889 was about 600, in 1889, 1896, including sculptures.

ROYAL ACADEMY OF MUSIC was established in 1822, mainly by the exertions of Lord Burghersh (afterwards earl of Westmoreland, who died 16 Oct. 1859), and was incorporated by charter 23 June, 1830. The first concert took place 8 Dec. 1828. Its reconstruction was proposed in 1866, and since effected. Sir George Macfarren principal, 1876, died, 31 Oct. 1887, succeeded by Dr. A. C. Mackenzie, Feb. 1888.

The academy unites with the Royal College of Music in regard to local examinations, announced 13 Nov. 1889.

ROYAL EXCHANGE (Cambium Regis), London. The foundation of the original edifice was laid by Sir Thomas Gresham, 7 June, 1566, on the site of the ancient Tun prison. Queen Elizabeth opened it on 23 Jan. 1571, and her herald named it the *Royal Exchange*. *Hume*. It was totally destroyed by the great fire, Sept. 1666. Charles II. laid the foundation-stone of the next edifice, 23 Oct. 1667, which was completed by Mr. Hawksmore, a pupil of Sir Christopher Wren, in about three years; it was repaired and beautified in 1769. This fire was burnt, 10 Jan. 1838. The new Royal Ex-

change, erected under the direction of Mr. Tite, was opened by the queen, 28 Oct. 1844.—The *ROYAL EXCHANGE*, Dublin, commenced 1769, opened 1774.

ROYAL GEORGE, a man-of-war of 108 guns, lost off Spithead. While keeled over to repair a pump, a sudden gust of wind washed the sea into her ports, and she went down. The rear-admiral Keupensfeldt, the crew, many inmates, women, and Jews, in all about 600 persons, were drowned, 29 Aug. 1782. By the use of the diving-bell, the ship, embedded in the deep, was surveyed in May, 1817, at 297 fathoms of the vessel and its cargo were brought up in 1839-42, under the superintendence of Sir Charles Pasley, when gunpowder was ignited by the agency of electricity.

ROYAL GRANTS to members of the royal family, —

The queen on July 2 applied to parliament for a grant to prince Albert Victor of Wales for his maintenance, and for one to the princess Louise of Wales on her proposed marriage with the earl of Fife, a select committee was appointed consisting of 23 members (including Mr. Goschen, Mr. W. H. Smith, Lord Hartington, Mr. J. Chamberlain, Mr. Gladstone, Mr. John Morley, Mr. Labouchere, Mr. Burt, Dr. Cameron, Mr. Parnell, and Mr. Sexton), 3 July, the committee first met

10 July, 1889. After several meetings at which there was much discussion on various propositions, a report was submitted to the house of commons, who eventually resolved, after several amendments had been rejected, that 50,000*l.* out of the consolidated fund should be paid annually (through trustees) to the prince of Wales for the support and maintenance of his family, the same to continue till six months after the queen's decease, 29 July, 1889. An act of parliament to this effect was passed 13 Aug. "

ROYAL HUMANE SOCIETY (London), see *Humane Society*.

ROYAL INSTITUTION OF GREAT BRITAIN, the earliest of the kind in London, was founded 9 March, 1799, by count Rumford, Sir Joseph Banks, Sir Francis Baring, and several other noblemen and gentlemen. It received the immediate patronage of George III., and was incorporated 13 Jan. 1800, by royal charter, as "The Royal Institution of Great Britain, for the diffusing knowledge, and facilitating the general introduction of useful mechanical inventions and improvements, and for teaching, by courses of philosophical lectures and experiments, the application of science to the common purposes of life." It was enlarged and extended by an act of parliament in 1810; the original plan, as drawn up by count Rumford, in 1799, having been considerably modified. The members are elected by ballot, and pay ten guineas on admission, and five guineas annually, or a composition of sixty guineas. "The Royal Institution, its Founder, and its first Professors," by Dr. Benson Jones, 2nd ed., published 1871.

The House (in Albemarle street, Piccadilly) was purchased in June, 1799, and the present front was added by subscription in 1828. The Lecture theatre was erected in 1803, under the superintendence of Mr. F. Webster.

The Laboratory established in 1800, was rebuilt, with the modern improvements, 1872.

The Library was commenced in 1803, by the munificent subscriptions of the proprietors of the Institution.

It now (1889) comprises about 50,000 volumes. Classified catalogues (by W. H. Storer) were published in 1809 and 1867, new ones (by B. Visconti) in 1852 and 1884.

The Museum contains original philosophical apparatus of Young, Cavendish, Davy, Faraday, and Dr. H. B. The first Lecture was delivered 4 March, 1800, by Dr.

in being the first professor of natural philosophy and chemistry.

In 1806, he was succeeded by Dr Thomas Young, so celebrated for his researches in optics, resulting in the discovery of the interference of light, and the establishment of the theory of undulation. His "Lectures on Natural Philosophy and the Mechanical Arts," first published in 1807, are still considered a text-book of physical science. His works on antiquarian literature (hieroglyphic inscriptions, &c.) are highly esteemed.

In Feb. 1810, Mr (afterwards Sir Humphry) Davy was engaged as assistant lecturer and director of the laboratory, and on 31 May, 1809, he was appointed professor of chemistry. His lectures were eminently successful, and his discoveries in chemistry and electricity have immortalised his name, and conferred honour on the institution. By him the alkaline metals potassium and sodium, were discovered in 1807, the nature of chlorine was determined in 1810, and the safety lamp invented in 1815.

William Thomas Brande succeeded Sir Humphry Davy as professor of chemistry in 1813, and held that office till his resignation in 1852, since which time, till his death (Feb. 1866), he was hon. professor. From 1816 to 1850 he delivered in the laboratory of this institution, his celebrated chemical lectures to students.

In 1813 Michael Faraday (born 22 Sept. 1791), on the recommendation of Sir H. Davy was engaged as assistant in the laboratory, and in 1825 as its director. In 1827 he became one of the permanent lecturers of the institution. In 1820 he commenced those researches in electricity and magnetism which form an era in the history of science. In 1833 he discovered the combustibility of chlorine and other gases. In 1831 he obtained electricity from the magnet. In 1845 he exhibited the two-fold magnetism of matter comprising all known substances, the magnetism of gases, &c. In 1850 he published his researches on diamagnetic magnetism. Died, 25 Aug. 1867.

John Tyndall, F.R.S., professor of natural philosophy, July, 1853, hon. professor, 9 May, 1859, is eminent for his researches on magnetism, heat, glaciers, &c.

Lord Kelvin, F.R.S., professor of natural philosophy, 9 May, 1857, is eminent for his researches on sound, light, &c.

Isaac Franklin, F.R.S., professor of chemistry 1863-8, is eminent for his discoveries in organic chemistry. In 1804, Sir J. St. Austin and other gentlemen proposed to form a school or museum at this institution, but the plan, although warmly supported by the members, was withdrawn for want of encouragement by the government and by mining proprietors.

The WEEKLY EVENING MEETINGS on the Fr. days, from January to June, as now arranged, commenced in 1866. Discourses (of which abstracts are printed) are given at these meetings by the professors of the institution, and other eminent scientific men.

KNOWLEDGE. In 1833 John Fuller, esq., of Rosehill, endowed two professorships, of chemistry and physics, the former bestowed on Mr Faraday for life, succeeded by Dr Wm. Odling 1863-7, by Dr John Eliot Gray 1874, by James Dewar 1879. The latter on Dr Rogers' death was to be filled in afterwards by triennial election.—The Fullerton professors of physiology have been P. M. Roget, R. E. Grant, T. R. Jones, W. B. Carpenter, W. G. Hall, T. W. Jones, T. H. Huxley (twice), R. Owen, J. Marshall, Michael Foster, Wm. Bartholomew, Alfred H. Garrod, and E. A. Schmitt (1874-5); J. G. McKendrick, 1881-4; A. G. Sanger, 1884; G. J. Romanes, 1888; Victor Horsley, 1891.—In 1821, Mrs. Acton gave 1000 to be invested for paying every seven years 100 guineas for the best essay on the benevolence of the Almighty, as illustrative of a department of science which have been awarded—in 1844 to Mr. G. Poyne in 1851 to Mr. T. Wharton Jones, in 1856 an award was made, in 1866 to Mr. George Warrington, in 1870 to Rev. George Henslow and E. Thompson Lowe, in 1879, to Mr. G. B. Boulger, in 1881 to Prof. (off. air) G. G. Stokes, F.R.S.

The "Fund for the Promotion of Experimental Research" was founded on 6 July, 1863, by Sir Henry De la Beche, Professor Faraday, Sir J. I. Murchison, Dr Henslow, and others.

The first officer was Sir Joseph Banks, president, till the office was granted, afterwards the Earl of Winchelsea, Sir Edwardes (at Thomas) Bennett, Treasurer, Rev. Dr Samuel Glass, Secretary.—Algeron dukes of Devonshire, K.H., elected president, 1840, succeeded

by Sir Henry Holland, in 1846 (died 27 Oct. 1873), by Algernon George, duke of Northumberland K.G., 1873. W. Folio, esq., Treasurer, elected 1840, succeeded by Wm. Spottiswoode, esq., in 1861, by George Bush, esq., 1873, by Sir Henry Follock, esq., 1886, by Sir James Cockburn Browne, 1889. The Rev. John Barlow, secretary, elected 1842, succeeded by Henry Bence Jones, M.D., 1860, by Wm. Spottiswoode, 1873, by Warren de la Rue, 1879, by Sir Wm. Bowman, Bart., 1888, by Sir Frederick Brauwel, Bart., 1885. Librarians Wm. Harris 1803-33, S. Weller Singer, 1835-35, Wm. Mason, 1835-48, Benjamin J. East, 1849-80 (hon. librarian 1889), Henry Young, 1889, an eminent foreign scientific man, was elected honorary member 4 May, 1891, in relation to the Faraday centenary, which see.

ROYAL SOCIETY (London). In 1645 several learned men met in London to discuss philosophical questions and report experiments, the *Notion Organon* of Bacon, published in 1620, having given great impulse to such pursuits. Some of them (Drs Wilkins, Wallis, &c.), about 1648-9, removed to Oxford, and with Dr (afterwards bishop) Seth Ward, the hon. Robert Boyle, Dr (afterwards sir) W. Petty, and several doctors of divinity and physics, frequently assembled in the apartments of Dr Wilkins, in Wadham college, Oxford. They formed what has been called the Philosophical Society of Oxford, which only lasted till 1690. The members were, about 1658, called to various parts of the kingdom, on account of their respective professions, and the majority coming to London, constantly attended the lectures at Gresham college, and met occasionally till the death of Oliver Cromwell, 3 Sept. 1658, see *Societies*.

The society was organised in 1660, and constituted by Charles II. a body politic and corporate, by the appointment of The President, Council, and Fellowship of the Royal Society of London, for improving Natural Knowledge, as April, 1662.

Eleven records the first anniversary meeting St. Andrew's day, 30 Nov. 1663.

The Philosophical Transactions began 6 March, 1664. In 1668 Newton invented his reflecting telescope (now in the possession of the society) and on 8 April, 1686, presented to the society the MS. of his *Principia* which the council ordered to be printed. This was done under the superintendence and at the expense of Halley the astronomer, at that time clerk to the society.

The society met for some years at Gresham College, and afterwards at Arundel House (1666), where it came into possession of a valuable library, presented by Mr Howard, grandson of its collector the earl of Arundel. After various changes the fellows returned to Gresham College, where they remained till their removal to Crane-court, in a house purchased by themselves, 8 Nov. 1720.

The Bakerian lecture was established by Henry Baker, 1774.

The first Copley medal was awarded to Stephen Gray in 1731; the Royal medal to John Dalton 1806, the Rumford medal (instituted in 1797) to Count Rumford himself in 1806.

The society remove to apartments granted them in Somerset-house, 1780, to apartments in Burlington house, Piccadilly, 1857.

Parliament votes annually 4000 to the Royal Society for scientific purposes.

Regulations made by which only fifteen fellows are to be annually elected, who pay ten pounds on admission, and four pounds annually, or a composition of sixty pounds March, 1847. In consequence, the number of fellows was reduced from 839 in 1847 to 663 in 1866, to 567 in 1875, to 552 in 1877, to 523 in 1884.

The entrance fee abolished, and the annual payment reduced to 21, announced, Nov. 1878.

The "Royal Society Scientific Fund" was founded in imitation of the "Literary Fund" in 1899; see *Scientific Fund*.

The Davy Medal (which see) first awarded, Nov. 1877.
The Darwin medal (see *Development*) first awarded, 1890.

RUBICON, a small river flowing into the Adriatic sea, separated Cisalpine Gaul from Italy proper. Roman generals were forbidden to pass this river at the head of an army. Julius Caesar did so, Jan. 49 B.C., and thereby began a revolt and deadly civil war.

RUBIDIUM, an alkaline metal, discovered by Bunsen by means of the spectrum analysis, and made known in 1861.

RUBRICS, directions in church offices, often printed in red. New ones for the English service agreed to by convocation, 4 July, 1879.

RUBY MINES OF BURMAH, Tavernier (middle of the 17th century) describes it as a place where rubies and other precious stones are largely obtained, in a country difficult of access. Similar accounts were given by Father Giuseppe d'Amato, about 1830. The largest stones were royal property. Mr. Bredemeyer had charge of these and other mines in 1868. Revenue about 1855, from 12,500 to 15,000. per annum. These mines are now British property (see under *Burma*, 1885), and for the use of them a revenue is paid by the Shan tribes, 1887. An agreement respecting them made between the Indian Government and Messrs. Streeter & Co. of London, announced May, 1887; suspended July, 1887. Working licences issued to persons on the spot, 1887. Lease for seven years to the Streeter Syndicate signed at the India office, 23 Feb. 1889; formation of a company headed by Messrs. Rothschild, March et seq., 1889. Visit of Sir Lepel Griffin to the mines, satisfactory to the company, reported March, 1890.

RUFFLES became fashionable about 1520; and went out about 1790.

RUGBY SCHOOL (Warwickshire), was founded in 1567 by Lawrence Sheriff, a London tradesman; its arrangements were effected by the Public Schools act 1868. Dr. Thomas Arnold, the historian, entered on the duties of head-master here in August, 1828, and under him the school greatly prospered. He died 12 June, 1842. His successors were Drs. Tait, Goulbourn, Temple, and Hayman. See *New Rugby*.

Dr. H. Hayman was opposed by the masters of the school, and after much discussion and discussion, was dismissed by the trustees, Dec. 1873, and Dr. Jex Blake elected in his room, Feb. 1874. Succeeded by Rev. J. Percival, Nov. 1886. Vice-Chancellor Melin decided against Dr. Hayman in his attempt to set aside his dismissal, but expressed his own opinion on "the grievous hardship of Dr. Hayman's case," 21 March, 1874.

Mr. Disraeli, the premier, presented Dr. Hayman to the living of Aldingham, Lancashire, April, 1874. Population of Rugby in 1881, 9,391; 1891, 11,562.

RUGEN, an island in the Baltic, has frequently changed masters, having been held by the Danes, Swedes, and French. It was transferred to Prussia in 1815.

RUHMKORFF'S INDUCTION COIL, see *Induction*.

"RULE, BRITANNIA." Nearly all the words are by James Thomson; the music, ascribed to Dr. Arne, is said by Schlegel (in his life of Handel) to have been taken from an air in Handel's "Occasional Oratorio" composed 1745, but the song and music were really printed in Dr. Arne's masque of "Alfred," 1740. *Grove*.

RULE-OF-THE-ROAD, see *Seas*.

RULING MACHINES, used for ruling paper with faint lines, for merchants' account-books, &c. They were invented by an ingenious Dutchman, resident in London, in 1782, and were subsequently greatly improved by Woodman, Payne, Brown, and others. They were improved in Scotland in 1803. An invention has lately rendered account-books perfect by the numbering of the pages with types, instead of the numbers being written by a pen, so that a page cannot be torn out from them without being discovered. The late Herr F. A. Nobert devised a ruling machine in 1845 for the production of microscopical test plates, diffraction gratings, and micrometers, specimens of which were exhibited in 1851. The test plates contain bands of lines in a graduated series of fineness from 10 to 1000 of a Paris line.

RUM (French *Rhum*), ardent spirit distilled from sugar lees and molasses, deriving its peculiar flavour from a volatile oil. Rum is principally made in the West Indies. The duty (since 1858) on colonial rum imported into the United Kingdom is 8s. 2d. per gallon. The duty on rum to be employed as methylated spirits was reduced in 1863.

street, London), was founded in 1768 by Sir Samuel
Rusell, James Horner, Dr. Mason Good, Henry
Hallam, Sir Francis Scarlett (aft. Lord Abinger), and
others. The building comprises a library, news
room, billiard room, &c.

RUSSELL TRIAL. Wilham, Lord Russell's
trial for complicity in the Rye-house plot was
marked by a most touching scene. When he re-
quested to have some one near him to take notes to
help his memory, he was answered, that any of
his attendants might assist him; upon which he
said, "My wife is here, and will do it for me."
He was beheaded in Lincoln's-Inn-Fields, 21 July,
1683. Lady Russell survived him forty years,
dying 29 Sept. 1723, in her eighty-seventh year.
His attainder was reversed, 1 Will. III. 1689.

RUSSIA, the eastern part of ancient Sarmatia.
The name is generally derived from the Roxolani,
a Slavonic tribe. Rurik, a Varangian chief,
appears to have been the first to establish a govern-
ment, 862. His descendants ruled amid many
vicissitudes till 1598. The progress of the Russian
power under Peter the Great and Catherine II. is
unparalleled for rapidity in the history of the world.
The established religion of Russia is the Greek
church, with toleration of other sects, even Mahome-
tans. By an imperial ukase, in 1802, six universities
were established, viz., at St. Petersburg,
Moscow, Wilna, Dorpat (in Livonia), Cherson, and
Kazan; but hitherto made little progress till the
present century, the native publications being
very few, and the best books being translations.
The Russian language, though not devoid of

negatives, is, to a foreigner, of very difficult pronunciation: the number of letters and diphthongs is forty-two. The population of the empire in 1867, 82,150,630, in 1872, about 85,685,045, in 1877 (estimated), 86,952,347, in 1885, 106,643,192. By the first Russian budget (1822), the estimated revenue was 24,500,000; expenditure, 37,850,000. Besides about 500 cathedrals, about 35,000 churches (Greek church, *which see*).

RUSSIA COMPANY, see *Russia*, 1553-4. See *America*.

RUSSO-TURKISH WAR.* The Russian and French governments having each taken a side in the dispute between the Greek and Latin churches as to the exclusive possession of the *Holy Places* (which are) in Palestine, the Porte advised the formation of a mixed commission, which decided in favour of the Greeks, and a firman was promulgated accordingly, 9 March, 1853; to this decision the French assented, although dissatisfied.

The Russians make further claims, and prince Menschikoff (who arrived at Constantinople 28 Feb. 1853), by various notes (between 23 March and 18 May), demands that a convention should be signed by the sultan granting to the czar such a protectorate over the Greek Christians in Turkey, as the sultan considered inimical to his own authority. 22 March-18 May, 1853.

Menschikoff's ultimatum rejected; he quits Constantinople. 21 May.

The Turkish fortress at Isakitcha fires on a Russian flotilla (the first act of war). 23 Oct.

In 1844, when the czar was in England, he conversed with the duke of Wellington and Lord Aberdeen (whom he had known many years) respecting the dissolution of the Turkish empire; and on his return he embodied his views in a memorandum drawn up by count Nesselrode, which was transmitted to London, but kept secret till March, 1856. In January and February of that year the czar had several conversations on the subject with the British envoy at St. Petersburg, sir G. H. Seymour, in one of which (Jan. 24) he compared Turkey to a "sick man" in a state of decrepitude, on the point of death, and made proposals to the British government as to the disposal of his property. He stated frankly that he would not permit the British to establish themselves at Constantinople; but said in another conversation, he would not object to their possessing Egypt. The purport of these conversations was conveyed in despatches to Lord John Russell, who replied that the British government declined to make any provision for the contingency of the fall of Turkey. The czar made similar proposals to the French government with the same result.

RUTHERFORD'S ACT, LORD (13 & 14 Viet. c. 36), for simplifying law proceedings in Scotland, passed 1850.

RUTHVEN, RAID OF, a term applied to the seizure of the person of James VI. of Scotland by William Ruthven, earl of Gowrie, and other nobles, in 1582, to compel the king to dismise his favourites, Arran and Lennox. Ostensibly for this, Gowrie was judicially put to death by his two opponents in 1584.

RUTLAND, STATUTE OF, 10 or 12 Edw. I. 1282 or 1284.

RYE-HOUSE PLOT, a plot (some think pretended) to secure the succession of the duke of Monmouth to the throne in preference to the duke of York (afterwards James II.), a Roman catholic. Some of the conspirators are said to have projected the assassination of the king, Charles II., and his brother. This design is said to have been frustrated by the king's house at Newmarket accidentally taking fire, which hastened the royal party away eight days before the plot was to take effect, 22 March, 1683; see *Newmarket*. The plot was discovered 12 June following. Lord William Russell on 21 July, and Algernon Sidney on 7 Dec. following, suffered death for being concerned in this conspiracy. The name was derived from the conspirators' place of meeting, the Rye-house at Broxbourne, Hertfordshire.

RYSWICK (Holland), where the celebrated peace was concluded between England, France, Spain, and Holland, signed, by their representatives, 20 Sept., and by the emperor of Germany, 30 Oct. 1697.

SAALFIELD.

SAALFIELD (Saxony, N. Germany). Here the Prussians, under prince Louis of Prussia, were defeated and their leader slain by the French under Lannes, 10 Oct. 1806.

SAARBÜCK, the Roman *Augusti Muri* or *Sara pens*, an open town on the left bank of the Saar, in Rhenish Prussia, founded in the tenth century, long subject to the bishops of Metz, afterwards ruled by counts (about 1237), and by the house of Nassau about 1320. It was captured by the French and retaken by the Germans 1676, reunited to France 1704-1814, and ceded to Prussia, 1815. On 2 Aug. 1870, it was bombarded by the French under Frossard (between 11 and 1 in the daytime), and the Prussians in small force were dislodged, and the town occupied by the French general Bataille. The mitrailleuses were said to be very effective. The emperor Napoleon, who was present with his son, said in a telegram to the empress, "Louis has gone through his baptism of fire. He has not been in the least startled. We stood in the foremost rank, and the rifle balls were dropping at our feet, and Louis picked up one that fell near him. His bearing was such as to draw tears from the soldiers' eyes." On the 6 Aug. the Prussian generals Guben and Von Steinmetz, with the first army, recaptured Saarbrück, after a sanguinary conflict at the village of Spicheren. The heights taken by the French on the 2nd are in Germany, those taken by the Germans on the 6th are in France, and both battles were fought between Saarbrück, and the town of Forbach, which was captured and has given a name to the second conflict. The loss was great on both sides. The French general François was killed, and the 2nd corps under Frossard nearly destroyed. The French retreated to Metz. They were greatly superior in numbers at the beginning of the fight, but were badly commanded.

SABBATARIANS. Traces exist of Sabbatarism, or Sabbathaires, among the sects of the 16th century on the continent. Upon the publication of the "Book of Sports" in 1618, a violent controversy arose among English divines on two points: first, whether the Sabbath of the fourth commandment was in force among Christians; and secondly, whether, and on what ground, the first day of the week was entitled to be distinguished and observed as "the Sabbath." In 1628, Theophilus Brabourne, a clergyman, published the first work in favour of the Seventh-day or Saturday, as the true Christian Sabbath. He and several others suffered great persecution for this opinion; but after the restoration there were three or four congregations observing the last day of the week for public worship in London, and seven or eight in the country parts of England. In 1851, there were three Sabbatarian or Seventh-day Baptist congregations in England; but in America (especially in the New England states) they are more numerous.—Joseph Davis suffered imprisonment in 1670. He and his son bequeathed property to maintain the sect; and litigation respecting its disposal was settled by vice-chancellor Stuart in conformity with their intentions in June, 1870. Very few Sabbatarians then remained.

SACRAMENT.

SABBATH: ordained by God. *Gen. ii. 3*; *Exod. xx. 8*; *Isaiah lviii. 13*. Jews observe the seventh day in commemoration of the creation of the world, and of their redemption from the bondage of the Egyptians; Christians observe the first day of the week in commemoration of the resurrection of Christ from the dead, and the redemption of man; see *Sunday*.

SABBATH SCHOOLS, see *Sunday Schools*.

SABBATICAL YEAR: a Jewish institution, 1491 A.C. *Leviticus xxiii*. During every seventh year the very ground had rest, and was not tilled; and every forty-ninth year all debts were forgiven, slaves set at liberty, and estates, &c., that were before sold or mortgaged, returned to their original families, &c.

SABELLIANISM, from Sabellius (of Ptolemais in Egypt), who flourished in the 3rd century, and who taught that there was but one person in the Godhead, the other persons of the Trinity being but different names of the same person. This doctrine was condemned at a council at Rome, 260.

SABINES, an ancient people of central Italy, from whom the Romans, under Romulus, took away their daughters by force, having invited them to some public sports or shows on purpose. When the Sabines determined to revenge this affront, the women became mediators to their fathers in behalf of their husbands, the Romans, and a lasting peace was made between them, 750 A.C. The Sabines, who had supported the Samnites in their war with Rome, were thoroughly defeated by M. Curius Dentatus, and their lands annexed 290 A.C., and eventually the Sabines were combined with the Roman people. One of the ecclesiastical provinces is still called Terra Sabina; chief town, Magliano.

SACCHARINE, see *Benzole*.

SACCHAROMETER, an instrument for determining the amount of sugar in solutions. Soleil, an optician of Paris, in 1847 made use of rotary polarized light for this purpose in a saccharometer, since improved by Duboscq.

SACHEVERELL RIOTS, see *Riots*, 1710.

SACKVILLE INCIDENT, see *United States*, Oct. 1888.

SACRAMENT (from *sacramentum*, an oath, obligation, also mystery). The Christian sacraments are baptism and the Lord's Supper. The council of Trent, in 1547, affirmed the doctrine of the schoolmen that there are seven sacraments, baptism, the Lord's Supper, confirmation, penance, holy orders, matrimony, and extreme unction. The name was given to the Lord's Supper by the Latin fathers. The wine was restricted to the clergy about the beginning of the 12th century. Communion in one kind only was authoritatively sanctioned by the council of Constance, 15 June, 1415. Henry VIII. of Germany was poisoned by a priest by the consecrated wafer, 24 Aug. 1513. The sacramental wine was poisoned by the gravedigger of the church at Zurich, by which sacrilegious deed a number of

persons that they took 4 Sept. 1776. In 1624 members of both houses of parliament were ordered to take the sacrament, or a guard against the introduction of Roman Catholicism. In 1753 the test act was passed; repealed in 1828; see *Trinitarianism*.

"Society of the Sacred Sacrament" (English churchmen, London, founded, 1864; "Constitution of the Sacred Sacrament" founded 1864; the two united, 1867) SACRAMENTARIES, followers of Ewing (1487-1539), who differed from the Romanists and Lutherans in regard to the sacrament.

SACRAMENTO, ST., a Portuguese settlement in S. America, claimed by Spain in 1680, but relinquished in 1713; several times seized; ceded in 1777; acquired by Brazil in 1825.

SACRED BAND, see *Thebes*.

SACRED BOOKS OF THE EAST. The publication of translations of the sacred books of the religion of the Brahmins, Buddhists, and Mohammedans, and of the followers of Khung-fu-tse and Lao-tse, edited by professor Max Müller, began in 1879. Thirty volumes have been published, 1889.

SACRED HARMONIC SOCIETY, see *Musica*.

SACRED HEART OF JESUS; a form of devotion said to have been instituted in England in the seventeenth century, and much promoted by Marguerite Marie Alacoque, an enthusiastic French nun, who asserted that Christ had appeared to her, and taken out her heart, placed it in his own, glowing in flame, and then returned it. She died in 1690. Her book "Dévotion au Cœur de Jésus," published in 1694, much advocated by Father Joseph Callet about 1760; and introduced into France, by Augustin.

A village in England, especially blessed to the poor, and headed by the duke of Norfolk, went to the shrine of Marguerite, at Farnham, and returned. 1-6 Sept. 1873

The R.C. diocese of Bedford dedicated to the Sacred Heart, 4 Sept. 1873; and a church at Mount-Marie, near Paris, founded for the same purpose, 26 June, 1875

The pope dedicated the universal church to "the Sacred Heart" 25 June, "

SACRED WARR.—I. Declared by the Amphictyons against Circe, near Delphi, for robbery and outrage to the visitors to the oracle, 495 B.C. Circe was raised to the ground, 586.—II. Between the Phocians and Delphians for the possession of the temple at Delphi, 448, 447.—III. The Phocians, on being fined for cultivating the sacred lands, seized the temple, 357. They were conquered by Philip of Macedon, and their cities depopulated, 346. See *Oracles*.

SACRIFICE was offered to God by Abel, 375 B.C. Sacrifices to the gods were introduced into Greece by Phrygius, king of Argos, 1773 B.C. Human sacrifices seem to have originated with the Chaldeans, from whom the custom passed into other Eastern nations. All sacrifices to the true God were to cease with the sacrifice of Christ, 33 A.D. Heb. x. 12-14. Pagan sacrifices were forbidden by the emperor Constantine II. 341.

SACRILEGE. In 1335, the punishment (formerly death) was made transportation for life. By 23 & 24 Vict. c. 96, s. 39 (1860), breaking into a place of worship and stealing therefrom was made punishable with penal servitude for life.

SACRIFICIUM (Latin, Italy). How the sacrifice of the younger Marcus and Paginius (sons of great slaughter, A.D. 82, and became gladiators).

SADDLES. In the earlier ages the Romans used neither saddles nor stirrups. Saddles were in use in the 3rd century, and are mentioned as made of leather in 304, and were known in England about 600. Side-saddles for ladies were introduced by Anne, queen of Richard II. in 1388. *Steele*.

SADDUCEES, a Jewish sect, said to have been founded by Sadoc, a scholar of Antiquity, about 200 B.C., who, misinterpreting his master's doctrine, taught that there was neither heaven nor hell, angel nor spirit; that the soul was mortal, and that there was no resurrection of the body from the dead. The Sadducees rejected the oral law, maintained by the Pharisees. See *Matt. xxiii. 23; Acts xxiii. 8*.

SADLER'S WELLS (N. London), so called after Mr. Sadler, who built an orchestra to entertain the invalids who used the waters medicinally, 1689. In time the orchestra was enclosed, and the building became a place for dramatic performances. The theatre was opened in 1765. Eighteen persons were trampled to death at this theatre, on a false alarm of fire, 18 Oct. 1807; see under *Theatre*. The theatre put up to auction and not sold, 31 Aug. 1875; and 30 July, 1878.

SADOWA, see *Komgryta*.

SAFES, A National Safe Company, London, opened vaults for storage of valuables, 1876.

SAFETY LAMP. One was invented in 1815 by Mr. Humphry Davy, to prevent accidents which happen in coal and other mines. The safety-lamp is founded on the principle that flame, in passing through iron-wire meshes, loses so much of its heat as to be incapable of igniting inflammable gases. The father of all safety-lamps was Dr. Hald Clanny, of Sunderland, whose invention and improvements are authenticated in the *Transactions of the Society of Arts* for 1817. The "Geordy," constructed by George Stephenson, the engineer, in 1816, is said to be the earliest. A miner's electric light, by M. Dumas and Benoit, was exhibited in Paris on 8 Sept. 1866. On 14 Aug. 1867, safety-lamps were rigidly tested by several mining engineers, and serious doubts thrown upon their complete efficiency. Col. Shakspeare's safety lamp (light extinguished by opening) exhibited at Royal Institution, &c., May, 1879. Messrs. Floum and Foster's new safety mining lamp approved, Jan. 1884.

Mr. J. Wilson-Swan's electric safety lamp, weighing 6 lb. exhibited at Aberdeen meeting of British Association Sept. 1885.

Mr. Charles D. Arle's safety lamp reported successful; the supply of mineral oil is isolated from the burner, 1884.

The Thornbury miners' lamp tried at Aldwicks Main Collieries by Mr. C. H. Rhodes, and subjected to experiments by prof. Dewar and Mr. Frederick Abel, who declare that this lamp fulfils the conditions required by the royal commission in 1866. Paraffin and other mineral oils may be used in this lamp, reported Nov. 1889.

SAFFRON (*saffron*, French; *Salsola*, Latin), a wholesome herb. *Morillon*. The Marston sage, *Salsola nemorosus*, was brought from Mexico, 1724. The blue African sage, *Salsola africana*, and the golden African sage, *Salsola aurea*, were brought to England from the Cape of Good Hope in 1731.

SAGE (*Sage*, French; *Salsola*, Latin), a wholesome herb. *Morillon*. The Marston sage, *Salsola nemorosus*, was brought from Mexico, 1724. The blue African sage, *Salsola africana*, and the golden African sage, *Salsola aurea*, were brought to England from the Cape of Good Hope in 1731.

SAGUNTUM, or **ZACYNTHUS**, now Murviedro, in Valencia, E. Spain, renowned for the daring siege it sustained, 219 B.C. The citizens, after performing incredible acts of valour for eight months, chose to be buried in the ruins of their city rather than surrender to Hannibal. They burnt themselves, with their houses, and the conqueror became master of a pile of ashes, 218 B.C.

SAHARA, a great sandy desert, North Africa, south of Barbary States. A project for making an inland sea here was entertained in 1883, and the construction of a railway was proposed in Algeria, Oct. 1890. A large natural reservoir of water at El Golea in the desert, was discovered early 1891.

SAIGON, French colony in Cochinchina, founded in 1860, after a defeat of the Chinese, 17 Feb. 1859.

SAILORS' HOME, in Well-street, London Dock, established by Mr. George Green, 1830; opened, 1835; enlarged, 1865. In one year it admitted 5444 boarders, who, besides home, had evening instruction, the use of a savings' bank, &c. The establishment is self-supporting, aided by subscriptions. Similar institutions have since been established. *Sailors' orphan girls' school and home*, Hampstead, established 1829. *Sailors' and Firemen's Union*, see *Shipping*.

SAINT. For names with this prefix, see the names themselves throughout the book. See *Acta Sanctorum*.

SAKYA MUNI, see *Buddhism*.

SALADO, a river, E. Spain; see *Turife*.

SALADS, are stated to have been in use in the middle ages; lettuce is said to have been introduced into England from the Low Countries, 1520-47.

SALAMANCA (W. Spain), taken from the Saracens 861. The university was founded 1240, and the cathedral built 1513. Near here the British and allies, commanded by Lord Wellington, totally defeated the French army under Marshal Marmont, 22 July, 1812. The loss of the victors was most severe, amounting in killed, wounded, and missing, to nearly 6000 men. Marmont left in the victor's hands 7141 prisoners, 11 pieces of cannon, 6 stands of colours, and 2 eagles. This victory was followed by the capture of Madrid. Population, 1887, 23, 190.

SALAMIS (near Athens). In a great sea-fight here, 30 Oct. 480 B.C., Themistocles, the Greek commander, with only 310 sail, defeated the fleet of Xerxes, king of Persia; which consisted of 2000 sail.—Near Salamis, in Cyprus, the Greeks defeated the Persian fleet, 449 B.C.; and Demetrius Poliorcetes defeated the fleet of Ptolemy and his allies, 306 B.C.

SALASSI, a turbulent Alpine tribe, were thoroughly subdued by Terentius Varro, 25 B.C., and a Roman colony established in their territories (now Aosta).

SALDANHA BAY, S. Atlantic Ocean; northward of the Cape of Good Hope. Here on 17 Aug. 1795, a Dutch squadron, under admiral Lucas, was captured by vice-admiral Sir George Keith Elphinstone, without resistance; Sir George was created Lord Keith.

SALE OF FOOD AND DRUGS ACT, passed 11 Aug. 1875; repeals all adulteration acts, and makes new arrangements.

SALINWORKMEN on the Danube. Their victory was gained by the imperialists, under prince Louis of Baden, over the Turks, commanded by the grand vizier Mustapha Kinspighi, 19 Aug. 1698.

SALERNO (Salernum, S. Italy), an ancient Roman colony. Its university, with a celebrated school of medicine, reputed to be the oldest in Europe, was founded by Robert Guiscard the Norman, who seized Salerno in 1077. Salerno suffered much in the wars of the middle ages.

SALFORD, near Manchester. Population, 1881, 176,335; 1891, 198,136. An incendiary explosion at the barracks caused one death; 74 persons suspected.

SALIQUE or **SALIC LAW**, by which females are excluded from inheriting the crown of France, is said to have been instituted by Pharamond, 424, and ratified in a council of state by Clovis I., the real founder of the French monarchy, in 511. *Hénault*. This law, introduced into Spain by the Bourbons 1700, was formally abolished by decree 20 March, 1830; and on the death of Ferdinand VII. his daughter succeeded as Isabella II., 29 Sept. 1833; see *Spain*. By this law also Hanover was separated from England, when queen Victoria ascended the English throne, 1837.

SALISBURY (Wilt), founded in the beginning of the 13th century, on the removal of the cathedral hither from Old Sarum. National councils or parliaments were repeatedly held at Salisbury, particularly in 1206, by Edward I.; in 1328, by Edward III.; and in 1384, Henry Stafford, duke of Buckingham, was executed here by order of Richard III., in 1483.—On **SALISBURY PLAIN** is Stonehenge (which see). This plain was estimated at 500,000 acres. On it were so many cross roads, and so few houses to take directions from, that Thomas, earl of Pembroke, planted a tree at each milestone from Salisbury to Shaftesbury, for the traveller's guide. The autumn military manoeuvres took place on Salisbury Plain, Aug., Sept. 1872; see under *Army*.—The first seat of the BISHOPRIC was at Sherborne, St. Aldhelm being prelate, 705. Herman removed the seat to Old Sarum, about 1072; and the see was removed to Salisbury by a papal bull, in 1217. It has yielded to the church of Rome two times and two cardinals. The building of the cathedral commenced 28 April, 1220, and was completed in 1258. This edifice is reckoned one of our finest ecclesiastical erections. Its spire, the highest in the kingdom, was considered in danger in April, 1864, and subscriptions were begun for its immediate repair. The choir was re-opened, after restoration by Sir G. G. Scott, 1 Nov. 1876. The bishopric is valued in the king's books at 1367l. 11s. 6d. Present income 5000l. Population, 1882, 14,792; 1891, 15,980.

RECENT BISHOPS.

SALISBURY'S ACT, see *Artisans*.

SALLÉE, a port of Morocco, long a haunt for pirates, destroyed by the British in 1632, and about 300 captives released.

SALIENTINI, allies of the Samnites, the only Italian tribe not subject to Rome, were overcome in war in 267 and 266 B.C., and Brundisium, their port, taken.

SALMON FISHERIES. The laws relating to them were consolidated and amended in 1861, and the report of a commission of inquiry (including sir Wm. Jardine) was published, in Feb. 1862. An act restricting the capture of salmon at certain times, passed in 1863, was amended in 1869-1870, and 1873. During the "salmon fence," 14 Sept. to 1 Feb., it is unlawful to catch fish of the salmon kind. A salmon-fishery congress opened at South Kensington, 7 June, 1867. Salmon eggs sent to New Zealand, Jan. 1878.

SALMON OVA, packed in boxes with moss, charcoal, and ice, to retard development—a plan suggested and proved practicable by Mr. E. H. Mowcrop in 1865—adopted successfully by Mr. J. A. Ford, who sent ova to Australia in the "Norfolk," 1864.

Salmon disease, in rivers, announced, 1879; commission of inquiry appointed, Mr. F. Buckland and others Jan. 1880.

Very great increase in the number of salmon caught, 1883.

SALONICA, see *Thessalonica*.

SALT (chloride of sodium, a compound of the gas chlorine and the metal sodium) is procured from the rocks in the earth, from salt-springs, and from sea-water. The famous salt-mines of Wieliczka, near Cracow in Poland, have been worked 600 years. The salt-works in Cheshire, called the **WICKES** (Nantwich, Northwich, and Middlewich), were of great importance in the time of the Saxon heptarchy. The salt-mines of Staffordshire were discovered about 1670. Salt duties were first exacted in 1702; they were renewed in 1732; renewed in 1823; and in that year were ordered to cease in 1825. During the French war the duty reached to 30s. per ton. For the salt-tax in France see *Gabells*. The government salt monopoly in India was abolished in May, 1853, by sir C. Trevelyan. Since 1797 salt has been largely employed in the manufacture of chloride of lime or bleaching powder (by obtaining its chlorine), and soap (by obtaining its soda). On this are based the chemical works of Cheshire, Lancashire, and other places. See under *Alkalies*.

Much distress in the salt districts of Cheshire through the subsidence of land, 1887-8. The proprietors of the Cheshire salt mines combined to form a "trust" or syndicate in the autumn of 1888; central office, Northwich; the trade being nearly ruined by great competition, first meeting 27 Sept. 1889.

Great advance in the price of salt Oct. 1888.

A "salt monsoon" presented to the town of Northwich by Mr. Reuzner, M.P. March, 1889.

Salt exported from the United Kingdom: 1876, 86,504 tons; 1880, 1,051,220 tons; 1885, 97,869 tons; 1890, 76,221 tons.

SALTAIRE, see *Alpaca*.

SALT LAKE, see *Mormonites*.

SALT-PETRE (from *sal petra*, salt of the rock), or Nitre, is a compound of nitric acid and potash (nitrogen, oxygen, and potassium), and hence is called nitrate of potash. It is the explosive ingredient in gunpowder, many detonating powders, and lucifer matches. Boyle in the 17th century demonstrated that salt-petre was composed of aqua fortis (nitric acid) and potash; the discoveries of Lavoisier (1777) and Davy (1807) showed its real composition. Its manufacture in England began about 1625. During the French revolutionary war, the manufacture was greatly increased by the researches of Borthollet.

SALUTE AT SEA. It is a received maxim at sea, that he who returns the salute always fires fewer guns than he receives, which is done even between the ships of princes of equal dignity; but the Swedes and Danes return the compliment without regarding how many guns are fired to them. The English claim the right of being saluted first in all places, as sovereigns of the seas; the Venetians claimed this honour within their gulf, &c. The admiralty issued a code of rules for salutes, Dec. 1876. See *Flag*, and *Naval Salutes*.

SALVADOR, SAN, one of the Bahamas, and the first point of land discovered in the West Indies or America by Columbus. It was previously called Guanahani, or Cay's Isle, and Columbus (in acknowledgment to God for his deliverance) named it San Salvador when he first saw it, 11 Oct. 1492. The capital, San Salvador, was destroyed by an earthquake, 16 April 1854, and is now abandoned.

SALVADOR, SAN, one of the republics of Central America, with a constitution established 24 Jan. 1859. Capital, Libertad. General Barrios elected president 1 Feb. 1860, was compelled to flee in Oct. 1863; when Francis Duesha became provisional president; his formal election took place April, 1865. The ex-president, Gerard Barrios, was surrendered by Nicaragua, tried and shot, Aug. 1865. A reattempted revolution failed; Zaldivar fled; general Gonzalez president, 1 Feb. 1872; B. Zaldivar, May, 1876; Gen. Menendez, June, 1885; re-elected 1 March 1887 for four years. Population, 1886, 651,130. The capital, San Salvador, was nearly destroyed by an earthquake, 19 March, 1873, about 50 persons perished. The convulsion began 5 March and thus gave timely warning. A rebellion suppressed, 6-10 Sept. 1887.

SAMARITANS (Samaritans). Were the Jewish general assembly was held, at the commencement of a battle, 27 July, 1875.

SAMARITANS, an ancient city of Germany, was situated in Austria, 1805; to Bavaria, 1809; to Austria again 1815. It was the birthplace of Metast, 1795. The meetings of the emperor of Austria and France here, 28 Aug. 1807, and the emperor of Austria and Germany, 6 Sept. 1871, which caused some anxiety, were reported to be in favour of peace. Population, 1800; province, 173,510; city, 27,741.

SAMAS, or **SOMAS**, see *Deism*.

SAMANIDE DYNASTY, began with Ismail Samani, who overcame the army of the Saffarids, and established himself in the government of Persia, 902; his descendants ruled till 999.

SAMARICAND (in Tartary) was conquered by the Mahometans, 707; by Genghis Khan, 1250, and by Timur, or Tamerlane, who ruled here in great splendour. Samarand was occupied by the Russians under Kaufmann 26 May, 1868, after a conflict on the previous day. The garrison left, resisted a fierce siege till relieved by Kaufmann, 13-20 June, 1868.

SAMARITANS. Samaria was built by Omri, 925 B.C.; and became the capital of the kingdom of Israel. On the breaking up of that kingdom (721 B.C.), the conqueror Sargon placed natives of other countries at Samaria. The descendants of these mixed races were abominable to the Jews, and much more so in consequence of the rival temple built on Mount Gerizim by Samballat the Samaritan, 332 B.C., which was destroyed by John Hyrcanus, 130 B.C.; see *John iv. & viii. 48*, and *Luke x. 33*. The Samaritan Pentateuch (of uncertain origin) was published in his Polyglot by Morinus, 1632.

The Samaritan Free Hospital, Marylebone; memorial stone laid by the prince of Wales, 21 July, 1869.

SAMARITANS, a warlike people of S. central Italy, who strenuously resisted the Roman power, and were not subjugated till after three sanguinary wars, from 343 to 290 B.C. They afterwards joined Pyrrhus, Hannibal, and other enemies of Rome, without benefit to themselves. Their brave leader, Caim Pontius, who spared the Romans at Caudium, 321, having been taken prisoner, was barely put to death, 232. They did not acquire the right of citizenship till 28 B.C. See *Caudium* *Perks* and *Reins*.

SAMOA ISLES (or *Navigators*), (nine inhabited), near the Fiji islands; christianized by rev. John Williams, 1830. King Maitetua succeeded, 8 Nov. 1880. The isles have a political constitution; their parliament voted annexation to New Zealand, March, 1885. Population about 35,000.

SAMOS, an island on the W. coast of Asia Minor. Colonised by Ionians about 1043 B.C. The city was founded about 986 Polycrates, ruler of Samos (532-22 B.C.), was one of the most able, fortunate, and treacherous of the Greek tyrants, and possessed a powerful fleet. He patronised Pythagoras (born here) and Anaxagoras. Samos was taken by the Athenians, 440; and, with Greece, became subject to Rome, 140. It was taken by the Venetians, A.D. 1125, who here made a velvet (samt), and became subject to the Turks, about 1459. Population, 1891, 44,953.

It was made a principality by sultan Mahmud in 1832. Prince Constantine Adonides, born 23 Feb., 1820; appointed 4 March, 1879. Alexander Karamanli, born 20 July, 1833, appointed 1882.

SAMPFORD COURTENAY (Devon). Here John, lord Russell, defeated the Cornish and Devonshire catholic rebels, the middle of Aug. 1549.

SAN. For names with this prefix, see the names themselves throughout the book.

SANCTION, see *Pragmatic*.

SANCTUARIES, see *Asylum*. Privileged places for the safety of offenders are said to have been granted by king Lucius to churches and their precincts. St. John's of Beverley was thus privileged in the time of the Saxons. St. Dunstan's, in Cornwall, was privileged by Athelstan, 935; Westminster, by Edward the Confessor, St. Martin's-le-Grand, 1529. Being much abused, the privilege of sanctuary was limited by the pope in 1503 (at the request of Henry VII.), and much reduced in 1540. In London, persons were secure from arrest in certain localities: these were the Minories, Salisbury-court, Whitefriars, Fulwood's-ponds, Mitre-court, Baldwin's-gardens, the Savoy, Chalk, Deadman's-place, Montague-close, and the Mint. This security was abolished 1567, but lasted in some degree till the reign of George II. (1737).

SANDALS, see *Shoes*.

SAND-BLAST. Gen. B. C. Tilghman, of Philadelphia, has invented a method of cutting stone or hard metal by a jet of quartz and impelled by compressed air or steam. A hole of 1 1/2 inch diameter and 1 1/2 inch deep was bored through a block of granite, nearly as hard as diamond, in 25 minutes. The invention was submitted to the Franklin Institute, Philadelphia, 15 Feb. 1871. It may be employed in the arts, for making, &c.; for that purpose a company was at work, 1874.

SANDHASTANS, see *Glaucis*.

SANDEFURST, ROYAL MILITARY COLLEGE, founded, first at High Wycombe, in 1759; removed to Great Marlow in 1804, and to Sandhurst in 1812. It consists of the staff college and cadets' college. SANITATION, the preservation of health. Strict cleanliness is enjoined in the law of Moses, 1490 a.o. Great attention has been paid to the public health in France since 1802. Tardieu published his "Dictionnaire de Hygiène," 1832-54. Sanitary commissions were appointed in 1838 and 1844. To Dr. Southwood Smith is mainly attributable the honour of commencing the agitation on the subject of public health in England about 1832; his "Philosophy of Health" having excited much attention. Since 1838 he has published numerous sanitary reports, having been much employed by the government. Professors of hygiene are now appointed. See *Health, Public Health, and Hygiene* (Congresses). SARDIS, see under *Seven Churches*.

SARMATIA, the ancient name for the country in Asia and Europe between the Caspian Sea and the Vistula, including Russia and Poland. The Sarmata or Sauromate troubled the early Roman empire by incursions. After subduing the Scythians

they were subjugated by the Goths, in the 3rd and 4th centuries. They joined the Huns and other barbarians in invading Western Europe in the 5th century.

SARNO (S. Italy). Near this river, Tois, king of the Goths, was defeated and slain by Justinian's general Narces, March, 553.

SARUM, OLD (Wiltshire), an ancient British town, the origin of Salisbury (*which see*). Although completely decayed, it returned two members to parliament till 1832.

SASSANIDES, descendants of Artaxerxes or Artabaz, whose father, Babel, was the son of Sassan. He revolted against Artabanus, the king of Parthia; defeated him on the plain of Hormuz, 226; and re-established the Persian monarchy. This dynasty was expelled by the Mahometans, 652; *see Persia*.

SATAN, *see Devil Worship*.

SATELLITES, *see Planets, Jupiter, Mars, Saturn*.

SATIRE. About a century after the introduction of comedy, satire made its appearance at Rome in the writings of Lucilius, called the inventor of it, 116 B.C. *Levy*. The Satires of Horace (35 B.C.), Juvenal (about A.D. 100), and Persius (about A.D. 60), are the most celebrated in ancient times, and those of Churchill (1761) and Pope (1729), in modern times. Butler's "Hudibras," satirizing the presbyterians, first appeared in 1663. *Satire Menippée*, a celebrated satirical pamphlet, partly in verse and partly in prose, attacking the policy of the court of Spain and the league, written in the style of the biting satires of the cynic philosopher Menippus. The first part, "Catholicon d'Espagne," by Leroy, appeared in 1593; the second, "Abrégé des États de la Ligue," by Gillot, Pithou, Rapin, and Fumeau, appeared in 1594. *Boutillet*.

SATRAPIES, divisions of the Persian empire, formed by Darius Hystaspes about 516 B.C.

SATTARA (W. India) was long a flourishing state, founded by Sevaraj about 1646; subjugated by the Maharrattas about 1749; conquered by the British, 1818; ruled by a rajah under the protection of the company. The last rajah died without issue in 1848; when the country was annexed.

SATURDAY (the last, or seventh day of the week; the Jewish Sabbath; *see Sabbath*). It was so called from an idol worshipped on this day by the Saxons, and according to Yastegan, was named by them Saterne's day. *Pardon*. It is more probably from Saturn, *dis Saturni*. *Saturday Review*, an independent literary weekly journal, was first published, 3 Nov. 1855. *See Hospital*.

SATURN, the planet, ascertained to be about 900 millions of miles distant from the sun, and its diameter to be about 77,230 miles. One of the eight satellites was discovered by Huyghens (25 March, 1655); four by Cassini (1672-84); two by air William Herschel (1789), and one by Bond and Lassell (1848). The ring was observed by Galileo, about 1610; its annular form determined by Huyghens, about 1655; and discovered to be two-fold by Messrs. Bail, 13 Oct. 1665; an inner ring was detected in 1850 by Dawes in England (29 Nov.), and by Bond in America.

SATURNALIA, festivals in honour of Saturn, father of the gods, were instituted long before the foundation of Rome, in commemoration of the freedom and equality which prevailed on the earth in his golden reign. Some, however, suppose that the Saturnalia were first observed at Rome in the

reign of Tullus Hostilius (673-640 B.C.), after a victory obtained over the Sabines: whilst others suppose that Janus first instituted them in gratitude to Saturn, from whom he had learned agriculture. Others assert that they were first celebrated after a victory obtained over the Latins by the dictator Posthumus, when he dedicated a temple to Saturn, 497 B.C. During these festivals no business was allowed, amusements were encouraged, and distinctions ceased. *Langlet*.

SAVAGE CLUB, instituted by various literary men, in 1857, facetiously terming themselves "savages," on account of their freedom from conventionalism. On some occasions they gave a war-whoop. *Saks*. Mr. W. E. Gladstone was present at the 22nd anniversary, 14 June, 1879, and the prince of Wales has been a visitor (1882).

SAVANDROOG (Mysoor, S. India), a strong fortress, was captured by the British without loss, 21 Dec. 1791.

SAVINGS' BANKS. The first of these was instituted at Berne, in Switzerland, in 1787, by the name of *caisse de domestiques*, being intended for servants only; another was set up in Basel, in 1792, open to all depositors. The rev. Joseph Smith, of Wendover, began a Benevolent Institution in 1799; and in 1803-4, a "charitable bank" was instituted at Tottenham by Miss Fricilla Wakefield. The rev. Henry Duncan established a parish bank at Ruthwell in 1810. One was opened in Edinburgh in 1814. The benefit clubs, among artisans, having accumulated stocks of money for their progressive purposes, a plan was adopted to identify these funds with the public debt of the country, and an extra rate of interest was held out as an inducement; hence were formed savings' banks to receive small sums, returnable with interest on demand.

Rt. hon. Geo. Rose developed the system, and brought it under parliamentary control, 1826.

In 1840 there were 550 banks; 766,354 depositors; amount, 22,060,004.

Acts to consolidate and amend previous laws relating to savings' banks were passed in 1828 and 1847; extended to Scotland in 1835; again consolidated and amended in 1863, 1866 and 1887.

On 30 Nov. 1881, the number of savings' banks in Great Britain and Ireland was 471, leaders above 20,000 friendly societies and charitable institutions. The depositors (in the banks) were 1,092,581, while the societies embraced a vast but unknown number of persons: the amount of deposits was 32,803,511.

SAVONA (a manufacturing town, N Italy, *lun.*, held by the Genoese) was captured by the king of Sardinia in 1746, by the French in 1809, and annexed restored to Sardinia at the peace. Pope Pius VII was kept here by Napoleon I., 1809-12. Soap is said to have been invented here, and hence its French name *savon*.

SAVOY, the ancient *Sapaudia* or *Sabaudia*, formerly a province in N Italy, east of Piedmont. It became a Roman province about 118 B.C. The Alamanni seized it in A.D. 395, and the Franks in 490. It shared the revolutions of Switzerland till about 1048, when Conrad, emperor of Germany, gave it to Humbert, with the title of count. Count Thomas acquired Piedmont in the 13th century. Amadeus, count of Savoy, having entered his dominions, solicited Sigismund to erect them into a duchy, which he did at Cambrai, 19 Feb 1416. Victor-Amadeus, duke of Savoy, obtained the kingdom of Sicily from Spain, by a treaty, in 1713, but afterwards exchanged it with the emperor for the island of Sardinia, with the title of king, 1720. The French subdued Savoy in 1792, and made it a department of France, under the name of Mont Blanc, in 1800. It was restored to the king of Sardinia in 1814, but with Nice annexed to France in 1860, in accordance with a vote by universal suffrage, 23 April, 1860. Savoy was visited by the emperor and empress of the French in August, 1860. The annexation was censured in England.

SAVOY PALACE (London), was built by Peter of Savoy, uncle of Eleanor, queen of Henry III, in 1245, on land granted to him. He gave it to the fraternity of Mountjoy (Monte Jovis), from whom it was purchased by queen Eleanor for her son Edmund. Here resided John, king of France, when a prisoner, 1357 & seq. The Savoy was burnt by Wat Tyler and his followers, 1381. It was restored as an hospital of St John the Baptist by Henry VII about 1505. The fruitless CONVENTION of bishops and eminent puritans for the revision of the liturgy was held at the Savoy, April-July, 1661. The hospital was dissolved in 1702, and the buildings (then used as a military prison) removed for Waterloo-bridge and its approaches, 1817-19. The ancient *Chapel* (which once enjoyed the privilege of sanctuary), after several restorations, was destroyed by fire, 7 July, 1864, and was rebuilt at the queen's expense, and re-opened 26 Nov 1865. The privilege of sanctuary, much abused, was abolished by parliament 1697. The Rev Henry White, 30 years chaplain, died 7 Oct 1890.

SAW Invented by Dædalus *Pliny*. Invented by Talus *Apollodorus*. Talus, it is said, having found the jaw-bone of a snake, employed it to cut through a piece of wood, and then formed an instrument of iron like it. Saw-mills were erected in Madeira in 1420 at Breslau in 1427. Norway had the first saw-mill in 1530. The bishop of Ely, ambassador from Mary of England to the court of Rome describes a saw-mill there, 1555. The attempts to introduce saw-mills in England were violently opposed, and one erected by a Dutchman in 1663 was forced to be abandoned. Saw-mills were erected near London about 1770. The excellent saw machinery in Woolwich dockyard is based upon the invention of the elder Brunel, 1806-13. The circular saw was introduced into England about 1790. The *saw gin* for separating cotton wool from the pod, invented by Eli Whitney, an American, in 1793, led to the immense growth of cotton in the southern states of the Union. Fowles and James's band saw was patented in 1858.

KINGS OF SCOTLAND

BEFORE CHRIST

[The early accounts of the kings are in a great measure
fabelous. The series of kings is carried as far back as
Alexander the Great.]

350 Fergus I. ruled 25 years, lost in the Irish Sea.
[Fergus, a brave prince, came from Ireland with an army
of Scots, and was chosen king. Having defeated the
Britons and slain their king Colus, the kingdom of the
Scotts was entailed upon his posterity for ever. He
went to Ireland, and, having settled his affairs there,
was drowned on his return, launching from the shore,
near the harbour, called *Cerrack Feryus* to this day,
3599 A.M. *Anderson*.]

AFTER CHRIST

357 Eugenius I., son of Fircornachus slain in battle
by Maxentius the Roman general and the Scots

SCOTT CENTENARY, celebrated in London and throughout Scotland, 9 Aug. 1871. Sir Walter Scott was born 15 Aug. 1771.

SCOTTISH CORPORATION (charitable), established 1665. The old hall, Crane-court, Fleet-street, built by Wren, burnt 14 Nov. 1877; new hall inaugurated 21 July, 1880.

SCOURERS, see *Mohocks*.

SCOURING OF THE WHITE HORSE, see *Ashdown*.

SCREW, was known to the Greeks. The pumping-screw of Archimedes, or screw-cylinder for raising water, invented about 236 B.C., is still in use. It is stated that with the assistance of the screw, one man can press down or raise up as much as 150 men can do without it.—The *Screw-Propeller* consists of two or more twisted blades, like the vanes of a windmill, set on an axis, running parallel with the keel of a vessel, and revolving beneath the water at the stern. It is driven by a steam-engine. The principle was shown by Hooke in 1681, and since by Du Ruc, Bornoulli, and others. Patents for propellers were taken out by Joseph Bramah in 1784, by Wm. Lytleton in 1794; and by Edward Shorter in 1799. But these led to no useful result. In 1836 patents were obtained by Francis Pettit Smith (knighted July, 1871; died, 12 Feb. 1874) and captain John Ericsson (died, aged 86, March, 1889); and to them the successful application of the screw-propeller must be attributed. The first vessels with the screw were the *Archimedes*, built on the Thames in 1838 by H. Winchurst, and the *Rattler*, built in the United States (1844), and tried in England in 1845. Double screw-propellers are now employed. A new form of screw-propeller invented by col. W. H. Mallory, of U. S. A. army, was tried on the Thames and reported successful, Aug. 1878.

SCRIBLERUS CLUB, a literary club, founded by Swift in 1714, included amongst its members, Bolingbroke, Pope, Gay, and Arbuthnot.

SCRIPTURE KNOWLEDGE INSTITUTION, Bristol, was founded by George Muller, a Prussian (born in 1805). He came to Bristol as a minister of the "Brethren" in 1832, and on 5 March, 1834, founded this institution, the objects of which are: 1. Assistance of schools giving instruction on scriptural principles; 2. Circulation of the scriptures; 3. Assistance to missions; 4. Circulation of tracts; 5. Provision for destitute orphans, see *Orphan-houses*. Without application, Mr. Muller, since he began, up to 1868, had received by voluntary contribution, 430,000*l*.

SCROFULA, see *King's-evil*.

SCRUTIN (French for ballot). In *scrutin de liste* the voter writes on his paper as many names as there are persons to be elected, for instance for the whole department. In *scrutin d'arrondissement*, the members are elected separately. The adoption of one of these modes was much discussed in France in 1875. The conservatives prefer the latter, the radicals the former. See *France*, Nov. 1875. The *scrutin de liste* was adopted in the elections of 1848, 1849, 1871, and 1875.

M. Bardon's bill for adopting the *scrutin de liste* (warmly advocated by M. Gambetta), was passed by the chamber of deputies (243-235), 18 May, 1881; rejected by the senate (148-124), 9 June, 1881; again rejected, Jan. 1882.

M. Waldeck Roussseau's bill for the *scrutin de liste* passed by the deputies (323-99), 24 March, finally passed, 9 June, 1885.

The bill for the restoration of the *scrutin d'arrondissement* passed by the chamber 12 Feb. and senate 13 Feb. 1880.

The *scrutin de liste* was adopted by the Italian chamber, 24 Feb. 1882.

SCULLABOGUE, see *Masquerade*, 1798.

SCULPTURE is said to have begun with the Egyptians. Bezaleel and Aholiab built the tabernacles in the wilderness, and made all the vessels and ornaments, 1491 B.C., and their skill is recorded as the gift of God. *Exod. xxxi. 3*. Diponius and Seylla, statuarys at Crete, established a school at Sicyon. Pliny speaks of them as being the first who sculptured marble and polished it; all statues before their time being of wood, 568 B.C. Alexander gave Lysippus the sole right of making his statues, 326 B.C. He left no less than 600 pieces, some of which were so highly valued in the age of Augustus, that they sold for their weight in gold. Sculpture did not flourish among the Romans, and in the middle ages with some fine exceptions, was generally degraded. With the revival of painting, it revived also; and Donato di Bardi, born at Florence, A.D. 1383, was the earliest professor among the moderns. An institute of sculptors was established in 1861. See *Royal Academy and Statues*.

SCOUTAGE or **ESCOUAGE**. The service of the *escauld* (scout) is either uncertain or certain. *Escauld* uncertain is where the tenant by his tenure is bound to follow his lord; and is called *Casteward*, where the tenant is bound to defend a castle. *Escauld* certain is where the tenant is set at a certain sum of money to be paid in lieu of such uncertain services. The first tax levied in England to pay an army, 5 Hen. II. 1159. *Cowel*.

SCOUTARI, Asiatic Turkey, opposite Constantinople, of which it is a suburb. It was anciently called *Chrysopolis*, golden city, in consequence, it is said, of the Persians having established a treasury here when they attempted the conquest of Greece. Near here Constantine finally defeated Licinius, 323. The hospital was occupied by the sick and wounded of the Anglo-French army, in 1854-5, whose sufferings were much alleviated by the kind exertions of Miss Florence Nightingale and a band of nurses under her, aided by a large fund of money (£5,000) subscribed by the public and placed in the care of the proprietors of the *Times* newspaper; see *Times*. Explosion of powder magazine by lightning, about 150 killed, 8 June, 1883.

SCYTHIA, situate in the most northern parts of Europe and Asia. The boundaries were unknown to the ancients. The Scythians made several irruptions upon the more southern provinces of Asia, especially 624 B.C., when they remained in possession of Asia Minor for twenty-eight years, and at different periods extended their conquests in Europe, penetrating as far as Egypt; see *Tartary*.

SEA. Lieut. Maury first published his "Physical Geography of the Sea" in 1854, and other important works since; he died Feb. 1873; see *Deep Sea*.

SEA BIRDS' PRESERVATION ACT, passed 24 June, 1869.

SEA FIGHTS see *Naval Battles*.

SEA FISHERIES, see *Fisheries*, and *Behring Straits*.

SEAL FISHERY ACT, passed 14 June, 1875.

SEALS or **SIGNETS**. Engraved gems were used as such by the Egyptians, Jews, Assyrians, and Greeks; see *Erod.* xxviii. 14. Ahab's seal was used by Jezebel, 899 B.C. (1 *Kings* xxi. 8.) The Romans in the time of the Tarquins (about 600 B.C.) had gummed rings. They sealed rooms, granaries, bags of money, &c. The German emperor, Frederick I. (A.D. 1152) had seals of gold, silver, and tin. Impressions of the seals of Saxon kings are extant; and the English great seal is attributed to Edward the Confessor (1041-66). "A seal with armorial bearings before the 11th century, is certainly false," *Foebroke*. The most ancient English seal with arms on it is said to be that of Richard I. or John. White and coloured waxes were used. Our present sealing-wax, containing shellac, did not come into general use in Germany and England until about 1550. Red waxes for seals came into use about 1624; but were not used for public seals till the 18th century. A seal acquired by the British Museum made of black hematite, thought to be Hittite, found at Yuzgat in Asia Minor, announced Nov. 1886. *Naval Society*, for publication of fac-similes of ancient seals, was established in 1883.—For **SEALED LETTERS**, see *Great Seal* and *Lettres du Cachet*.

SEAMEN. In consequence of the great loss of life by wrecks of merchant vessels, attributed to bad ships and overloading, a commission of inquiry was agreed to by parliament on the motion of Mr. S.

Pimsoil (who published "Our Seamen: an Appeal"), 4 March, 1873. The duke of Edinburgh was on the commission; the duke of Somerset, chairman. Mr. Pimsoil has been censured for exaggeration.

The report issued in September tended to justify the public apprehensions, but suggested no remedy. The report presented to parliament, 2 July, 1879, condemned the present insurance system, and recommended increased responsibility of owners and others, and strengthening the powers of the Board of Trade for investigation.

The Merchant Shipping Survey Bill was rejected (173-170) 24 June, 1874.

After much excitement, an Act was passed to give further powers to the Board of Trade to stop unseaworthy ships 13 Aug. 1875.

Another Merchant Shipping Act (which see) passed 15 Aug. 1876.

Strong circular issued by the Board of Trade (Mr. Chamberlain); deaths of the employed in ships asserted to be: in 60; in coal mines: in 315; present system stated to be inefficient. Jan. 1884. First annual congress of the National Seamen's and Firemen's union held at Cardiff (Mr. Pimsoil present). 8 Oct. 1889.

SEAS, SOVEREIGNTY OF THE. The claim of England to rule the British seas is of very ancient date. Arthur is said to have assumed it, and Alfred afterwards supported this claim. It was maintained by Selden, and measures were taken by government in consequence, 8 Chas. I. 1633. The Dutch, after the death of Charles I., made some attempts to obtain it, but were roughly treated by Blake and other admirals. Russia and other powers of the north aimed to avoid search, 1780; again, 1800; see *Armed Neutrality and Flag*. The international rule of the road at sea was settled in 1862; (new rules were issued in 1879 and 19 Aug. 1884), yet near Great Britain alone there have been 13,000 collisions in six years. Mr. Wm. Stirling Lacon proposed to reduce the rules from 749 words to 144, for simplicity and security. His form had been nine times before parliament, 1873. Revised rules issued by the admiralty in a "Fleet Circular," Nov. 1885.

The British Board of Trade appointed a committee, consisting of admirals N. Bowden Smith, sir Robert Moynaux, sir George B. Nares, and others, to consider measures for the prevention of collisions at sea; first meeting 1 Aug. 1880.

SEASONS. The four natural divisions of the year.

In the north temperate regions in 1884, the spring quarter began 20 March, 5 a.m., the summer, 21 June, 1 a.m., the autumn, 22 Sept. 3 p.m., the winter, 21 Dec. 10 a.m. See *Lapland seasons under Year*. James Thomson's "Seasons" published: "Winter," 1726; "Summer," 1727; "Spring," 1728; "Autumn," 1730. Haydn's "Seasons" first performed, 1801.

SEATS BILL, see *under Reform*.

SEBASTIAN, ST. (N. Spain), was taken by the French, under the duke of Berwick, in 1719. It was besieged by the British and allied army under Wellington. After a most heavy bombardment, by which the whole town was laid nearly in ruins, it was stormed by general Graham (afterwards lord Lynedoch), and taken 31 Aug. 1813.—On 5 May, 1836, the fortified works, through the centre of which ran the high road to Hernani, were carried by the English auxiliary legion under general Evans, after very hard fighting. The British naval squadron, off St. Sebastian, under lord John Hay, lent very opportune aid to the victors in this contest.—A vigorous assault was made on the lines of general De Lacy Evans, at St. Sebastian, by the Carlists, 1 Oct. 1836. Both parties fought with

bravery. The Carlists were repulsed, after suffering severely. The loss of the Anglo-Spanish force was 376 men and 37 officers, killed and wounded. General De Lacy Evans was slightly wounded. See under *Leagues*. The queen regent of Spain meets queen Victoria here, 27 March, 1889. Population, 1887, 29,047.

SEBASTOPOL or **SEVASTOPOL**, a town and once a naval arsenal, at S.W. point of the Crimea, formerly the little village of Akkier. The buildings were commenced in 1784, by Catherine II. after the conquest of the country. The town is built in the shape of an amphitheatre on the rise of a large hill flattened on its summit, according to a plan laid down before 1794, which has been since adhered to. The fortifications and harbour were constructed by an English engineer, colonel Upton, and his sons, since 1830. The population in 1834 was 15,000. This place underwent eleven months' siege, by the English and French in 1854 and 1855. Immediately after the battle of the Alma, 20 Sept. 1854, the allied army marched to Sebastopol, and took up its position on the plateau between it and Balaklava, and the grand attack and bombardment commenced 17 Oct. 1854, without success. After many sanguinary encounters by day and night, and repeated bombardments, a grand assault was made on 8 Sept. 1855, upon the Malakoff tower and the Redana, the most important fortifications to the south of the town. The French succeeded in capturing and retaining the Malakoff. The attacks of the English on the great Redan and of the French upon the little Redan were successful, but the assailants were compelled to retire after a desperate struggle with great loss of life. The French lost 1646 killed, of whom 5 were generals, 24 superior and 116 inferior officers, 4500 wounded, and 1400 missing. The English lost 385 killed (20 being commissioned and 42 non-commissioned officers), 1886 wounded, and 176 missing. In the night the Russians abandoned the southern and principal part of the town and fortifications, after destroying as much as possible, and crossed to the northern forts. They also sank or burnt the remainder of their fleet. The allies found a very great amount of stores when they entered the place, 9 Sept. The works were utterly destroyed in April, 1856, and the town was restored to the Russians in July; gen. Todleben, the able defender, died 1 July, 1884, and was buried here; his monument uncovered 28 June, 1890. See *Russo-Turkish War*. Population of Sebastopol, 1885, 33,803.

SECEDERS; SECESSION CHURCH, see *Burghes*.

SECONDARY OF LONDON, an ancient office, resembling that of under-sheriff in counties. The place was purchaseable till early in the present century, when it was bought up by the corporation.

SECRET SOCIETIES, *Assassins, Fenians, Ribbonmen, Fakim, Tribunals, Rosicrucians, Illuminati, Carbonari, Mary-Anne, Nihilists*.

* In consequence of the sufferings and disasters of the army in the winter of 1854-5, the Sebastopol Inquiry Committee was appointed, and the Aberdeen administration resigned, Feb. 1855. The committee sat from 1 March to 13 May, and Aberdeen being the last person examined. Its report was presented 16 June. Mr. Roebuck, the chairman, moved on 17 July that the house should pass a vote of severe reprobation on every member of the Aberdeen administration. On 29 July his motion was lost by a majority of 107 against it. In 1855 the government sent Mr. John McNeill and Col. Tulloch to inquire into the state of the armies in the Crimea. Their report was presented to parliament in Feb. 1856. A commission was appointed to consider the statements in the report (which were very unfavorable to many officers), but the substance of the report was unshaken.

SECRETARIES OF STATE. The earliest authentic record of a secretary of state is in the reign of Henry III., when John Maunsell is described as "*Secretarius Noster*," 1253. *Eymer*. Towards the close of Henry VIII.'s reign, two secretaries were appointed; and upon the union with Scotland, Anne added a third as secretary for Scotch affairs; this appointment was afterwards laid aside; but in the reign of George III. the number was again increased to three, one for the American department. In 1782 this last was abolished by act of Parliament, and the secretaries were appointed for home, foreign, and colonial affairs. When there were but two secretaries, one held the *portefeuille* of the Northern department, comprising the Low Countries, Germany, Denmark, Sweden, Poland, Russia, &c.; the other, of the Southern department, including France, Switzerland, Italy, Spain, Portugal, and Turkey; the affairs of Ireland belonging to the elder secretary; both secretaries then equally directed the home affairs. *Beaton*. There are now six secretaries—home, foreign, colonial, war, (in 1858) India, and (in 1885) Scotland, all in the cabinet. Secretary of State for Scotland act passed 14 Aug. 1885, amended 1887, explained 1889. See *Administrations*, and separate articles.

The *Institute of Secretaries* was started at a meeting in London, 4 July, 1890, to collect information respecting the position, duties, and responsibilities of secretaries to be applied for their benefit. First dinner 24 June, 1891.

SECTS, RELIGIOUS, see under *Worship*, and their respective titles.

SECULAR GAMES (*Ludi Seculares*), very ancient Roman games, celebrated on important occasions. Horace wrote his "*Carmen Seculare*" for their celebration in the reign of the emperor Augustus (17). They took place again in the reign of Claudius (47), of Domitian (88), and for the last time, of Philip (238), believed to be 2000 years after the foundation of the city.

SECULARISM, a name given to the principles advocated by G. J. and Austin Holyoake, about 1846, and since by Mr. Bradlaugh.

Its central idea is free, not lawless thought, and it considers acceptance to be security. It advocates liberty of action without injury to others. It is not against Christianity, but independent of it. Its standard is utilitarian, it is the religion of the present life only; teaching men to seek morality in utility, and happiness, in duty. Mr. Austin Holyoake and other secularists repudiated atheism, Mr. Bradlaugh and others profess it.

SECURITY FROM VIOLENCE ACT, passed in 1863, appointed whipping as part of the punishment for attempts at garroting.

SEDAN, an ancient fortified city in the valley of the Meuse, N.E. of France, the seat of a principality long held by the dukes of Bouillon. On 6 July, 1641, a victory was gained at *La Marée*, near Sedan, by the count of Soissons and the troops of Bouillon and other French princes, over the royal army supporting Richelieu; but the count was slain on 23 June, 1642. The duke was arrested in the midst of his army, and was made to cede Sedan to the crown. The protestant university was abolished after the revocation of the edict of Nantes, 22 Oct. 1685. Around this place a series of desperate conflicts on 29, 30, and 31 Aug. between the French army of the north, under marshal MacMahon (about 150,000 men), and the greater part of the three German armies under the king and crown-prince of Prussia and the crown-prince of Saxony (about 250,000 men) was brought to a close on 1 Sept. 1870. The battle began with attacks on the French right and left about 3 a.m., and was very severe at 3 p.m. At 4

p.m. the Germans remained masters of the field, and the towns-people of Prussia announced a complete victory, the chief part of the French army retreating into Sedan.

The emperor Napoleon was present during the battle, and, it is said, stood at Igny, near Sedan, exposed for four hours to the German grenades. The impossibility of further resistance was then evident. The Germans had constructed their circle close round Sedan, their formidable artillery held all the heights, from which they could at pleasure wholly destroy the town and the army, and only 3000 men were in a condition to respond to their commander's call, and to make a supreme effort to break through the enemy with the emperor and escape to Montmédy.

At first general de Wimpfen (called to the command when MacMahon was wounded) indignantly rejected the terms offered by the victor, and the emperor had a fruitless interview with count Bismarck to endeavour to mitigate them.

On 2 Sept. the emperor wrote in autograph to the king of Prussia, "Mon frère, n'avant pu mourir à la tête de mes troupes, je dépose mon épée au pied de votre majesté, Napoléon." A capitulation of Sedan and the whole army therein was signed by generals Van Moltke and De Wimpfen at the château of Bellevue, near Frenois, at 11.30 a.m., and at 2 p.m. an interview took place between the king and the emperor, who was downcast but dignified.

The conflict was principally carried on by the artillery, in which (according to the emperor) the Germans had the advantage, not only in number (600 to 500), but also in weight, range, and precision. The carnage was awful, and the field the next day was a mass of shattered bones, torn flesh, and coloured rags.

About 35,000 French prisoners were taken in the battle, and 63,000 surrendered the next day, together with 70 mitrailleurs, 400 field-pieces, and 130 fortress guns. About 11,000 French wounded were found lying in the neighbourhood, and about 3000 escaped into Belgium and laid down their arms. The great army of the north had ceased to exist. Among the killed was lieutenant-col. Fremy, a correspondent of the Times, who had approached too near the conflict.

The French emperor and his suite arrived at Wilhelmshöhe, a castle near Cassel appointed for his residence, (formerly inhabited by his uncle Jerome, when king of Westphalia), in the evening of 5 Sept.

On 2 Sept. the village of Bazailles was stormed by the Prussians and burnt. It was said, because the inhabitants fired on the ambulances; many women and children perished. The French denied the provocation. The place had been previously twice bombarded and stormed by the mutilated combatants.

In a letter dated 12 May, 1872, the emperor Napoleon took upon himself the whole responsibility of the surrender of Sedan.

SEDAN CHAIRS (so called from Sedan), were first seen in England in 1581. One used in the reign of James I., by the duke of Buckingham, caused great indignation, and the people exclaimed that he was employing his fellow-creatures to do the service of beasts. Sedan chairs came into London in 1614, when sir Francis Duncomb obtained the sole privilege to use, let, and hire a number of such covered chairs for fourteen years. They came into very general use in 1649.

SEDANGS, a tribe dwelling on the borders of Annam. M. de Mayreux, an ex-officer of the French navy, having made himself their king, came to Paris. He was set aside, and the Sedangs were brought under French protection by the French resident-general in Indo-China; reported Oct. 1889.

SEDMOOR (Somersetshire), where the duke of Monmouth (natural son of Charles II. by Lucy Walters), who had risen in rebellion on the accession of James II., was completely defeated by the royal army, 6 July, 1685. The duke was made a prisoner in the disguise of a peasant, at the bottom of a ditch, overcome with hunger and fatigue. He was tried and beheaded on 15 July following.

SEDITION. Sedition acts were passed in the reign of George III. The proclamation against seditious writings was published May, 1792. The celebrated Sedition bill passed Dec. 1795. Seditious societies were suppressed by act, June, 1797. The Seditious Meetings and Assemblies bill passed 37 March, 1817. In Ireland, during the Roman Catholic and Repeal agitation, acts or proclamations against sedition and seditious meetings were published from time to time until 1848.

SEEDS. An act was passed to prevent the adulteration of seeds (a common practice), 11 Aug. 1869; amended in 1878.

SEEKERS, see *Quakers*.

SEGEDIN, or **SEZEGEDIN**, Hungary. Here was concluded a treaty between Ladislaus IV. and Amurath II., 12 July, 1444. It was treacherously annulled at the instigation of cardinal Julian, who with Ladislaus perished in the fatal battle of Varna, 10 Nov. 1444. See *Varna*.

SEICENTO, see under *Italian*.

SEIDLICE (Poland), where a battle was fought 10 April, 1831, between the Poles and Russians. The Poles obtained the victory after a bloody conflict, taking 4000 prisoners and several pieces of cannon; but this success was soon followed by fatal reverse.

SEISMOMETER (from *seismos*, Greek for earthquake), an apparatus for measuring the violence of the shocks. One is described by Mr. Robert Mallet in his work on earthquakes, published in 1858. Many described by Prof. J. A. Ewing, 1880-3.

SELA, see *Petra*.

SELBORNE SOCIETY, for the preservation of birds, plants, and pleasant places, originated in the Selborne league (afterwards society) formed by Mr. and Mrs. G. A. Musgrave in Nov. 1885. It has included the plumage league since Jan. 1886, (see under *Birds*).

SELDEN SOCIETY, founded 29 Jan. 1887, for the study of English legal history, and publication of ancient MSS. and books, by lords justice Fry, Coleridge, and Lindley, and other eminent lawyers. John Selden, legal antiquary, born 16 Dec. 1584, died 30 Nov. 1654.

SELECT-MEN, the earliest officers of the townships formed by the first colonists of New England about 1635.

SELECTION, *NATURAL*, see *Species*.

SELENIUM, a grayish-white elementary substance (chemically resembling sulphur), discovered in the stone riolite by Berzelius, in 1817.

The variation in its resistance to the electric current when subjected to light was observed by Mr. Willoughby Smith in 1873, and utilised in the telephone (which see). Dr. C. Wm. Siemens constructed a "selenium eye."

SELEUCIA (Syria), made the capital of the Syrian monarchy by its builder, Seleucus Nicator, 312 B.C. On the fall of the Seleucids, it became a republic, 65 B.C. It was taken by Trajan, A.D. 116; several times given up and retaken; subjugated by the Saracens, and united with Ctesiphon, 636.

SELEUCIDES, *ERA OF THE*, dates from the reign of Seleucus Nicator. It was used in Syria for many years, and frequently by the Jews until the 15th century, and by some Arabians. Opinions vary as to its commencement. To reduce it to our

are (supposing it to begin 1 Sept. 312 B.C.), subtract 311 years 4 months.

SELF-DENYING ORDINANCE, which ordained that no member of parliament should hold any civil or military office or command conferred by either or both of the houses, or by authority derived from them, after much discussion, was passed 3 April, 1655, by the influence of Cromwell, who thus removed the earl of Essex and other Presbyterians out of his way. A somewhat similar ordinance was adopted by the parliament at Melbourne in Australia, in 1858. The name was given to an arrangement made respecting British naval promotions and retirements in 1870.

SELLASIA (Laconia). Here the Spartans under Cleomenes were defeated by Antigonus Doseon and the Achæans, 221 B.C.

SELSEY, see *Chichester*.

SEMAPHORE, see *Telegraphs*.

SEMATOLOGY (Greek *sema*, a sign), the science of signs, a term proposed by B. H. Smart, who died 1872.

SEMINARA (Naples). Near here Gonsalvo de Cordova, the great captain, was defeated by the French, in 1495; but defeated them, 21 April, 1503.

SEMINCAS, see *Simancas*.

SEMPACH (Switzerland). Here the Swiss gained a great victory over Leopold, duke of Austria, 9 July, 1386, under Arnold von Winkelried; the duke and Arnold were slain, and the liberty of Switzerland was established. The day is still commemorated. Especially on 5 July, 1886.

SEMPER PARVUM ("Always the same"), one of the mottoes of queen Elizabeth, was adopted by queen Mary and queen Anne, 13 Dec. 1702.

SEMPERPERINGHAM, see *Gilbertines*.

SENATE (*Senatus*). In the ancient republic the government was divided between the *senatus* (from *senia*, old; in Greek, *gerousia*, from *geron*, old), an assembly of elders, and the popular assembly (*comitia*, Latin; *ekklesia*, Greek), the king being merely the executive. The Roman senate, said to have originally been composed of 100 members, was raised to 300 by Tarquinius Priscus; to about 600 by Sylla, about 81 B.C.; and to 900 by Julius Cæsar. It was reformed and reduced to 600 by Augustus; and gradually lost its power and dignity under the emperors. The mere form existed in the reign of Justinian. A second senate, formed at Constantinople by Constantine, retained its office till the 6th century. S. P. Q. R. on the Roman standard stood for "Senatus Populusque Romanus," "the Roman senate and people." A *senatus consultum* was a law enacted by the senate.

The French senate was created by the constitution of the year 8, promulgated 24 Dec. 1799, to watch over the administration of the laws. The number of senators was raised gradually from 60 to 137. The senate was replaced by the chamber of peers in 1814; re-established by Napoleon III. 14 Jan. 1852; and abolished, 5 Sept. 1870. Its re-establishment was proposed in 1873. Establishment of a senate of 300 voted; 223 to be elected for 9 years by the departments; 75 (for life) by national assembly, 22 Feb. 1875.

The 75 elected, 9-11 Dec., 1875. The congress of 13 Aug. 1884, ordered the gradual abolition of life senators as vacancies occurred: new senators were to be elected for 9 years by the departments; enacted, 5 Nov.; bill passed by the deputies and senate, 4-9 Dec. 1884. See *Fraser*.

SENEFFE (Belgium). Near here was fought a severe but indecisive battle between the Dutch, under the prince of Orange (afterwards our William III.), and the French, led by the great Condé, 11 Aug. 1674.

SENEGAL, French colonies on the river of that name in Senegambia, W. Africa, settled about 1626; several times taken by the British, but recovered by the French, to whom they were finally restored in 1814.

The French opposed by two powerful chiefs, Samori and Ahmadou, sultan of Toucouleur; Samori, defeated by the French, makes a treaty.

Very great loss of life and property by unexampled floods; towns and villages wholly submerged.

Ang. Sept. 1890.

French war with the natives, 1890; the chief Ahmadou's army defeated in sharp battles; the French, under col. Archinard, enter Niaro, 1 Jan. 1891.

Ahmadou again defeated by col. Archinard; many prisoners taken; Ahmadou fled; Niaro restored to the chiefs, reported.

18 Jan. " The rebel tribes defeated, near Diania; 600 rebels killed, 24 Feb. Diania and Kinian taken by col. Archinard, reported.

March. " War with Samori renewed; he returns to his southern territories, after much carnage and desolation.

April-June, " Intestine wars between the native chiefs, Ahmet-Saloum and Amar-Saloum, Ahmet-Saloum victor, reported Aug. "

Expedition of colonial Humbert against Samori in French Soudan, 1 Jan., whom he defeats, 9, 14 Jan., and takes two strongholds, 25 Jan.; fresh conflicts; capt. Menard killed, reported.

6 April, colonial Humbert victorious, 14 March; the French repulsed by Samadou, reported.

7 May, 1892.

SENECHAL, a high officer of the French royal household. In the reign of Philip I. 1059, the office was esteemed the highest place of trust.

SENLAC, see *Hastings*.

SENONES (see *Gauls*), defeated by Camillus, 367 B.C. They defeated Metellus the consul at Arretium, 284, but were almost exterminated by Dolabella, 283. They invaded Greece in 279; were defeated by Antigonus Gonatas, 278; and sued for peace.

SENOVA, near Schipka, in the Balkans. Here Suleiman Pasha and the Turks were defeated by the Russian general Skobeloff, 9 Jan. 1878. This victory virtually closed the war, and opened the road to Adrianople. About 26,000 Turks and 283 officers were made prisoners, with 40 Krupp guns. About 8000 Turks and 2000 Russians were killed or wounded.

SENTINUM (central Italy). The site of a great victory of the Romans under Fabius Maximus, over the Samnites and Gauls, whose general, Gellius Egnatius, was slain, 295 B.C. P. Decius the other consul, devoted himself to death during the conflict.

SEPARATISTS, a term applied to the Irish National Party, headed by Mr. Parnell, about 1883. In 1884 it vehemently attacked earl Spencer and the Irish executive.—The name is also assumed by a small Christian sect in Dublin, and some other places; originated by John Walker, a classical scholar, somewhat resembling the Glasites (Prov. xviii. 1); he died 25 Oct. 1833, aged 66.

SEPHARDIM, the name given to the descendants of the highly civilised Jews of Spain and Portugal, who fled from the persecutions of the Inquisition, 1492-1505. The Jews interpret Sephard, in *Obadiah* 20, as Spain.

SEPOYS (a corruption of *sipahi*, Persian, a soldier), the term applied to the native troops in the British Service in India. The Turkish cavalry is named *Spahis*, a name also given to native cavalry in Algeria in the French service in 1834. Under able generals they greatly aided in establishing British rule in India. For their mutinies, see *Vellores*, 1806; *Madras*, 1809; and *India*, 1857.

SEPTEMBER, the seventh Roman month reckoned from March (from *septimius*, seventh). It became the ninth month when January and February were added to this year by Numa; 731 a.d. The Roman senate would have given this month the name of Tiberius, but the emperor opposed it; the emperor Domitian gave it his own name Germanicus; the senate under Antoninus Pius gave it that of Antoninus; Commodus gave it his surname, Hercules; and the emperor Tacitus his own name, Tacitus.—“September 4 government,” see *France*, Sept. 1870.

SEPTEMBRIZERS. In the French revolution a dreadful massacre took place in Paris, 2-5 Sept. 1792. The prisons were broken open, and the prisoners butchered, among them an ex-bishop, and nearly 100 non-juring priests. Some accounts state the number of persons slain at 1200, others at 4000. The agents in this slaughter were named *Septembrizers*.

SEPTENNIALISTS, the party in France who support the septennate or seven years' government of marshal MacMahon, enacted by the assembly, 19, 20 Nov. 1873. See *France*, 1874.

SEPTENNATE, in the German constitution, is the stipulation that every German fit for the duty is liable to serve for seven years in the Imperial army 4 May, 1871.

SEPTENNIAL PARLIAMENTS. Edward I. held but one parliament every two years. In the 4th Edward III. it was enacted, “that a parliament should be holden every year once.” This continued to be the statute-law till 16th Charles I. 1641, when an act was passed for holding parliaments once in three years at least; repealed in 1664. The Triennial act was re-enacted in 1694. Triennial parliaments thence continued till the 1st Geo. I. 1715, when, in consequence of the obligation that “a popish faction were designing to renew the rebellion in this kingdom, and the report of an invasion from abroad,” it was enacted that “the then parliament should continue for seven years.” This *Septennial act*, entitled “an act for enlarging the continuance of parliaments” (1715 in the statutes, 4to, given as 1 Geo. I. stat. 2, c. 38), was passed 7 May, 1716; see *Parliaments*. Several unsuccessful motions have been made for its repeal: one in May, 1837; again 24 Feb. 1880, and 8 April, 1893 (168-142).

SETTLEMENT, ACT OF, for securing the succession to the British throne, to the exclusion of Roman Catholics, was passed in 1689. This name is also given to the statute by which the crown, after the death of William III. and queen Anne, without issue, was limited to Sophia, electress of Hanover, grand-daughter of James I., and her heirs being protestants, 1702. The Irish act of settlement, passed in 1662, was repealed in 1689; see *Hanover*.

SETTLEMENT, LAW OF, of the poor, the subject of many statutes since 1535, was somewhat changed by the poor law act of 1834.

SEVEN BISHOPS, see *Bishops*, 1688.

SEVEN BROTHERS, martyrs at Rome, under Antoninus; their feast is kept 10 July.

SEVEN CHURCHES OF ASIA, to the angels (ministers) of which the apostle John was commanded to write the epistles contained in the 2nd and 3rd chapters of his Revelation, viz., Ephesus, Smyrna, Pergamos, Thyatira, Sardis, Philadelphia, and Laodicea, 96.

1. *Ephesus* (which see). Paul founded the church here, 57. In 59, he was in great danger from a tumult created by Demetrius, to the elders of this church he delivered his warning address, 60 (Acts xix. 32). Ephesus was in a ruinous state even in the time of Justinian (527), and still remains so.

2. *Smyrna*. An ancient Greek city, claiming to be the birth-place of Homer, was destroyed by the Lydians, about 607 B.C. rebuilt by Antigonos and Lysimachos. Its first bishop, Polycarp, was martyred here about 160. It has been frequently captured. It was sacked by Tamerlane in 1402, and finally taken by the Turks, 1424. It is now the chief city of Asia Minor, and the seat of the Levant trade. Earthquake, above 3000 persons, 13 May, 1875. Great fire, about 200 houses destroyed, 28 July, 1880. Population, 1883, 286,500.

3. *Pergamos*. Capital of the kingdom of the same name, founded by Philetaerus, whom Lysimachos, one of Alexander's generals, had made governor, 283 B.C. He was succeeded by Eumenes I., 263. Attalus (who took the title of king), 241. Eumenes II. (who collected a great library), 197. Attalus II., 190. Attalus III., 138. He bequeathed his kingdom to the Romans, 133. It revolted, was subdued, and made the Roman province, Asia. Pergamos is still an important place, called Bergamo. Parchment is said to have been invented here. The explorations of the ancient world, initiated by the German government in 1874, resulted in the discovery of Greek marble statues, which has been deposited in the museum at Berlin.

4. *Thyatira*. Now a mean town of 2000 houses, called Ak-hissar, "White Castle."

5. *Sardis*. Formerly the capital of Lydia, the kingdom of Croesus (560 B.C.), taken by Cyrus, 548; burnt by the Greeks, 499; it flourished under the Roman empire; was taken by the Turks; and destroyed by Tamerlane about 1465. It is now a miserable village, named Sart.

6. *Philadelphia* was built by Attalus (III.) Philadelphus,

king of Pergamos (133-138 B.C.) was taken by Bajazet I. A.D. 1390. It is now called *Alish Ebehr*, "The City of God," and is a miserable town of 3000 houses.

7 Laodicea In Phrygia, near Lydia has suffered much from earthquakes. It is now a deserted place, called *Bake hissar*, "The old castle."

SEVEN DAYS' WAR, see *Army*, 1871.

SEVEN SAGES, see *Giuse*, 590 B.C.

SEVEN-SHILLING PIECES in gold were authorised to be issued 29 Nov. 1797.

SEVEN SLEEPERS. According to an early legend seven youths, in 251, commanded to worship a statue set up in Ephesus by the emperor Decius, refused, and fled to a cavern in the mountain, where they were enclosed, and slept, according to Durandus, for 300 years. Other writers give shorter periods, and various accounts of the incidents which accompanied the awakening. A festival in their honour is kept by the Roman church on 27 July.

SEVERUS'S WALL, see *Roman Walls*.

SEVILLE (S.W. Spain), the *Hispalis* of the Phoenicians, and the *Juba* of the Romans was the capital until Philip II. finally established his court at Madrid, 1563. It opened its gates to the Saracens in 712, and was taken from them by the Christians in 1247, after an obstinate siege. The peace of Beville between England, France, and Spain, and also a defensive alliance to which Holland acceded, signed 9 Nov. 1729. In the peninsular war, Seville surrendered to the French, 1 Feb. 1810, and was taken by assault by the British and Spaniards, after the battle of Salamanca, 27 Aug. 1812. It was besieged but not taken by Espartero, July, 1843. Visit of Prince of Wales, 20 April, 1876. The ancient cathedral was much renovated, 1889-90. Population, 1887, 143,182.

SEVRES, see *Pottery*.

SEWERS, see *Cloaca Maxima*. An act was passed in 1847 enforcing the conveyance of the sewage of houses in London into the public sewers. The commissioners of sewers in London were superseded by the metropolitan commissioners of sewers, nominated by the government. They abolished the large brick sewers, introducing pipe drains, and turned the contents of 30,000 cesspools into the River Thames. The necessity for purifying the defiled river led to the construction of a new system of drainage, under the superintendence of the Metropolitan Board of Works (which see). The main drainage (the plan of Mr J. W. Bazalgette) consists of the Northern High-level, Middle-level, and Low-level, and Southern High-level and Low-level. On 14 March, 1865, the works were said to be completed, except the low-level sewer on the north side, which was waiting for the completion of the Thames embankment, &c. On 4 April, 1865, the prince of Wales started the engines which commenced lifting the waters of the southern outfall, at

Crossness Point, near Erith. * The main drainage works of the metropolis (82 miles), were finally completed Aug. 1875. The sewage is carried 14 miles down the river. Total cost, 4,500,000. See *Carlisle* and *London*.

Royal commission on the Metropolitan Sewage Discharge (Lord Bramwell, Mr John Lubbock, Mr A. W. Williams, and others) appointed 22 June, 1882, reports on the great contamination of the Thames at the outfalls, and need of change, approval of the combination of chemical precipitation with filtration through earth, June and Dec. 1884.

Mr Wm. Webster's method of decomposing London sewage by electricity set up at Crossness, reported successful on inspection March 1886.

Mr H. Wollheim's process, the *Ammonia* (or ammonia compounds), reported successful exhibited at Wimbledon Sewage Farm, Aug., before the lord mayor and others 18 Sept. 1889.

SEWING-MACHINE. It is said that Thomas Saint patented one for boots and shoes in 1790. Similar inventions are ascribed to Duncan (1804), Adams and Dodge (American, 1818), Thimomani (French, 1834), and W. J. Hunt (1834). The first really practical sewing-machine was the invention of Elias Howe, an American mechanic, of Cambridge, in Massachusetts, about 1841, who died at Brooklyn, 2 Oct. 1867, aged 47. It is now known under an improved form as Thomas's shuttle machine, by whom it was introduced into England in 1846. Many improvements have been since made and new machines invented.

SEXAGESIMA SUNDAY, see *Quadragesima Sunday*, and *Week*.

SEXTANT, an instrument used like a quadrant, containing sixty degrees, or the sixth part of a circle, invented by John Brache, at Augsburg, in 1550. The Arabian astronomers are said to have had a sextant of fifty-nine feet nine inches radius, about 995.

SEYCHELLES ISLES (Indian Ocean), settled by the French about 1768, captured by the British, 1794, ceded to them, 1815.

SFAXERS, see *Thurs*.

SHADOWING, a term applied in Ireland to the practice of the police, closely following persons suspected of boycotting, or intimidating persons opposed to the National League 1889-91.

SHAFTESBURY'S ACT, LORD, 18 & 19 Vict. c. 86 (1855), relates to religious worship.

SHAFTESBURY MEMORIALS, relating to the earl of Shaftesbury, celebrated for his lifelong exertions to ameliorate the condition of the working classes, the poor and destitute, women and children. He died 1 Oct. 1885, aged 84. A large sum was subscribed for two statues and a national convalescent home, Oct. 1885. A statue uncovered in Westminster Abbey by the baronet Burdett-Coutts, 1 Oct. 1888. A memorial fountain by Alfred Gilbert is to be set up in Piccadilly Circus (Aug., 1892).

* The utilisation of diminished sewage as manure is now much advocated. Great success is said to have been attained at Edinburgh, Carlisle, Croydon, and other places. Much hot controversy has arisen respecting the disposal of the London sewage. On 15 Nov. 1864 the Metropolitan Board accepted a contract for its disposal from Messrs. Hope and Nipon. Sewage Utilisation acts were passed in 1865 and 1867 and the Metropolitan Sewage and Sewerage Reclamation acts were passed in June, 1865. The sewage farm near Barking, Essex, was reported to be flourishing in 1868. Good grass and corn crops raised.

SHAFESBURY PARK ESTATE, near Wandsworth, London, S.W., a model village, and termed "a workman's city;" built here for clerks, artisans, and labourers, by a company, was opened by the earl of Shaftesbury, 3 Nov. 1873, and 18 July, 1874.

SHAKERS, an English sect, now chiefly found in America, arose in the time of Charles I., and derived its name from their voluntary convulsion. It existed for a short time only, but was revived by James Wardley in 1747, and still more by Ann Lee (or Standlee), expelled quakers, about 1757. The sect emigrated to America, May, 1772, and settled near Albany, New York, 1774. They denounce marriage as sinful, regard celibacy as holy, oppose war, disown baptism and the Lord's Supper, and use dancing as part of their worship. *Masters*. One of their elders, Fred. W. Evans, lectured in London, Aug. 1871.

Above a hundred of them settled in the New Forest, near Lymington, Hampshire, on property obtained for them by a Mrs. Wood not paying the interest of a mortgage they were enticed in severe weather and suffered much. end of Dec. 1874. They are called Girdling, from Mrs. Girdling, a leader among them who died 18 Sept. 1886. The community then gradually dispersed.

Goods seized for debt about 27 July, expelled, 22 Aug. permitted to remain in the neighbourhood, Oct. 1878. Mrs. Wood was confined at Lymington, 27 Feb. 1874; so men and 40 women half-starved in the New Forest; will not work for hire, Jan. 1884.

SHAKESPEARE'S PLAYS. William Shakespeare was born at Stratford-upon-Avon, Warwickshire, (23) April, 1564, and died 23 April, 1616. [An act to incorporate the Trustees and Guardians of Shakespeare's birthplace was passed 26 March, 1891.] The first collected edition of his works is dated 1623 [a facsimile of this edition was published, 1862-5], the second, 1632,* the third, 1664, the fourth, 1685, all in folio. Critical editions of the text, edited by Alexander Dyce, were published in 1857 and 1864-6, Boydell's edition, with numerous plates, was published in nine vols. folio, in 1802. Aycough's Index to Shakespeare was published in 1790, Twiss's Index, in 1805, and Mrs. Cowden Clarke's Concordance, 1847; "Key to Shakespeare," 1879; Shakespeare-Lexicon, by Alexander Schmidt, 1874-5.

Shakespeare's first plays were probably produced about 1590, and soon after represented, himself frequently taking a part as the "Theatre," or the "Artisan," near Shore-ditch, E. London, and after 1594 at the new "Globe" theatre, Bank-side, southward, of which Shakespeare himself was part proprietor. It was of a horse-shoe form, partly covered with thatch. After it was increased, the thatch took fire, through the negligent discharge of a piece of ordnance, and the whole building was consumed, 29 June, 1613. The house was crowded to excess, to witness the play of *Henry VIII.*, but the audience escaped unhurt.

SHAKESPEARE'S JUBILEE, proposed by David Garrick, was celebrated at Stratford-upon-Avon, 6 & 7 Sept. 1769. A similar festival was kept 23 April, 1866. The festival of Shakespeare's birth was celebrated, with many festivities, at Stratford-upon-Avon, 23 & 29 April, 1864.

SHAKESPEARE'S HOUSE. In 1847, a number of persons of

distinction interested themselves for the preservation of the house in which Shakespeare was born, then actually up for sale. They held a meeting at the Thatched-House Tavern, London, 26 Aug. [in that year], and took measures for promoting a subscription set on foot by the Shakespeare Club at Stratford-upon-Avon; and a committee was appointed to carry out their object. In the end Shakespeare's house was sold at the Auction Mart in the city of London, where it was "knocked down" to the United Committee of London and Stratford for the large sum of 3000, at Sept. 1847. In 1850, a learned and useful scholar, John Shakespeare (no relation of the poet), gave 5000 to purchase the adjoining house, that it might be pulled down, in order to ensure the poet's house from the risk of fire.

SHAKESPEARE FUND, established in Oct. 1865, to purchase Shakespeare's garden, birth place estate, and to erect and endow a public library and museum at Stratford-upon-Avon. The catalogue of the library and museum was published, Feb. 1868.

SHAKESPEARE MEMORIAL ASSOCIATION (established 1875; eleventh annual meeting, at Stratford-upon-Avon, 28 April, 1886. A monument surmounted by a statue of Shakespeare, including statues of Shakespearean characters, executed by Lord Ronald Gower, presented by him to the association, set up at Stratford-upon-Avon, unveiled by Lord Haldon (the Marquis) 20 Oct. 1888. Bionia statue of Shakespeare (presented by Mr. William Knighton) erected in the boulevard Hausmann, Paris, unveiled 12 Oct. 1888.

The hon. Ignatius Donnelly, an American, reports his discovery of a cryptogram of Francis Bacon in the text of one of the plays in the folio of 1623, and thereon asserts his belief that Bacon was the author of the Shakespeare plays written 1557. His book, entitled "The Great Cryptogram, Francis Bacon's crypt in the so-called Shakespeare Plays" was published in 1888.

The **SHAKESPEARE LIBRARY** at Birmingham, was founded in 1864, and formally opened, 23 April, 1868, burnt 11 Jan. 1879.

* In 1849, Mr. J. P. Collier, editor of an edition of Shakespeare, purchased a copy of the second folio, on which was written in pencil, a number of corrections, supposed to have been made soon after the time of publication. At first he thought little of these marks, but in 1853 he was induced to publish "Notes and Emendations" derived from this volume. Much controversy raged as to the authenticity of these corrections, and in 1859 it was generally agreed that they were of modern date, and consequently of little value. Mr. Collier died aged 94, 17 Sept. 1883.

at 43,000,000, by others at 40,000,000, and by more at 60,000,000, in 1840. In 1851 there were imported into England 201,859 sheep and lambs, in 1853, 184,482, in 1864, 496,243. See under *Little*. In Aug. and Sept. 1862, many sheep in Wiltshire died of smallpox, and on Sept. 11, government declared for enforcing the act for the prevention of contagion. The evil soon abated. In April, 1866, the disease reappeared and the regulations were re-issued. Mortality amongst sheep through dukes, &c., April, 1880. In 1865, 914,170 sheep and lambs were imported. In 1868 341,152. SHEEPSHANKS' DONATIONS. On 2 Feb. 1857, Mr John Sheepshanks, by a deed of gift, presented to the nation his valuable collection of paintings and drawings, valued at 60,000/. In accordance with the donor's directions, the pictures were placed in the South Kensington Museum. The collection is rich in the works of Mulready, Landseer, and Lebbe. He died 5 Oct. 1867—On 2 Dec. 1858, the trustees of his brother, the late Mr Richard Sheepshanks, presented 10,000/ stock to Trinity college, Cambridge, for the promotion of the study of astronomy, meteorology, and magnetism.

SHEERNESS (N Kent), a royal dockyard, planned by Charles II in 1663, was taken by the Dutch, under De Ruiter 9 June, 1667. Improved since 1815, new fortifications still in progress. Population, 1681, 14,285, 1891, 13,281. The old dock church burnt 13 persons killed. 26 Nov. 1881.

SHEFFIELD, on the river *Sheaf*, West Riding, Yorkshire, renowned for cutlery, plated goods, &c. Sheffield thistles are mentioned by Chaucer, in the time of Edward III. In July, 1892, it was proposed by lord Tennyson and others, to celebrate the centenary of the birth of Shelley, by establishing a library and museum at Horsham, Sussex, near which place he was born. A mural tablet commemorating his birth, 4 Aug. 1792, and his death, 8 July, 1822, was set up publicly in the parish church 4 Aug. 1892.

SHELLS, see *Bombs*.
SHERIFF, or *shue-ress*, governor of a shire or county. London had its sheriffs prior to William I's reign, but some say that sheriffs were first nominated for every county in England by William in 1079. According to other historians, Henry Cornhill and Richard Bynere were the first sheriffs of London, 1 Rich. I, 1189. The nomination of sheriffs, according to the present mode, took place in 1461. Since, Anciently sheriffs were hereditary in Scotland, and in some English counties, as Westmoreland. The sheriffs of Dublin (first called bailiffs) were appointed in 1308, and obtained the name of sheriff by an incorporation of Edward VI 1548. Thirty-five sheriffs were fined, and

shewn existed in one year, rather than upon the office for London, 1734; see *Beaumont*. The high sheriffs of the counties of England and Wales, except Middlesex and Lancaster, are nominated on the marrow of St. Martin, Nov. 12. This somewhat vice-regal office, of Saxon origin, has gradually lost much of its importance.

SHILLING. The value of the ancient Saxon coin of this name was five pence, but it was reduced to fourpence about a century before the conquest. After the conquest the French *solidus* of twelve pence, in use among the Normans, was called *shilling*. The true English shilling was first coined, some say, in small numbers, by Henry VII., 1504. *Ruding*. A peculiar shilling, value nine pence, but to be current at twelve, was struck in Ireland, 1560, and a large but very base coinage in England for the service of Ireland, 1598. Milled shillings were coined 13 Chas II. 1662, see *Coin*.

SHIP-BUILDING, &c., according to the Greek legends, began with the Egyptians, and ancient drawings of their rude vessels are extant. The Greeks, Phoenicians, and Carthaginians were skilful shipbuilders, and Solomon's "navy of ships" (1 *Kings* ii. 26), was doubtless constructed by Tyrians, 994 a.c. The ships of Tarshish (probably in Spain), are mentioned in *Psalms* xlviii. 7, *Isaiah* li. 16 &c. The Romans built their first fleet of boats, by copying a Carthaginian vessel wrecked on their coast, 260 a.c. The dangers of navigation are described in *Psalms* cxxi. 23-30, and *Acts* xvi. Strong vessels were constructed by the Norsemen for invasion and piracy in the 5th century, A.D. &c., and by the Venetians and other Italians for commerce and war in the Middle Ages. The first double-decked ship built in England was of 1000 tons burthen, by order of Henry VII., was called the *Great Harry*, and cost 14,000*l*. *Stow*. Port-holes and other improvements were invented by Desbarges, a French builder at Brest, in the reign of Louis XII., about 1500. Ship-building was treated as a science by Hoste, 1669. Iron and steel are now greatly used in ship-building.

A private ship cut out of solid oak, 48 feet long, 4 feet 4 inches wide, and 3 feet deep, was found by the bridge gas company while excavating near the river Anchorage in Lincolnshire April 1835. Mr. Justice Chitty decided 6 July, 1835 that the ship was the property of the owner of the land, Mr. Elwes.

The *Princess*, a great sailing ship, was built on the Clyde by Messrs. Henderson for a Bordeaux firm, 312 masts, 360 feet long, 48 feet wide, bowsprit 30 feet long, carrying power over 6,000 tons.

Sept. 1850

Ships, originally made of wood, and latterly of iron, are now frequently made of steel.

SHIPKEA, see *Schipska*.

SHIP-MONEY was first levied about 1607, to form a navy to oppose the Danes. This impost, levied by Charles I. in 1634-6, was much opposed, and led to the revolution. He assessed London in seven ships, of 4000 tons, and 1560 men, Yorkshire in two ships, of 600 tons or 12,000*l*, Bristol in one ship of 100 tons, Lancashire in one ship, of 400 tons. Among others, John Hampden refused to pay the tax, he was tried in the Exchequer in 1636. The judges declared the tax legal, 12 June, 1637. Ship-money was included in the grievances complained of in 1641. The five judges, who had given an opinion in its favour, were imprisoned. Hampden received a wound in a skirmish with prince Rupert, at Chalgrove, 18 June, and died 24 June, 1643.

SHIPPING, BRITISH. Shipping was first registered in the river Thames in 1786, and throughout the empire in 1787. In the middle of the 18th century, the shipping of England was but half-a-million of tons—less than London now. In 1830, the number of ships in the British empire was 22,785. The merchant shipping act of 1854 was amended in 1867, see *Merchant Shipping Act*, *Navy* and *Navigation Acts*.

SHIRES, see *Counties* and under *Horse*.

SHIRTS are said to have been first generally worn in the west of Europe early in the 8th century. *De Frasnay*. Woollen shirts were commonly worn in England until about 1253, when linen, but of a coarse kind (fine coming at this period from abroad), was first manufactured in England by Flemish artisans. *Stow*.

SHODDY, a kind of soft woollen goods, manufactured from old woollen rags, or the refuse, to which new wool is added, is stated to have been first manufactured about 1813, at Batley, near Dewsbury, Yorkshire.

SHOEBLACK SOCIETY Brigades (Blue, Red, and Yellow) were established at various times, especially in 1851, by the Ragged School Union (*which see*), founded 1844. In 1855, 108 boys had cleaned 544,800 pairs of boots and shoes, and thus earned £270*s.*; of which 123*s.* had been paid to the boys, 51*s.* to their bank, and 51*s.* to the society. The brigades earned 454*s.* in 1859; 11,031*s.* in 1871; 10,936*s.* (in nine districts) in 1886. There were eleven shoeblack societies in the metropolis in 1888.

SHOEBURYNESSE (Essex). Some ground here, purchased in 1842 and 1853, by an act of parliament in 1862 was set apart as "ranges for the use and practice of artillery," and a school for gunnery was established; see *Cannon*, note. Experiments with Mr. Whitworth's projectiles on 12 Nov. 1862, showed their great improvement in form and material. Shells were sent through 5½ inch plate and the wood-work behind it. It was objected, that they might not do this with ships in motion. The National Volunteer Artillery Association began their annual meetings here in July, 1865.

Drying shell experiments with a new sensitive fuse, col. Francis Lyon (the inventor), col. Fox-Strangways, capt. Francis M. Gould-Adams, and four others were killed, 26 Feb. 1885.

SHOES, among the Jews were made of leather, linen, rush, or wood. Moors were worn as ornaments in their shoes by Jewish women. *Isaiah* iii. 18. Pythagoras would have his disciples wear shoes made of the bark of trees; probably that they might not wear what were made of the skins of animals, as they refrained from the use of everything that had life. The Romans wore an ivory crescent on their shoes; and Caligula enriched his with precious stones. In England, about 1462, the people wore the heels or points of their shoes so long that they encumbered themselves in walking, and were forced

to tie them up to their knees; the fine gentlemen fastened theirs with chains of silver or silver gilt, and others with laces. This was prohibited, on the forfeiture of 20*s.* and on pain of being cursed by the clergy, 7 Edw. IV. 1467; see *Dress*. Shoes, as at present worn, were introduced about 1633. The buckle was not used till 1668. *Stow*; *Mortimer*. The buckle-makers petitioned against the use of shoe-strings in 1791. A strike of London shoe-makers respecting wages, April, 1884.

SHOOTING STARS, see under *Meteors*.

SHOP HOURS' REGULATION ACT (Sir John Lubbock's), for the protection of young persons, passed, 1886. The Shop Hours' bill passed 1892.

SHOP-TAX enacted in 1785; caused so great a commotion, particularly in London, that it was deemed expedient to repeal it in 1789. The statute whereby *shoplifting* was made a felony, without benefit of clergy, was passed 10 & 11 Will. III. 1699. This statute has been some time repealed.

SHORE JANE, the mistress of Edward IV. and afterwards of lord Hastings. She did public penance in 1481, and was afterwards confined in Ludgate, but upon the petition of Thomas Hymore, who agreed to marry her, king Richard III., in 1484, restored her to liberty; and sir Thomas More mentions having seen her. *Harleian MSS.*

SHORT-HAND, see *Stenography*.

"SHORT - LIVED" ADMINISTRATION—that of William Pulteney, earl of Bath, lord Carlisle, lord Winchelsea, and lord Granville, existed from 10 Feb. to 12 Feb. 1746.

SHOT. In early times various missiles were shot from cannon. Bolts are mentioned in 1413; and in 1418 Henry V. ordered his clerk of the ordnance to get 7000 stone shot made at the quarries at Maidstone. Since then chain, grape, and canister shot have been invented, as well as shells, all of which are described in Scofield's work on "Projectile Weapons of War, and Explosive Compounds," 1858; see *Bombs* and *Cannon*. For Pulliser's shelled shot, see *Cannon*.

SHREWSBURY ADMINISTRATION. Charles, duke of Shrewsbury, was made lord treasurer, 29 July, 1714, two days before the death of queen Anne. His patent was revoked soon after the accession of George I., 20 Oct. following, when the earl of Halifax became first lord of the treasury; see *Halifax*. The office of lord treasurer has been executed by commissioners ever since.

SHREWSBURY (Shropshire), arose after the ruin of the Roman town Uriconium (see *Wroaster*),

and became one of the chief cities of the kingdom, having a mint till the reign of Henry III. Here Richard II. held a parliament in 1307.—On 23 July, 1403, was fought a sanguinary battle at Halesley field, near Shrewsbury, between the army of Henry IV. and that of the nobles, led by Percy (surnamed Hotspur), son of the earl of Northumberland, who had conspired to dethrone Henry. Henry was seen in the thickest of the fight, with his son, afterwards Henry V. The death of Hotspur by an unknown hand gave the victory to the king. *Home*.—Shrewsbury grammar school was founded by Edward VI. in 1551, endowed by Elizabeth, and opened 1562. Its arrangements were modified by the public school act, 1868. Population in 1881, 26,481; 1891, 26,962.

SIAM, a kingdom in India, bordering on the Burmese empire. Siam was governed by two kings, one inferior, till Jan. 1887, when the second king being dead, the dignity was abolished. Siam was re-discovered by the Portuguese in 1511, and a trade established, in which the Dutch joined about 1604. A British ship arrived about 1613. In 1683, a Cephalaonian Greek, Constantine Phaulcon, became foreign minister of Siam, and opened a communication with France; Louis XIV. sent an embassy in 1685 with a view of converting the king, without effect. After several ineffectual attempts, sir John Bowring succeeded in obtaining a treaty of friendship and commerce between England and Siam, which was signed 30 April, 1855, and ratified 5 April, 1856. Two ambassadors from Siam arrived in Oct. 1857, and had an audience with the queen; they brought with them magnificent presents, which they delivered crawling, on 16 Nov. They visited Paris in June, 1861. By a treaty with France, the French protectorate over Cambodia was recognised; signed 15 July, ratified 24 Oct. 1867. The king Khouloukorn, born 21 Sept. 1853, has reigned since 1 Oct. 1868; the king was entertained at Calcutta, 7-12 Jan. 1872; a political constitution was decreed, 8 May, 1873. Queen Victoria receives the order of the White Elephant from the Siamese minister at Windsor, 2 July, 1880. Population of Siam (1891) about 9,000,000.

King: Khouloukorn, born 21 Sept. 1853; succeeded his father Mongkout, 1 Oct. 1868.

Various changes and political reforms were begun by the king, 26 Nov. 1873. On 9 Oct., 1874, he invited astronomers to Bangkok to view the eclipse of 5 April, 1875. Death of the able ex-regent Somdech Chan, 29 Jan. 1883.

Telegraphic communication with France opened, 14 July, 1883.

king, 28 Nov.; at Rome by the king, 3 Dec.; by the khedive at Cairo, 24 Dec. 1891; at Bombay, 21 Jan.; at Rangoon, 23 March, 1892.

SIAMMA TWINS. Two persons born about 1822, enjoying all the faculties and powers usually possessed by separate and distinct individuals, although united together by a short cartilaginous band at the pit of the stomach. They were named Chang and Eng, and were first discovered on the banks of the Siam river by an American, Mr. Robert Hunter, by whom they were taken to New York, where they were exhibited. Captain Coffin brought them to England. After having been exhibited for several years in Britain, they went to America, where they settled on a farm, and married two sisters. In 1865 they were in North Carolina in declining health. Their exhibition in London began again 6 Feb. 1865. Their death in America, within two hours of each other, took place 26, 17 Jan. 1874.

SIBERIA (N. Asia). In 1780 the conquest was begun by the Cossacks under Jermak Timofejew. In 1710 Peter the Great began to send prisoners thither. An insurrection broke out among the Poles in Siberia in June, 1866, and was soon suppressed. University founded, 1886. Population in 1885, 4,313,680.

Since 1865 efforts have been made to open up a sea route to central Siberia, especially by capt. Wiggins and his friends, 1874, & sq. In 1890 two vessels from London reached Karmoul on the Yenesei, stayed there 29 days, and returned in October.

The construction of a railway to Siberia, in ten years, was authorised, Feb. 1890.

A party of about 30 political exiles, including women and children, at Yakutsk, N.E. Siberia, were suspected of mutiny, very severely treated, and some persons were killed, 4 April. The exiles were tried by court-martial in May, and all were convicted, 28 June. Three men were hanged, 30 Aug. 1889. The story printed in the Times, 26 Dec. 1889, was at first contradicted and afterwards said to be exaggerated, March, 1890.

SIBYLS, Sibyllæ, women believed to be inspired, who flourished in different parts of the world. Plato speaks of one, others of two. Pliny of three, Ælian of four, and Varro of ten. An Erythraean sibyl is said to have offered to Tarquin II. nine books containing the Roman destinies, demanding for them 300 pieces of gold. He denied her; whereupon the sibyl threw three of them into the fire, and asked the same price for the other six, which being still denied, she burnt three more, and again demanded the same sum for those that remained, when Tarquin conferring with the pontiffs was advised to buy them. Two magistrates were created to consult them on all occasions, 531 B.C.; see *Quindecimviri*.

SICILIAN VESPERS, the term given to the massacre of the French (who had conquered Sicily, 1266), commenced at Palermo, 30 March, 1282.

On Easter Monday conspirators assembled at Palermo; and while the French were engaged in festivities, a Sicilian bride passed by with her train. One Drucbet, a Frenchman, used her rudely, under pretence of searching for arms. A young Sicilian stabbed him with his own sword; and a tumult ensuing, the French were instantly murdered. The populace ran through the city, crying out, "Let the French die!" and, without distinction of rank, age, or sex, slaughtered all of that nation they could find, to the number of about 8000. Even the churches proved no sanctuary, and the massacre became general throughout the island.

SICILY (anciently *Trinacria*, three-cornered). The early inhabitants were the Siculi, or Siculi, a people of Spain, and Etruscans, who came from Italy. The Phœnicians and Greeks settled some colonies here (735-582); see *Syracuse*. In modern times its government has frequently been united with and separated from that of Naples (*which see*); the two now form part of the kingdom of Italy. Popu-

SILESIA, formerly a province of Poland, was invaded by John of Bohemia, 1325, and ceded to

him, 1355. It was taken by the king of Hungary, 1478, and added to the Austrian dominion, 1526. It was conquered and lost several times during the seven years' war by Frederick of Prussia, but was retained by him at the peace in 1763. The emperor William was most enthusiastically received during his visit, Sept. 1875.

SILICON or **SILICUM** (from *siles*, flint), a non-metallic element, next to oxygen the most abundant substance in the earth, as it enters into the constitution of many earthy, metallic oxides, and a great number of minerals. The mode of procuring pure silicon was discovered by Berzelius in 1823. *Gmelin*. See *Water glass*, and *Bauxite* & *Stones*.

SILISTRIA, a strong military town in Bulgaria, European Turkey. It was taken by the Russians, 30 June, 1829, and held some years by them as a pledge for the payment of a large sum by the Porte, but was eventually returned. In 1854 it was again besieged by the Russians, 30,000 strong, under prince Paskewitch, and many assaults were made. The Russian general was compelled to retire in consequence of a dangerous confusion. On 2 June, Musa Pascha, the brave and skilful commander of the garrison, was killed. On 9 June, the Russians stormed two forts, which were retaken. A grand assault took place on 13 June, under prince Gortschakoff and general Schidlovsky, which was vigorously repelled. On the 15th, the garrison assumed the offensive, crossed the river, defeated the Russians, and destroyed the siege works. The siege was thus raised, and the Russians commenced their retreat as Omar Pacha was drawing near. The garrison was ably assisted by two British officers, capt Butler and capt Nasmith, the former of whom, after being wounded, died of exhaustion. They were highly praised by Omar Pacha and lord Haltinge, and lieutenant Nasmith was made a major. Population, 1839, 11,414.

SILK. Wrought silk was brought from Persia to Greece, 32, B.C. Known at Rome in Tiberius's time, when a law passed in the senate prohibiting the use of plait of mosaic gold, and also forbidding men to dress themselves by wearing silk, fit only for women. Helio-gabalus first wore a garment of silk, A.D. 220. Silk was at first of the same value with gold, weight for weight, and was thought to grow in the same manner as cotton on trees. Silk-worms were brought from India to Europe in the 6th century. Charlemagne sent Offa, king of Merca, a present of two silken vests, 780. The manufacture was encouraged by Rici, king of Sicily, at Palermo, 1146, when the Sicilians not only bred the silk-worms, but spun and wove the silk. The manufacture spread into Italy and Spain, and also into the south of France, a little before the reign of Francis I. about 1510, and Henry IV propagated mulberry-trees and silk-worms throughout the kingdom, about 1600. In England, silk-manufactures were worn by some noblemen's ladies at a ball at Kenilworth castle, 1286. Silk was worn by the English clergy in 1534. Manufactured in England in 1604, and broad silk wove from raw silk in 1620. Brought to perfection by the French refugees in London at Spitalfields, 1688. A silk-throwing mill was made in England, and fixed up at Derby, by Mr Thomas Lombe, merchant of London, modelled from the original mill then in the king of Sardinia's dominions, about 1714. He obtained a patent in 1718, and died 3 Jan. 1739.

Six new species of silk-worm were rearing in France, 1861.

The Silk association of Great Britain and Ireland began, 1886-7. first exhibition St James's square, London, S.W. (opened by the duchess of Leck), 6-21 May, 1890. **SILK-WORM DISEASE**. In 1853 the annual produce of sericulture in South France was estimated at about 4,680,000. Soon after a disease broke out in the worms which reduced the value of the silk crop to about one third that amount. In 1858 a commission was appointed to inquire into the nature of the disease, then termed *pebrée*, and M Quatrefages, in 1859, proved that it is hereditary, contagious, and infectious. M Fiquet discovered in the blood of the deceased worms a multitude of cylindrical corpuscles, more named *garrishia*, which Pasteur who took up the study, in 1865, has demonstrated to be parasitical and the cause of the disease. He has since devised a way by which it is hoped, the organic germs may be got rid of and the disease extirpated.

SILOTVOR, a new explosive invented by M Rouchessell, who asked 50,000*l* for the patent, 1887.

SILURES, a British tribe, occupying the counties of Monmouth and Hereford, was subdued by the Roman general Ostorius Scapula, 50, *see* *Shropshire*. From this tribe is derived the geological term "Silurian strata," among the lowest of the palaeozoic or primary series, from their occurrence in the above-mentioned counties. *Murchison's* "Siluria" was published 1849.

SILVER exists in most parts of the world, and is found mixed with other ores in various mines in Great Britain. The silver mines of South America are far the richest. A mine was discovered in the district of La Paz in 1660 which was so rich that the silver of it was often cut out with a chisel. In 1749, one mass of silver weighing 370 lbs was sent to Spain. From a mine in Norway, a piece of silver was dug, and sent to the Royal Museum at Copenhagen, weighing 560 lbs, and worth 1680*l*. In England silver plate and vessels were first used by Wilfrid, a Northumbrian bishop, a lofty and ambitious man, 709. *Tynrell* Silver knives, spoons, and cups, were great luxuries in 1300, *see* *Mirror*. The act of 1816 restricted the use of silver as legal tender to 40*s*. In 1855, 561,906 oz, in 1857, 532,866 oz, in 1865, 724,850 oz, in 1870, 784,502 oz, in 1876, 483,422 oz, in 1882, 372,544 oz, in 1887, 320,345 oz, in 1888, 321,425 oz, in 1889, 306,149 oz, in 1890, 299,724 oz, were obtained from mines in Britain. Pattinson's process for obtaining silver from lead ore was introduced in 1829. *See* *Bullion*, *Coin*, *Goldsmiths*, *Morro*, *Plate*, *India*, 1876, *United States*, 1878, 1890-2. SIMONIANIS, a sect named after the founder, Simon Magus, the first heretic, about 41. A sect of social reformers called ST SIMONIAN, after their founder, Claude H. comte d. St Simon (born 1760), sprung up in France in 1819, and attracted considerable attention, the doctrines were advocated in England, particularly by Dr Paine, who lectured upon them in London, 24 Jan 1834. St Simon died in 1825, and his follower, Pere Enfantin, died 1 Sept 1864.

SIMONY (trading in church offices), derives its name from Simon desiring to purchase the gift of the Holy Spirit (*Acts* viii 18-19). It is forbidden in England by the canon law, and by statute 31 Eliz c 6, "for the avoiding of simony and corruption in presentations, collations, and donations of and to benefices," &c., 1589 g, and by statute of 22 Anne 2 stat 12 (1713). The rev James John Meist was convicted of simony, 26 29 Nov 1869, and deprived.

The bishop of Peterborough (Dr Maser) moved for a committee on the laws relating to simony appointed 21 April 1874

SIMPLON, a mountain road leading from Switzerland into Italy, constructed by Napoleon in 1801. It winds up passes, crosses glaciers, and passes by galleries through solid rock, and has eight principal bridges. The number of workmen employed at one time varied from 30,000 to 40,000.

SINKING FUND First projected by Sir Robert Walpole to redeem the debt to the bank of England, act passed in 1710. The act establishing the sinking fund of Mr Pitt, devised by Dr Price, was passed in March, 1786. At that estimated surplus of 900,000 in the revenue was augmented by new taxes to make up the sum of 1,000,000 which was to be invariably applied to the reduction of the

national debt. The fallacy of the scheme was shown by Dr Hamilton in 1813. In July, 1828, the sinking fund was limited to one-fourth of the actual surplus of revenue.

A new sinking fund was established by Act passed 5 Aug 1875. The annual charge of the national debt of the year ending 31 March, 1877 to be 27,700,000, subsequent years to be 28,000,000.

SINOPE, an important Greek colony on the Euxine, after resisting several attacks was conquered by Mithridates IV., king of Pontus, and made his capital. It was the birth-place of Diogenes, the cynic philosopher. On 30 Nov 1853, a Turkish fleet of seven frigates, three corvettes, and two smaller vessels, was attacked by a Russian fleet of six sail of the line, two sailing vessels, and three steamers, under admiral Nachimoff, and totally destroyed, except one vessel, which conveyed the tidings to Constantinople. Four thousand lives were lost by fire or drowning, and German Pasha, the Turkish admiral, died at Sebastopol of his wounds. In consequence of this act (considered treacherous) the Anglo-Turkish fleet entered the Black Sea, 3 Jan 1854.

SION COLLEGE AND HOSPITAL, situated on the site of a nunnery, which, having fallen to decay, was purchased by William Elysinge, a citizen and mercer, and converted into a college and hospital, called from his name LIVINGE SPITAL. In 1340 he changed it to an Austin priory, which was afterwards granted by Henry VIII to Sir John Williams, master of the jewel-office, who, with Sir Roland Hayward, inhabited it till its destruction by fire. In 1623 Dr Thomas White having bequeathed 3000*l* towards purchasing and building a college and almshouse on the ancient site, his executor erected the present college. It is held by two charters of incorporation, 6 Chas. I. 1630 and 16 Chas. II. 1664. It contains a valuable library (easily accessible to the public), and an almshouse for ten men and ten women. New buildings erected on the Thames Embankment memorial street laid 27 Apr. 1885, opened by the prince of Wales, 15 Dec 1886.

SIRENE an instrument for determining the velocity of aerial vibrations corresponding to the different pitches of musical sounds was invented by Baron Carnaud de la Tour of Paris in 1859. The principle was shown in an apparatus exhibited by Robert Hooke before the Royal Society, 27 July, 1681.

SLAVERY. The traffic in men came from Chaldaea into Egypt, Arabia, and all over the East in Greece, in the time of Homer, all prisoners of war were treated as slaves. The Lacedaemonian youths, trained up in the practice of degrading and butchering slaves, were from time to time let loose upon them to show their proficiency, and once, for amusement only, murdered, it is said, 3000 in one night, *see Helots*. Alexander, when he razed Thebes, sold the whole people for slaves, 335 B.C. There were 400,000 slaves in Athens, 317 B.C. In Rome slaves were often chained to the gate of a great man's house, to give admittance to the guests invited to the feast. By one of the laws of the XII. Tables, creditors could seize their insolvent debtors, and keep them in their houses, till by their services or labour they had discharged the sum they owed.

C. Pollio threw such slaves as gave him the slightest offence into his fish-ponds, to fatten his lampreys, 42 B.C. Caelius Sordidus left to his heir 4116 slaves, 12 B.C. The first Janissaries were Christian slaves, 1329.

SLAVERY IN ENGLAND Laws respecting the sale of slaves were made by Alfred. The English peasantry were commonly sold for slaves in Saxon and Norman times, children were sold in Bristol market like cattle for exportation. Many were sent to Ireland and to Scotland. Under the Normans the vassals (formed villeins, of and pertaining to the soil) were devalued as chattels during the feudal times.

Severe statutes were passed in the reign of Richard II. 1397 and 1398, the rebellion of Wat Tyler, 1381, arose partly out of the evils of serfdom. A statute was enacted by Edward VI. that a runaway or any one who hired him for three days, should be brought before two justices of the peace and marked with a hot iron on the breast, and if judged the slave of him who bought him for two years. He was to take the slave and give him bread & water or small drink and refuse meat and clothe him to work by besting, chaining, or otherwise, and if within that time he absented himself fourteen days was to be marked on the forehead or cheek by a hot iron with an S, and to be his master's slave for ever. A declaration was made felony if it was lawful to put a ring of iron round his neck arm or leg. A child might be put apprentice, and on running away, become a slave to his master. 1547

Queen Elizabeth ordered his bondsmen in the western counties to be made free at easy rates. 1574
Serfdom was finally extinguished in 1660, when tithes in capite, knight's service, &c., were abolished.

A slave named Somerset, brought to England, was because of his ill state, turned adrift by his master. By the charity of Mr Granville Sharp, he was restored to health, when his master again claimed him. A suit was the consequence which established by decision of the Court of King's Bench, in favour of Somerset, that slavery could not exist in Great Britain.

SLAVE TRADE. The slave trade from Con-
 go and Angola was begun by the Portuguese in
 1482. The commerce in man has brutalised a tract
 fifteen degrees on each side of the equator, and forty
 degrees wide, or of 4,000,000 of square miles, and
 men and women have been bred for sale to the
 Christian nations during the last 250 years, and
 war carried on to make prisoners for the Christian
 market. The Abbé Raynal computed (1777) that, at
 the time of his writing, 9,000,000 of slaves had been
 consumed by the Europeans. The slave-trade is
 now approaching extinction.

In 1768 the slaves taken from Africa amounted to
 104,100. In 1768 the annual number was about 100,000.
 In 1807 it was shown by documents, produced by govern-
 ment, that since 1792 upwards of 3,500,000 Africans
 had been torn from their country, and had either per-
 ished on the passage or been sold in the West Indies.

SLAVONIA or **SLAVONIA**, a province of Austria, derives its name from the Slaves, a Sarmatian people who replaced the Avars in Pannonia early in the 9th century. In 854 Cyril and Methodius, Greek missionaries, preached here and adapted the Greek alphabet to the Slavonian language, the letters of which have since been a little altered. The country, after having been held at times by the Greeks, Turks, and Hungarians, and the cause of sanguinary conflicts, was ceded finally to Hungary in 1699, at the peace of Carlowitz. Deputies from the Slavonian provinces of Austria were entertained at Moscow and St. Petersburg May, 1867. The Croatian-Slavonian diet, at Agram, was dissolved, May, 1867. It protested against incorporation with Hungary. The Slavonian family of languages includes Russian, Polish, Serbian, Bohemian, Bulgarian, Wendic, Slovac, and Polish. For the war, see *Turkey*, 1875-6.

Two hundred and thirty French ships were taken, thousands of Frenchmen were killed, with two of their admirals, the loss of the English was inconsiderable. 24 June, 1340.

SMALCALD (Hesse), TREATY OF, entered into between the elector of Brandenburg and the other princes of Germany in favour of Protestantism, 31 Dec. 1530, see *Protestants*. The emperor apprehensive that the kings of France and England would join this league, signed the treaty of Pavia, 31 July, 1532, allowing liberty of conscience.

SMALLPOX, *varicella* (diminutive of *varus*, a pimple), a highly contagious disease, supposed to have been introduced into Europe from the East by the Saracens. Rhazes, an Arabian, described it accurately, about 900. From Europe it was carried to America, soon after its discovery, and raged there with great severity, destroying the Indians by thousands. In 1694, queen Mary of England died of small pox, as did in 1711 and 1712 the emperor of Germany, the dauphin and dauphiness of France, and their son, in 1730 the emperor of Russia, in 1741 the queen of Sweden, and in 1774 Louis XV. of France. It is stated that in the middle of the 16th century two millions perished by it in Russia. In London in 1723 one out of fourteen deaths was caused by small pox, and in 1746 the rate was one in ten. For the attempts to alleviate this scourge, see *Inoculation*, introduced into England in 1722, and *Vaccination* announced by Dr. Jenner in 1798. *Smallpox Hoepferi*, established 1746. Smallpox raged in parts of London, and thousands died, 1870-1, a temporary hospital was established at Hampstead (*which see*). The Anti-Vaccination society has been active, and many parents have been fined for opposing the vaccination of their children, 1870-6. In Sept. and Oct. 1862, a great many sheep died of smallpox in the West of England, till successful preventive measures were resorted to. Many cases in London, 1876-8, deaths principally of unvaccinated persons.

Smallpox prevalent in London, 88 deaths 1-7 May, 1893. Deaths 15-21 May, diminishing July, 1881. Deaths, June, 1880-June, 1881, 1532 deaths, 637 not vaccinated, in N. E. London. May deaths, about 36 a week, June, 1884, deaths decreasing reported, 24 July, reappears, but subsides, Dec. 1884. Severe epidemic of smallpox at Sheffield and neighbourhood March, 1887, still prevalent, Jan. 1888, disappearing, April, 1888.

SMITH'S CHARITY (FOR POOR KIN) Alderman Henry Smith, by will dated 26 April, 1647, left 1000l for relief of captives held by Turkish pirates, and 1000l for his poor kinsmen

The former object having become obsolete an act was passed in 1775 to divert all this property to the poor kinsmen. In 1868 there were 422 in number. The value of the property is now 17,000l a year (1889). The master of the rolls decided in Dec 1877 that the funds should be applied to general charitable purposes. On appeal the decision was in favour of the poor Smiths 12 Feb 1878

SMITHFIELD WEST, in the heart of London, was once a favourite walk of the London citizens, outside the city walls. Sir W Wallace was executed here, 23 Aug 1305. On 15 June, 1381, Wat Tyler was met by Richard II at this place, and was stabbed by Watworth the mayor. Many tournaments were also held here. In the reign of Mary (1553-8) many persons perished by fire, and Bartholomew Leggett an Arman, was burnt here, 18 March, 1612. Bartholomew fair was held here till 1853. This place is mentioned as the site of a cattle market as far back as 1150. The space devoted to this purpose was enlarged from about three acres to four and a half, and in 1834 to six and a quarter. The ancient regulations were called the 'statutes of Smithfield.' In one day there were sometimes assembled 4000 beasts, and 30,000 sheep. The annual amount of the sales was about 7,000,000l

Sold here, 225 123 beasts, 1 593 270 sheep and lambs 26 356 calves, 33 531 pigs (About 160 calves men) 1846

The contracted space of the market the slaughtering places adjoining and many other nuisances gave ground to much dissatisfaction and after investigation an act was passed appointing metropolitan market commissioners with power to provide a new market slaughtering places &c and to close the market at Smithfield. 1 Aug 1851

SNEEZING. The custom of saying "God bless you" to the sneezer originated, according to Strada, among the ancients, who, through an opinion of the danger attending it, after sneezing made a loud prayer to the gods, as "Jupiter help me." The custom is mentioned by Homer, the Jewish rabbis, and others, and is found among savages. Polydore Vergil says it took its rise at the time of the plague, 558, when the infected fell

down dead meaning, though seemingly in good health.

SNIDER GUN, see under *Firearms*.

SNUFF-TAKING took its rise in England from the captures made of vast quantities of snuff by Sir George Rooke's expedition to Vigo in 1702, and the practice soon became general. In 1839 there were imported 1,622,493 lbs of snuff, of which 196,305 lbs were entered for home consumption, the duty was 88,263*l*, see *Tobacco*. In 1853, 2,773,925 lbs of snuff and cigars, in 1861, 2,110,430 lbs, in 1871, 3,852,236 lbs, 1877, 3,762,831 lbs, 1883, 3,121,174 lbs, 1887, 3,595,071 lbs were imported.

SOAP MUSEUM, No 13, Lincoln's inn-fields, was gradually formed by Sir John Soane, the architect, who died in 1837, after making arrangements for its being open to the public by an act passed in 1833. It contains Egyptian and other antiquities, valuable paintings, rare books, &c. 15*o* are distributed annually to distressed architects or their widows and children.

One of two sealed caskets in the museum was opened 29 Nov 1886, chiefly private legal documents discovered.

SOAP is a salt, a compound of a fatty acid with an alkali soda or potash. The Hebrew *berith*, translated soap, is merely a general term for cleansing substances. *Job* 15:30 *Jer* 17:22. Pliny declares soap to be an invention of the Gauls, though he prefers the German to the Gallic soap. Naucrates and her attendants, Homer tells us, washed clothes by treading upon them with their feet in pits of water. *Odyssey*, book 13. The Romans used tulle's earth *Sapon*, the French word for soap, is ascribed to its having been manufactured at Savon, near Genoa. The manufacture of soap began in London in 1524, before which time it was supplied by Bristol at one penny per pound. The duty upon soap, imposed in 1711, after several reductions from 3*d* per pound, was totally repealed in 1853. It then produced, according to the chamberlain of the exchequer, Mr Gladstone about 1,120,000*l* annually. Exported from the United Kingdom in 1876, 254,853 cwts, 1880 391,808 cwts, 1885, 402,112 cwts, 1890, 496,030 cwts.

SOBRAON (N.W. India). The British army 35,000 strong under Sir Hugh (afterwards Viscount) Gough, attacked the Sikh force on the Sutlej, 10 Feb 1846. The enemy was defeated after a dreadful contest, and all their batteries taken, and in attempting the passage of the river by a floating bridge in their rear, the weight of the masses that crowded upon it caused it to break down, and thousands of Sikhs were killed, wounded, or drowned. The British loss was 2338 men.

SOCIALISM, which proposes the re-organization of society for the benefit of the community at the expense of the individual, was warmly advocated in London, 24 Jan 1834, by Robert Owen. He had, beginning at New Lanark, in Scotland, about 1801, established a settlement at New Harmony in America in 1824. He died 17 Nov. 1858, aged 90. The French socialists, termed *Communists*, became a powerful political body in that country, were implicated in the revolution of 1848, and made an insurrection at Paris, 1871. See *France*, *Germany*, 1878 *et seq.*, *Positive Philosophy*, and *Working-men* (who, in Great Britain, have received by legislation nearly all they require).

SOCIETIES AND INSTITUTIONS, LITERARY AND SCIENTIFIC, in Great Britain.
Further details of many of these will be found under their respective heads. All in the list below are in London, except otherwise stated. An act was passed 11 Aug. 1854, "to afford facilities for the establishment of institutions for the promotion of literature and science," by grants of land, &c.; and for their regulation. The Royal and London Institutions were exempted from the operation of the act.

SOCIETY ISLANDS Pacific Ocean, discovered by De Quirós in 1606, re-discovered by Capt. Wallis, 1767, who gave Otahaiti or Tahiti the name of King George's Island. Capt. Cook, who visited them in 1769 and 1777, named them Society Islands in honour of the Royal Society. See *Otaheite*.

SOCINIANS persons who accept the opinions of Faustus Socinus (died 1562) and his nephew Laelius (died 1604), Socinians noblemen. They held—1 That the Eternal Father was the one only God, and that Jesus Christ was no other than God than by his superiority to all other creatures, 2 That Christ was not a mediator, 3 That hell will endure for a time, after which the soul and body will be destroyed, 4 That it is unlawful for princes to make war. Hook. The Socinians established a church at Rakow in Poland and made proselytes in Transylvania, 1573. They were expelled from Poland in 1638. The Rakovian catechism was published in 1574, see *Unitarians*.

SOCOTRA (*Dioscoridia insula*), an island in the Indian Ocean belonging to the Imam of Muscat, 120 miles E of Cape Guardafui, Eastern Africa. In the summer of 1878, it was said to have been given up to the British, formally annexed, Nov. 1886.

SODIUM, a remarkable metal, first obtained in 1807 by Sir Humphry Davy, from soda (which was formerly confounded with potash, but proved to be a distinct substance by Duhamel in 1736). This metal, like potassium, was obtained by the agency of the electric battery. In consequence of Davy's improved processes, sodium manufactured by Bell Brothers, of Newcastle, at now a pound (1868). It is an important agent in the modern production of aluminium. Common salt (chloride of sodium) is a compound of sodium and chlorine. Mr. H. Y. Castner's (of New York) new process for the enhanced production of sodium, and through sodium of aluminium and magnesium announced in June, 1887. His works were set up at Oldbury, near Birmingham, the price of sodium in 1889 was about 4s 4d a pound. See *Alkalies* and *Aluminium*.

SODOM AND GOMORRAH (Palestine), with

their inhabitants, were destroyed by fire from heaven 1898 B.C., *Gen. xix*.

SODOE, said to be derived from Sodor-ey, or south isles (the Ebrides or Hebrides), in distinction from Orkneys, the north isles. The southern or western isles were made an episcopal diocese by Magnus, king of Norway, 1098, and joined to the isle of Man about 1113. See *Man*.

SOFIA, a manufacturing town in Bulgaria, founded by Justinian on the ruins of the ancient Sardica, became the capital of the new principality. A palace and other buildings were erected, Aug. 1881. It contains 30 mosques and 10 churches. Destructive thunderstorm with loss of life, 31 May, 1890, see *Bulgaria*. Population, 1890, 42,000.

SOFFARIDES DYNASTY reigned in Persia, 872-902.

SOFTAS, Mahometan students devoted to the Koran only. See *Turkey*, May, 1876.

SOHO BAZAAR AND THEATRE, see *Bazaars* and *Theatres*.

SOISSONS (France), capital of the Gallic Suessones, was subdued by Julius Cæsar, 57 B.C. It was held by Syagrius, after his father Agadus, till his defeat by Clovis, A.D. 486. Several councils have been held at Soissons (in 744, 1092, 1122). Its academy was established in 1674. During the Franco-Prussian war, Soissons after three weeks' investment and four days bombardment, surrendered to the Germans under the grand duke of Mecklenburg, 16 Oct. 1870. 99 officers, 4633 men, 128 guns, &c., were said to be taken. The Germans thus obtained a second line of railway from Châlons to Paris.

SOLAR SYSTEM, nearly as now accepted, is said to have been taught by Pythagoras of Samos, about 529 B.C. He placed the sun in the centre, and all the planets moving in elliptical orbits round it—a doctrine superseded by the Ptolemaic system (which see). The system of Pythagoras, revived by Copernicus (1543), is called the Copernican system. Its truth was demonstrated by Sir Isaac Newton in 1687. See *Planets*.

SOLDIERS DAUGHTERS HOME was established at Hampstead, near London, in Aug. 1857, by the surplus of the money collected by the central association in aid of the wives and families of soldiers in active service during the Crimean war, and opened by the prince consort 18 June, 1858. It has been much indebted to the exertions of Major Poyjs.

Soldiers and Sailors Families Association founded 1883. In Nov. 1890 it acquired subscribers for the sufferers by the wreck of H.M.S. *Serpent*, see *Am.*

SOLEBAY or **SOUTHWOLD BAY** (Suffolk), where a fierce naval battle was fought between the fleets of England and France on one side, and the Dutch on the other, the former commanded by the duke of York, afterwards James II., 28 May, 1672. The English lost four ships, and the Dutch three, but the enemy fled, and were pursued to their coasts. The earl of Sandwich was blown up, and thousands were killed and wounded.

SOL-FA SYSTEM, see *Musical*.

SOLFERRINO (in Lombardy), the site of the chief struggle on the great battle of 24 June, 1859, between the allied French and Sardinian army commanded by their respective sovereigns, and the Austrians under general Hess, the emperor being

present The Austrians, after their defeat at Magenta, gradually retreated across the Mincio, and took up a position in the celebrated quadrilateral, and were expected there to await the attack. But the advances of Garibaldi on one side, and of prince Napoleon and the Tuscans on the other, induced them to recross the Mincio and take the offensive, on 23 June. The conflict began early on the 24th, and lasted fifteen hours. At first the Austrians had the advantage, but the successful attack of the French on Cavriana and Solferino changed the fortune of the day, and the Austrians, after desperate encounters, were compelled to retreat. The French attribute the victory to the skill and bravery of their emperor and the generals MacMahon and Niel, the Austrians, to the destruction of their reserve by the rifled cannon of their adversaries. The Sardinians maintained a fearful contest of fifteen hours. At San Martino, it is said against double their number. Loss of the Austrians, 630 officers, and 19,311 soldiers, of the allies, 8 generals, 936 officers, and 17,305 soldiers killed and wounded. This battle closed the war, preliminaries of peace being signed at Villa France, 12 July. On 24 June, 1870, on the site of the battle, three obelisks, containing the bones of thousands of the slain, were consecrated in the presence of representatives of Austria, France, and Italy.

SOLICITOR, see Attorney. By the Supreme Judicature Act, attorneys in future are to be styled solicitors, in act for regulating their examination was passed, 23 July, 1877.

SOLICITOR-GENERAL, the legal officer next in rank, and deputy to the attorney-general, whom he frequently succeeds.

SOLICITORS' ACT, passed 24 Dec. 1888.

SOLICITORS' REMUNERATION ACT, 44 & 45 Vict. c. 44, passed in 1881.

SOLIFDIANS (from *solis*, only, and *fidus*, faith) a name given to the Antinomians (which see).

SOLOMON'S TEMPLE, see Temple.

SOLWAY MOSS (Cumberland, bordering on Scotland) On 13 Nov 1717, it swelled, owing to heavy rains. Upwards of 400 acres rose to such a height above the level of the ground, that at last it rolled forward like a torrent above 1 mile, sweeping along with it houses, trees, &c. It covered 600 acres at Netherby, and destroyed about 30 small villages. Near Solway Moss the Scots were defeated by the English, 25 Nov 1542.

SOMAJ, see Dossam.

SOMBRERO (West Indies) On this desert isle, Robert Jeffery, a British man-of-war's man, was put ashore by his commander, the hon. captain W. Lake, for having tapped a barrel of beer when the ship was on short allowance. After sustaining life for eight days on a few limpets and rain-water, he was saved by an American vessel, 13 Dec 1807, and returned to England. Sir Francis Burdett advocated his cause in parliament, and he received 600*l.* as a compensation from captain Lake, who was tried by a court-martial, and dismissed the service, 10 Feb 1810.

SOMERSET-HOUSE (London), formerly a palace, founded on the site of several churches and other buildings, levelled in 1549, by the protector Somerset, whose residence fell to the crown after his execution, 22 Jan 1552. Here resided at times queen Elizabeth, Anne of Denmark, and Catherine, queen of Charles II. Old Somerset-house, a mixture of Grecian and Gothic, was demolished in 1775 and the present edifice, from a design by sir William Chambers, was erected for public offices. The Royal Academy of Arts first assembled in the apartments given to the members by the king, 17 Jan 1771. The Royal Society met here, 1780-1857, and apartments here were also held by the Society of Antiquaries and the Geological Society, all three now at Burlington House. Large suites of government buildings were erected in 1774. The Navy-office, Pipe office, Victualling and other offices, were removed here in 1788, and various government departments since. The east wing forming the King's College (see King's College) was completed in 1833. By an act passed in 1854, the offices of the duchy of Cornwall were transferred to this place.

SOMERSET THE BLACK, see Slavery in England.

SOMERS-TOWN, a populous district in St. Pancras parish, N. London named after earl Somers, whose family acquired the property about 1695. The building began about 1786, and many French refugees settled in it. Much of the district has been occupied by the railway companies.

SOMNATH GATES, the gates of an ancient Hindoo temple at Guzarat, which was destroyed by Mahmud of Ghuznee in 1025. The priests wished to preserve the idol, but Mahmud broke it to pieces and found it filled with diamonds, &c. He carried the gates to Guanaes. When that city was taken by general Nott, 6 Sept. 1842, lord Ellen-

orough ordered the gates to be restored after an exile of 800 years, and issued a proclamation much censured at the time. The gates are made of mandal wood, and are described and figured in the *Archæologia* of the Society of Antiquaries, vol. xix.

SOMORROSTRO, see *Spain*, 1874.

SONATA (Italian, sound-piece), the highest form of instrumental music, consisting of three or four movements, intending to express diverse kinds of human feelings.

It was developed from the *suite*, varied dance music (Tartini, 1644, and others). The form fixed by Corelli (1653-1713), was adopted and modified by Vivaldi, the Bachi, Handel, Mozart, Haydn, and culminated in the master-pieces of Beethoven (1770-1827). Fine sonatas have been composed by Dussek, M. Clementi, Weber, Schubert, Mendelssohn, Schumann, Wm. Sterndale Bennett, Chopin, Liszt, and Rubenstein.

SONDERBUND, see *Switzerland*, 1846.

SONNET, a poem in fourteen lines, with rhymes adjusted by rules, was invented, it is said, by Guido d'Arezzo, about 1024. The most celebrated sonnets are those by Petrarch (about 1327), Shakespeare (1609), Milton (about 1650), and Wordsworth (1820).

SONNITES, the orthodox Mahometans who now possess the Turkish empire, see *Mahometanism*.

SONS OF THE CLERGY, see *Clergy*.

SONTAY, see *Tongay*, Dec. 1883.

SONTHALS, a tribe of Northern India, brought to Bengal about 1820, where they prospered, till, partly from the instigation of a fanatic, and partly from the exactions of money-lenders, they broke out into rebellion in July, 1855, and committed fearful outrages. They were quite subdued early in 1856, and many were removed to the newly-conquered province of Pegu.

SOOLOO, see *Sulu*.

SOPHIA, ST. (in Constantinople) The first church was dedicated to St. Sophia (holy wisdom) by Constantius II., 360, this having been destroyed, the second, the present edifice, was founded by Justinian, 531, and dedicated 537. Since the Mahometan conquest in 1453, it has been used as an imperial mosque. Its length is 269 feet, and its breadth 243 feet. Six of the pillars are of green jasper, from the temple of Diana, at Ephesus; and of porphyry, from the temple of the Sun, at Rome. Four minarets were added by Selim II., who reigned in 1566. The interior of the dome is beautifully ornamented with mosaic work.

SOPHIA, see *Sofia*.

SOPHISTS, teachers of youth in Athens, who were censured by Socrates, and consequently were instrumental in causing his judicial murder, 399 B.C. The controversy against them was carried on by Plato and his disciples.

SORBONNE, a society of ecclesiastics at Paris, founded by Robert de Sorbonne in 1252. The members lived in common, and devoted themselves to study and gratuitous teaching. They soon attained a European reputation as a faculty of theology, their judgment being frequently appealed to, from the 14th to the 17th centuries. The influence of the Sorbonne was declining when the society was broken up in 1789. The buildings are now devoted to education. The new Sorbonne Buildings were opened on 5 Aug. 1880; this is the virtual

reconstruction of the university of Paris. Gymnastic education introduced, 1892.

SORCERERS AND MAGICIANS. A law was enacted against their seductions, 33 Hen. VIII. 1541; and another statute equally severe was passed, 5 Eliz. 1563. The pretension to sorcery was made capital, 1 James I. 1603, see *Witchcraft*.

SORGHUM, see under *Sugar*.

SOUDAN or **SOUDJA**, the title of the lieutenant-generals of the caliphs, which they bore in their provinces and armies. The officers afterwards made themselves sovereigns. Saladin, general of the forces of Nouredin, king of Damascus, was the first that took upon him this title in Egypt, 1165, after having killed the caliph Caym.

SOUDAN or **NIGRITIA**, a region of Central Africa, partly subjected to the Khedive of Egypt since 1874, capital Khartoum. It was well governed, by col. Gordon, till 1879. See *Egypt*.

SOULAGES COLLECTION About 1827,
M. Soulages of Toulouse, collected 790 specimens
of Italian art and workmanship, &c. These were
bought for 11,000*l*. by 73 English gentlemen, with
the view of first exhibiting them to the public, and
afterwards selling them to the government (who
gradually purchased them between 1858 and 1865)
They formed part of the "Art Treasures" exhibited
at Manchester in 1857.

SOUND, see *Acoustics*.

SOUND DUTIES. Till the year 1857, no
merchant ship was allowed to pass the Sound (a
narrow channel separating Zealand from Sweden)

without clearing at Elsinore and paying toll.
These duties had their origin in an agreement
between the king of Denmark and the Hansa towns
(1248), by which the former undertook to maintain
lighthouses, &c., along the Carlsberg, and the latter
to pay duty for the same. The first treaty with
England in relation to this was in 1450, other
countries followed. In 1855 the United States
determined to pay the dues no more, and in the
same year the Danish government proposed that
these dues should be capitalised, which was
eventually agreed to, the sum being 30,476,325 rix-
dollars. In Aug. 1857, the British government
paid 10,126,855 rix-dollars (1,125,266*l*.) to the Danes
as their proportion.—The passage of the Sound was
affected, in defiance of strong fortresses, by sir Hyde
Parker and lord Nelson, 31 March, 1801, see
Baltic Expedition.

SOUNDINGS AT SEA. Captain Ross, of
H.M.S. *Edinburgh*, in 1840 took extraordinary
soundings at sea. In the latitude 33° 8' and longi-
tude 9° W. about 300 miles from the Cape of Good
Hope, 2266 fathoms were sounded, the weight
employed amounted to 450 lbs. On 13 July, 1857,
lieut. Joseph Dayman, in the North Atlantic Ocean,
lat 51° 9' N, long 40° 2' W. in sounding, found
a bottom at 2425 fathoms. The deepest sounding
known (3875 fathoms) was taken by the *Challenger*,
capt. Nares, 24 March, 1873, in the North Atlantic,
north of St. Thomas. See *Deep Sea Soundings*.

SOUTH AFRICAN ASSOCIATION estab-
lished July, 1881, to promote the commercial
and social interests of the South African colonies

SOUTH AFRICA CONFEDERA-
TION to comprise the three British colonies—
Cape Town, Natal, and West-Gratias Land (1851)
—and the two Dutch republics, Orange River free
state, and the South Africa or Transvaal republic
(1852) The formation was proposed by the earl of
Carnarvon, colonial secretary, in a despatch to sir
Henry Barkly, governor of Cape Town, 4 May, 1875,
and advocated by the historian, J. A. Thond, on a
visit. It was much opposed at the Cape. See
Cape. A conference of delegates in London was
opened, 5 Aug. 1876

The South Africa Act "for the union under one govern-
ment of such of the South Africa colonies and states
as may agree thereto, was passed 20 Aug. 1877

SOUTHAMPTON, a seaport (S. England), a
county of itself, near the Roman Clausentum and
the Saxon Hamtune. It frequently suffered by
Danish incursions Canute, when king, occasionally
resided here. The charter was granted by Henry I.
and confirmed by Richard I. and John; and the first
grammar school was founded by Edward VI. On
17 July, 1861, a monument to Dr Isaac Watts,
a native, was uncovered; and on 15 Oct. 1862, the
Hartley institution was opened by lord Pal-
merston. The prince of Wales laid the foundation
of the parish church of St. Mary, built as a memo-

rial of Samuel Wilberforce, bishop of Winchester, 12 Aug. 1878, consecrated 10 June, 1879. The British Association met here 1846 and 1882. Population 1881, 60,051, 1891, 65,325.

SOUTH AUSTRALIA was visited by Capt Sturt in 1830, and explored shortly after by Capt Parker and Mr Kent, the former of whom was killed by the natives. The boundaries of the province were fixed by 4 & 5 Will IV c 95 (1834), and it was occupied 26 Dec 1836, by Capt Hindmarsh, the first governor. It was colonised according to Mr L. Gibbon Wakefield's scheme, which was carried out by the South Australian Colonisation Association. The colony for several years underwent severe trials through the great influx of emigrants, land-jobbing, building speculations, &c., which produced almost universal bankruptcy in 1839. In five years after, the energy of the colonists had overcome these difficulties, and the prosperity of the colony appeared fully established. In 1842 the highly productive Burra Burra copper mines were discovered, and large fortunes were suddenly realised, but in 1851 the discovery of gold in New South Wales and Victoria almost paralysed this province by drawing off a large part of the labouring population. Very little gold was found in South Australia, but a reaction took place in favour of the copper mines and agriculture, &c. Before the discovery of gold, little trade existed between Adelaide (the capital of South Australia) and Melbourne, but in 1852 gold was transmitted from the latter to the former to the amount of 2,215,167, principally for breadstuffs, farm produce, &c. The discovery of alluvial gold at Taupo, Waukaringa, Oct. favourable report Dec 1886. Sir Dominie Daly, appointed governor in Nov. 1861, died 19 Feb 1868, succeeded by Sir James Hergesson Dec 1868, by Anthony Musgrave, Jan 1873, by Wm. Wellington Collins, Jan 1877, Sir W. T. D. Jerrold, June, 1877, Sir W. Robinson, Nov. 1882, the Earl of Kintore, Dec 1888. Population in 1855, 85,821, in 1865, 156,605, in 1871, 185,626, in 1877, 225,677, in 1882, 293,509, in 1891, 315,046.

The Earl of Kintore and party cross the continent from Port Darwin to Adelaide (see Austral &c) 9 April 23 May 1891.

Resignation of Mr Playford, 17 June, Mr. H. Holden forms a ministry 30 June, 1892.

SOUTHCOTT, JOANNA, a fanatic, born in 1750, came from Exeter to London, where her followers at one period amounted to many thousands, the low and ignorant being her principal dupes. In 1792 she announced herself as the woman spoken of in Revelation, chap. xii, and a disease favoured the delusion that she would be

the mother of the promised Messiah. She died 27 Dec 1814. In 1851 there existed in England 47 congregations, professing to expect her return. Her successor, Mrs. Peacock, died March, 1875, aged 103 (?).

SOUTH-EASTERN RAILWAY, from London to Folkestone, opened, 23 June, 1843, to Dover, 7 Feb 1844.

SOUTHERN CONFEDERATE STATES, see Confederates.

SOUTHERN CONTINENT. The Southern Ocean was first traversed by Magellan in 1520, and explored by Wallis and Carteret in 1766 and by Cook in 1773 and 1774. Of the southern continent little more is known than that it is rebound, and contains active volcanoes. It was discovered in the first instance by Capt John Biscoe, on 27 Feb 1831, in lat 65° 57' S, long 47° 20' E, extending east and west 200 miles,—thus he named Enderby Land, after the gentleman who had equipped him for the voyage. Capt Biscoe also discovered Graham's Land on 15 Feb 1842, situated in lat 67° 1' S, long 71° 48' W. The Messrs Enderby equipped three other expeditions in search of the southern continent, the last (in connection with some other gentlemen) in 1838, when Capt Balleny had command, who, on 9 Feb 1839, discovered the Balleny Islands, in lat 67° S, long 165° E, and in March, 1839, Sabina Land, in lat 65° 10' S, long 118° 30' E. In 1840, a French expedition, under the command of Admiral D'Urville, and an American expedition, under the command of Commodore Wilkes, greatly added to our knowledge in respect to the existence of a southern continent, and thus was again increased by the expedition which sailed from England in 1839, under the command of Capt. Sir James Clark Ross, who discovered Victoria Land in 1841, and subsequently penetrated as far south as 78° 11'. Antarctic expedition proposed to the Argentine republic and the Genoa 8 Sept 1881, the objects collected to be divided Italian expedition under hrut. Boce, 1881-2.

New South Polar expedition proposed by the Antarctic Exploration committee at Melbourne was rejected by the governors and others Aug 1890. The sum required for the expedition is 15,000. Sir Thomas Blair subscribed 5,000 (the rest some 5,000, 1,000 for the other 5,000) See Antarctic Pole.

SOUTH KENSINGTON MUSEUM, new Brompton old church (containing the pictures presented by Mr Vernon, Mr Sheepshanks, Mrs. Ellison, and those bequeathed by Turner, the great painter, as well as specimens of sculpture and art, educational collections, products of the animal, vegetable, and mineral kingdoms, &c.), was opened on 22 June, 1857. A special exhibition of works of art, of immense value, lent for the occasion, was opened here in the summer of 1862, and closed in November. In July, 1873, a testimonial to Mr. (aft. an) Henry Cole, C.B., was proposed for his exertions in organizing this museum, and in promoting its objects.

Mr John Forster, biographer of Dickens, bequeathed his library of books, MSS., paintings, and drawings to this museum. He died 1 Feb 1876. Scientific Apparatus Loan Exhibition (which was) opened 23 May closed 30 Dec. Mr. John Jones bequeaths a collection of works of art, &c. estimated value, 500,000, announced Jan 1888.

SOUTHPORT, Lancashire, a watering place, founded in 1792 on a sandy waste, has rapidly pro-

grewed, now possessing an esplanade 3 miles long, and many fine buildings. It was made a municipal borough in 1867, and received the British Association 19 Sept. 1883. Population, 1851, 4,765; 1871, 18,085; 1891, 43,006.

SOUTH-SEA BUBBLE commenced with the establishment of the South-sea company in 1700, which was at first unwisely and afterwards dishonestly managed. It exploded in 1720, ruining thousands of families, and the directors' estates, to the value of 2,014,000*l.*, were seized in 1721 and sold. Mr Knight, the cashier, absconded with 100,000*l.*, but he compounded the fraud for 10,000*l.* and returned to England in 1743. Almost all the wealthy persons in the kingdom had become speculators, the artifices of the directors having raised the shares, originally 100*l.*, to the price of 1000*l.* A parliamentary inquiry took place in Nov. 1720, and Aislabine, chancellor of the exchequer, and several members of parliament were expelled the house in 1721, see *Law's Bubble*.

SOUTHWARK (S. London), was governed by its own bailiffs till 1327. The city, however, found great inconvenience from the number of malefactors who escaped thither, in order to be out of the reach and cognizance of the city magistrates, and a grant was made of Southwark to the city of London by the crown, for a small annuity. In Edward VI's reign it was formed into a city ward, and was named Bridge Ward Without, 1550—*Southwark bridge* was designed by John Rennie, and built by a company, 1815-19 at an expense of 800,000*l.* It consists of three great cast-iron arches, resting on massive stone piers and abutments, the distance between the abutments is 708 feet, the centre arch is 240 feet span, the two others 210 feet each, and the total weight of iron 5308 tons. The bridge was freed from toll on 8 Nov. 1864, the company receiving a compensation from the city. An act for the payment of dividends to shareholders was passed in 1872—*Southwark park* was opened 19 June 1869. By the Seats Act (1885), Southwark sends three members to parliament.

City and South London Electric Railway (see 1111) opened 4 Nov. and 18 Dec. 1890. The priory church of St. Mary Overie (dating from the 13th century, was leased from the crown to the united parishes of St. Margaret and St. Mary Magdalene and became the parish church as St. Martin in 1540. Since then many changes have been made. Mr G. Gwilt repaired the tower, the lady chapel and the choir 1818 &c. The roof of the nave was removed in 1837, and in 1839 replaced by lath and plaster. The prince of Wales laid the memorial stone of a new nave 24 July, 1890, about 31,000*l.* subscribed for the work up to 17 Feb.

The prince and princess of Wales visited the Evelina hospital, he lays the foundation stone of the new buildings of the R. S. London Ophthalmic Hospital 24 July,

SOUTHWELL, Nottinghamshire, an ancient Saxon town, where a church was founded by Paulinus, archbishop of York, 627, made collegiate before the conquest, refounded by Henry VIII, and made a bishopric by Henry VIII, 1541, dissolved by Edward VI. Collegiate church restored by Elizabeth, 1586. Near here Charles I. surrendered himself to the Scotch army in 1646. The Massacre act, authorizing the establishment of a see at Southwell, was passed, 16 Aug. 1878. Constituted to consist of the counties of Derby and Nottingham, 2 Feb. 1884. The restored minster re-opened as cathedral, 2 Feb. 1888.

SOVEREIGN, an ancient and modern British gold coin. In 1489 224 pieces, in value 20*l.*, "to be called the sovereign," were ordered to be coined out of a pound of gold. *Ruding*. In 1542 sovereigns were coined in value 20*l.*, which afterwards, in 1550 and 1552 (4 & 6 Ed. VI.), passed for 2*l.* and 3*l.* "Sovereigns" of the new coinage were directed to pass for 20*l.* 1 July, and half-sovereigns for 10*l.* 10 Oct. 1817, see *Coin*, and *Gold*. By the Coinage act, 1870, the weight of the sovereign is fixed at 123.27447 grains troy, specific gravity, 17.57 (916.67, gold being 1000) half-sovereigns, 61.63723 grains. The *dragon* sovereigns were re-issued in 1871.

SPA-FIELDS (N. London). Here about 30,000 persons assembled to vote at address from the distressed manufacturers to the prince regent, 15 Nov. 1816. A second meeting, 2 Dec. following, terminated in an alarming riot, the shops of several gunsmiths were attacked for arms by the rioters, and in the shop of Mr Beckwith on Snow-hill, Mr Platt was wounded, and much injury was done before the tumult was suppressed. For this riot, *Lashman*, a seaman, was hanged, 12 March, 1817; *Watson*, the ringleader, escaped to America.

Spafields Chapel, a dome building originally a place of entertainment named the Pantheon erected, 1770, was after several changes purchased by the guests of Huntingdon and used as a place of worship for her connection (see *Whitechapel*). This chapel was pulled down in 1887.

SPARTA, the capital of Laconia (Greek, Λακωνία) or Lacedæmon, the most considerable republic of the Peloponnese, and the rival of Athens. Though without walls, it resisted the attacks of its enemies by the valour of its citizens for eight centuries. Lacedæmon is supposed to have been the first king. From Lacedæmon the fourth king, and his wife Sparta, who are also spoken of as the founders of the city, it obtained name. The Lacedæmonians were a nation of soldiers, and cultivated neither the arts, sciences, commerce, nor agriculture. The early history is traditional

SPARTACUS'S INSURRECTION (or
Servile War) Spartacus was a noble Thracian,
 who served in an auxiliary corps of the Roman
 army. Having deserted and been apprehended, he
 was reduced to slavery and made a gladiator. With
 some companions he made his escape, collected a
 body of slaves and gladiators, 73 B.C., ravaged
 southern Italy, and defeated the Roman forces
 under the consul sent against him. Knowing the
 impossibility of successfully resisting the republic,
 he endeavoured to conduct his forces into Sicily,
 but was defeated and slain by Crassus, 71 B.C.

"SPASMODIC SCHOOL" of poetry, a
 name sarcastically given to Alex. Smith, Sydney
 Dobell (died in Aug. 1874), Gerald Massey, and
 others (precursors of Morris, Algernon Swinburne,
 and Rossetti, sarcastically termed the "flecky
 school"), ridiculed by professor Ayton in his
 "Firmilian," published 1854

SPEAKERS OF THE HOUSE OF COMMONS.
 Peter de Montfort, afterwards killed at the battle
 of Evesham, was the first speaker, 45 Hen. III.,
 1260, Sir Thos. Hungerford is said to have
 been the first named Speaker, 1373, but
 an Peter de la Mare is supposed to have been the
 first regular speaker, 50 Edw. III., 1376. The
 king refused his assent to the choice of Sir
 Edward Seymour, as speaker, 6 March, 1678, and
 sequester William Gregory was chosen in his room.
 Sir John Trevor was expelled the chair and the
 house for taking a gratuity after the act for the
 benefit of orphans had passed, 12 March, 1694-5, a
 deputy speaker was appointed Aug. 1853

RECENT SPEAKERS

1780 Henry Villington (aft. 1804 ch. 14th) 1 June
 1801 Sir John Mitford (aft. baron Redbush) 15 Feb.
 1802 Charles Abbot (aft. lord Colchester) 20 Feb.

 1857 John Lubbock Denison 30 April (afterwards viscount Devonport)
 187 Sir Henry Wm. Bouverie Brand (afterwards viscount Hampden) 9 Feb. 25 Feb. 1884
 1884 Arthur Hillier, Peel 26 Feb. re-elected 1892
 The speaker is a weekly liberal (Globe) newspaper, edited by Mr. J. W. W. (aft. first appears 4 Jan. 1800)

SPEAKERS COMMENTARY, a name given to an edition of the Bible with a revised text and a commentary by several bishops and other theologians edited by F. C. Cook. The undertaking originated, it is said, chiefly with Mr. John Evelyn Denison, speaker of the house of commons, with the view of opposing the interpretations of Dr. Colenso, and was announced in Nov. 1863. The publication, begun in 1871, was completed in 1881. The poetry part published in 1888

SPEAKING-TRUMPET, used by ships at sea. One is said to have been used by Alexander, 335 B.C. One was constructed from Kircher's description by Saland, 1652. Philosophically explained and brought into notice by Morland, 1670

SPECIAL COMMISSION ACT, passed 13 Aug. 1888. A commission constituted to try certain charges and allegations against certain members of parliament. See *Parnellites and Ireland*, 1888.

SPECIAL CONSTABLES are sworn in for the preservation of the public peace when disturbances are feared. The laws relative to their appointment were amended in 1831 and 1835. Louis Napoleon, afterwards emperor, acted as a special constable in London, 10 April, 1848, see *Chartists*, and London, Dec. 1867. Instructions for their organization were issued, 13 Jan. 1868. On 28 Jan. 52,974 in the metropolis, and 113,674 in the United Kingdom, had been sworn in. Their services were not required, and they were honourably dismissed by an order issued 31 March, 1868.

Special constables were sworn in in relation to the disturbances in Trafalgar Square (see *Notes*) 17 Nov. 1887, 1,500 hired Trafalgar Square, Sunday, 30 Nov. 1887, and till 28 Jan. 1888, and thanked.

SPECIES Much controversy among naturalists arose in consequence of the publication, in 1859, of Mr Charles Darwin's "Origin of Species," in which he suggests that all the various species of animals were not created at one time, but have been gradually developed by what he terms "natural selection," and the struggle for life in which the strong overcome the weak.

This preservation of favourable individual differences and variations and the destruction of those which are injurious I have called *natural selection*, or the survival of the fittest. —Darwin

The idea was put forth by Lamarck in his "Philosophie Zoologique" 1809. Similar views appear in the "Vestiges of Creation" 1844. Mr. Darwin says, that he infers "from analogy that probably all the organic beings which have ever lived on the earth have descended from some one primordial form into which life was first breathed by the Creator. See *Descent of man* and *Introduction*.

Charles Darwin was born 24 Feb 1809, and died 19 April 1882.

Statue of Darwin by J. E. Boehm paid for by universal subscription, received at the British Museum of Natural History by the prince of Wales, and unveiled by professor Huxley, 9 June 1885.

His "Life and Letters" edited by his son Francis Darwin published Nov. 1887.

Professor G. J. Roussier, Librarian wrote "Darwin and after Darwin" was published in 1892.

SPECIFIC GRAVITIES. See under *Weights*.

SPECTACLES, unknown to the ancients, are generally supposed to have been invented by Alessandro de Spina, a monk of Florence, in Italy, about 1285. According to Dr. Ploti, they were invented by Roger Bacon, about 1280. Vanni attributes them to Salvino, who died 1317. On his tomb at Florence is the inscription, "Qui quies Salvino degli Armati, inventor di occhiali. Dio gli perdoni le peccati." ('Here lies Salvino degli Armati, inventor of spectacles. May God pardon his sins'.)

SPECTATOR The first number of this periodical appeared on 1 March, 1711, the last was No. 635, 20 Dec 1714. The papers by Addison have one of the letters of 1710 at the end. The most of the other papers are by Sir Richard Steele, a few by Hughes, Budgell, Euclid, Miss Shephard, and others.—The *Spectator* newspaper (philosophical, whig), begun 5 July, 1828.

SPECTRUM, the term given to the image of the sun or any other luminous body formed on a wall or screen, by a beam of light received through a small hole or slit, and refracted by a prism. The colours thus produced are red, orange, yellow, green, blue, indigo, and violet. The phenomena were first explained by Newton, whose "Optics" was published in 1704. Several of the colours are considered to be compounds of three primary ones by Mayer (1775), red, yellow, and blue,—by Dr. Thos Young (1801), red, green, and violet,—by Prof Clerk Maxwell (1860), red, green, and blue. As the colour of a flame varies according to the substance producing it or introduced into it, so the spectrum varies. This led to the invention of a method of chemical analysis by professors Bunsen and Kirchhoff (1860), by which they discovered two new metals, and drew conclusions as to the nature of the atmosphere of the sun and stars, and of the light of the nebulae, by comparing the spectrum with that produced by flames into which iron, sodium, and other substances have been introduced. For the invisible rays of the spectrum, see *Calorescence*, *Fluorescence*, and *Bolometrie*.

Frankhofer's Lines. In 1868 Dr. Wollaston observed several dark lines in the solar spectrum in 1817, Joseph

Fraunhofer not only observed them but constructed a map of them giving 500 lines or dark bands. By the researches of Fraunhofer and others the number observed is now about 2000.

Mr Fox Talbot observed the orange line of strontium in the spectrum in 1846 and later David Brewster observed other lines 1833-42-3. In 1860-3 Mr William Buggins analysed the light of the fixed stars and of the nebulae and in 1865 Dr. Bunsen Jones by means of spectrum analyses detected the presence of minute quantities of metals in the living body, introduced only a few minutes previously.

A spectroscopic society in Italy published a journal early in 1872.

H. Schliemann's *Spectroanalytische* published 1870, new edition in 1883.

Sir H. Rowland's *Spectroscopic Analysis* published 1867-8, 1870, 1871, 1872, 1873, 1874.

Oxygen detected in the solar spectrum by Mr. Draper.

The experiments of professor Dewar and others have shown that the spectrum of various gases are affected by temperature and pressure 1885-9.

SPECULATIVE SOCIETY, Edinburgh (which had included among the members David Hume), celebrated its hundredth anniversary on 14 Oct 1873, see *Philosophy*.

"SPELLING BEES" meetings to test the proficiency in correct spelling introduced into London from the United States of America, the first at Holloway London, N., in the autumn of 1875. Geographic, musical, and other bees followed and all were successful.

SPELLING REFORM A resolution in favour of it was adopted by the London School Board, in 1877, a conference and public meeting were held at the Society of Arts, 29 May, 1877.

A *Spelling Reform Association* formed in 1877, Dr Temple, a schoolmaster, Robert F. Fox, a tailor, and Mrs. Muller were among the members. In 1879, as their association formed in the United States, professor F. A. March presided.

Mr T. B. Spence's article on a Marriage and Mortality Table in the Journal of the Institute of Actuaries 1871, and according to honest spelling July, 1879.

SPHERES The celestial and terrestrial spheres and sundials are said to have been invented by Anaximander, 528 B.C., and the armillary sphere by Eratosthenes, about 225 B.C. The planetarium was constructed by Archimedes before 212 B.C. Pythagoras maintained that the motions of the twelve spheres must produce delightful sounds, inaudible to mortals, which he called the music of the spheres.

SPHYGMOGRAPH (from the Greek, *sphugmos*, a pulsation) an instrument for investigating disease, by showing the state of the pulse, invented by M. D. J. Marey, of Paris, and described by him in 1863.

SPOCES Imported into Great Britain cinnamon and other spices, exclusive of pepper, 1846, 1 910,584 lbs., 1856, 4,154,167 lbs., 1867, 12,831,953 lbs., 1877, 17,186,572 lbs., 1879, 19,340,817 lbs., 1883, 24,144,895 lbs., 1887, 23,783,950 lbs. 1890, 23,506,493 lb.

SPOCHEREN, see *Saccharum*.

SPINET a clavichord or keyed instrument, used in the 17th century, a modification of the virginals which Mr. Bull, Gibbons, Murchell, and especially Domenico Scarlatti composed for this instrument.

SPINNING was ascribed by the ancients to Minerva, the goddess of wisdom. Aracis, king of Aracada, taught his subjects the art about 1500 B.C. Tradition reports that Laocetes with her maids was

found spinning, when her husband Collatinus paid a visit to her from the camp, that the wife of Tarquin was an excellent spinner, and that a garment made by her, worn by Servius Tullius, was preserved in the temple of Fortune. Till 1767, the spinning of cotton was performed by the hand spinning-wheel, when Hargreaves, an ingenious mechanic, near Blackburn, made a spinning jenny, with eight spindles, and also erected the first carding machine, with cylinders. Arkwright's machine for spinning by water was an extension of the principle of Hargreaves; but he also applied a large and small roller to expand the thread, for which he took out a patent in 1769. At first he worked his machinery by horses; but in 1771 he built a mill on the stream of the Derwent, at Cromford. In 1774-9, Crompton invented the mule (*which see*).

SPIRES (in Bavaria). The emperors held many diets at Spire since 1309, and it was the seat of the imperial chamber till 1689, when the city was burned by the French, and not rebuilt till after the peace of Ryswick, in 1697. The diet to condemn the reformers was held at Spire, called there by the emperor Charles V. 1529, *see Protestants*.

SPIRIT-LEVEL. The invention is ascribed to J. Melchisedec Thvenot, who died 1692.

SPIRIT-MOTOR. Mr. Yarrow explained to the Institute of Naval Architects his method of employing vaporized spirit instead of steam in the propulsion of steam launches thus dispensing with the use of a boiler, &c., March, 1868. Petroleum is used as fuel.

SPIRITS, *see Distillation*. In all nations spirituous liquors have been considered as a proper subject of heavy taxation for the support of the state, *see Alcohol, Brandy, Rum, Methylated Spirits, &c*.

In 1840 England made about ten millions of gallons of spirits, Scotland about seven millions of gallons, and Ireland about nine millions of gallons.

In 1831 the number of gallons on which duty was paid for home consumption was 23,976,596. The total amount paid was £6,071,281 of which £3,758,786 was paid by England, 1,459,597 by Scotland, and 1,006,735 by Ireland.

The total duty on home consumption paid in 1853 was £6,760,422.

In 1858, 9,195,551 were paid as duty on 27,370,934 gallons.

In 1855, methylated spirits of wine, for use in the arts and sciences, were made duty free.

In 1850, 27,657,722 gallons of spirits were distilled in the United Kingdom. The uniform duty of 8s per gallon was paid on 24,354,403 gallons for home consumption, producing 9,701,704. In the year 1865 the tax produced about 14,935,000, being the largest sum then ever raised by indirect taxation. In 1871-2, 16,798,341 (consumes and excise); in 1875-6, 21,105,663; in 1877-8, 20,675,984; in 1883-4, 18,435,957; in 1887-8, 27,312,550; in 1888-9, 27,175,794; in 1889-90, 28,531,571; in 1890-1, 29,263,541.

In 1861 an act was passed repealing wholly or in part all previous acts, and embodying all regulations for the guidance of manufacturers and dealers in spirits.

In 1870, about 30,000,000. spent in spirits; 58,000,000. by working classes.

Proof spirits distilled in the United Kingdom in 1873, 36,479,648 gallons (England, 9,531,058; Scotland, 10,566,889; Ireland, 10,566,889); in 1874, 35,359,238 gallons; duty paid, 10s a gallon.

Exported from the United Kingdom: 1876, 1,308,456 gallons; 1880, 2,000,103; 1885, 2,760,041; 1889, 3,415,320; 1890, 3,698,658.

Additional duty of 6d. per gallon on spirits imposed, 27 April, 1890.

SPIRITS ACT (43 & 44 Vict. c. 24), passed Aug. 1880, consolidated and amended the law relating to the manufacture and sale of spirits.

SPIRITUALISM or SPIRIT-RAPPING.

Spiritual manifestations (so called) began, it is said, in America about 1848, and attracted attention in this country about 1851, in the shape of rapping, table-turning, &c. Many inquisitive or credulous persons visited Mr. Daniel Dunglas Home or Home and Mr. Forster, noted "spiritual mediums." Mr. Home, secretary of the Spiritual Athenaeum, Sloane-street, Chelsea, published, in 1863, "Incidents of my Life," in which he states that the only benefit he derived from the "gift" was the convincing many unbelievers of the certainty of a life to come; the *Times*, April, May, 1868. The "Spiritual Magazine," began Jan. 1860; the "Spiritualist," 9 Nov. 1869. The London Dialectical society published a report on spiritualism in Nov. 1871. Mr. W. Crookes, in 1871, investigated the phenomena, and ascribed them to "psychic forces" ("Quarterly Journal of Science," July and Oct. 1871). Miss Kate Fox, said to be the earliest American medium (about 1852) was married to Mr. H. D. Jencken, in London, Dec. 1872.

The impostures of the Davenport brothers exposed in 1865.

In 1874 Messrs. Maskelyne and Cooke, and Dr. Lyall, exhibited tricks by which they said they demonstrated the impostures of spiritualism.

Spiritualism discovered by a section of the British Association at Glasgow (supported by Messrs. Wm Crookes, A. Russell Wallace, and other eminent men), without result, 12 Sept. 1876.

20 spiritualist journals, publishing, 1876. Dr. Henry Slade, a medium, and Geoffrey Simmons, his assistant, charged at Bow-street by judge 1 May Lancaster and others, with "unlawfully using certain subtle and crafty means and devices to deceive"; dealt with under Vagrant Act, 2, 10, 20 Oct.; Simmons discharged, Slade sentenced to 3 months' imprisonment with hard labour, 31 Oct. 1876, appeal to assizes; sentence quashed for a technical error, 20 Jan. 1877.

Wm. Lawrenson sentenced to 3 months' imprisonment for receiving money as a "medium," 16 Jan. 1877.

See Trick, 1881.

SPIRALFIELDS (East London), so named from the priory of St. Mary Spittle, dissolved 1534. Here the French protestant refugees settled and established the silk manufacture in 1685. In consequence of commercial changes the weavers endured much distress about 1829.

SPLITHEAD, a roadstead near the Spit, a sand-bank between Portsmouth and the Isle of Wight. *See Naval Review*, under *Navy of England*.

SPLITZBERGEN, an archipelago in the Arctic ocean, discovered in 1553 by Sir Hugh Willoughby, who called it Greenland, supposing it to be a part of the western continent. In 1595 it was visited by Barents and Cornelius, two Dutchmen, who pretended to be the original discoverers, and called it Spitzbergen, or sharp mountains, from the many sharp pointed and rocky mountains with which it abounds; *see Phipps*.

A scientific expedition to Spitzbergen, organized by Herr Eschscholtz of Stuttgart, left Bremen about 29 July; returned 26 Aug. 1891.

SPLITZCAP, *see Majuba*.

SPONTANEOUS COMBUSTION of the human body, declared by many chemists to be impossible, although many cases have been recorded. The case of the countess of Goritz, 1847, disproved by confession of her murderer, March, 1850.

SPONTANEOUS GENERATION. The origin of the germs of infusorial animalcules developed during putrefaction, &c., has been warmly debated by naturalists. Spallanzani (about 1766), and especially M. Pasteur and others assert that these

germs are really endowed with organic life existing in the atmosphere. Needham (about 1747), and especially M. Pouchet and his friends in our day, assert that these germs are spontaneously formed out of organic molecules—Pouchet's "*Heterogènes*" appeared in 1859. Bastian's "*Beginnings of Life*," 1872. The researches of professor Tyndall, supporting Pasteur, and opposing Bastian, were published 1876-8.

"Spontaneous generation" (also termed *generatio æquivoca* and *epigenesis*), has been still further disproved by the laborious microscopic investigations of the Rev. W. H. Dallinger, 1875-8. He found germs to stand a much greater heat than perfect organisms.

SPORTING NEWSPAPERS. Bell's *Life* in London, began 1820, *Sporting Life*, 16 March, 1859; *Sporting Gazette*, 1862; *Sporting Times*, 1865; *Sportsman*, Aug 1865; *The Field*, 1853; *Illustrated Sporting and Dramatic News*, 1874; *Referee*, 1877.

SPORTS. The first "*Book of Sports*," under the title of "*The King's Majesty's Declaration to his Subjects concerning Lawful Sports to be used*," on Sundays after evening prayers, was published by king James I., 24 May, 1618. The second "*Book of Sports*," with a ratification by his majesty Charles I., is dated 18 Oct 1633. On the publication of the first "*Book of Sports*," there arose a long and violent controversy among English divines on certain points, see *Sabbatarians, Sunday, &c*—The book was ordered to be burnt by the hangman, and the sports were suppressed by the parliament. The sportsman's annual exhibition, at the Agricultural Hall, London, began in 1882.

SPOTTSYLVANIA (Virginia), see *United States*, May, 1864.

SPRINGFIELD (Missouri), near which was fought the desperate battle of Wilson's Creek, in which the federals had the advantage over the confederates, but lost their brave general, Nathaniel Lyon, 10 Aug. 1861.

SPURS. Anciently the difference between the knight and esquire was, that the knight wore gilt spurs (*equus auratus*), and the esquire silver ones. Two sorts of spurs seem to have been in use at the time of the Conquest, one called a pryck, having only a single point, the other a number of points of considerable size. Spurs nearly of the present kind came into use about 1400, see *Plating*.

SPURS, BATTLE OF. Henry VIII. of England, the emperor Maximilian, and the Swiss, in 1513, entered into an offensive alliance against France. Henry VIII. landed at Calais in the month of July, and soon formed an army of 30,000 men. He was joined by the emperor with a good corps of horse and some foot, the emperor as a *mercenary to the king of England, who allowed him a hundred denarii a day for his table*. They invested Tournai with an army of 50,000 men, and the duc de Longueville, marching to its relief, was signally defeated on the 16th of August, at Gume-gate. This battle was called the battle of *Spurs*, because the French used their spurs more than they did their swords. The English king laid siege to Tournai, which submitted in a few days. *Hénault. See Chevaliers*, for another "*battle of spurs*."

S. S., see *Collar*.

STABAT MATER, a Latin hymn, by Jacopone, 14th century, sung during Passion week in Catholic churches. Rossini's music to this hymn (1842) is often performed.

STADE DUES. At a castle near the town of Stade, in Hanover, certain dues on goods were charged by the Hanoverian government. The British government settled these dues in 1844. They were reinstated by the Americans in 1855, and were abolished in June, 1861. Great Britain paid 160,000*l* as her share of the compensation (3,000,000*l*).

STADTHOLDER, see *Holland*.

STAFF COLLEGE (Sandhurst), for providing an education to qualify military officers for the duties of the staff. The foundation stone was laid by the duke of Cambridge on 14 Dec. 1859.

STAFFORD, Staffordshire, a Saxon town. A castle was erected here by Ethelfleda, countess of Mercia, 913. A charter was granted by king John, 1207, and the grammar-school was rebuilt and endowed by Edward VI., 1550. Population, 1881, 19,977; 1891, 20,270.

STAGE COACHES, so called from the stages or inns at which the coaches stopped to refresh and change horses. *Basley*. The stage-coach duty act passed in 1785. These coaches were made subject to salutary provisions for the safety of passengers, in 1810, to mileage duties, 1815. The acts were consolidated in 1832, and amended in 1833 and 1842. See *Mail Coaches, &c*

STAGYRITE, properly Stagiite, see *Asiaticum*.

STAMFORD BRIDGE (York). In 1066 Tostig, brother of Harold II., rebelled against his brother, and joined the invading army of Harold Hadrada, king of Norway. They defeated the northern earls and took York, but were defeated at Stamford-bridge by Harold, 25 Sept., and were both slain. The loss by this victory no doubt led to his defeat at Hastings, 14 Oct. following. The claim of Mr. William Grey for the *caridom of Stamford*, was granted by the house of Lords, 3 May, 1892.

STAMP-DUTIES. By 22 & 23 Charles II (1670-1) duties were imposed on certain legal documents. In 1694 a duty was imposed upon paper, vellum, and parchment. The stamp-duty on newspapers was commenced in 1711, and every year added to the list of articles upon which stamp-duty was made payable.

Stamp act, which led to the American war, passed 22 March, 1765, repealed in 1766
Stamp duties in Ireland commenced 1774
Stamps on notes and bills of exchange in 1782
The stamp-duties produced in England, in 1800, a revenue of 3,126,535*l*
Many alterations made in 1853 and 1857. In June, 1855, the stamp-duty on newspapers as such was totally abolished, the stamp on them being henceforth for postal purposes.

In July and Aug 1854, 12,115,000 newspaper stamps were issued, in the same months, 1855, only 6,870,000.

Drafts on bankers to be stamped 1858
Additional stamp duties were enacted in 1860 (on leases, bills of exchange, dock warrants, extracts from registers of births, &c.), in 1861 (on leases, licences to house agents, &c.)
Stamp-duties reduced in 1864, 1865

All fees payable in the superior courts of law, after 31 Dec 1865, are to be collected by stamps, by an act passed in June, 1865. Also in Public Record office 1868

144,623,014 inland revenue penny stamps sold, besides other stamps 1869

STANDARD for gold and silver in England fixed by law, 1300 Standard gold is 22 parts out of 24 of pure gold, the other two parts or carats being silver or copper. The standard of silver is 11 oz 2 dwts of fine silver alloyed with 18 dwts of copper, or 37 parts out of 40 pure silver, and three parts copper. In 1300 these 12 oz of silver were coined into 20 shillings in 1412 they were coined into 30 shillings, and in 1527 into 45 shillings. In 1545 Henry VIII coined 6 oz of silver and 6 oz of alloy into 48 shillings, and the next year he coined 4 oz of silver and 8 oz of alloy into the same sum Elizabeth, in 1560 restored the old standard in 60 shillings, and in 1601 in 62 shilling. The average proportions of silver to gold at the royal mint are 15½ to 1. The standard of plate and silver manufactures was affirmed 6 Geo I 1719 *et seq*, see *Gold, Goldsmiths' Skill, Coinage, and Currency*

STANDARD, BATTLE OF THE, see *North allerton*

STANDARD MEASURES In the reign of Edgar a law was made to prevent frauds arising from the diversity of measures, and for the establishment of a legal standard measure to be used in every part of his dominions. The standard vessels made by order of the king, were deposited in the city of Winchester, and hence originated the well-known term of "Winchester measure" of the time of Henry VII (1487). The bushel so made is still preserved in the museum of that city. Henry I also, to prevent fraud, in the measurement of cloth, ordered a standard yard of the length of his own arm to be made and deposited at Winchester with the standard measures of King Edgar. The Guildhall contains the standard measures of succeeding sovereigns. *Camden*—The standard weights and measures were settled by parliament in 1824. The pound Troy was to be 5760 grains, and the pound avoirdupois 7000 grains. The "Standard yard of 1760," in the custody of the clerk of the house of commons, was declared to be the Imperial Standard yard and the unit of measures of extension. This standard having been destroyed by the fire in 1834, a new commission was appointed to reconstruct it, and researchers for this purpose, in conformity with the act, which directed the comparison of the standard with a pendulum vibrating seconds of time in the latitude of London, were begun by Francis Bailey (died in 1844), continued by the rev R Sheepshanks till his death in 1855, and completed by G B Airy, astronomer royal. In 1855 was passed "an act for ascertaining and preserving the lost standards of weights and measures." The parliamentary copies of the standard pound and yard are deposited at the Royal Observatory, Greenwich. The standard weights and measures act was passed Aug 1866. The Standard Commission published reports, 1866 *et seq*.

The old standard yard and other measures and weights, supposed to have been burnt at the fire of the parliament houses in 1834, were discovered by Mr Bull's agents in the Journal Office where they had been deposited and left untouched July 1891. The real standard of the reign of Henry VII and Elizabeth are still in existence

"**STANDARD**," conservative newspaper, begun, morning, 1827, evening, 29 June, 1857

STANDARDS, see *Banners, Flags, &c*. The practice in the army of using a cross on standards and shields is due to the asserted miraculous appearance of a cross to Constantine, previously to his battle with Maxentius. Eusebius says that he received this statement from the emperor himself, 312. The standard was named LABARUM. For the celebrated French standard, see *Auriflamme*.—**STANDARD OF MAROUMT**, on this emblem no infidel dared look. Christians have been massacred by the Turkish populace for looking on it.—The British Imperial Standard was first hoisted on the tower of London, and on Bedford Tower, Dublin, and displayed by the Foot Guards, on the union of the kingdoms, 1 Jan 1601

STANFORD COURT, Worcestershire, the ancient mansion of Sir Francis Wynn, burnt 17 Dec 1882, valuable portraits, books, MSS &c. destroyed

STANHOPE ADMINISTRATION was named by James (afterwards earl) Stanhope and the earl of Sunderland, 15 April, 1717. Stanhope was premier and chancellor of the exchequer, lord (afterwards earl) Cowper, lord chancellor, earl of Sunderland and Joseph Addison secretaries of state &c. In March, 1718, Addison resigned, and the earl of Sunderland became premier

STANLEY AND AFRICAN EXHIBITION Pitons queen Victoria and the king of the Belgians. Mr Joseph Thomson the traveller chief superintendent opened at Victoria Gallery Regent street, 24 March closed 8 Nov 1890

The exhibit included pictures and portraits African weapons historical and many interesting objects collected by Travellers Grant, Speke Johnstone and other travellers

STANLEY FUND Mr Stanley's wish that the surplus of the receipts from the exhibition should form a fund for building a steamer on the lake Victoria. Wyndham (17 May) agreed to it at a meeting at the Marlborough house 5 June 500 given by the queen, 16 July, 500 received Oct 1890

STANNARY COURTS of Devon and Cornwall for the administration of justice among the tin miners, whose privileges were confirmed by 33 Edw I 1305. They were regulated by parliament in 1641, and at many times since. A "Stannaries act" was passed in 1869, another one in 1887

STAPLE (literally that which is fixed). The chief English staple commodities which were traded in by privileged merchants, and on which customs were levied, were wool, skins, leather, tin, lead and sometimes cloth, butter, and cheese. Certain towns were appointed for the collection of the duties statutes relating to the staple were passed by Edward III, Richard II and Henry VI. Edward III's "ordinance stapleum" (ordinance of the staple) was enacted in 1353

STARCH is a sediment produced at the bottom of vessels wherein wheat has been steeped in water. It is soft and friable, easily broken into powder, and is used to stiffen and clear linen, with blue, its powder is employed to powder the hair. The art

of starching linen was brought into England by Mrs Dugheim, a Flemish woman, i Mary, 1553. *Stow* Patents for obtaining starch from other substances have been taken out from potatoes by Samuel Newton and others in 1707, from the horse-chestnut by Wm Murray in 1706, from rice by Thomas Wickham in 1823, from various matters by Orlando Jones in 1839-40.

STAR-CHAMBER, COURT OF So called happily from its roof being garnished with stars. *Coke* This court of justice was called Star Chamber, not from the stars on its roof (which were obliterated even before the reign of queen Elizabeth), but from the *Stara*, or Jewish covenants, deposited there by order of Richard I. No star was allowed to be valid except found in those repositories, and here they remained till the banishment of the Jews by Edward I. The court was instituted or revived, 3 Hen VII 1486, for trials by a committee of the privy council, which was in violation of Magna Charta, as it dealt with civil and criminal causes unfettered by the rules of law. In Charles I a reign it exercised its power upon several bold innovators, who gloried in their sufferings, and contributed to render government odious and contemptible. It was abolished in 1640. There were in this court from 26 to 42 judges, the lord chancellor having the casting vote. The judicial committee of the privy council is the Star-chamber revived under another name.

STAR OF INDIA, a new order of knight hood for India, instituted by letters patent 23 1 Oct, gazetted 25 June, 1861, and enlarged in 1866. It comprised the sovereign, the king and miter, 25 knights (Europeans and natives), and extra or honorary knights, such as the prince consort, the prince of Wales, &c. The queen invested several knights on 1 Nov 1861. The prince of Wales held a grand chapter at Calcutta, 1 Jan 1876.

STARS, THE FIXED They were classed into constellations (*which see*), it is supposed about 1200 B C. Hicetas, of Syracuse, taught that the sun and the stars were motionless, and that the earth moved round them, about 344 B C (thus is mentioned by Cicero, and perhaps gave the first hint of this system to Copernicus). Job, Hesiod, and Homer mention several of the constellations. The Royal Library at Paris contains a Chinese chart of the heavens, made about 600 B C, in which 1460 stars are correctly inserted. The aberration of the stars was discovered by Dr Bradley, 1727, see *Astronomy*, and *Solar System*. Maps of the stars were published by the Society for the Diffusion of Useful Knowledge in 1839, and a set of Celestial Maps, issued under the superintendence of the Royal Prussian Academy, was completed in 1859. See *Photometer*.

A list of about 200 stars which vary in their brightness and sometimes disappear, has been published by Mr G F Chaboure in his "Handbook on Astronomy, 1880-90. A variable star named *Alpha*, or *Mira* *Octis* observed by David Fabricius in Aug 1596 disappeared in Oct. following. It was observed again in 1603 and 1688, and since Bessel discovered the annual parallax of star *Si Cygni* (hence he calculated its distance from the earth to be about 60 billions of miles) 12 Feb 1841. Struve made it 40 billions [supported by Brünnow and E S Baily] 1853. The calculations of T Henderson (at the Cape) 1852 supported by D Gill and others showed that probably a Centauri is the star nearest to the earth 1883 4.

A new star in Auriga in the Milky Way was discovered at Greenwich, by telescope, 2 Feb 1892. It had been photographed by prof Pickering 1, 10, on Dec. 1891. It has been named Nova Aurigæ. Its brilliancy diminished, May, revived Aug 1892.

STARVATION Deaths attributed to it in the metropolitan districts, 1873, 107, 1875, 46, 1879, 80, 1883, 29. In London, 1889, 27. In England and Wales 1887, 250, 1888, 237. See *Abstinence*.

STATE MEDICINE, see under *Sanitation*, 2 May, 1888.

STATE PAPER OFFICE was founded in 1578, now merged into the Public Record Office. In 1856 the British government began the publication of Calendars of State Papers, invaluable to future historians.

STATES-GENERAL OF FRANCE An ancient assembly of France, first met, it is said, in 1302 to consider the exactions of the pope. Previous to the Revolution, it had not met since 1614. The states consisted of three orders, the clergy, nobility, and commons. They were convened by Louis XVI, and assembled at Versailles, 5 May, 1789 (308 ecclesiastics, 285 nobles, and 621 deputies or *tiers état*, third estate). A contest arose whether the three orders should make three distinct houses, or but one assembly. The commons insisted upon the latter, and assuming the title of the National Assembly, declared that they were competent to proceed to business, without the concurrence of the two other orders, if they refused to join them. The nobility and clergy found it expedient to concede the point, and they all met in one hall, see *National Assembly*. Centenary, see *France*, 5 May, 1889.

STATES OF THE CHURCH, see *Pope*, and *Rome*.

STATIONERS Books and papers were formerly sold only at stalls, hence the dealers were called stationers. The company of stationers of London is of great antiquity, and existed long before printing was invented, yet it was not incorporated until 3 Philip & Mary, 1557. Then old dwelling was in Paternoster-row.

STATISTICS, the science of the state political knowledge, is said to have been founded by Sir Wm Pott, who died in 1687. The term is said to have been invented by professor Achenwall of Gottingen in 1749. The first statistical society in England was formed at Manchester in 1833, the Royal Statistical Society of London, which publishes a quarterly journal, was established 15 March, 1834, for the purpose of procuring, arranging, and publishing "facts calculated to illustrate the condition and prospects of society." Jubilee Sept 22, 23, 24 June, 1885, incorporated, 1887. Similar societies have been established on the continent. International Statistical Institute constituted in 1885, met at Rome, 12-16 April, 1887. International Statistical Congresses are now held occasionally. The 1st at Brussels, chiefly through the agency of M Quetelet, in 1853, 2nd at Paris, 1855, 3rd at Vienna, 1857, 4th at London, under the presidency of the prince consort, 16-21 July, 1860, 5th at Berlin, 6th at Florence, 7th at the Hague, 8th at St Petersburg, was opened 22 Aug 1872, 9th at Pesth, 31 Aug 1876 and since, one at Vienna 28 Sept 1891. The eminent statistician, Dr Wm Farr, died 14 April, 1883. *Statistical Abstracts* have been published annually by the government for many years. Mr M G Mulhall's "Dictionary of Statistics" published 1891.

STATUES, see *Scriptura*, &c. Two statues of Ramesses II and one of his queen (about 1322 B C), 10 feet high, discovered at Aboukh by Darnous Pasha, Oct. 1891. Phidias, whose statue of

Jupiter passed for one of the wonders of the world, was the greatest statutory among the monuments, 440 ft. He had previously made a statue of Minerva at the request of Pericles, which was placed in the Parthenon. It was made of ivory and gold, and measured 39 feet in height. Aulus raised a golden statue to his father, the first that appeared in Italy. Lyappaus invented the art of taking likenesses in plaster moulds, from which he afterwards cast models in wax, 326 B.C. Michael Angelo was the greatest artist among the moderns. The first equestrian statue erected in Great Britain was that of Charles I in 1678. By 17 & 18 Vict. c. 10 (10 July, 1854), public statues were placed under the control and protection of the Board of Works. The following are the chief public statues in London—

* This statue is of brass cast by Le Sueur, in 1633, at the expense of the Howard Arundel family. During the civil war the parliament sold it to John Rivet, a brasser, in Holborn, with strict orders to break it to pieces but he concealed it underground till the Restoration, when it was erected, in 1660, on a pedestal executed by Grinling Gibbons. The first equestrian statue of brass, founded at one cast was that of Louis XIV of France, 1699. It was elevated about 1724.

STATUTES, see Acts of Parliament, Clarendon, Merion, &c. Statute Law Revision acts were passed in 1863-1892. The subject was referred to a joint committee of both houses, 14 March, 1892. Statute Law Revision and Civil Procedure act, 44 & 45 Vict. c. 59, passed 27 Aug 1881. "Statutes Revised Edition (1325-1878)" in 18 volumes, published 1870-85. The number of volumes most greatly reduced. Select commons' committee on the subject, met 17 July, 1891.

STATUTORY DECLARATIONS By 5 & 6 Will IV. c. 62 (1845), persons objecting to oaths are permitted to make declarations before magistrates, judges, &c., commencing "I —, do solemnly and sincerely declare that"—an indulgence sometimes abused.

Mr. Alexander J. Chaffers having made a declaration against the character of Lady Trevelyan wife of sir Trevelyan was prosecuted for libel. She with drew during the examination and the prosecution ceased but Chaffers was severely censured by the magistrate and by the attorney general in parliament.

STEAM CARRIAGE (for ordinary roads), invented by the earl of Caithness, was said to be successful in 1860. It travels over rough roads at the rate of 8 miles an hour, at a cost of less than 1d. per mile. His lordship made a journey of 140 miles in two days, see *Road Steamers*.

STEAM ENGINE* AND NAVIGATION. Hero of Alexandria, in his 'Pneumatics,' describes various methods of employing steam as a power, and to him is ascribed the *Autopilot*, which, although a toy, possesses the properties of the steam-engine. He flourished about 284 A.D. Roger Bacon appears to have foreseen the application of steam-power, see *Railways, Locomotives, Road Steamers*, &c.

Blomont de Laus a French protestant publishes a work which Arago insufficiently considers to have contained the germs of the steam-engine 1815. The *Encyclopédie* describes his steam-engine in his 'Century of Inventions' 1863. Papin's digester invented 1681-2. Captain Savary's engine constructed for raising water 1698.

Papin's engine exhibited to the Royal society about 1699. [He is said to have made a steamboat which was destroyed by boatswain of the Weser.] Thomas Newcomen, of Dartmouth is stated to have constructed "the first self-acting steam engine," (used for nearly a century without alteration or amendment) 1712. [He died in London while endeavouring to obtain a patent, 1729.]

 Polystone steamer (first built of Siemens-Martin steel, 340 feet long by 40 feet broad, 3400 tons) launched at Napier's yard, Glasgow, 3 Aug. 1879
 Invented a turbo-shaft steam yacht (broad and flat), built by Elder & Co. of Glasgow for the czar of Russia, launched on the Clyde, 7 July, 1880
 Faraday steamship (for laying electric cables, 360 feet long, 52 feet wide 26 feet deep 5000 tons register to carry 6000 tons dead weight) next in size to *Great Eastern* built for Messrs. Siemens by Messrs. Mitchell, at Newcastle, launched (munch employed, 1882 at sea) 17 Feb. 1874 she laid cables from Nova Scotia to New York Dec. 1880
 Orient steamer, built by Elders of Glasgow, for 1863, *City of Boston* Feb. 1870, *Germania*, 21 Dec. 1871, *Atlantic*, April, 1873, *Villa de Harar*, 23 Nov. 1873, *Cushman*, 5 July, 1877, *Elen*, 15 July, 1877, &c.

Australian traffic, length, 460 feet; breadth, 45 feet, depth, 27½ feet, sailed from Greenock to West India Dock, London 10 22 Sept. 1879
Service, Cunard royal mail steamer, 590 feet long, 52 feet broad, 44 feet depth, gross tonnage, 2900 tons, 3 decks and promenades, next in size to *Great Eastern* launched in the Clyde 1 March 1881
Service, sailed from America to Liverpool (by long route) in 7 days, 8 hours, 15 min quickest passage hitherto made 26 Jan. 1882
City of Rome, mail steamer, length 386 feet, breadth 52 feet, left the Clyde 28 Sept. 1881
Alaska, Guion mail steamer crossed the Atlantic, 6 days, 22 hours 21 Mar 6 June, 1882
The Guion steamer *Arizona*, left Queenstown at 2 10 p.m. Sept 22, and reached Sandy Hook at 6 30 p.m. on the 28th, which, including the difference in time, 4 hours 22 min., makes the passage 7 days 8 hours, 12 min. On the return passage she made the voyage in 7 days, 7 hours, 48 min.
The Guion steamer *Alaska* arrived at Sandy Hook on Sunday, 12 7 day 17 min. 28 July, 1882
Black Star Line of steamers between Grimsby and America 1882
Victoria, steamer (pioneer of the P and O company), built by Messrs Caird & Co length 465 feet, breadth 52 feet, depth 37 feet, sailed from Greenock to Southampton 26 July, 1887
Mr Thomas Lubbock's steam generator used to economize fuel without producing smoke, employed at Elswick Works, Newcastle, and other places
Arcturion (P and O steamer) arrived at Albert Dock 28 May, 1888
Etymna, Cunard line sailed from Roches Point, Cal., to New York in 6 days, 1 hr 47 min 2 June, 1888
Jerusalem boat of the Allan line, said to have crossed the Atlantic from land to land in 4 days, 17 hours and 10 minutes 4 June, 1888
City of New York length 550 feet, breadth 63½ feet first voyage across Atlantic 2 Aug 1880

(1857-8) called *Pioneer* 692 feet 83 feet

Horse Power—Paddles 1000, 2 new, 1600

Weight of ship 12,000 tons ordinary light

draught, 12,000 tons, and to live cost 750,000

She was designed by Mr J. H. Brunel [who died 15 Sept 1880], and built by Messrs Scott Russell and Co. at Millwall launching laid from 3 Nov 1857, to 31 Jan 1858

The capital subscribed having been all expended, a new company was formed to fit her for use

On 7 Sept 1858, she left her moorings at Deptford for Portland roads. On the voyage an explosion took place (off Haslemere), through some neglect in regard to the casing of one of the funnels, when ten firemen were killed and many persons seriously injured. After repairs she sailed to Holyhead, arriving there 20 Oct. She endured the storm of the 26 Oct. well and proceeded to Southampton for the winter, a boy

She was fitted up to convey 3000 persons from London to Australia, a distance of 22,500 miles, with accommodation for 800 1st class passengers, 2000 2nd class, and 1200 3rd class. Her able captain (Harrison) was drowned in the Solent 22 Jan. 1860 (depth regretted). She sailed for New York 27 June, under command of captain Vine Hall, and arrived there 26 June. After being exhibited she left New York 16 Aug and returned to England 26 Aug

Owing to a lawsuit in April, the ship came into the hands of sheriff's officers but was released and sailed for New York on 1 May, 1861. On 12 Sept. she suffered much loss through a violent gale

In 1862 she performed several voyages to and from New

York, but in Aug ran on a rock near Long Island and injured her bottom

She was repaired and arrived at Liverpool 17 Jan. 1863, and sailed to New York (16-27 May)

She was bought by Glass Elliot and Co in March or April, 1864, and was chartered to convey the Atlantic telegraph cable, sailed from Sheerness 15 July and returned 19 Aug 1865 see under *Electric Telegraph*

She sailed for New York prepared for 2000 passengers, 26 March, and returned with 121. She was seized by the seamen, claiming their wages, May, 1867, and the case was carried into Chancery in July

At the meeting of the shareholders 20 Feb 1868, no dividend was declared

She conveyed the French Atlantic telegraph cable, successfully laid Oct 1869

Arrived at Bombay with Bombay and Suva cable, 27 Feb returned to Sheerness June, 1870

Sailed with the fourth Atlantic telegraph cable 8 June which was completely laid 3 July, 1873

Sailed with the fifth Atlantic telegraph cable 8 June, 1874

Put up for sale at 30,000, not bought 19 Oct 1881

(John Scott Russell died, aged 74) 8 June, 1882

Proposed to be employed as a coal hulk in Gibraltar Bay April, 1884

Sold by auction to Mr Frederick de Mattos for 26,000 for the London traders (limited) 28 Oct 1885

The ship reported in good condition 20 April, 1886

Sold to Mr Worsley for 26,000 12 May-12 Oct, 1887

Largely visited, drink licence refused April, 1887

Sold to Mr Craik for 22,000 20 Oct, 1887

In the Clyde sold to Messrs Henry Ball, metal brokers, for 16,000 18 Dec 1887

Messrs Henry Ball and Sons came the vessel to be moved to the Mersey, where it is beached 25 Aug 1888

Total receipts of the sale at Liverpool 58 Oct 24 Nov, 1888

STEAM GUN, suggested by Wm Murdoch, 1803 One patented by Messrs Perkins, in 1824, was, ineffective

In Oct 1870 Mr H. Besemer proposed the application of steam power to artillery

STEAM HAMMER, invented by Mr James Nasmyth in 1838, and patented by him 18 June, 1842 Its main feature is the absolutely direct manner by which the elastic power of steam is employed to lift up and let fall the mass of iron constituting the hammer, which is attached direct to the end of a piston-rod passing through the bottom of an inverted steam cylinder placed immediately over the anvil

In 1842 Mr Nasmyth applied his steam hammer to driving piles which has importantly assisted in the execution of great public works. Owing to its vast range of power for all run work can now by its means be executed on a scale, and for a variety of purposes, with ease and perfection not previously possible. Parts of gigantic marine steam engines, anchors, and Armstrong guns as well as the most minute details of machinery, as in field rifles, are executed by the steam hammer

A steam hammer said to be the then largest in the world, completed at Woolwich the falling portion weighs 40 tons and when used with topstam (51 tons) has the force of 91 tons, April, 1874 (One at Schneider's works, Creusot, France built between 75 and 80 tons, Dec 1877)

Mr Nasmyth, aged 87, died 7 May, 1880. His Auto-biography, edited by Dr S. Emile, was published in 1883

STEAM-MAN. A figure constructed to drag a phaeton received this name in New York in March, 1866.

STEAM NAVIGATION, see under *Steam*.

STEAM-PLOUGHS were patented by G. Callaway and R. A. Purkes, 1849, H. Cowling, 1850, and others. John Fowler's of 1854 is much approved.

STEAM-RAM (to be used in naval warfare), was invented by Mr. James Naughton in 1836, and communicated to the Admiralty in 1845. Steam-ramps built by Mr. James Laird of Birkenhead for the Confederates in N. America, were stopped and eventually bought by the British government, 1864.

STEAM-WHISTLES and STEAM-TRUMPETS, used in factories to summon or dismiss workmen, prohibited by an act passed Aug. 1872.

STEARINE (from *stear*, suet), that part of oils and fats which is solid at common temperature. The nature of these substances was first made known by Chevreul, in 1823, who showed that they were compounds of peculiar acids, with a base termed *glycerine* of these compounds the chief are stearine, margarine, and elaine, see *Candles*.

STEEL, metal, a compound of iron and carbon, exists in nature, and has been fabricated from the earliest times. It was certainly used by the Egyptians, Assyrians, and Greeks. It now largely replaces cast iron in ship building, &c.

Reaumur discovered the direct process of making steel by immersing malleable iron in a bath of cast iron.

A manufactory for cast steel is said to have been set up by Benjamin Huntsman at Handsworth, near Sheffield.

The manufacture of shear steel began in Sheffield.

German steel was made at Newcastle previously by Mr. Crawley.

The inventions of Mushet (1800), Lucas (1804), and Heath (1839) were important steps in this manufacture, see *Iron*.

Reips patented his puddled steel.

Mr. H. Bessemer made steel by passing cold air through liquid iron, &c. By this method it is of crude iron has been converted into cast steel in 23 minutes.

Tungsten steel was made in Germany 1850, and Mr. Bessemer made steel by bringing red hot iron in contact with carbonic oxide.

M. Alfred Kipp exhibited an ingot of steel weighing 4500 lbs. in 1851, and one weighing 20 tons in 1862 (about 15,000 men were employed at his works at Essen 1887).

The subject much investigated by M. Caron 1861, 5 much attention was excited by cutlers made from a metallic sand in light from Turin, or New Plymouth in New Zealand.

A steel bridge, in connection with the exhibition, constructed at Paris by M. Jouty.

Mr. John Heaton published his process.

Dr. Siemens by means of his regenerative gas-furnaces produced excellent steel, cheaply, in large masses.

Cutlery Company, London opened an exhibition.

Messrs. Dolekew Vaughan & Co. of Middlesbrough, by Thomas and Gilchrist's process, convert Cleveland iron ore into Bessemer steel by lining the furnace with refractory bricks of magnesite in limestone and adding cold basic material, phosphorus being thereby removed.

The process reported successful.

Mr. J. S. Jeans published his important work, "Steel its History, Manufacture, Properties, and Uses."

The *Carfield*, a steel sailing ship, 2,220 tons, 502 ft. long, 44 ft. 9 in. breadth, 41 ft. breadth, launched at Belfast.

Umbreit, Oswald liner, above 8,000 tons, 500 ft. long, 57 ft. 3 in. breadth, 41 ft. depth, launched on the Clyde.

Mr. B. H. Thwaites of Liverpool, and Mr. A. Stewart, of Bradford, introduced an improved "rapid" process for the manufacture of steel, announced Oct. 1887.

See under *Steel*.

STEEL PENS "Iron pens" are mentioned by Chamberlayne in 1685. Steel pens, made long before, began to come into use about 1820, when the first gross of three-slit pens was sold wholesale for 7s. 4s. In 1830 the price was 8s., and in 1832, 6s. A better pen is now sold for 6d. a gross. Birmingham in 1858 produced about 1000 million pens per annum. Women and children are principally employed in the manufacture. Perry, Mitchell, and Gillott are eminent makers. Joseph Gillott, originally a mechanic, made a large fortune by steel-pen making. He died 5 Jan. 1872, aged 72.

STEEL-YARD An ancient instrument, the same that is translated *balances* in the Pentateuch. The *Statera Romana*, or Roman steel-yard, is mentioned in 315 B.C.—The *STEEL YARD* or *STILL-YARD COMPANY*, London merchants, who had the steel-yard in Thames-street assigned to them by Henry III., about 1232, were Flemings and Germans, and the only exporters, for many years after, of the staple commodities of England. *Anderson*. The company lost its privileges, finally, in 1578, and the merchants were expelled from England in 1597.

STEENKIRK, see *Enghen*.

STEFANO, SAN, a small village on the sea of Marmora, S.W. of Constantinople, here the grand duke Nicholas established his head quarters, 24 Feb., and here was signed a treaty of peace with Turkey 3 March, 1878, much modified by the treaty of Berlin, signed 13 July, following. The Russians quitted San Stefano, 22 Sept. 1878.

It established independence of Montenegro, Serbia, and Roumania, constituted Bulgaria a tributary principality, required a heavy indemnity from Turkey for Russia, who was to gain a port on the Black Sea and Bosphorus, to exchange the Dobruja for Bessarabia, to obtain rights for Christians to open the Bosphorus and Dardanelles in peace and war.

STELLA-LAND, see *Transal and Bosh-trana-land*.

STENOCHROMY, see *Printing in Colours*.

STENOGRAPHY (from *stenos*, narrow), the art of short-hand, said to have been practised by the ancients. Its improvement is attributed to the poet Ennius, to Lyro, Cicero's freedman, and still more to Seneca. The *Artis Secreti Characteris*, written about 1412, is the oldest system extant. Dr. Timothy Bright's "Characterie, or the Arte of Shorte, Swift, and Secret Writing," published in 1588, is the first English work on short-hand. Peter Bales, the famous penman, published on stenography in 1590, and John Willis published his "Stenographie" in 1602. There are now numerous systems. John Byrom's (1767), T. Gurney's (1710), "Brachygraphy," based on Mason's (1750), "A Short-hand Dictionary" (1777), Taylor's (1786), Mavor's (1789), Pitman's (phonographic), (1837), A. M. Bell's Stenophonomography (1852), J. D. Everett's (1877), Tocknell's Legible Short-hand (1881), J. M. Sloan's (1882). See *Phonography*.

The Short-hand Society met Nov. 1881. Sig. A. Michael's stenographic machine for the legible representation of phonetic sounds (about 200 words per minute) like a harmonium with a key-board exhibited at the Turin exhibition of 1884, successfully adopted by the Italian Senate. International Short-hand Congress at the Geological Museum, London, S.W. (48 systems noticed) 26 Sept.-1 Oct. 1887. Others since, Paris 1889, Munich, 1890, Berlin 30 Sept. 1891.

STEPHEN'S CHAPEL, ST (Westminster), built by King Stephen, about 1135. It was rebuilt by Edward III. in 1347, and by him made a col-

legate church, to which a dean and twelve secular priests were appointed. Soon after its surrender to Edward VI., about 1548, it was applied to the use of Parliament, see *Parliament*. It was destroyed by fire, 16 Oct. 1834. The Society of Antiquaries published memorials of it about 1810, and Mr Maclean's work appeared in 1844. The restoration of the beautiful crypt was complete in Jan. 1870.

STEPNEY, a parish, E London, the Stebenhude of Domesday book. Edward I. summoned a parliament here, 1209. Stepney suffered severely by the plague, 1625 and 1665. Stepney-green was restored and opened as a park by the Metropolitan Board of Works, Aug. 1872. Population, 1881, 58,543, 1891, 57,599.

STEREOCHROMY, a mode of painting in which water glass (an alkaline solution of flint, silica) serves as the connecting medium between the colour and the substratum. Its invention is ascribed to Von Fuchs, who died at Munich on 5 March, 1856. Fine specimens of this art by Kaulbach and Richter exist in the Museum at Berlin, and also at Munich.

STEREOMETER, by which is compassed the art of taking the contents of vessels of liquids by gauging, invented about 1750. *Anderson* & *Say* a stereometer, for determining the specific gravity of liquids, porous bodies, and powders as well as solids, was described in 1797.

STEREOSCOPE (from *stereos*, solid, and *scopein*, to see), an optical instrument for representing in apparent relief natural objects, &c., by uniting into one image two plane representations of these objects as seen by each eye separately. The first stereoscope by reflection was constructed and exhibited by professor Charles Wheatstone in 1838, who had announced its principle in 1833. Since 1854 stereoscopes have been greatly improved.

STEREOTYPE, a cast from a page of movable printing-types, so named by the Prussian printer, Didot 1798. It is said that stereotyping was known in 1711. It was practised by Wm. Ged of Edinburgh, about 1730. Some of Ged's plates are at the Royal Institution, London. A Mr. James attempted to introduce Ged's process in London, but failed, about 1735. * *Nichols* Stereotype printing was in use in Holland, in the last century, and a quarto Bible and a Dutch folio Bible were printed there. *Phillips* It was revived in London by Wilson in 1804. Since 1850 the durability of stereotypes has been greatly increased by electrotyping them with copper or silver. Stereotyping used for printing the *Times*, 1856, et seq.

In the library of the Royal Institution is an edition of *Sallust* with this imprint: *Edinburgi, Gulielmus God, auri filius Edinensis, non typis mobilibus ut vulgo huc solet, sed tabellis seu laminis fusa excudit* 1744. (Printed at Edinburgh by William God of Edinburgh, goldsmith not with moveable types as is commonly done, but with cast tablets or plates.)

STERLING (money). *Ducange* says (1733), "*Esterlingus, sterlingus*, are English words relating to money, and hence familiar to other nations, and applied to the weight, quality, and kind of money." "*Denarius Anglus, qui vocatur sterlingus*," stat. Edw. I. (The penny of England, which is called sterling.) Camden derives the word from *austerling* or *asterling*, observing that the money brought from Germany, in the reign of Richard I., was the most esteemed on account of its purity, being called in old deeds "*nummi auster-*

ling." Others derive the word from the *Easterlings*, the first moneyers in England.

STETHOSCOPE. In 1816 *Laennec*, of Paris, by rolling a quire of paper into a kind of cylinder, and applying one end to the patient's chest and the other to his own ear, perceived the action of the heart in a much more distinct manner than by the immediate application of the ear. This led to his inventing the stethoscope, or "breast-explorer," the principle of which, now termed "auscultation," was known by *Hippocrates* (357 B.C.), and by *Robert Hooke*, 1681.

STETTIN (Pomerania), an ancient city, formerly held by the *Sidmi* and *Venedes*, was taken by *Boleslas* of Poland in 1121. After being conquered by the Swedes, Russians, and French, it was awarded to Prussia in 1814. Population, 1890, 116,239.

Visited by emperor William during military manoeuvres, 12 Sept. 1887.

STEWARD OF ENGLAND, LORD HIGH. The first grand officer of the crown. This office was established prior to the reign of Edward the Confessor, and was formerly annexed to the lordship of Hinckley, Leicestershire, belonging to the family of Montfort, earls of Leicester, who were, in right thereof, lord high stewards of England, but Simon de Montfort, the last earl of this family, having raised a rebellion against his sovereign, Henry III., was attainted, and his estate forfeited to the king, who abolished the office, 1265. It is now revived only *pro hac vice* at a coronation, or the trial of a peer. The first afterwards appointed was Thomas, second son of Henry IV. The first for the trial of a peer was Edward, earl of Devon, on the arraignment of the earl of Huntingdon, in 1400. The last was Lord Denman at the trial of the earl of Cardigan, 16 Feb. 1841. The duke of Hamilton was lord high steward at the coronations of William IV. 1831, and Victoria, 1838.

STEWARD OF THE HOUSEHOLD, LORD (an ancient office), has the sole direction of the king's house below-stairs, he has no formal grant of his office, but receives his charge from the sovereign in person, who, delivering to him a white wand, the symbol of his office, says, "*Senechal, tenes le bouton de notre maison*." This officer has been called lord steward since 1540, previously to the 31st of Henry VIII. he was styled grand master of the household. His function as a judge was abolished in 1849.

STEWART, see *Stuart*.

STICKLESTADT (Norway). Here Olaf II., aided by the Swedes, was defeated in his endeavours to recover his kingdom from Canute, king of Denmark, and slain, 29 July, 1030. He was afterwards sainted, on account of his zeal for Christianity.

STIPENDIARY MAGISTRATES, see *Magistrates*.

STIRLING (S. Scotland). The strong castle was taken by Edward I. of England, 1304. Here James II. stabbed the earl of Douglas, 13 Feb. 1452, and here James VI. was crowned, 24 July, 1567. Stirling surrendered to Monk, 14 Aug. 1651. The statue of king Robert Bruce unveiled, 24 Nov. 1877. A gigantic bronze statue of Sir William Wallace unveiled at the National Wallace Monument 25 June, 1887. Population, 1881, 16,013, 1891, 16,995.

STREUPS were unknown to the ancients. Gracchus fitted the highways with stones to enable

the horsemen to mount. Warriors had projections on their spears for the same purpose. Stirrups were used in the 5th century, but were not common even in the 12th.

STOCKACH, a town in Baden, near which the Austrians, under the archduke Charles, defeated the French, 25 March, 1799, and Moreau defeated Kray, 3 May, 1800.

STOCKHOLM, capital of Sweden (built on *holmen*, or islands), was fortified by Birger Jarl about 1254. Here the Swedish nobility was massacred by Christian II in 1520, see *Sweden*. Population, 1887, 227,964; 1890, 245,154.

Peace of Stockholm, between the king of Great Britain and the queen of Sweden by which the former acquired the duchies of Bremen and Verden as elector of Brunswick. 20 Nov. 1729. Treaty of Stockholm, between Sweden and Russia in favour of the duke of Holstein Gottorp. 24 March 1724.

Another between England and Sweden. 3 March 1812. And one between England and France and Sweden. 21 Nov. 1855.

STOCKINGS of silk are said to have been first worn by Henry II of France, 1547. In 1560 queen Elizabeth was presented with a pair of knit black silk stockings, by her silk-woman, Mrs Montague, and she never wore cloth ones any more. *Houell*. He adds, "Henry VIII wore ordinary cloth hose, except there came from Spain, by great chance, a pair of silk stockings, for he was very early acquainted with silk." Edward VI was presented with a pair of Spanish silk stockings by his merchant, Sir Thomas Gresham, and the present was then much taken notice of. *Idem*. Others relate that William Rider, a London apprentice, seeing at the house of an Italian merchant a pair of knit worsted stockings from Mantua, made a pair like them, the first made in England, which he presented to the earl of Pembroke, 1564. *Stow*. The art of weaving stockings in a frame was invented in England by the rev. Mr Lee, of Cambridge, in 1589, twenty-five years after he had learnt to knit them with wires or needles. Cotton stockings were first made in 1730, see *Cotton*. Digitated stockings (like gloves), introduced 1882.

STOCKPORT (in Cheshire) has become eminent on account of the cotton trade. Heaton Norris, in Lancashire, is united to it by a bridge over the river. Here the Manchester blanketers were dispersed, 11 March, 1817, and here was a serious religious riot, when two Roman Catholic chapels were destroyed, and the houses of many Roman Catholics gutted, and their furniture and other contents smashed or burnt, 29 June, 1852.

STOCKS, in which drunkards were placed. The last in London was removed from St Clement Danes, Strand, 4 Aug. 1826.

STOCKS. The public funding system originated in Venice, about 1173, and was introduced into Florence in 1340. The English funding system may be said to have had its rise in 1690. See *Finance*. The Forged Transfer of Stock Act was passed 1 Aug. 1891.

The memorable Stock Exchange hoax, for which admiral lord Lochraue (afterwards lord Dundonald), Johnstone and others, were convicted, 23 Feb. 1814. Lord Cochran was in consequence expelled the house of commons. He was innocent and afterwards proved, and he was restored to his rank by king William IV. and to the honours belonging to it by queen Victoria.

Stock exchange (coffee house destroyed by fire 12 Feb. 1816. Royal Commission (lord Penance, justice Blackburn, Mr Spencer Walpole and others) to examine into the constitution and management of the London stock exchange agreed to 20 March 1877, report issued the 21st July 1880, and incorporation and other changes signed 31 July 1878. The number of stock holders in 1840 amounted to 337,481.

STOICS, disciples of Zeno, the philosopher (about 200 B.C.), obtained the name because they listened to his instructions in a porch (Greek, *stoa*) at Athens. Zeno taught that man's supreme happiness consisted in living agreeably to nature and reason, and that God was the soul of the world. *Stanley*

STOKE, EAST (near Newark, Nottinghamshire) Near here, on 16 June, 1427, the adherents of Lambert Simnel, who personated Edward, earl of Warwick, and claimed the crown, were defeated by Henry VII John de la Pole, the earl of Lincoln, and most of the leaders, were slain. Simnel was afterwards employed in the king's household.

STONE Stone buildings erected in England by Benedict Biscop about 670. A stone bridge built at Bow, in the 11th or 12th centuries, is accounted the first, but a bridge exists at Crowland, which is said to have been built in 860, see *Bridges*. The first stone building in Ireland was probably a round tower, see *Building*. Stone china-ware was made by Wedgwood in 1762. Artificial stone for statue was manufactured by a Neapolitan, and introduced into England, 1776. Stone paper was made in 1770, see *Ransom's Artificial Stone, and Lithotomy*. For stone implements, see *Flints*, and *Pneumatics*. An orchestra composed of wind instruments in side of terra-cotta appeared in London in 1864.

STONEHENGE (on Salisbury Plain, Wiltshire) is said to have been erected in the counsel of Merlin, by Aurelius Ambrosius, in memory of 460 Britons, who were murdered by Hengist the Saxon about 450. *Geoffrey of Monmouth*. Erected as a sepulchral monument of Ambrosius, 500. *Polydore Vergil*. An ancient temple of the Britons, in which the Druids officiated. *Dr Stukeley*. The Britons are said to have held annual meetings at Abury and Stonehenge, when laws were made and justice administered. The curus near Stonehenge was discovered by Dr Stukeley, 6 Aug 1723. The origin and object of these remains are still very obscure. See W M Flinders Petrie's "Stonehenge Plans, Description, and Theories" 1880. The thorough preservation of Stonehenge strongly advocated Aug 1886.

STORTHING, the Norwegian parliament, said to have been first held at Bergen by Hacon V. in 1223.

STOVES. The ancients used stoves which concealed the fire, as the German stoves yet do. They lighted the fire also in a large tube in the middle of the room, the roof being open. Apartments were warmed by portable braziers. Stoves on this old principle, improved, continue in use in many houses and public establishments in England, and generally on the continent. Dr Franklin and count Rumford (who invented a stove) pointed out the waste of fuel in our open fires, and Dr Neil Arnott patented his "improvements in the production and agency of heat," 14 Nov 1821. Dr O. William Siemens described his smokeless stove in "*Nature*" for 11 Nov 1880. See *Chimneys*, and *Cottages' Stoves*.

Mr T. Pringle Teale publishes his invention in which he revives the principles of count Rumford with additions, 1885-6.

STOWMARKET EXPLOSION, see *Gum-Cotton*, 1871.

SUEZ CANAL. The caliph Omar about 640 opposed cutting the isthmus. A plan for a canal between the head of the Red Sea and the bay of Pelusium was brought forward by St. Ferdinand de Lesseps in 1852. He undertook to cut a canal through 90 miles of sand, to run out moles into the Mediterranean; to deepen the shallow waters; to create ports to receive the ships from India and Australia, and to adapt the canal to irrigation. The consent of the Egyptian, Turkish, Russian, French, and Austrian governments was gradually obtained, but not that of the British. A company was formed for the purpose, and the work commenced in 1858 by Mr. Daniel Lange (knighted 1870). The cost was estimated at 8,000,000*l.* Engineer, M. L. Montet.

Mr. Delacour, a French engineer, after viewing the works which were "employing 25,000 men in the desert," expressed his conviction that they would be completed in four or five years. 7 Nov. 1868

seives disgraced by being ordered to make common sewers, destroyed themselves, 606 n.c. Cato committed suicide, 16 n.c.* In the Roman catholic church, in the 6th century it was ordained that no commemoration should be made in the Eucharist for such as committed self-murder. Thus ecclesiastical law continued till the Reformation, when it was admitted into the statute law of England by the authority of parliament, with the consecration of land and goods. Till 1823 the body of the suicide was directed to be buried in a cross-road, and a stake to be driven through it. A new act, suppressing the barbarous custom, was passed in 1822. It is now usually buried in consecrated ground without a religious ceremony. Thomas Cooper, the eminent Chartist, author of "The Purgatory of Suicide," an epic poem, published in 1845, died, aged 87, 15 July, 1892. Dr. Henry Morelli published "Suicide: an Essay" 1881. There were 7,572 suicides in France in 1887.

* Three instances of self-destruction by fire: the philosopher Empedocles threw himself into the crater of Mount Etna; a Frenchman threw himself, in 1820, into the crater of Vesuvius; and an Englishman, who jumped into the furnace of a forge about the year 1811. Plutarch relates that an unaccountable passion for suicide seized the Milesian virgins, from which they could not be prevented by the tears and prayers of their friends, but a decree being issued that the body of every young maid who did self-murder should be drawn naked through the streets, a stop was soon put to the extraordinary frenzy.

SUICIDE (*from sui, self; caedere, to kill*), the slaying of himself. The first instances recorded in Jewish history are those of Samson, about 1120, and Saul, 1055 b.c. The Greek and Roman philosophers deemed it a crime, and burned the offending hand apart from the rest of the body. In the reign of Tarquin I., the Roman soldiers, thinking them-

SUMMARY JURISDICTION ACT, 42 & 43 Vict. c. 49, 11 Aug. 1879. It amends the law respecting the jurisdiction of magistrates, in regard to fines, imprisonments, &c. It came into operation 1 Jan. 1880. Amended 1881 and 1884.

SUMPTUARY LAWS restrain excess in dress, furniture, eating, &c. The laws of Lycurgus were severe against luxury, probably 6th century B.C. Those of Zoroaster ordained that no sober woman should go attended by more than one maid in the street, or wear gold or embroidered apparel, 450 B.C. — *Diog. Laert.* The *Lex Oratoria* among the Romans (1st B.C.) limited the guests at feasts, and the number and quality of the dishes at an entertainment; and it also enforced that during supper, which was the chief meal among the Romans, the doors of every house should be left open. The English sumptuary laws, chiefly of the reigns of Edward III. and Henry VIII., were repealed in 1556; see *Dress*.

SUN. Pythagoras taught that the sun was one of the twelve spheres, about 550 B.C. The relative distances of the sun and moon were first calculated geometrically by Aristarchus, who also maintained the stability of the sun, about 280 B.C. Numerous theories were ventured during fifteen centuries, and astronomy lay neglected till about A.D. 1200, when it was brought into Europe by the Moors of Barbary and Spain. The Copernican system was made known in 1543; see *Copernican System*, and *Solar System*. Galileo and Newton maintained that the sun was an igneous globe. The transit of Mercury was observed by Cassendi. For recent discoveries, see *Eclipses*, *Spectrum*, and *Venus*.

* The estimated diameter is 860,000 miles, and the distance from the earth, 92,000,000 miles, has been recently corrected to 94,000,000, by the result of the experiments and calculations of M. Foucault and Bouvard (1866). "The error corrected corresponds to the apparent breadth of a human hair at 255 feet, or of a sovereign's miles of —" — *Encyclop.* Distance computed by Mr C. B. Avey from results of the observation of transit of Venus (9 Dec. 1874), 93,321,000 miles, Oct. 1877; on January 1, 1878, from the transit of 1876 by Professor Newcomb (in American), 94,368,000 miles, October, 1878. The sun is now described as consisting of a solid or liquid nucleus, surrounded by a luminous envelope (photosphere) over which is a dense atmosphere, emitting the vapours of various metals and other elements; and a corona.

By the observations of Dr. Halley on the spot which sustained the sun's disc in July and August, 1704, he established the certainty of its motion round its own axis.

Intensely red sunsets and after-glow, and very red sun rises, seen in England and other parts of the globe, Nov. and Dec. 1883; attributed by Dr. Meldrum, Dr. Norman Lockyer and others, to the volcano dust projected by the eruptions of Krakatoa (see *Java*, Aug. 1883), Dec. 1883; other causes, such as cosmic dust, were suggested.

SUNDAY was the day on which, anciently, divine adoration was paid to the Sun. Among Christians it is commonly called *Das Dominica*, or Lord's day, on account of our Saviour's appearance on that day, after his resurrection. The first civil law that was issued for the observance of this day, combined it with that of the seventh-day Sabbath and other festivals (*Justinian, Life of Constantine*), and it was followed by several imperial edicts in favour of this day, which are extant in the body of Roman law, the earliest being that of Constantine the Great, dated 7 March, 321. See *Antiquities, Sabbatharians, Sports, Book of*, &c. — For *Sunday Law*, see *Dominical Letter*.

SUNDAY SCHOOLS. Cardinal Br. Charles
 Borromeo introduced Sunday instruction of children
 at Milan, about 1580; in the next century his example
 was followed in England by the rev. Joseph Alleine;
 by rev. David Blair, at Brechin, about 1760; by the
 rev. Theophilus Lindsey, at Catterick, Yorkshire,
 about 1763; and more especially organized by
 Robert Ballou, an eminent printer of Gloucester,
 conjointly with rev. Thos. Stock, 1780. Ludwick

SUPREMACY over the church was claimed
 by pope Gelasius I. as bishop of Rome, 494. On
 15 Jan. 1535, Henry VIII. by virtue of the act 26
 Hen. VIII. c. 1, formally assumed the style of "an
 earth supreme head of the church of England" which
 was retained by Edward VI., Mary I. (for a
 time), but was refused by Elizabeth, and has never
 been revived by succeeding sovereigns. The
 bishop of Rochester (Fisher) and the ex-lord
 chancellor (sir Thomas More) and many others
 were beheaded for denying the king's supe-
 macy in 1535; and in 1578, John Nelson, a priest,
 and Thomas Sherwood, a young layman, were
 executed at Tyburn for the same offence. The "act
 of Supremacy," repealed by 1 & 2 Phil. and Mary,
 c. 8 (1554), was re-enacted 1 Edw. c. 1 (1559).

SUPREME COURT OF JUDICATURE
 was constituted by the Judicature Act 26 & 27
 Vict. c. 66, passed 5 Aug. 1873, to come into opera-
 tion 1 Nov. 1874. In 1874 this was declared in

1 Nov. 1875. The "Council of Judges" appointed by this act met to consider questions relating to the reform of the law, 18 Jan. 1880. See under *Judges*.

The existing courts were to be united into one Supreme Court, divided into the High Court of Justice and the Court of Appeal. The High Court consisted of the lord chancellor, the two lord chief justices, the vice-chancellors, and the other judges; (hereafter the court to consist of six judges.) Five divisions: 1. Chancery, a Queen's Bench, 3. Common Pleas, 4. Exchequer, and 5. Probate, Divorce, and Admiralty; subject to alteration.

The Court of Appeal to consist of five ex-officio judges (viz. lord chancellor, two lord chief justices, lord chief baron, master of the rolls), and such others as may be appointed (§§ 20, 21, 22).

Appeals to the house of lords or the judicial committee of the privy council to be discontinued.

Law and equity to be concurrently administered: law terms abolished; and sittings in vacation provided for. See under *Terms*.

The act passed 11 Aug., 1875, suspended §§ 20, 21, and 22, converted the proposed court of appeal into an intermediate court till 1 Nov., 1876 (See below).

The Supreme Court of Judicature (comprising the High Court of Justice, Chancery division, Queen's Bench, Common Pleas, and Exchequer subdivisions, Probate, Divorce, and Admiralty division (all which see) began 1 Nov. 1875

After one term, it was said in the *Times*, "its operation has tended to economise judicial power and to prevent delay of justice" 29 Nov. "

By the Appellate Jurisdiction Act (1876) the house of lords retains its powers as a court of ultimate appeal; the court to consist of the lord chancellor, two lords of appeal (to be created peers for life, with good salary) and any peers who are or have been lawyers. Act to come into operation 1 Nov. 1876

The court may sit during prorogation of parliament. The statute relating to the judicial committee of the privy council and to the intermediate court of appeal is amended "

By this act also the Queen's Bench, Common Pleas, and Exchequer divisions of the Supreme Court are converted into 15 courts of first instance or primary courts.

Additional judges for chancery division appointed. Style of ordinary judges — of the court of appeal to be, "lord justices of the appeal"; other judges, "justices of the high court," by act passed 24 April, 1877

An amendment act (42 & 43 Vict. c. 78), relating to offices, fees, &c., passed 15 Aug. 1879

At a meeting of the judges it was resolved to recommend the abolition of the exchequer and common pleas, and their consolidation into one, termed the "queen's bench division," under the lord chief justice of England, 30 Nov.; order in council 16 Dec. 1880

Carried into effect: old divisions at an end; judicature act carried out for the first time 7 March, 1881

Further changes made by the act 44 & 45 Vict. sec. 66, passed 27 Aug. 1881, by it the master of the rolls was made a judge of appeal only, and the chief justice of England was endowed with the powers of the chief justice of common pleas and the chief baron of the exchequer.

New code of rules of procedure issued about 9 July; same into force 24 Oct. 1883. See *Civilians*.

Amendment act passed (combining other acts), 11 Aug. 1884; other acts passed 24 Aug. 1880, 11 Aug. 1884, and 5 Aug. 1891

SUPREME COURT OF JUDICATURE FOR IRELAND constituted by act passed 14 Aug. 1877. Amended by an act passed 23 May, 1887, by which the titles of chief baron of the exchequer and chief justice of the common pleas are to be abolished at the next vacancies.

Composition of Appeal: ex-officio members, lord chancellor, lord chief justice of Ireland, master of the rolls, lord chief justice of common pleas, and lord chief baron of exchequer. *Ordinary members*, two lords justices of appeal.

RICKS (COUNCIL OF JUSTICE): Chancery division, lord chancellor, master of the rolls, vice-chancellor, and two lord judges. Queen's Bench division: lord chief justice, and three judges.

Common Pleas division: lord chief justice, and two judges.

Exchequer division: lord chief baron, and two judges. *Probate and Matrimonial divisions:* one judge.

See under *Chancery* and the other divisions.

SURAT (E. India). Before the English East India company obtained possession of Bombay, the presidency of their affairs on the coast of Malabar was at Surat; and they had a factory here established under captain Best in 1611. The Great Mogul had here an officer who was styled his admiral. An attack of the Mahratta chief Sivraje, on the British factory, was defeated by sir George Oxenden, 1664. The English were again attacked in 1670 and 1702, and often subsequently. The East India company, in 1759, fitted out an armament, which dispossessed the admiral of the castle; and, soon after, the possession of this castle was confirmed to them by the court of Delhi. Surat was vested in the British in 1800 and 1803. A fourth part of Surat was destroyed by fire 6, 7 April, 1889.

SURGEONS. Barbers and surgeons were united in one company in 1540; but it was enacted that "no person using any shaving or barbering in London shall occupy any surgery, letting of blood, or other matter excepting only the drawing of teeth." In 1745 the surgeons and barbers of London were made distinct corporations. The college of surgeons obtained charters in 1745, 1800, and 1843 (when it was styled the "Royal College of Surgeons of England"), 1852, and 1859. Since that period, various legislative and other important regulations have been adopted to promote their utility and respectability; and no person is legally entitled to practise as a surgeon in the cities of London and Westminster, or within seven miles of the former, who has not been examined at this college. The college in Lincoln's-inn-fields was re-modelled in 1836, and the interior completed in 1837. The premises were enlarged in 1852-3. The museum began with the Hunterian collection, 1800; and the library was founded in 1801. Mrs. Mary Emily Dowson, the first lady surgeon duly qualified to act, was invested with the letters testimonial of the Irish college of surgeons, June, 1886. See *Anatomy, Physics, and Medical Council*.

SURGERY. It was not until the age of Hippocrates that diseases were made a separate study from philosophy, &c., about 410 A.D. Hippocrates mentions the *ambule*, the ancient instrument with which they reduced dislocated bones. Celsus flourished about A.D. 17; Galen, 170; Aëtius, 500; Paulus Ægineta, in 640. The Arabians revived surgery about 900; and in the 16th century a new era in the science began; between these periods surgery was confined to ignorant priests and barbers. Anatomy was cultivated under Vesalius, the father of modern surgery, in 1538. Surgeons and doctors were exempted from bearing arms or serving on juries, 1513, at which period there were only thirteen in London; see *Physics*.

SURGICAL AID SOCIETY, founded 1864; supplies the poor with instruments, water-beds, &c.

SURINAM (Dutch Guiana), discovered by Columbus, 1498. The factories established by the English in 1640 were occupied by the Portuguese,

1643; by the Dutch, 1654; taken by the British, 1799, 1804; and restored to the Dutch, 1802, 1814.

SURNAMES were introduced into England by the Normans, and were adopted by the nobility about 1100. The old Normans used *filii*, which signifies son, as Fitz-herbert. The Irish used O, for grandson, O'Neal, O'Donnell. The Scottish Highlanders used Mac, as MacDonald, son of Donald. The Welsh used Ap, as Ap Rhys, the son of Rhys; Ap Richard. The prefix Ap eventually was combined with the name of the father, hence Frys, Pritchard, &c. The northern nations added the word son to the father's name, as Williamson. Many of the most common surnames, such as Johnson, Wilson, Dyson, Nicholson, &c., were taken by Brabanters and other Flemings, who were naturalised in the reign of Henry VI., 1435. M. A. Lower's "Dictionary of English Surnames" was published in 1860.

SURPLICES were first worn by the Jewish priests, and are said to have been first used in churches in the fourth century, and encouraged by pope Adrian, 786. "Every minister saying public prayers shall wear a comely surplice with sleeves," Canon 58. The garb prescribed by stat. 2 Edw. VI. 1547; again 1 Eliz. 1558; and 13 & 14 Chas. II. 1662; see *Ritualism*.

SURREY CHAPEL, Blackfriars-road, was built for Calvinistic dissenters in 1783; the rev. Rowland Hill, their minister, who died in 1833, was buried in a vault here. The congregation under the rev. Newman Hall removed to Christ Church, in Westminster-road, July, 1876. See *Lincoln Tower*.

SURREY HOUSE MUSEUM, Forest Hill, containing the collections of Mr. F. Horniman, cost about 100,000*l.*, presented by him to the public, was opened by sir Morrell Mackenzie, 24 Dec. 1890.

SURREY ZOOLOGICAL GARDENS (near London) were established in 1831, by Mr. Edward Cross, who brought hither the menagerie formerly at Exeter change. Various picture models have been exhibited here since 1837, viz., Vesuvius, Iceland, &c., accompanied by fireworks. In 1856, a company which had taken the gardens, erected a large yet elegant building for concerts; the architect being Mr. Horace Jones. On 19 Oct. 1856, when the hall contained about 9000 persons, attending to hear the rev. C. H. Spurgeon, seven were killed and thirty seriously injured, by a false alarm of fire. It was burnt 11 June, 1861; see *Fires*. In 1862 the hall was temporarily taken for the reception of the patients of St. Thomas's hospital.

SURTEES SOCIETY for publishing MSS. relating to the northern counties, established 1834; 84 volumes have been published, 1889.

SUSA, or **SHUSHAN**, capital of Susiana, a province of Persia, was taken by Alexander the Great, 331 B.C.

SUSPENDING POWER, see *Dispensing Power*.

SUSPENSION BRIDGES are ancient in China. The Hungerford (or Charing-cross) suspension bridge, opened May 1, 1845, was removed to

Clifton and opened there, 8 Dec. 1864. Parliament empowered the commissioners of woods to erect (among other improvements there) a suspension bridge at Battersea, Sept. 1846; and many bridges of similar construction have been erected in various parts of the kingdom. Lambeth and Westminster suspension bridge was opened 10 Nov. 1862; see *Lambeth Street*, *Hungerford*, *Clifton*, &c.

SUSPENSORY BILL, the name given to "a bill to prevent for a limited time [to 1 Aug. 1860] new appointments in the church of Ireland; and to restrain, for the same period, in certain respects, the proceedings of the Ecclesiastical Commissioners for Ireland." This bill was introduced into the commons by Mr. Gladstone, 14 May, and passed through committee, 5 June; rejected by the lords (192 to 97), 30 June, 3 A.M., 1868.

SUSSEX, see *Britain*.

SUTLEJ, a river in N.W. India, the ancient Hyphasis or Hypana, on the banks of which were fought the desperate battles of Alwal, 28 Jan., and Sobroon, 10 Feb. 1846 (*which see*).

SUTTEE, the burning of widows. This custom began in India from one of the wives of "Bramah, the Son of God," sacrificing herself at his death, that she might attend him in heaven. Seventeen widows have burnt themselves on the funeral pile of a rajah; and in Bengal alone, 700 have thus perished in a year. The English government, after long discouraging suttees, by the agency of lord William Bentinck, formally abolished them, 7 Dec. 1829; but they have since occasionally taken place. The wife of the son of the rajah of Beygroom thus perished, June, 1864, and several wives of sir Jung Bahadur, minister of Nepal, 1 March, 1877. *Suttees still occur; one, voluntary, at Poona, Nov. 1890.*

About 20,000,000 women in enforced widowhood; much profligacy, 1885. Legislative interference with the Hindu marriage laws declared by lord Dufferin, viceroys, to be ineffectual and unnecessary; moral influence progressing (see Brahmo Boum, under *Deism*) announced Oct. 1886.

SUWANOW, or (**SUWOROFF**), a group of small uninhabited isles in the Pacific, about 450 miles N.W. of the Samoan isles, annexed by Great Britain, 1889.

SWABIA, a province in S. Germany; was conquered by Clovis, and incorporated into the kingdom of the Franks, 496. After various changes of rulers, it was made a duchy by the emperor Conrad I., in 912, for Erchanger; according to some, in 916, by Burckhardt. The duchy became hereditary in the house of Hohenstaufen in 1080. Duke Frederick III. became emperor of Rome, commonly styled Barbarossa, red beard, in 1155. Conradin his descendant, was defeated at the battle of Tagliacozzo (*which see*), in 1268, and beheaded shortly after. The breaking up of the duchy gave rise to many of the small German states; part of Swabia is included in Wurtemberg and Switzerland. Swabia was made a circle of the empire in 1337 and 1500. A league, composed of Swabian cities and states, about 1254, was the germ of the great Swabian league, formed for the preservation of the peace of Germany, under the auspices of the emperor Frederick, in 1488.

SWAN RIVER SETTLEMENT, see *Western Australia*.

SWANSEA, Glamorganshire, an ancient Welsh town; seat of the copper trade since 1719.

New dock opened by the prince of Wales, 28 Oct. 1861. Population, 1861, 76,430; 1891, 90,423.

The British Association met here Aug. 1874, and Aug. 1890.

Levee at Dullery, 37 years M.P. for Swansea, died suddenly, 19 June, 1894.

SWAT, or **SVAT,** a river, N.W. India. The Ahom, Abdul Ghafur, originally an eastern Mahometan fanatic, about 1822, gradually obtained temporal power over the tribes in the hills near Afghanistan, dying in high reputation, about 1878.

SWAZILAND, South Africa, a tract of about 8,000 square miles, nearly surrounded by the Transvaal territory; population, about 50,000 natives and 600 whites, 1889.

Great disorders through the weakness of the king, Umbandi; influenced successively by opposing white factions, English and Soers; the king died, 6 Oct. 1889.

To settle the government of the country, Sir Francis de Winton was appointed British commissioner, sailed 1 Oct.; at Pretoria, about 11 Nov.; after commissioners were appointed, 21 Oct.

Boon, eldest son of Umbandi, elected king; Mr. Shepstone appointed to take charge of European affairs, about 23 Oct.

Sir Francis de Winton and the Transvaal commissioners meet 100 head-men of the Swazi; results: the independence of the nation to be preserved, the accession of the king recognised; the queen-mother to be regent during his minority; Mr. Shepstone to be adviser; the commissioners to govern the whites during their stay, to be succeeded by 3 delegates; a legal tribunal to be appointed to secure respecting concessions of land to the whites, 21 Dec.

The queen-regent (by Mr. Shepstone) proclaims submission to the commissioners, about 16 Dec.; the commissioners appoint 3 delegates (British, Boer, and Swazi) to help the queen, pending the decision of the British and Transvaal governments, and leave, Dec.

At a conference with president Kruger at Bismarck's Fort, it was agreed to defer the settlement for four months, 12 March, 1890.

Independence of the Swazi re-affirmed by a convention, a joint administration over the white settlers to be established with other conditions; signed by president Kruger; reported 4 Aug.; ratified by the Volksraad, 8 Aug.

Col. Martin, British commissioner, introduced to Queen Victoria, 1 July, 1892.

SWEABORG, a strong fortress in Finland, the Gibraltar of the north, 3½ miles south of Helsinki; it is situated on seven rocky islands; the fortifications were commenced by the Swedes in 1748, and completed after Finland was united to Russia in 1809. On 6 Aug. 1855, the English and French fleet anchored off Sweaborg, and bombarded it by mortar and gun-boats from the 6th to the 11th, causing the destruction of nearly all the principal buildings, including the dockyard and arsenal. Few casualties and no loss of life ensued in the allied squadron, but this success was not followed up.

SWEARING ON THE GOSPELS, first used about 1520, and introduced in judicial proceedings about 1600.—*See* PROFANE SWEARING made punishable by fine; a labourer or servant forfeiting 1s. others 2s. for the first offence; for the second offence, 4s.; the third offence, 6s.; 6 Will. III., 1695; see *Outlaw*.

SWEATING SICKNESS, see *Plague*.

SWEATING STROKE, a term applied, especially in the east end of London, to the practice carried on by large numbers of sweating orders to seditionaries termed "sweaters," who employ men, women, and children (principally foreigners) to wash up clothes, boots, and furniture in their own houses at abominably low wages with nasty

evil consequences. Lord Sumner's motion for a select committee of inquiry was carried in the Lords, 28 Feb.; with bishops of Canterbury, Carlisle, and others appointed 9 March, 1888. Painfully distressing evidence was obtained. The origin of the evil is attributed to the great competition in producing extremely cheapness. The new and foreign workmen are termed "greasers." It is stated that about 2s. are sometimes paid for a week of days of 14 hours, May. The sufferings of the Oradley Heath chair-makers, nail-makers, and others, were disclosed to the committee.

Anti-sweating league formed in London, 1 Oct. 1889.

The fifth and final report recommends that where legislation cannot intervene capitalists should acquire into the way in which their work is carried on, with the view of improvement; 5 May, 1890. Blue Book published, 19 May.

SWEDEN (N. Europe). The ancient inhabitants were the Finns, now the modern inhabitants of Finland, who retired to their present territory on the appearance of the Scandinavians or Goths, who have ever since been masters of Sweden; see *Scandinavia*, and *Norway*, 1891. The internal state of this kingdom is little known previous to the 11th century. By the union of Calmar in 1397, Sweden became a province of Denmark, and was not wholly rescued from this subjection till 1521, when Gustavus Vasa recovered the kingdom from the Danish yoke. He became king in 1523, and his descendants ruled till 1809. The government of Sweden is a limited monarchy. The diet consists of four orders, the nobles, the clergy, the peasants, and the burghers, and meet every three years. The king is, as in Britain, the head of the executive. There are two universities, Uppsala and Lund; and Sweden can boast, among its great men, Linnaeus, Celsius, Scheele, Bergman, Berzelius, Thorswalden, and Anderseen. Population (31 Dec. 1887) of Sweden, 4,734,901; of Norway (1875), 1,806,900. Sweden, 1890, 4,784,675. Norway, 1891, 1,908,997. Sweden, 1890-91, 4,911,894½; Norway, 1891-2, estimated revenue, 2,733,333½; expenditure, 2,738,889½.

SWEDENBORGIANS, or New Jerusalem Church, are those who adopt the theological teachings of Emanuel Swedenborg (born at Stockholm, 29 Jan. 1688; died in London, 29 March, 1772).

He claimed to have had his spiritual sight opened, and to have been introduced into heaven and hell by the Lord that he might disclose their true nature and the science of correspondences by which the internal sense of Scripture, which is the Word as it exists in the heavens, may be known to men: this he did in the *Arcana Cælestia* and other works.

His disciples first meet as an organized body in London in 1788.

There were 70 churches in Great Britain in 1879. Their belief is that the sole deity is centred in Jesus Christ, in whom is a trinity of essentials; that salvation is effected by faith and works combined; that as man's soul is a spiritual body he will never resume the material body; that the Last Judgment was effected in the spiritual world during Swedenborg's lifetime; and that the Lord's Second Coming has taken place through the revelation of a new system of truth from the inner sense of Scripture.

SWORDS. The Roman swords were from 20
 to 30 inches long. The broadsword and scimitar are
 of modern adoption. Damascus steel swords were
 most prized; the next the sword of Ferrara steel.
 The Scotch Highlanders, from the artiller Andrew
 di Ferrara, called their swords *Andrew Ferraris*.
 The large sword shown at Dumbarton castle as
 Wallace's is asserted to be one of Edward IVth's.
 The broadsword was forbidden to be worn in Edin-
 burgh in 1724.

SYCAMORE, or SYCOMORE TREE.
 In Mrs. Jameson's "Memoirs of Female Sovereigns"
 we are told that Mary queen of Scots
 brought over from France a little sycamore tree,
 which she planted in the garden at Holyrood, and
 that from this have sprung all the beautiful groves
 of sycamore now to be seen in Scotland.

SYLLABUS OF ERRORS in modern times.
 80 paragraphs divided into 10 chapters, issued by
 pope Pius IX., with an encyclical letter, 8 Dec.
 1864. It condemned heresy, modern philosophy,
 and liberalism in politics; was forbidden to be read
 in French churches, and was generally opposed, but
 was adopted by the council at Rome 1870.

SYMPHONIES. Short pieces of instru-
 mental music between songs in operas, early in the
 17th century. These were gradually developed by
 the great masters, such as Lully, into independent
 pieces, of these the symphonies of Corelli, Handel,
 Mozart, Haydn, and Beethoven are eminent
 examples.

SYMPHONION, an improved form of the
 musical box capable of performing many more
 tunes, invented by Mr. Ellis Parr, 1887.

SYMPTESOMETER, a species of barometer
 invented by Adam of Edinburgh in 1819.

SYNAGOGUE (literally an assembly), a con-
 gregation of the Jews, and the place where such
 assembly is held for religious purposes. When
 these meetings were first held is uncertain; some
 refer them to the times after the Babylonian cap-
 tivity. In Jerusalem were 430 synagogues. In
 1841 there were in London 10 synagogues, in
 England and Wales, 53. A magnificent synagogue
 was consecrated at Berlin, 9 Sept. 1859; see Jews.

SYNDICATE, originally a body of syndics,
 officers of a government or any ruling body; the
 term is now frequently used as synonymous with a
 company or body of trustees, 1882. See Groups.

SYNOD. The first general synods were called by emperors, and afterwards by Christian princes; but the pope ultimately usurped this power, one of his legates usually presiding; see *Omnium*. The first national synod held in England was at Hertford, 673; the last was held by cardinal Pole in 1555. Made unlawful to hold synods but by royal authority, 25 Henry VIII. 1533; see *Dort*, and *Worms*.

SYNONYM, a word having the same or nearly the same meaning as another, as valour, courage. Books of Greek and Latin synonyms were early compiled. G. Crabbe's dictionary appeared, 1816; Dr. P. M. Bogot's excellent "Thesaurus of English Words and Phrases," 1832.

SYPPHILIS, a disease said to have been introduced into Europe at the siege of Naples, 1495; but was probably known to the ancients.

SYRACUSE, S. E. Sicily, founded by Archias, 734 B.C. The city gradually included five towns, Ortygia (an island, containing the citadel, or acropolis), Achradina, Tyche, Neapolis, and Epipolae. The ancient history is given in the article *Sicily*.

TABERNACLE

TABERNACLE, the Holy Place of the Israelites, till the destruction of Solomon's temple, was constructed by *Ithra* and *Amaleph*, 1491 a.c. The tabernacle set up at Shiloh by Joshua, 1444 a.c. was replaced by the temple erected by Solomon, 1004 a.c. The chapel erected for George Whitefield in Moorfields in 1741, being of a temporary nature, received the name of Tabernacle, which was afterwards given to their chapels by the Calvinistic Methodists. Whitefield's Tabernacle in Tottenham-court-road was erected in 1756, and enlarged in 1760. His lease expired in 1826; the chapel was opened by the Independents in 1830, and taken down in 1830. A large metropolitan tabernacle, erected for the ministrations of Mr C. H. Spurgeon, a Baptist, near the "Elephant and Castle," Kennington-road, Surrey, was opened on 31 March, 1861.

TALLY OFFICE in the Exchequer took its name from the French word *tally*, to cut. A tally is a piece of wood written upon both sides, containing an acquaintance for money received, which, being cloven asunder by an officer of the exchequer, one part, called the stock, was delivered to the person who paid, or lent, money to the government, and the other part, called the counter-stock, or counter-soul, remained in the office, to be kept till called for, and joined with the stock. This manner of striking tallies is very ancient.—*Booke* The practice was ordered to be discontinued in 1782. See *Exchequer* On 16 Oct 1834, the houses of parliament were burnt down by too many of these tallies being used in heating the stores in the house of lords.

TALMUD (from *lamad*, to teach), the compendium of ancient Jewish oral or unwritten law, as distinguished from the Pentateuch, or written law, its origin is coeval with the return from the Babylonish captivity, 536 a.c. Its compilation in Hebrew was begun by the Scribes, and by their successors the work was carried on till 220 a.c. It is composed in prose and poetry, and contains two elements, legal and legendary. The morality resembles that of the New Testament, and the philosophy is rather Platonic than Aristotelian.

The Mishna, comprising the work of the rabbis, termed *Tannaim* was compiled by Jehuda Hassasi in the middle of the second century A.D. and forms the Jerusalem Talmud, written at Tiberias, in Palestine, about 330. The Babylonian Talmud contains also the Gemara or Ghemara, the work of the rabbis termed *Amoraim*, criticisms and comments on the Mishna. The part named *Halaka*, is dogmatic, legal, and doctrinal, the *Agada*, is illustrative, narrative, and legendary.

After being almost universally condemned, and the MSS often burnt, the defence of the Talmud was undertaken by the German reformer Roushlin, in the 16th century, and between 1560 and 1593 the "Talmud Hieronymianum," in 12 vols fol, and the "Talmud Hieronymianum," in one vol fol, were printed at Vindob. A discourse on the Talmud was given at the Royal Institution, 15 May, 1866, by Mr Samuel Lewis, whose article in the "Quarterly Review," Oct. 1867, had attracted much attention. Vol I of the first English translation of the Jerusalem Talmud by Dr. Moses Schwab, appeared in 1869; he had published part of a French translation.

TOCHERNAYA, a river in the Crimea. On 16 Aug. 1855, the lines of the allied army at this place were attacked by 50,000 Russians under prince Gortschakoff, who was repulsed with the loss of 3123 slain, 1658 wounded, and 600 prisoners. The brunt of the attack was borne by two French regiments under general D'Herbillion. The loss of the allies was about 1200, 200 of these were from the Sardinian contingent, which behaved with great gallantry, under the command of general La Marmora. The Russian general Read, and the Sardinian general Montevocchio, were killed. The object of the attack was the relief of Sebastopol, then closely besieged by the English and French.

TEMPLARS The military order of "soldiers of the temple," to protect pilgrims, was founded about 1118 by Baldwin II, king of Jerusalem, confirmed by pope Honorius II, 1128. The Templars were numerous in several countries, and came to England before 1185. Their wealth having excited the cupidity of the French kings, the order was suppressed by the council of Vienna, and part of its revenues was bestowed upon other orders about 1312. Numbers of the order were tried, condemned

and burned alive or hanged in 1308-10, and it suffered much persecution throughout Europe; 68 knights were burnt at Paris, 1310. Pope Clement V. abolished the order, April, 1312. The grand master Molay was burnt alive at Paris, 18 March, 1324. Their property in England was given to the Hospitalers, and the head of the order in England died in the Tower. See *Good Templars*.

TEMPLE (London), the dwelling of the Knights Templars, consecrated by Heraclius, patriarch of Jerusalem, 1185, at the suppression of the order, was purchased by the professors of the common law, and converted into inns, 1311, afterwards called the Inner and Middle Temple, Essex house, also a part of the house of the Templars, was called the Outer Temple, because it was situated without Temple-bar.

The Temple hall was built in 1572
St. Mary's, or the Temple Church, situated in the Inner Temple, is a Gothic stone building, erected by the Templars in 1240, and is remarkable for its circular vestibule, and for the tombs of the crusaders, who were buried here. The church was recased with stone by Mr. Surridge in 1828

The temple of Jerusalem built by Solomon, 1022 B.C. consecrated 1004; pillaged by Shishak, 927; repaired by Josiah, 856; profaned by Abaz, 740; restored by Hecataeus, 726; pillaged and fired by Nebuchadnezzar, 588, &c.; rebuilt, 526; pillaged by Antiochus, 170; rebuilt by Herod, 120; destroyed by Titus, A.D. 70

The temple of Apollo, at Delphi, first a cottage with boughs, built of stone by Trophœus, about 1200 B.C.; burnt by the Pisistratide, 548, a new temple raised by the family of the Alcmaeonide, about 523.

Temple of Diana at Ephesus, built seven times; planned by Cleophaon, 344 B.C.; fired by Erastostatus or Herostatus, to perpetuate his name, 336 B.C.; to rebuild it employed 200 years; destroyed by the Goths, A.D. 260.

The temple of Piety was built by Atilius, on the spot where once a woman had fed with her milk her aged father, whom the senate had imprisoned, and excluded from all alimonia.—*Vol. Max*.

Temple of Thebes, built 420 B.C., is at this day the most perfect ancient edifice in the world.
Most of the heathen temples were destroyed throughout the Roman empire by Constantine the Great and Theodosius, 337-392. See separate articles.

TENANT, see *Rent*. Bills to amend the position of Irish tenants in relation to their landlords

were brought into parliament by Mr. Sharnan Crawford, 1835, sir Joseph Napier, 1852, Mr. Cardwell, 1860, Mr. Chichester Fortescue, 1866, Lord Nass, 1867. The Irish land bill settling the question passed 8 July, 1870. See *Ulster*.

THE TENANTS' DEFENCE ASSOCIATION, was formed in consequence of a declaration by Mr. Farnhill, and his party, at a meeting in the house of commons, that a new league was necessary to defend the Irish tenant farmers against their landlords, 14 July, 1883. The tenants were invited to contribute to the fund, and preliminary meetings were held. The association was inaugurated at Thirles, Tipperary, by Mr. Sexton, Mr. Redmond, and other M.P.'s. 600 delegates being present, 28 Oct. 1883. 40,000l. had been subscribed up to 30 Jan. 1890. In April, 1891, the scheme was reported unsuccessful.

TESTAMENT, see *Bible*, and *Wills*

TESTER, *testone*, a silver coin struck in France by Louis XII 1513 and also in Scotland in the time of Francis II and of Mary, queen of Scots, 1559. It was so called from the head of the king stamped upon it. In England the tester was of 12d value in the reign of Henry VIII, afterwards of 6d (still called a tester).

TESTRI (N France). Pepin d'Héristal in vited by malcontents, here defeated and captured Thierry III king of Austrasia, and established himself as duke, 687.

TETTENHALL (Staffordshire). It was probably at this place, then named Teotenheal, that the Danes were defeated by the Saxon king, Edward the Elder, 6 Aug 910.

TETUAN (Morocco) was entered by the Spaniards 6 Feb 1860, after gaining a decisive victory on 4 Feb. The general O'Donnell, was made a *grande* of the first class.

TEUTOBERG FOREST (the Teutobergensis saltus, *Lusitania*), probably situate between Detmold and Paderborn, where Hermann, or Arminius, and the Germans defeated the Romans under Varus, with very great slaughter, A.D. 9. Varus and many of his officers preferred suicide to captivity. This defeat was regarded at Rome as a national calamity, and Augustus, in agony, cried, "Varus, give me my legions!"

TEUTONES, a people of Germany, who with the Cimbri made incursions upon Gaul, and out to pieces two Roman armies, 113 and 105 B.C. They were at last defeated by the consul Marius at Aix, and a great number made prisoners, 102 B.C. (see *Cimbri*), with whom authors commonly join the Teutones. The appellation came to be applied to the German nation in general (hence *Deutsche*).

TEUTONIC ORDER, military knights established in the Holy Land about 1191, through the humanity of the Germans (Teutones) to the sick

and wounded of the Christian army in the Holy Land, under Guy of Lusignan before Acre. The order was confirmed by a bull of pope Celestine III. On their return to Germany, the knights were invited to subdue and christianise the country now called Prussia and its neighbourhood, which they gradually accomplished. Their territories were invaded, and their army was defeated, with great slaughter, near Tannenberg in East Prussia, by Jagellon, duke of Lithuania, 15 July, 1410, when the grand master and many of the knights were slain. A large part of their possessions was incorporated into Poland in 1466, and into Brandenburg about 1521. In 1525, the grand master was made a prince of the empire, and the order much weakened. Its remaining possessions were seized by Napoleon I in 1809. See *Prussia*, &c.

TEWKESBURY (Gloucestershire), where Edward IV gained a decisive victory over the Lancastrians, 4 May, 1471. Queen Margaret the consort of Henry VI, was taken prisoner and her son killed. The queen was conveyed to the Tower of London, where king Henry expired soon after this fatal engagement being, as is generally supposed, murdered by the duke of Gloucester, afterwards Richard III. The queen was ransomed in 1475 by the French king, Louis XI, for 50,000 crowns. Population, 1881, 5,100. 1891, 5,269.

The abbey founded by Robert Fitz Hamon cousin of William I completed and consecrated 1123. It was altered 14th century. A tower lately destroyed by Henry VIII, the abbey chapel restored by G. G. Scott 1877-9.

TEXAS (N America) was settled by the French, 1687, who were expelled soon after. It revolted from Mexico in 1835, was helped by the Americans in 1836. Its independence was acknowledged in 1840. Its proposed annexation led to war between Mexico and the United States. It was admitted into the Union by the latter in 1845, seceded from it in 1861, submitted in 1865, re-admitted to state rights, March, 1870. The coast was desolated by a great storm, 15-18 Sept 1875. Population 1880, 1,917,449. 1890, 2,235,523. Capital, Austin. See *Slavery*.

TEXEL (at the mouth of the Zuyder Zee, Holland). Its vicinity has been the scene of memorable naval engagements. An engagement between the English under Blake, Deane, and Monck and the Dutch under Van Tromp and De Ruyter in which the latter were worsted and admiral Van Tromp was killed, 31 July 1653. Again, in the month of the Texel a sharp indecisive action took place between the allied English and French fleets under princes Rupert and counts d'Estrees and the Dutch fleet under De Ruyter 11 Aug 1673. The Dutch fleet was vanquished by admiral Duncan on 11 Oct 1797, see *Camperdown*. The Dutch fleet of 12 ships of war and thirteen Indiamen surrendered to admiral Mitchell, who, entering the Texel, possessed himself of them without firing a shot, 30 Aug 1799.

THEATINES, a religious order, the first who assumed the title of regular clerks, founded by Caraffa, bishop of Theate, or Chieti, in Naples (afterwards pope Paul IV.), 1524, to repress heresy. They first established themselves in France, according to Hénault, in Paris, 1644. The Theatines vainly endeavoured to revive among the clergy the poverty of the apostles.

THEATRES. That of Bacchus, at Athens, built by Philon, 420 B.C., is said to have been the first erected. Marcellus' theatre at Rome was begun by Caesar, and dedicated by Augustus, 12 B.C. Theatres were erected in most cities of Italy. Most of the inhabitants of Pompeii were assembled at a theatre on the night of 24 Aug. 79, when an eruption of Vesuvius covered the city. Scenes were introduced into theatres, painted by Balthazar Sienno, A.D. 1533. See *Drama, Plays, &c.*

THEATRES IN ENGLAND. The first royal licence for a theatre in England was in 1574, to master Burbage and four others, servants of the earl of Leicester, to act-plays at the Globe, Bank-side. It is stated the first play-house in London was erected at Shoreditch, and called the "Theatre" in 1576, and that the Curtain near it, was erected in 1577. The Blackfriars was built in 1596. The other London theatres in Elizabeth's reign were Whitefriars, Rose, Hope, Swan, Red Bull, Cockpit or Phoenix, and several others. Shakespeare and his fellow actors erected the Globe theatre on Bank-side, about 1594. The prices of admission are said to have been—gullery, 2d.; lords' rooms, 1s.; see *Drama, Drury Lane*, and other theatres. The theatres were closed by parliament, 1642-60.

The first play-bill was dated 8 April, 1662, and issued from Drury-lane: it runs thus: "By his Majesty his company of Comedians at the New Theatre in Drury-lane, will be acted a comedy called the *Humorous Lieutenant*." After detailing the characters, it concludes thus: "The play will begin at three o'clock exactly" 8 April, 1663
